[1] Applicant no longer owns any interest in this acreage.
[2] Applicant is filing for additional delivery point.

[2] Due to lessor demand for release of non-productive acreage, Shell complied.
[4] By assignment of Oil and Gas Lease, effective August 26, 1982, Mobil assigned to The Energy Group Incorporated all of its right, title and interest in and to that certain producing acreage below the base of the Council Grove Formation.
[5] To release gas for irrigation fuel.
[6] The subject leases have expired or terminated by their own terms and were not included in the rollover contract dated July 1, 1982.
[7] Acreage was released to lessor. ARCO no longer owns any interest in this property.
[8] Shell Lease No. L-9870, dated November 2, 1951, beyond its primary term. Due to demand by lessor, Shell released certain deep rights under said lease.
[9] Partial release of oil, gas and mineral lease executed on February 25, 1983 covering 4,371.52 acres more or less. Applicant no longer owns any interest in this acreage.
[10] No production or sales, partial release as a result of lawsuit.
[11] Applicant is filing under Gas Sales Contract dated April 18, 1968, amended by Amendment dated March 25, 1983.
[12] Applicant is filing under Gas Sales Contract dated April 19, 1968, amended by Amendment dated March 25, 1983.
[13] Applicant is filing under Gas Purchase Contract dated March 21, 1983.
[14] Rockefeller State Lease #2039 expired April 14, 1982 and the #10 Well was P & A on October 6, 1982. Such well was the only well covered under the Contract and Rate Schedule.
[15] Applicant is filing under Gas Purchase Contract dated April 15, 1983.
[16] Energy Reserves Group, Inc. has assigned all of its right, title and interest in all acreage covered under the subject Rate Schedule effective March 1, 1982 pursuant to Assignment of Oil and Gas Lease.
[17] Effective October 15, 1982, Energy Reserves Group assigned its interest in the LaTerre No. 2 Well and all pipelines, equipment, personal property, etc., associated with or pertaining to such well and the Lower BB, RA SUA Unit, Chauvin Field, Terrebonne Parish, Louisiana, as more fully set forth in Applicant's Assignment dated October 15, 1982.
[18] Effective October 1, 1982, Shell assigned its interest in all wells, equipment, production facilities and other property located on leased premises to IMC Exploration Company.
[19] The contract expired by its primary term on January 1, 1982. The reserves in the subject field have been depleted and ARCO has no plans to develop additional reserves.
[20] Applicant is filing for Partial Successor in Interest under Interstate Rollover Contract dated October 1, 1982.
[21] Applicant is filing under Gas Sales Contract dated June 3, 1970, amended by Amendment dated March 25, 1983.
[22] Applicant is filing under Gas Sales Contract dated May 1, 1972, amended by Amendment dated March 25, 1983.
[23] Applicant is filing for Partial Successor in Interest under Interstate Rollover Contract dated March 23, 1979.

Filing code: A—Initial Service. B—Abandonment. C—Amendment to add acreage. D—Amendment to delete acreage. E—Total Succession. F—Partial Succession.

Oil Pipeline; Tentative Valuation

May 27, 1983.

The Federal Energy Regulatory Commission by order issued February 10, 1978, established an Oil Pipeline Board and delegated to the Board its functions with respect to the issuance of valuation reports pursuant to Section 19a of the Interstate Commerce Act.

Notice is hereby given that a tentative basic valuation is under consideration for the common carriers by pipeline listed below:

1980 Basic Reports

Valuation Docket No. PV-2473-000—Algonquin Pipe Line Company, 1000 Ashland Drive, Russell, Kentucky 41169.
Valuation Docket No. PV-2467-000—Dorchester Liquids Transportation Corporation, P.O. Box 31049, Dallas, Texas 75231.

On or before July 5, 1983, persons other than those specifically designated in Section 19a(h) of the Interstate Commerce Act having an interest in these valuations may file, pursuant to rule 214 of the Federal Energy Regulatory Commission's "Rules of Practice" (18 CFR 385.214), an original and three copies of a petition for leave to intervene in these proceedings.

If the petition for leave to intervene is granted the party may thus come within the category of "additional parties as the FERC may prescribe" under Section 19a(h) of the Act, thereby enabling it to file a protest. The petition to intervene must be served on the company at its address shown above and an appropriate certificate of service must be attached to the petition. Persons specifically designated in Section 19a(h) of the Act need not file a petition; they are entitled to file a protest as a matter of right under the statute.

Francis J. Connor,
Administrative Officer, Oil Pipeline Board.

BILLING CODE 6717-01-M

[Docket No. CP83-301-000]

Associated Natural GAS Co.; Application

May 26, 1983.

Take notice that on April 29, 1983, Associated Natural Gas Company (Applicant), 405 West Park Street, Blytheville, Arkansas 72315, filed in Docket No. CP83-301-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities in southeastern Missouri by sale to the City of Kennett, Missouri (Kennett), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the abandonment by sale of the natural gas distribution system owned by Applicant located within the corporate limits of Kennett and such of Applicant's distribution facilities located outside the corporate limits of Kennett which are attached to and are an integral part of Kennett's distribution system and approximately 18.8 miles of transmission line from the Texas Eastern Transmission Corporation (TETCO) delivery point at the Jim Hill Plant to Kennett, Missouri, and appurtenant facilities.

Applicant indicates it currently operates a natural gas distribution system within and adjacent to the corporate limits of Kennett under the terms of a franchise ordinance. However, Applicant states that the franchise expired on March 1, 1980, and Kennett has exercised its option to purchase the gas distribution system within the City as well as related facilities including 18.8 miles of jurisdictional line used to deliver gas purchased from TETCO to the customers of Kennett. Applicant also indicates that it has agreed to release the portion of the contract demand from its service agreements with TETCO and a corresponding amount of volumetric entitlements.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 5 and 15 of the Natural Energy Regulatory Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the

Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL83-2-000]

William H. Beck v. Inland Power Co.; Termination of Docket

May 26, 1983.

On October 18, 1982, Mr. Nicholas Manring, on behalf of his client Mr. William Beck, filed a letter with the Commission citing section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). The letter was assigned Docket No. EL83-2-000. In his letter, Mr. Manring raised certain issues regarding a contract offered to Mr. Beck by Inland Power & Light Company. Inland is a non-regulated electric utility located in Spokane, Washington.

On December 30, 1982, a letter was sent to Mr. Manring by the Secretary of the Commission indicating that Mr. Beck's remedy would appear to lie in an appropriate State judicial forum, as prescribed by section 210(g) of PURPA, rather than before the Commission. Given this response to the inquiry, notice is hereby given that Docket No. EL83-2-000 is terminated.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-2500-000]

Commonwealth Gas Pipeline Corp. and Columbia Gas Transmission Corp.; Petition for Declaratory Order

May 25, 1983.

Take notice that on December 28, 1982, as supplemented on February 22, 1983, the City of Richmond, Virginia (Richmond), filed Docket No. G-2500-000, a petition pursuant to Section 385.207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for an order declaring that Commonwealth Gas Pipeline Corporation (Commonwealth), Richmond's sole supplier, no longer qualifies for an exemption from the provisions of the Natural Gas Act and the Regulations of the Commission pertaining thereto pursuant to Section 1(c) of the Natural Gas Act, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Richmond requests that the Commission finds that the recent consolidation of Commonwealth with the Columbia Gas System, Inc. (Columbia) precludes a finding that Commonwealth is purchasing natural gas from "another person" within the meaning of Section 1(c) of the Natural Gas Act, because Commonwealth's purchases of natural gas in interstate commerce are from Columbia Gas Transmission Corporation (Columbia Gas Transmission), Commonwealth's new affiliate. Petitioner submits that the consolidation mandates a finding that Commonwealth is now no more than a local branch of an integrated, interstate gas transmission system and as such no longer qualifies for an exemption under Section 1(c) of the Natural Gas Act. Richmond further submits that a second factor mandates revocation of Commonwealth's exemption. Section 1(c) of the Natural Gas Act requires that all of the exempted entity's rates be regulated by a state utility commission. While many of Commonwealth's rates are subject to the jurisdiction of the Virginia State Corporation Commission (VSCC), Richmond alleges that Commonwealth's sales to Richmond are exempt from regulation by the VSCC and such exemption precludes the continued exemption of Commonwealth under Section 1(c) because rate regulation by the VSCC is not as complete as regulation by the Commission.

It is submitted that the order in Docket No. G-2500 was issued on September 7, 1954, granting Commonwealth exemption from the provisions of the Natural Gas Act. At that time, Commonwealth purchased all of its natural gas supply from the Atlantic Seaboard Corporation (Seaboard), a non-affiliated entity within Columbia. Subsequently, Commonwealth's gas requirements came to be supplied in significant part by Columbia Gas Transmission, a successor company to Seaboard. When these purchases commenced, Commonwealth and Columbia Gas Transmission were not affiliated, it is explained. Richmond asserts that in 1981, Columbia merged with Commonwealth Natural Resources, Inc., the parent of Commonwealth, and Commonwealth Natural Resources, Inc., was liquidated thereby making Columbia Gas Transmission and Commonwealth affiliates.

Richmond asserts that as a result of the merger, Columbia Gas Transmission and Commonwealth are really one pipeline serving several non-affiliated customers, including Richmond. Furthermore, Richmond claims that the legislative history of Section 1(c) reveals that Congress did not contemplate that large interstate pipelines could minimize or circumvent Commission regulation by the creation of local systems. Richmond adds that an applicant seeking an exemption from the Natural Gas Act must demonstrate that it is purchasing natural gas from "another person." Richmond submits that because of the merger, the sales by Columbia Gas Transmission to Commonwealth are no longer sales to "another person."

It is submitted that the absence of comprehensive regulation constitutes a separate ground for revocation of Commonwealth's exemption. Richmond asserts that Congress intended that a state commission regulate all rates and all services as a condition to the receipt of an exemption. Richmond alleges that, as a municipal utility, its rates are exempt from state regulation, therefore Commonwealth is no longer entitled to a Section 1(c) exemption because of the absence of comprehensive state regulation. In its supplement of February 22, 1983, Richmond cites a letter from Chairman Bradshaw of the VSCC to the Commission wherein Richmond claims that Chairman Bradshaw acknowledges the absence of VSCC jurisdiction over the rate charged Richmond by Commonwealth.

Therefore, Richmond requests that the Commission enter an order terminating Commonwealth's exemption under Section 1(c), of the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 15, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-311-000]

Equitable Gas Co.; Application

May 26, 1983.

Take notice that on May 3, 1983, Equitable Gas Company (Equitable), 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219, filed in Docket No. CP83-311-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the transportation of up to 10,000 Mcf of natural gas per day for Mark Producing, Inc. (Mark), from points along Equitable's pipeline system in Pennsylvania and West Virginia for redelivery into the pipeline system of Texas Eastern Transmission Corporation (TETCO), the purchaser of the gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Equitable proposes to implement the terms of an agreement between Equitable and Mark dated November 3, 1982, whereby Equitable has agreed to transport up to 10,000 Mcf of natural gas per day for Mark for a period of 15 years. Equitable proposes a rate as may be set forth in its FERC Gas Tariff which is currently 15.5 cents per Mcf.

Equitable states that up to 10,000 Mcf of natural gas per day would be received from Mark at interconnections with Equitable's pipeline and will be redelivered for Mark's account at existing interconnections with the pipeline system of TETCO. Equitable proposes to construct several taps and to install associated measuring and regulating facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Equitable to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14613 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-9-002]

Faustina Pipe Line Co.; Amendment to Application

May 26, 1983.

Take notice that on May 24, 1983, Faustina Pipe Line Company (Applicant), Post Office Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-9-002, an amendment to its pending application filed in Docket No. CP83-9-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect a change in the transportation service to be provided Southern Natural Gas Company (Southern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that in its application filed in Docket No. CP83-9-000 it requested authorization to transport up to 150 billion BTu's of gas per day on a firm basis on behalf of Southern on its mainline facilities located in Southern Louisiana. Applicant further states that under the terms of an agreement dated May 20, 1983, several changes have been made in the transportation service for which authorization is requested. According to Applicant, the amendments would change the application by (1) deleting the minimum annual charge as an element of the rate and charge to be assessed Southern for the transportation service; (2) deleting the right of Southern to extend the transportation agreement for an additional 5 years in order to make up any minimum annual charges for transportation paid for but not received; (3) extending to Southern the right to deliver to and receive gas from Applicant at certain points along the facilities of Louisiana Resources Company; (4) deleting the request that the Commission declare that its jurisdiction over Applicant would be limited to the proposed transaction; and (5) deleting the request for a grant of abandonment authorization in the event that any tribunal ever extends the jurisdiction of the Commission to Applicant, beyond the proposed transportation service.

Finally, Applicant states that it now seeks authorization for its proposed transportation service under the Commission's Order No. 63 program and Section 284.222 of the Commission's Regulations, rather than as originally filed under Section 157.6 of the Commission's Regulations under the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14614 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-12-002]

Faustina Pipe Line Co.; Amendment to Application

May 26, 1982.

Take notice that on May 24, 1983, Faustina Pipe Line Company (Applicant), P.O. Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-12-002, an amendment to its pending application filed in Docket No. CP83-12-000 pursuant to section 7(c) of the Natural Gas Act so as to reflect a change in the requested authority under which Applicant proposes to render a transportation service for United Gas Pipe Line Company (United), all as more fully set forth in the amendment which

is on file with the Commission and open to public inspection.

In the application, as first amended, Applicant sought the issuance by the Commission of a limited certificate pursuant to Section 7(c) of the Natural Gas Act authorizing the interruptible transportation in interstate commerce of up to 50 billion Btu's of gas per day by Applicant on behalf United. Applicant states that this second amendment further changes the application by

(I) Requesting approval of the Commission of such services under the Commission's Order No. 63 program, Sections 284.227 and 284.127 of the Commission's Regulations,

(II) Deleting the request contained in the application, as amended, that the Commission explicitly declare in any order issued herein that the Commission's jurisdiction over Applicant and certain others under the Natural Gas Act by reason of any service performed by Applicant hereunder be limited solely to such service; and

(III) Deleting the further request contained in the application, as amended, that the Commission explicitly grant in any order issued herein authorization for the abandonment by Applicant of the services to be performed effective in the event the Commission or any other tribunal ever seeks to extend more broadly than as herein requested the Commission's jurisdiction over Applicant (or certain others) under the Natural Gas Act by reason or any service performed by Applicant hereunder.

Applicant states that it continues to seek authorization to render to United a transportation service for a term of up to 20 years.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14615 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-337-000]

Faustina Pipe Line Co.; Application

May 26, 1983.

Take notice that on May 24, 1983, Faustina Pipe Line Company (Applicant), Post Office Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-337-000 an application pursuant to Section 7(c) of the Natural Gas Act and Section 284.2 of the Commission's Regulations for a certificate of public convenience and necessity for blanket authorization to transport, sell, or assign natural gas in interstate commerce as if Applicant were an intrastate pipeline as defined in Subparts C, D, and E of Part 284 of the Commission's Regulations, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it receives some of its gas supply from interstate sources, but that such gas is exempt from the jurisdiction of the Commission under Section 1(c) of the Natural Gas Act. It is stated that Applicant is subject to the jurisdiction of the Commissioner of Conservation of the State of Louisiana and that all of Applicants's existing facilities and operations are exempt from Commission jurisdiction under Section 1(c) of the Natural Gas Act.

Applicant submits that it is willing and able to comply with the conditions set forth in Section 284.22(e) of the Commission's Regulations. Applicant further states that it has elected to submit a separate application for approval of rates pursuant to Section 284.123(b)(2) for each transaction in which it would engage under its blanket certificate.

Applicant requests that the Commission declare that the proposed sales or assignments would not impair the continued validity of Applicant's exclusion from the applicability of the Natural Gas Act under Section 1(c) and would not subject it to the jurisdiction of the Commission except to the extent necessary to enforce the terms and conditions of the certificate.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14616 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RE81-92-001]

Florida Power and Light Co.; Application for Exemption

May 26, 1983.

Take notice that Florida Power and Light Company (FPLC) filed an application on May 6, 1983 for exemption from certain requirements of Part 290 of the Commission's Regulations concerning collection and reporting of cost of service information under Section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or before June 30, 1984, information on the costs of providing electric service as specified in Sections 290.404(d)(1) and 290.404(d)(2).

In its application for exemption FPLC states, in part, that it should not be required to file the specified data for the following reasons:

The end use class specified under Section 290.404(d)(1), "Residential customers not using electricity for either water heating or whole-residence space heating," is currently substantially less than the minimum reporting level of 5 percent of the total kilowatt hour sales. Over the past two years the trend for this group has been down and the Company estimates that it will continue to decline during the reporting year. Rather than commit the funds and manpower to meet the reporting requirement, the Company is requesting this exemption.

The end use class specified under Section 290.404(d)(2), "Residential customers using electricity for water heating but not for whole-residence space heating," was intended to be used in determining patterns for electric heating. The energy use of this end use class was to be compared with that specified under Section 290.404(d)(3), "Residential customers using electricity for whole-residence space heating and other uses" with the assumption that the difference would be electric heating. In comparing appliance saturation studies conducted by RP&L in 1980, and other items which affect energy consumption, it is clear that the difference between these customer classifications cannot be reliably attributed to whole-residence space heating. Hence, reporting the information required for the Section 290.404(d)(2) end use class for the 1981 reporting period would not promote the purpose of Section 133 of PURPA and would unnecessarily divert equipment and manpower from projects which would yield greater benefits to FP&L's customers.

Copies of the application for exemption are on file with the Commission and are availabe for public inspection. The Commission's regulations require that said utility also apply to any State regulatory authority having jurisdiction over it to have the application published in any official State publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the Federal Register. Within that 45 day period such person must also serve a copy of such comments on: Mr. J. C. Collier, Jr., Vice President, Energy Management, Florida Power and Light Company, 9250 West Flagler Street, Miami, Florida 33174.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER78-379-000]

Indiana & Michigan Electric Co.; Refund Report

May 26, 1983.

The filing Company submits the following:

Take notice that on March 3, 1983, Indiana & Michigan Electric Company submitted for filing a refund report pursuant to the Commission's order issued on February 2, 1983.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before June 13, 1983. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RE81-76-001]

Iowa Power and Light Co.; Application for Exemption

May 26, 1983.

Take notice that Iowa Power and Light Company (IPLC), filed an application on December 21, 1982 for exemption from certain requirements of Part 290 of the Commission's Regulations concerning collection and reporting of cost of service information under Section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or before June 30, 1984 (and biennially thereafter), information on the costs of providing electric service as specified in Subparts B, C, D, and E.

Due to an administrative oversight, this Notice of Application was not published in the **Federal Register** within the prescribed 15 day period (Part 290 Section 290.60(d)) following the date of receipt of the Application for Exemption.

In its application for exemption IPLC states, in part, that it should not be required to file the specified data for the following reasons:

The stated purposes of Section 133 of PURPA have been achieved in ILPC's 1980 and 1982 filings.

Further reporting is not likely to carry out the purposes of Section 133 of PURPA.

Further reporting is duplicative and unnecessary since the Iowa State Commerce Commission requires similar data in retail rate proceedings.

Copies of the application for exemption are on file with the Commission and are available for public inspection. The Commission's regulations require that said utility also apply to any State regulatory authority having jurisdiction over it to have the application published in any official State publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the **Federal Register**. Within that 45 day period such person must also serve a copy of such comments on: Mr. J. P. Glahn, Vice President and Treasurer, Iowa Power and Light Company, 666 Grand Avenue, P.O. Box 657, Des Moines, Iowa 50303.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14619 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-7-001]

Louisiana Resources Co.; Amendment to Application

May 26, 1983.

Take notice that on May 24, 1983, Louisiana Resources Company (Applicant), Post Office Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-7-001, an amendment to its pending application filed in Docket No. CP83-7-000 pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 so as to reflect a change in the transportation service to be provided Southern Natural Gas Company (Southern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a gas transportation agreement dated June 10, 1982, it proposes to transport on behalf of Southern up to 150 billion Btu's of gas per day on firm basis for a 15-year term. Applicant further states that said agreement has been amended by agreement dated May 20, 1983, that changes the proposed transportation service by (1) deleting the minimum annual charge as an element of the rate and charge to be assessed Southern for the service, and (2) deleting the right of Southern to extend the agreement an

additional 5 years in order to make up for any transportation service paid for under the minimum annual charges but not actually provided by Applicant.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14820 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-334-000]

Louisiana Resources Co.; Application

May 26, 1983.

Take notice that on May 23, 1983, Louisiana Resources Company (Applicant), Post Office Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-334-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA) and Section 284.127 of the Commission's Regulations for authorization to transport up to 150 billion Btu's of gas per day on behalf of Faustina Pipe Line Company (Faustina) for a 15-year term, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is an intrastate pipeline within the meaning of Section 2(16) of the NGPA and is subject to the jurisdiction of the Commissioner, Office of Conservation of the State of Louisiana. Applicant proposed to transport up to 150 billion Btu's of gas per day on a firm basis for Faustina for a 15-year period. Applicant states that Faustina would have the right to tender gas for transportation along Applicant's mainline from the "Henry" delivery point to the interconnection between Applicant and Faustina's systems and could receive an equivalent quantity back along any other point on that portion of Applicant's mainline. Applicant proposes to charge a one-part, commodity rate for the transportation service, which initially would be 16.44 cents be million Btu and maintains that such rate is fair and equitable.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. ER82-616-001]

Middle South Energy, Inc.; Order Granting Rehearing, Clarifying Prior Order, and Reinterpreting Statutory Suspension Authority

May 24, 1983.

On September 24, 1982, Middle South Energy, Inc. (MSE) filed a request for rehearing of a prior Commission order issued in this proceeding on August 25, 1982.[1] On October 20, 1982, we issued an order granting rehearing for purposes of further consideration.

MSE's request raised three issues. First, it is asserted that the Commission erred in construing the Unit Power Sales Agreement (Unit Power Agreement) submitted for filing in this proceeding as a change in rates and suspending its effect. MSE contends that its submittal is properly characterized as an initial rate within the meaning of section 35.1(b) of the Commission's regulations. Second, MSE requested clarification as to whether its request for prospective application of an 18 percent return on common equity under the Unit Power Agreement requires it to file a rate change in a new docket in order to have that request heard by the Commission. Finally, MSE renewed its request for an order requiring the use of normalized accounting consistent with section 168 of the Internal Revenue Code in determining its cost of service in this docket.[2]

The background to the initial versus changed rate question is as follows. MSE is a wholly owned subsidiary of Middle South Utilities, Inc. (MSU). Its sole asset is a 90% ownership interest in the Grand Gulf Nuclear Station Project, a new two-unit generating station (Grand Gulf). Under the Unit Power Agreement, MSE has sold the entire capacity and energy output of its interest in Grand Gulf in varying shares to three other operating subsidiaries of MSU—Mississippi Power and Light Company (MP&L), Louisiana Power and Light Company (LP&L), and New Orleans Public Service Company (NOPSI). In the order of August 25, 1982, we accept the Unit Power Agreement for filing as a change in rates and suspended its operation, to become effective subject to refund.

Upon reconsideration, we have concluded that it is not appropriate to treat an initial rate of a new corporate entity as a change in rate simply because of its affiliated status. Thus, we will grant the request for rehearing on this point and MSE's Unit Power Agreement with the other MSU operating subsidiaries will be treated as an initial rate.

In the past, such a determination would have led to MSE's rate schedule being accepted for filing without suspension, pursuant to the prior interpretation of our statutory authority which is set forth in § 2.4(d) of the Commission's "Statements of General Policy and Interpretations Under the Federal Power Act" (18 CFR § 2.4(d)). This statement reflects the previously held view that "[a]n initial rate schedule cannot be suspended." During consideration of MSE's request, however, we have had occasion to reconsider the interpretation of § 205 of the Federal Power Act that underlies § 2.4(d). We have concluded for the reasons set forth below, that the Commission does have authority to suspend initial rates under § 205. Accordingly, we shall separately amend the interpretation set forth in § 2.4 to conform to our interpretation below. The result of our conclusion is that the order of August 25, 1982, will remain unchanged with respect to suspension of MSE's rates.

Discussion

The current interpretation of Federal Power Act § 205 expressed in § 2.4(d)

---

[1] *Middle South Energy, Inc.*, Docket No. ER82-616-000, 20 FERC ¶ 61,206.

[2] This issue is now moot since an order addressing the matter was issued on December 30, 1982.

rests on a narrow reading of subsections (c), (d), and (e) of § 205. Subsection (e) provides for suspension of "any such new schedule." The traditional interpretation holds that this phrase refers back to the immediately preceding subsection (d), which provides that

> Unless the Commission otherwise orders, *no change shall be made* by any public utility *in any such rates*, charges, classification, or service, or in any rule, regulation or contract relating thereto, except after sixty days notice to the Commission and the public. Such notice shall be given by filing with the Commission and keeping open for public inspection *new schedules* stating plainly the change or changes to be made in the schedule or schedules then in force * * *. [Emphasis supplied.]

Thus, "such new schedule" in § 205(e) has been interpreted to mean only the changed rate schedules referred to in subsection (d). Tha alternative reading, which we here adopt, is that "such new schedule" most logically applies to both § 205(d) and § 205(c). Section 205(c) requires the utility to file "schedules showing *all* rates and charges for any transmission or sale subject to the jurisdiction of the Commission. . . ."(emphasis supplied). Thus, under the more expensive reading, the suspension authority extends to new initial rates as well as to newly changed rates.

We believe that the reference to a change of rates in § 205(e) most logically relates to changes in those pre-existing rate schedules filed with the Commission for the first time as a result of the enactment of § 205. Under this reading, any rate schedule for a new service filed after the first-ever filing would be regarded as a change of service or rate. In effect, § 205 permits "grandfathering" of rate schedules existing at the time of enactment.[3]

We believe that our reading is consistent with the fundamental purpose of the Federal Power Act; that is, to maintain rates that are just and reasonable to both the utility and the consumer. In this connection, we take as our guide the reasoning of the Supreme Court in the *Trans-Alaska Pipeline Rate Cases*, 436 U.S. 631 (1977) (*TAPS*). In *TAPS*, the Court found that the Interstate Commerce Commission (ICC) possessed necessarily implied authority pursuant to § 15(7) of the Interstate Commerce Act [4] to suspend initial rates of oil pipeline companies under the rate setting scheme of Title I of that Act, which is similar in language, structure, and purpose to the Federal Power Act.[5]

The keystone of the Court's analysis was its conclusion that the absence of authority to suspend initial rates is not consistent with the primary purpose of the Interstate Commerce Act to maintain reasonable charges for the regulated services. The Court reasoned that absent such suspension authority, the Act would provide no mechanism tending to make initial rates reasonable. This would be particularly the case where (as in *TAPS*) the shippers and the pipeline owners were affiliates. The Court was not deterred in this regard by its admission that the suspension authority was added [6] to deal with the "mischief of unchecked changes in rates." 436 U.S. 644. It found that unless the legislative history of the statute compelled the opposite conclusion, the suspension power would necessarily apply to initial as well as changed rates because the mischiefs flowing from each are the same.

The Court did not find any significance in the phrase "change of rate" in § 15(7). If noted that Congress, in enacting Titles II, III, and IV of the Act to extend the ICC's original ratemaking jurisdiction to additional modes of transportation, unequivocably indicated that initial rates were new rates capable of being suspended, and yet reference to "changed" rates appear in the same places they appear in Title I.[7]

The applicability of the reasoning in the *TAPS* case to this Commission's authority under the Federal Power Act is clear.[8] Absent authority to suspend initial rates, the Commission's ability to ensure their reasonableness would be limited to orders with prospective effect made pursuant to § 206. Thus, the filing utility's customers would be forced to pay any initial rate ultimately found to be unreasonable until the Commission issued an order pursuant to § 206. In the formal hearing context, this could be a lengthy period. In this respect, absence of initial rate suspension authority is inconsistent with the fundamental requirement of § 205(a) that "all" rates shall be just and reasonable. We are aware of no rationale in the legislative history to explain why an unlawful initial rate should be viewed as less onerous that an unlawful change in rate.

This raises the issue of whether suspension of initial rates would be prejudicial to the utility. The Court in *TAPS* considered this matter and concluded that the ICC has power ancillary to its authority to suspend initial rates under the Interstate Commerce Act to set maximum interim rates during the suspension period. It further held that part of that ancillary power is the power to order refunds of amounts collected under the interim rates during the suspension period and under the initial rates collected after the suspension period expires where such rates are found to be unreasonable. 436 U.S. 654–657. This was held to be the case notwithstanding the lack of any express authority to do so in the Act and the fact that the express refund authority of § 15(7) is limited to increased rates or changes at the end of the suspension period.

There is a contrary argument that merits discussion. In *United Gas Pipeline Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332 (1956) (Mobile), the Supreme Court noted as marked

---

[3] The legislative history is not clear on this point. *See* H.R. 5423, 74th Congress, 1st Sess.; S. 2796, 74th Congress, 1st Sess.; Senate Report No. 621, 74th Congress, 1st Sess., p. 51 (May 13, 1935); House Report No. 1318, 74th Congress , 1st Sess., p. 29 (June 24, 1935). *See also* note 9, *infra*.

[4] 49 U.S.C. § 5(7). Authority to suspend oil pipeline rates now rests with this Commission pursuant to the Department of Energy Organization Act, 42 U.S.C. § 7101 *et seq.*, and Executive Order No. 12009, 42 Fed. Reg. 46267 (1977). The relevant language of § 15(7) pertaining to suspension is as follows:

> "Whenever there shall be filed with the Commission any schedule stating a new individual or joint rate, fare, or charge, * * * the Commission shall have * * * authority * * * to enter upon a hearing concerning the lawfulness of such rate, fare, [or] charge * * *; and pending such hearing and the decision thereon the Commission upon filing with such schedule and delivering to the carrier or carriers affected thereby a statement in writing of its reasons for such suspension, may from time to time suspend the operation of such schedule and defer the use of such rate, fare, [or] charge * * *, but not for a longer period than seven months beyond the time when it would otherwise go into effect. * * *"

[5] These parallels are obvious upon reading the two statutes and have been frequently noted by the courts. *See Arrow Transportation Co.* v. *Southern Railway Co.*, 372 U.S. 658, 668 (1963); *Papago Tribal Utilities Authority* v. *FERC*, 628 F.2d 235, 243, n. 19 (D.C. Cir. 1980); *Aberdeen & Rockfish Railway Co.* v. *SCRAP*, 409 U.S. 1207, 1215 (Opinion in chambers (1972)).

[6] Subsection 15(7) was added to the Act by the Mann-Elkins Act of 1910, 36 stat. 552.

[7] A second line of reasoning was that if the ICC was not given authority to suspend initial rates, Congress must not have intended to foreclose any equity powers of the courts to enjoin common carrier rates. this could lead to diverse conclusions by the courts, thwarting the regulatory purpose of uniformity of rates. Although the FPA does not require uniformity of rates, it does prohibit undue discrimination in rates, which was also a concern noted by the Court in *TAPS*. 436 U.S. 631, 641. Thus, the exercise of injunctive authority by the courts is likewise inconsistent with the scheme of the Federal Power Act. Further, as noted by the court in *Papago Tribal Utilities Authority* v. *FERC*, 628 F.2d 235, 242 (D.C. Cir. 1980), any judicial authority to suspend rates

> "Would create the hazard of forbidden intrusion into the administrative domain, * * * because it necessarily would involve inquiry into the reasonableness of rates. (*Citing Arrow Transportation Co.* v. *Southern Railway Co.*, 372. U.S. 658 (1963); [footnote omitted].

[8] These titles of the Interstate Commerce Act were enacted in the 1930's contemporaneously with the Federal Power Act.

contrast between the Interstate Commerce Act and the Natural Gas Act,[9] in that the former in effect "precludes private rate agreements by its requirement that the rates to all shippers be uniform," whereas "the Natural Gas Act permits the relations between the parties to be established initially by contract." 350 U.S. 338–339. The reason for the Interstate Commerce Act scheme was the administrative impossibility of policing thousands of individual railroad retail transactions. The Court noted by contrast the relatively few wholesale natural gas transactions and the substantial investment that may be required for the service of a particular customer, creating a need for "individualized arrangements." *Id.* The same reasoning, of course, would apply to wholesale transactions under the Federal Power Act. Thus, the argument would go, Congress could not have intended to give the parties authority to negotiate individualized contracts for new services and at the same time undercut that authority by permitting the Commission to suspend the initial rates resulting therefrom. The mechanism for ensuring the reasonableness of the initial rates would be the parties' arms length negotiations. The problem with this argument is that the logic would apply equally to *changes* in contracts negotiated at arms' length. Such contract changes are clearly subject to suspension and refund. The more salient consideration is that notwithstanding the fact that private rate agreements are authorized by the Federal Power Act, the Commission is given final authority to modify these agreements in order to carry out its mandate to ensure that all rates be just and reasonable. See *Mobile, supra,* construing the Commission's authority under the parallel provisions of the Natural Gas Act. 350 U.S. 340–341. Furthermore, while an initial rate may represent the bargained-for product of negotiations between the parties, this is not necessarily the case. The reality is that a new rate for new service may be proffered unilaterally by a utility just as in the case of a changed rate.

Finally, the Supreme Court found in *TAPS* that the ICC's authority to order "reparations" under the Interstate Commerce Act for charges ultimately found to be unreasonable was not an adequate remedy because (1) the damage suffered through loss of competitive advantage would likely exceed the difference between the charged rate and the just and reasonable rate, and (2) the shippers have more incentive to pass along unreasonable rates in the prices of their goods than to seek reparations, thus shifting the burden to the consumer. 436 U.S. 640–641. The case for the Commission's authority to suspend initial rates under the Federal Power Act on this basis is even stronger because the Commission, unlike the ICC, has no authority to order "reparations." It is thus that much more difficult for the Commission to enforce the just and reasonable standard absent suspension and refund authority with respect to initial rates.

There are judicial statements supportive of the restrictive interpretation we have followed in the past. *See Florida Power & Light Co.* v. *FERC,* 617 F.2d 809 (D.C. Cir. 1980); *Mobile, supra; Indiana & Michigan Municipal Distributors Association* v. *FERC, (IMMDA)* 659 F.2d 1193 (D.C. Cir. 1981); and *Otter Tail Power Company* v. *FERC,* 583 F.2d 389 (8th Cir. 1978). These statements are, however, *dicta.* In *Florida Power* and *Otter Tail* the courts stated that they were addressing only the question of whether the Commission had correctly classified the rate schedules as changed rather than initial rates. The Court in *Mobile* made a passing reference to the Commission's suspension authority under the Natural Gas Act during the course of a discussion of the general statutory scheme, included to highlight a different question which was at issue in that case.[10] In *IMMDA,* the court, while strongly agreeing with the Commission's view that it could not suspend initial rates, made it clear that the basic statutory scheme was not in dispute in that case. 659 F.2d at 1196.

The foregoing discussion of the Commission's suspension authority in light of *TAPS* leads us to the conclusion that we have the authority to suspend new initial rates.

Having determined that we have the authority to suspend new initial rates, we reaffirm our original suspension of MSE's rates for the reasons stated in the order of August 25, 1982, as well as the requirement that the rates be collected subject to refund.[11]

As to the other outstanding issue, MSE's request for an 18 percent return on equity will be heard in this proceeding, inasmuch as the company has filed supporting testimony. However, we emphasize that that proposed rate is under investigation pursuant to section 206 of the Federal Power Act and, accordingly, is prospective only in application.

The Commission orders:

(A) MSE's request that the order of August 24, 1982 in this proceeding be modified to find its submittal to be an initial rate is hereby granted to the extent indicated above. In all other respects rehearing is denied.

(B) MSE's application for clarification of the order of August 24, 1982, is granted as indicated above.

(C) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. GP83-27-000]

National Fuel Gas Supply Corp.; Two-Party Protest

May 25, 1983.

On May 4, 1983, National Fuel Gas Supply Corporation (National Fuel), filed with the Federal Energy Regulatory Commission (Commission), pursuant to §§ 154.94(j)(3) and 157.40(c)(1)(v)(B) of the Commission's regulations, a protest to N.E.A. Cross Company's (Cross) assertion of contractual authority to charge and collect the maximum lawful price under section 107 of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. §§ 3301–3432 (Supp. V 1982), for gas subject to Contract No. 36129, executed August 13, 1980, which National Fuel alleges contains specific price limitations.

National Fuel further states that it inadvertently paid Cross the maximum lawful price for gas subject to the contract for deliveries between August

---

[9] The rate setting provisions of the Natural Gas Act have been found by the courts to be substantially identical to those of the Federal Power Act. *FPC* v. *Sierra Pacific Power Co.,* 350 U.S. 348, 350–351, 353 (1956); *Indiana & Michigan Power Co.* v. *FPC,* 502 F.2d 336, 341 (D.C. Cir. 1974); *Borough of Lansdale, Pa.* v. *FPC,* 494 F.2d 1104, 1110–1111 (D.C. Cir. 1974).

[10] We note that in *Mobile* the Court focused on the distinction between "existing" rates and "new" rates (350 U.S. at 340) and between "long established" versus "newly changed" rates (350 U.S. at 341), rather than on a distinction between "initial" and "changed" rates. The fact that a rate was "new" seemed more important in the Court's discussion than the fact that it was "changed." It may be that the Court would have considered a "new" initial rate (as opposed to a "long established" or "existing" initial rate) as falling under Section 4(e). However, that question was not before it.

[11] While we believe that under *TAPS* we have concomitant authority to establish interim rates during the suspension period (*See* 436 U.S. at 651–654), such action is not necessary where, as here, no services upon which charges could be based were rendered during the suspension period. However, we have asserted our ancillary authority to make the rates subject to refund. *See,* 436 U.S. at 654–657.

13, 1980 and December 22, 1982. National Fuel notified Cross of the overpayments on April 7, 1983, and requested that Cross refund the overpayent, approximately $1,798,335, plus interest. Cross refused to make refunds and, according to National Fuel, has indicated it will seek relief in the Pennsylvania state court.

Any person desiring to participate in this protest proceeding shall file a petition to intervene, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, within 15 days after publication of this notice in the **Federal Register.**

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RE83-4-000]

New Braunfels Utilities; Application for Exemption

May 26, 1983.

Take notice that New Braunfels Utilities (New Braunfels) filed an application on December 23, 1982 for exemption from certain requirements of Part 290 of the Commission's Regulations concerning collection and reporting of cost of service information under Section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or before June 30, 1984, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290.

Due to an administrative oversight, this Notice of Application was not published in the **Federal Register** within the prescribed 15 day period (Part 290, Section 290.601(d)) following the date of receipt of the application for exemption.

In its application for exemption New Braunfels states, in part, that it should not be required to file the specified data for the following reasons:

An exemption would not be deleterious to special interest groups and third parties nor would it serve to circumvent the purposes of PURPA.

Copies of the appication for exemption are on file with the Commission and are available for public inspection. The Commission's regulations require that said utility also apply to any State regulatory authority having jurisdiction over it to have the application published in any official State publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the **Federal Register.** Within that 45 day period such person must also serve a copy of such comments on: Robert H. Sohn, P.E., General Manager, New Braunfels Utilities, P.O. Box 289, 263 Main Plaza, New Braunfels, Texas 78130.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP81-388-014 and CP78-123-019]

Northwest Alaskan Pipeline Co.; Petition To Amend

May 25, 1983

Take notice that on May 16, 1983, Northwest Alaskan Pipeline Company (Northwest Alaskan), 136 East South Temple, Salt Lake City, Utah 84111, filed in Docket Nos. CP81-388-014 and CP78-123-019 a petition to amend the Commission's orders issued October 1, 1981 and August 18, 1982, in Docket Nos. CP81-388-001 and CP81-388-008, respectively, pursuant to Section 3 of the Natural Gas Act so as to authorize the continued importation of natural gas from Canada to the United States purchased at a reduced price, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Northwest Alaskan states that the subject orders authorized it to import natural gas at an import price of $4.94 per million Btu. Northwest Alaskan states that the October 1, 1981 order pertains to the gas it imports at the Kingsgate, British Columbia, import point which gas it resells to Pacific Interstate Transmission Company. Northwest Alaskan similarly states that the August 18, 1982 order pertains to the gas it imports at the Monchy, Saskatchewan, import point which it resells to Northern Natural Gas Company, a Division of Inter-North Inc., Panhandle Eastern Pipe Line Company and United Gas Pipe Line Company. Northwest Alaskan further states that on April 11, 1983, the Government of Canada lowered its border price from $4.94 per million Btu to $4.40 per million Btu.

Northwest Alaskan requests that the Commission issue an order authorizing it to import natural gas from Canada at a price of $4.40 per million Btu effective April 11, 1983. Northwest Alaskan avers that such an amendment would permit it to reflect in its rates the lowered border price thereby reducing the cost of gas to its customers.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 15, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP81-152-002]

Panhandle Pipe Line Co., and Trunkline Gas Co., Amendment

May 25, 1983.

Take notice that on April 28, 1983, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, and Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP81-152-002 an amendment to their application filed January 21, 1981, in Docket No. CP81-152-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect changes in the transportation and exchange agreement dated October 31, 1980, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is asserted that on April 25, 1983, Panhandle, Trunkline and United Gas Pipe Line Company (United) executed amendment No. 5 to the transportation and exchange agreement among the parties which amendment deletes the 50 percent purchase option in Article 1, reduces the volumes to be transported from 30,000 Mcf per day on a firm basis and 20,000 Mcf per day on an interruptible basis to 4,000 Mcf per day on an interruptible basis, changes the

term of the agreement from ten years to three years and year to year thereafter, and changes the transportation rate from a demand charge of $168,300 per month and an interruptible unit rate of 18.44 cents per Mcf to an interruptible rate of 31.08 cents per Mcf. All other provisions of the original agreement remain in full force and effect, it is stated.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 15, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RE83-6-000]

Rochester Public Utilities; Application for Exemption

May 26, 1983.

Take notice that Rochester Public Utilities (RPU) filed an application on January 4, 1983 for exemption from certain requirements of Part 290 of the Commission's Regulations concerning collection and reporting of cost of service information under Section 133 of the Public Utility Regulatory Policies Act (PURPA) Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or before June 30, 1984 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290.

Due to an administrative oversight, this Notice of Application was not published in the **Federal Register** within the prescribed 15 day period (Part 290, Section 290.601(d)) following the date of receipt of the application for exemption.

In its application for exemption RPU states, in part, that it should not be required to file the specified data for the following reasons:

The applicant is a relatively small utility system, locally regulated, and very responsive to the needs of its customers. All meetings are held in accordance with the State Open Meetings Law and, as a consequence, all records, including those that are rate related, are open to public scrutiny as a matter of policy.

The applicant adopted the FERC System of Accounts in 1977 and, as a consequence, most of its records are not in the form and detail required by Section 133 of PURPA.

The cost of compliance with Section 133 of PURPA, particularly compliance with the requirements addressing load research, would impose a severe financial burden on the applicant's customers and would not further the purposes of Section 133 of PURPA.

The applicant's total retail sales in 1981 amounted to 438,892,379 KWH, an amount below the 500,000,000 KWH threshold in which compliance with Section 133 of PURPA is required, excluding the sale of 83,141,600 KWH to its only large customer, the IBM Corporation.

Copies of the application for exemption are on file with the Commission and are available for public inspection. The Commission's regulations require that said utitity also apply to any State regulatory authority having jurisdiction over it to have the application published in any official State publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the **Federal Register**. Within that 45 day period such person must also serve a copy of such comments on:

Mr. John Cobb, General Manager, Rochester Public Utilities, P.O. Box 6057, Rochester, Minnesota 55903
and
Mr. David R. Frantsen, Director of Finance & Accounting, Rochester Public Utilities, P.O. Box 6057, Rochester, Minnesota 55903

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14623 Filed 5-31-83: 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-300-000]

Texas Eastern Transmission Corp.; Application

May 26, 1983.

Take notice that on April 29, 1983, Texas Eastern Transmission Corporation (Applicant), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP83-300-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of metering facilities and the sale of natural gas in interstate commerce to the City of Kennett, Missouri (Kennett), as successor to certain interests of Associated Natural Gas Company (Associated), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to sell and deliver to Kennett under Applicant's Rate Schedules GS-B, I-B and WS a daily quantity of 6,419 dt equivalent of natural gas, an annual contract quantity of 1,308,690 dt equivalent, and such volumes as may be offered by Applicant on an interruptible basis. Applicant states that such authorization would implement Applicant's intent to transfer existing contractual obligations and entitlements of Kennett from Associated, certain of whose properties are being acquired by and contractural rights succeeded to, by Kennett.

Applicant states that Kennett and Associated entered into an agreement on May 6, 1981, whereby Kennett would purchase a portion of the transmission and distribution system owned by Associated and acquire the contractural rights to a portion of the natural gas supply available to Associated under its service agreements with Applicant. Consequently, Applicant has executed new service agreements with Kennett and Associated to effectuate the transfer of contract obligations between Applicant and Associated to Kennett.

It is stated that this change would require the installation of a gas metering facility which is estimated to cost $144,390. It is asserted that Kennett would reimburse Applicant for such cost. Applicant states that its proposal would require only minor changes in its operations and would not affect its ability to render presently authorized service to its other customers or result in any increase in either total daily or annual entitlements.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16,

1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commmission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14624 Filed 5-31-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-302-000]

Trailblazer Pipeline Co.; Application.

(May 26, 1983.)

Take notice that on April 29, 1983, Trailblazer Pipeline Company (Applicant), 122 South Michigan Avenue, Chicago, Illinois, 60603, filed in Docket No. CP83-302-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 75,000 Mcf of natural gas per day on behalf of Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and the revision of contract demands and revised demand rates, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

It is stated that Tennessee has gas reserves located in the Rocky Mountain area which it desires Applicant to transport on its behalf. Applicant states that it has agreed to transport up to 75,000 Mcf of natural gas per day for Tennessee pursuant to a service agreement dated April 25, 1983, for a term of 15 years. Line pack would be treated consistently with provisions in Applicant's tariff, it is said. Further, Applicant states that no additional facilities would be required to effectuate this transportation service.

Applicant states that Tennessee would cause Wyoming Interstate Company, Ltd. (WIC) to deliver for Tennessee's account volumes of gas to Applicant at the interconnection of the facilities of WIC and Applicant in Weld County, Colorado. Applicant would transport those volumes for redelivery at the eastern terminus of its system near Beatrice, Nebraska.

Applicant further states that in order to accommodate the Tennessee gas within existing capacity, Applicant has obtained new nominations from all shippers on the Trailblazer segment and has entered into revised service agreements reflecting revised contract demands for each shipper. The new contract demands, reflecting both the addition of Tennessee and the revised volumes for other shippers, would be

Shipper	Existing contract demand [1]	Proposed contract demand [1]
Natural Gas Pipeline Co. of America	183,000	140,000
Northern Natural Gas Co.	49,000	88,000
Columbia Gas Transmission Corp.	69,500	56,500
Tennessee Gas Pipeline		75,000
Total	301,500	309,500

[1] Million cubic feet per day.

As a result of the revision in the contract demands for all shippers, Applicant proposes to reduce its Rate Schedule T demand rate. Based on currently effective demand costs, this reduction would be 27.0¢ from $10.42 to $10.15. Applicant further requests that the Commission permit the revise demand rate to become effective on the date its order authorizing the proposed revision is issued.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals;

Objection to Proposed Remedial Order Filed, Period of April 18 Through April 29, 1983

During the period April 18 through April 29, 1983, the notice of objection to the proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 105.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: May 25, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Damson Oil Doram Energy Corp., Houston, Texas, HRO-0149, Crude Oil.

On April 25, 1983, Damson Oil Corp./ Doram Energy, Inc. 396 West Greens Rd., Houston, Texas 77067 filed a Notice of Objection to a Proposed Remedial Order the DOE Houston District Office of Enforcement issued to the firm on March 9, 1983. In the PRO the Houston District found that during March 1980 to December 1980, the prices which Damson charged in resales of crude oil during specified periods were in excess of actual purchase prices; Damson did not provide services traditionally associated with the resale of crude oil, violating 10 CFR 212.186, 210.62, 205.202. According to the PRO the Damson Oil Corp./Doram Energy Inc. violation resulted in $285,583.48 of overchargs.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-41011; TSH FRL 2370-4]

Twelfth Report of the Interagency Testing Committee to the Administrator; Receipt of Report and Request for Comments Regarding Priority List of Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Interagency Testing Committee (ITC) established under section 4(e) of the Toxic Substances Control Act (TSCA), transmitted its Twelfth Report to the Administrator of EPA on May 11, 1983. This report, which revises and updates the Committee's priority list of chemicals, adds five designated chemicals to the list for priority consideration by EPA in the promulgation of test rules under section 4(a) of the Act. The new chemicals are calcium naphthenate, cobalt naphthenate, lead naphthenate, methylolurea and 2-phenoxyethanol. The Twelfth Report is included in this notice. The Agency invites interested persons to submit written comments on the Report, and to attend Focus Meetings to help narrow and focus the issues raised by the ITC's recommendations. Members of the public are also invited to inform EPA if they wish to be notified of subsequent public meetings on these chemicals. EPA also notes the removal of 15 chemicals from the priority list because EPA has responded to the ITC's prior recommendations for testing of the chemicals.

DATES: Written comments should be submitted by July 1, 1983. Focus Meetings will be held on July 20 and 21, 1983.

ADDRESSES: Send written submissions to: TSCA Public Information Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-108, 401 M St., SW Washington, D.C. 20460.

Submissions should bear the Document Control Number OPTS-41011.

The public record supporting this action, including comments, is available for public inspection in Rm. E-107 at the address noted above from 8:00 a.m. to 4:00 p.m. Monday through Friday, except legal holidays. Focus Meetings will be held at Waterside Mall, in Rm. 3906, 401 M St., SW., Washington, D.C. Persons planning to attend one of the Focus Meetings and/or hoping to be informed of subsequent public meetings on these chemicals, should notify the TSCA Assistance Office at the address listed below. To insure seating accommodations at the Focus Meeting, persons interested in attending are asked to notify EPA at least 2 weeks ahead of the scheduled dates.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Toll Free: (800-424-9065), In Washington, D.C.: (544-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION:

I. Background

Section 4(a) of TSCA (Pub. L. 94-469, 90 Stat. 2003; 15 U.S.C. 2601 *et seq.*) authorizes the Administrator of EPA to promulgate regulations requiring testing of chemical substances in order to develop data relevant to determining the risks that such chemical substances may present to health and the environment.

Section 4(e) of TSCA established an Interagency Testing Committee to make recommendations to the Administrator of EPA of chemical substances to be given priority consideration in proposing test rules under section 4(a). Section 4(e) directs the Committee to revise its list of recommendations at least every 6 months as it determines to be necessary. The ITC may "designate" up to 50 substances at any one time for priority consideration by the Agency. For such designations, the Agency must within 12 months either initiate rulemaking or issue in the **Federal Register** its reasons for not requiring testing. The ITC's Twelfth Report was received by the Administrator on May 11, 1983, and follows this Notice. The report designates 5 substances for priority consideration and response by EPA within 12 months.

II. Written and Oral Comments and Public Meetings

EPA invites interested persons to submit detailed comments on the ITC's new recommendations. The Agency is interested in receiving information concerning additional or ongoing health and safety studies on the subject chemicals as well as information relating to the human and environmental exposure to these chemicals. A notice is published elsewhere in today's **Federal Register** adding the 5 substances designated in the ITC's Twelfth Report to the TSCA section 8(d) rule. The section 8(d) rule requires the reporting of unpublished health and safety studies on the listed chemicals. These 5 chemicals will also be added to the TSCA section 8(a) Preliminary

Assessment Information rule through a **Federal Register** notice to be published in the near future.

Focus Meetings will be held to discuss relevant issues pertaining to the chemicals and to narrow the range of issues/effects which will be the focus of the Agency's subsequent activities in responding to the ITC recommendations. The Focus Meetings will be held July 20 and 21, 1983, at Waterside Mall, 401 M St., SW., Washington, D.C., Room 3906. These meetings are intended to supplement and expand upon written comments submitted in response to this notice. The schedule for the Focus Meetings is as follows: July 20, 9:00 a.m.—calcium, cobalt and lead naphthenates, July 21, 9:00 a.m.—2-phenoxyethanol, 1:00 p.m.—methylolurea. Persons wishing to attend one or more of these meetings should call the TSCA Assistance Office at the toll free number listed above at least 2 weeks in advance.

After consideration of the data pertaining to each chemical, and any additional information provided in the written comments and the Focus Meetings, EPA will hold public meetings on each chemical after preliminary decisions have been made on the types of testing that are needed. These meetings will be several months in the future, but separate notice of these meetings will not be published at that time. Therefore, anyone wishing to attend these later meetings should contact EPA now at the address given for the TSCA Assistance Office in order to be notified in advance of the public meetings.

All written submission should bear the identifying Docket No. OPTS–41011.

III. Status of List

In addition to adding the 5 designations to the priority list, the ITC's Twelfth Report notes the removal of 15 chemicals from the list since the last ITC report because EPA has responded to the Committee's prior recommendation for testing of the chemical. The 15 chemicals removed and the dates of publication of EPA's responses in the **Federal Register** are: acetonitrile, December 29, 1982 (47 FR 58020); acrylamide-environmental, January 6, 1983 (48 FR 725); antimony metal, antimony sulfide and antimony trioxide, January 6, 1983 (48 FR 717); 4-chlorobenzotrifluoride, November 8, 1982 (47 FR 50555); hexachloro-1,3-butadiene, December 29, 1982 (47 FR 58029); hexachlorocyclopentadiene, December 29, 1982 (47 FR 58023); isophorone, January 6, 1983 (47 FR 727); methyl ethyl ketone and methyl isobutyl ketone, December 29, 1982 (47 FR 58025); pyridine, December 29, 1982 (47 FR 58031); toluene, December 16, 1982 (47 FR 56391); tris(2-Chloroethyl) phosphite, November 1, 1982 (47 FR 49466); and xylenes, December 16, 1982 (47 FR 56392). The current list contains 36 designated substances or categories of substances and two recommended categories of substances.

Dated: May 18, 1983.

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Twelfth Report of the TSCA Interagency Testing Committee to the Administrator, Environmental Protection Agency

Summary

Section 4 of the Toxic Substances Control Act of 1976 (TSCA, Pub. L. 94–469) provides for the testing of chemicals in commerce that may present an unreasonable risk of injury to health or the environment. It also provides for the establishment of a Committee, composed of representatives from eight designated Federal agencies, to recommend chemical substances and mixtures (chemicals) to which the Administrator of the U.S. Environmental Protection Agency (EPA) should give priority consideration for the promulgation of testing rules.

Section 4(e)(1)(A) of TSCA directs the Committee to recommend to the EPA Administrator chemicals to which the Administrator should give priority consideration for the promulgation of testing rules pursuant to section 4(a). The Committee is required to designate those chemicals, from among its recommendations, to which the Administrator should respond within 12 months by either initiating a rulemaking proceeding under section 4(a) or publishing the Administrator's reason for not initiating such a proceeding. Every 6 months, the Committee makes those revisions in the TSCA section 4(e) Priority List that it determines to be necessary and transmits them to the EPA Administrator.

As a result of its deliberations, the Committee is revising the TSCA section 4(e) Priority List by the addition of 5 chemicals and is noting the removal of 15, as a result of responses by EPA.

The Priority List is divided into two parts: part A contains those recommended chemicals and groups designated for priority consideration and response by the EPA Administrator within 12 months, and part B contains chemicals and groups that have been recommended for priority consideration by EPA without being designated for response within 12 months. Although TSCA does not establish a deadline for EPA response to nondesignated chemicals and groups (part B of the Priority List), the Committee anticipates that the EPA Administrator will respond in a timely manner.

The entries being added to the Priority List are presented, together with the types of testing recommended, in the following Table 1.

TABLE 1.—ADDITIONS TO THE SECTION 4(e) PRIORITY LIST

Chemical/group	Recommended studies
A. Designated for response within 12 months	
Methylolurea (CAS No. 1000–82–4).	Health Effects: Short-term genotoxicity; toxicokinetics; long-term bioassay, if indicated by results of genotoxicity and toxicokinetic testing.
Calcium naphthenate (CAS No. 61789–36–4).	Chemical Fate: Abiotic and biotic persistence, including dissociation; transport, including soil mobility.
Cobalt naphthenate (CAS No. 61789–51–3).	Health Effects: Carcinogenicity; mutagenicity; teratogenicity; toxicokinetics; reproductive effects.
Lead naphthenate (CAS No. 61790–14–5).	Ecological Effects (depending on the results of chemical fate tests): Acute toxicity to fish and aquatic invertebrates; toxicity to plants; bioconcentration.
2-Phenoxyethanol (CAS No. 122–99–6).	Health Effects: Reproductive effects; teratogenicity; short-term genotoxicity; subchronic toxicity.
B. Recommended but not designated for response within 12 months	
None	—

Notes

(1) Dr. Snow terminated his association with the Committee on February 18, 1983.

(2) Ms. Hudson resigned as the NIOSH member of the Committee on January 30, 1983. She continues to serve in a technical support capacity as a representative of the National Library of Medicine.

(3) Dr. Christensen terminated his association with the Committee on January 30, 1983.

(4) Mr. Tatken was appointed on March 22, 1983.

(5) Mr. Lewis was appointed on March 22, 1983.

(6) Dr. Clayton terminated his association with the Committee on January 20, 1983.

(7) Dr. Cooper terminated his association with the Committee on February 4, 1983.

(8) Mr. Ells was appointed to the Committee support staff on February 17, 1983.

The Committee acknowledges and is grateful for the assistance and support given to it by the staffs of CRCS, Inc., and Dynamac Corporation (technical support prime and subcontractors) and personnel of the EPA Office of Toxic Substances.

Chapter 1—Introduction

1.1 *Background.* The TSCA Intergency Testing Committee (Committee) was established under section 4(e) of the Toxic Substances Control Act of 1976 (TSCA, Public Law 94–469). The specific mandate of the Committee is to recommend to the Administrator of the U.S. Environmental Protection Agency (EPA) chemical substances and mixtures in commerce that should be given priority consideration for the promulgation of testing rules to determine their potential hazard to human health and/or the environment. TSCA specifies that the Committee's recommendations shall be in the form of a Priority List, which is to be published in the **Federal Register**. The Committee is directed by section 4(e)(1)(A) of TSCA to designate those chemicals on the Priority List to which the EPA Administrator should respond within 12 months by either initiating a rulemaking proceeding under section 4(a) or publishing the Administrator's reason for not initiating such a proceeding.

Every 6 months, the Committee makes those revisions in the section 4(e) Priority List that it determines to be necessary and transmits them to the EPA Administrator.

The Committee is normally comprised of representatives from eight statutory member agencies, five liaison agencies, and one national program. Currently, representation from one statutory member agency and one liaison agency is lacking. The specific representatives and their affiliations are named in the front of this report. The Committee's chemical review procedures and prior recommendations are described in previous reports (Refs. 1 through 12).

1.2 *Committee's previous reports.* Eleven previous reports to the EPA Administrator have been issued by the Committee and published in the **Federal Register** (Refs. 2 through 12). Sixty-four entries (chemicals and groups of chemicals) were recommended for priority consideration by the EPA Administrator and designated for response within 12 months. In addition, two groups were recommended, without being so designated. Removal of twenty entries was noted in the previous reports.

1.3 *Committee's activities during this reporting period.* Between October 1, 1982, and March 31, 1983 the Committee continued to review chemicals from its third and fourth scoring exercises (see Ref. 2 for methodology). During this period, the Committee began the fifth round of scoring chemicals, to select candidates for in-depth review beginning in early 1984.

The Committee contacted approximately 30 manufacturers of the chemicals being reviewed to request information that would be of value in its deliberations. Many of the firms have provided unpublished information on current production, exposure, uses, and biological effects of chemicals under study by the Committee.

During this reporting period, the Committee evaluated 64 chemicals for priority consideration. Five chemicals were added to the section 4(e) Priority List, and 29 were deferred at this time. The remaining 30 chemicals are still under study.

1.4 *The TSCA section 4(e) Priority List.* Section 4(e)(1)(B) of TSCA directs the Committee to: "* * * make such revisions in the [priority] list as it determines to be necessary and * * * transmit them to the Administrator together with the Committee's reasons for the revisions." Under this authority, the Committee is revising the Priority List by adding five chemicals: methylolurea, calcium naphthenate, cobalt naphthenate, lead naphthenate, and 2-phenoxyethanol. All five chemicals are designated for response within twelve months. The testing recommended for these chemicals and the rationales for the recommendations are presented in Chapter 2 of this report.

Fifteen chemicals and groups are being removed from the Priority List because the EPA Administrator has responded to the Committee's prior recommendations for testing these chemicals. They are: acetonitrile, acrylamide, antimony metal, antimony sulfide, antimony trioxide, 4-chlorobenzotrifluoride, hexachloro-1,3-butadiene, hexachlorocyclopentadiene, isophorone, methyl ethyl ketone, methyl isobutyl ketone, pyridine, toluene, tris(2-chloroethyl)phosphite, and xylenes.

With the 5 recommendations and 15 removals noted in this report, 36 entries now appear on the section 4(e) Priority List. The Priority List is divided in the following Table 2 into two parts; namely, Table 2A, Chemicals and Groups Designated for Response Within 12 Months, and Table 2B, Other Recommended Chemicals and Groups.

TABLE 2.—THE TSCA SECTION 4(e) PRIORITY LIST—MAY 1983

[2A. Chemicals and Groups Designated for Response Within 12 Months]

Entry	Date of designation
1. Alkyl epoxides	October 1977
2. Aniline and bromo-, chloro-, and/or nitroanilines	April 1979
3. Aryl phosphates	April 1978
4. Biphenyl	May 1982 [1]
5. Bis(2-ethylhexyl) terephthalate	November 1982 [1]
6. Calcium naphthenate	May 1983
7. Chlorinated benzenes, mono- and di-	October 1977
8. Chlorinated benzenes, tri-, tetra-, and penta-	October 1978
9. Cobalt naphthenate	May 1983
10. Cresols	October 1977
11. Cyclohexanone	April 1979
12. Dibutyltin bis(isooctyl maleate)	November 1982 [1]
13. Dibutyltin bis(isooctyl mercaptoacetate)	November 1982 [1]
14. Dibutyltin bis(lauryl mercaptide)	November 1982 [1]
15. Dibutyltin dilaurate	November 1982 [1]
16. 1,2-Dichloropropane	October 1978

TABLE 2.—THE TSCA SECTION 4(e) PRIORITY LIST—MAY 1983—Continued

[2A. Chemicals and Groups Designated for Response Within 12 Months]

Entry	Date of designation
17. Dimethyltin bis(isooctyl mercaptoacetate)	November 1982 [1]
18. 1,3-Dioxolane	November 1982 [1]
19. Ethyltoluene	May 1982 [1]
20. Formamide	May 1982 [1]
21. Glycidol and its derivatives	October 1978
22. Halogenated alkyl epoxides	April 1978
23. Hydroquinone	November 1979
24. Lead naphthenate	May 1983
25. Mesityl oxide	April 1979
26. 4,4'-Methylenedianiline	April 1979
27. Methylolurea	May 1983
28. Monobutyltin tris(isooctyl mercaptoacetate)	November 1982 [1]
29. Monomethyltin tris(isooctyl mercaptoacetate)	November 1982 [1]
30. 2-Phenoxyethanol	May 1983
31. Quinone	November 1979
32. 4-(1,1,3,3-Tetramethylbutyl)phenol	November 1982 [1]
33. 1,2,4-Trimethylbenzene	May 1982 [1]
34. Tris(2-ethylhexyl) trimellitate	November 1982 [1]

[2B. Other Recommended Chemicals and Groups]

Entry	Date of recommendation
1. Carbofuran intermediates	November 1982 [1]
2. Trimethylbenzenes	May 1982 [2]

[1] The dates of designation and recommendation have been revised to reflect when the revised lists were actually delivered to the EPA Administrator, rather than the dates when the reports were prepared.

[2] Recommended to the EPA Administrator in May 1982 and added to the section 4(e) Priority List in November 1982.

To date, 35 chemicals and groups have been removed from the Priority List. The cumulative list is presented in the following Table 3.

TABLE 3.—CUMULATIVE REMOVALS FROM THE TSCA SECTION 4(e) PRIORITY LIST—MAY 1983

Chemical/group	EPA responses to committee recommendations

Chapter 2—Recommendations of the Committee

2.1 *Chemicals recommended for priority consideration by the EPA Administrator.* As provided by section 4(e)(1)(B) of TSCA, the Committee is adding the following five chemical substances to the section 4(e) Priority List: methylolurea, calcium naphthenate, cobalt naphthenate, lead naphthenate,

and 2-phenoxyethanol. The recommendation of these chemicals is being made after considering the factors identified in section 4(e)(1)(A) and other available relevant information, as well as the professional judgment of Committee members.

The five recommendations designated for response by the EPA Administrator within 12 months and supporting rationales are presented in section 2.2 of this report.

2.2 *Chemicals designated for responsé within 12 months with supporting rationales.*

2.2.a *Methylolurea*

Summary of recommended studies. It is recommended that methylolurea be tested for the following:

Health Effects:

Short-term genotoxicity

Toxicokinetics

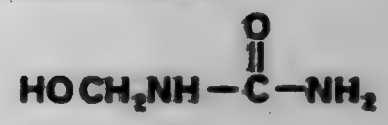
Long-term bioassay, if indicated by results of genotoxicity and toxicokinetic testing

Physical and Chemical Information

CAS Number: 1000–82–4.

Synonyms: Urea (hydroxymethyl) (CA Index name); urea-formaldehyde monomer; urea-formaldehyde precondensate.

Structural Formula:



$$HOCH_2NH-\overset{\overset{O}{\|}}{C}-NH_2$$

Empirical Formula: $C_2H_6N_2O_2$.

Molecular Weight: 90.

Melting Point: 111° C.

Boiling Point: Decomposes.

Solubility in Water: Soluble (Walker, 1964).

Log Octanol/Water Partition Coefficient: −3.3 (estimated; Leo, et al., 1971).

Description of Chemical: Colorless solid.

Rationale for Recommendations

I. *Exposure information—Production/use/disposal.* Methylolurea is a monomer used in the preparation of urea-formaldehyde (U–F) resins and in the manufacture of controlled release fertilizers (Georgia Pacific Corp., 1982a, 1982b). In 1977, between 31 and 161 million pounds were produced for commerce in the United States (EPA, 1982).

Methylolurea is also produced as a nonisolated intermediate in the production of U–F resins. In 1981, 1.7 billion pounds of U–F resins were produced (C&EN, 1982). The estimated domestic consumption of U–F resins by category of use for 1978 is given in the following Table 4.

TABLEL 4—ESTIMATED DOMESTIC CONSUMPTION OF UREA RESINS IN 1978[1]

Use category	Millions of pounds
Particleboard [2]	910
Medium-density fiberboard [3]	135
Plywood	95
Molding compounds [3]	81
Paper treating and coating	55
Textile treatment [4]	40
Surface coatings	30
Foam	30
Miscellaneous	5–10

[1] Adapted from CEH (1979).
[2] Includes melamine-urea-formaldehyde resins.
[3] Includes fillers, which account for 35–50 percent.
[4] Includes modified urea resins such as ethyleneurea, triazine, and uron.

The principal use of these resins is as particleboard adhesives.

Prior to polymerization through heat and pH adjustment, U–F prepolymers or precondensates are composed of methylolurea and its oligomers in various concentrations depending on the application and the precondensate stage; from 29 to 40 percent methylolurea has been reported to be present (Kumlin and Simonson, 1981; Tomita and Hirose, 1976; Meyer, 1979). Consequently, exposure to the precondensate would result in exposure to methylolurea.

The amount of residual methylolourea in cured U–F resins has not been adequately determined (Hsiao and Villaume, 1978). Its presence may be inferred from the release of formaldehyde from U–F resin products. Methylolurea hydrolyzes readily to release formaldehyde (Hsiao and Villaume, 1978). Furthermore, the level of formaldehyde released from wood products containing U–F resins has been shown to correlate directly with the absorption of water by the product (Meyer, 1979). Formaldehyde has been detected in a number of occupational settings where U–F resins are present (Hsiao and Villaume, 1978).

In occupational settings, exposure to U–F resins, and consequently exposure to methylolurea, may occur at any stage in the production of a material containing U–F resins. For example, during the manufacture of particleboard, inhalation exposure may occur when the prepolymer is atomized and sprayed onto wood chips as liquid droplets ranging in size from 20 to 80 microns (Meyer, 1979). Exposure may also occur when the prepolymer is applied to textiles by soaking, drying, and heating to impart wrinkle resistance and water repellency to fabrics (CEH, 1979). Operations such as sawing or sanding particleboard may generate dust containing residual methylolurea.

In a 1972–74 survey, NIOSH estimated that 391,074 workers are potentially exposed to U–F resins (NIOSH, 1976). The fraction of these workers exposed to methylolurea is not known.

II. *Chemical fate information*—Methylolurea is not expected to persist in the environment (Landquist, 1955).

III. *Biological effects of concern to human health*—

A. *Toxicokinetics (absorption, distribution, and excretion).* No information was found.

B. *Metabolism.* No information was found.

C. *Genotoxicity.* When methylolurea (urea-formaldehyde precondensate) was administered to 48 outbred male rats via intragastric intubation, chromosomal aberrations of the bone marrow cells were seen at 24 hours and 48 hours after treatment. The dosage was reported to be one-tenth the LD_{50}; however, neither the dosage nor the LD_{50} was given. Three hundred to four hundred anaphases and telophases were analyzed per animal. Statistical analysis of the data revealed a reliable difference between the number of chromosomal aberrations in the bone marrow cells of treated versus control groups at 24 or 48 hours (Erkis and Ratpan, 1973). The authors concluded that methylolurea was "genetically dangerous."

In addition, Morin and Kubinski (1978) tested a precondensate of urea-formaldehyde containing methylolurea in a system that determines the ability of methylolurea to react with macromolecules. The precondensate changed the apparent molecular weight of the isolated DNA and increased the rate of attachment of DNA to bacterial and animal cells. A positive correlation was reported between this property and the ability of tested compounds to produce cancer in vivo.

D. *Short-term (acute) effects.* No information was found.

E. *Long-term (subchronic/chronic effects).* No information was found.

F. *Reproductive effects and teratogenicity.* No information was found.

G. *Rationale for health effects recommendations.* A potential exists for occupational exposure to methylolurea in U–F resin precondensates and for user exposure to methylolurea in particleboard and other products containing the compound as a residue.

Two preliminary genotoxicity tests of methylolurea were positive. A battery of short-term genotoxicity tests should be performed to evaluate further the compound's genotoxic potential.

Since methylolurea readily releases formaldehyde, there is concern about its

fate in the body. Because no toxicokinetic study reports have been found, such testing should be undertaken. If the results of the genotoxicity tests and toxicokinetic studies increase suspicion as to the potential toxicity of methylolurea, further testing such as a long-term bioassay should be undertaken.

IV. *Ecological effects*—No ecological-effects testing is recommended because of the low persistence of methylolurea.

2.2.b *Naphthenate Metal Salts*

Summary of recommended studies. It is recommended that cobalt, lead, and calcium naphthenates be tested for the following:

A. Chemical Fate: Abiotic and biotic persistence, including dissociation; transport, including soil mobility.

B. Health Effects: Carcinogenicity, mutagenicity, teratogenicity, toxicokinetics, reproductive effects.

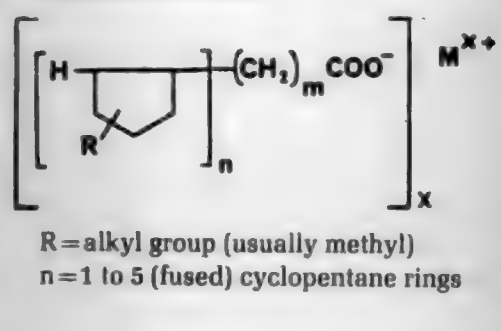
C. Ecological Effects (The following ecological tests are recommended, depending on the results of chemical fate tests.): Acute toxicity to fish and aquatic invertebrates, toxicity to plants, bioconcentration.

Physicial and Chemical Information

CAS Numbers: Cobalt naphthenate, 61789–51–3; lead naphthenate, 61790–14–5; calcium naphthenate, 61789–36–4.

Synonyms: Naphthenic acids, cobalt salts (CA index name); naphthenic acids, lead salts (CA index name); naphthenic acids, calcium salts (CA index name).

Structural Formula:



R = alkyl group (usually methyl)
n = 1 to 5 (fused) cyclopentane rings
m = greater than 1
x = valence state of anion
M = metal cation with valence X

Empirical Formula: A naphthenate metal salt is a mixture of the respective metal derivative (cobalt, lead, or calcium) of naphthenic acid containing a specified percentage of metal by weight. The physical state of the metal salt (whether liquid or solid) depends on the type and amount of metal present, the mode of preparation, and the nature of the organic acid used (Kirk-Othmer, 1965). The metal moiety is considered the active part of the metal salt, and the naphthenic acid part serves as the carrier for the metal. This relationship allows required concentrations of heavy metals to be dissolved in organic, solvent-based paints as driers, in lubricants as anticorrosive and extreme pressure agents, in various organic systems as catalysts, and in solvents as preservatives (Kirk-Othmer, 1981).

Naphthenic acid, itself, is predominantly a mixture of alicyclic monocarboxylic acids with single or fused (usually two) cyclopentane rings. Typical naphthenic acids undergo the same chemical reactions as other saturated monocarboxylic acids, including esterification, amidation, and saponification. Their solubility in a variety of organic solvents accounts for their preferred use in the formation of metal salts (Kirk-Othmer, 1981).

Additional physical and chemical information is given in the following Table 5.

TABLE 5.—PHYSICAL AND CHEMICAL PROPERTIES OF THREE METAL NAPHTHENATES

Chemical	Metal content (percent)	Molecular weight range [1]	Melting point [2] (°C)	Boiling range [3] (°F)	Specific gravity [3] (77°dF)	Solubility [4]	Physical State
Cobalt naphthenate	6	239–409	(5)	315–380	0.91–0.95	Soluble in oils, alcohol, ether.	Liquid.
Cobalt naphthenate	10.5	239–409	77	(5)	1.16	do	Solid.
Lead naphthenate	16	387–557	(5)	(5)	(5)	Soluble alcohol	Liquid.
Lead naphthenate	24	387–557	(5)	(5)	1.07–1.13	do	Do.
Lead naphthenate	37	387–557	[illegible]	(5)	1.53	do	Solid.
Calcium naphthenate	[illegible]	220–390	(5)	315–380	[illegible]	Soluble in ethyl [illegible] carbon tetrachloride, gasoline, benzene.	Liquid.
Calcium naphthenate	5	220–390	(5)	315–380	0.92–0.96	do	Do.

[1] Estimated (Kirk-Othmer, 1981).
[2] Kirk-Othmer, 1965.
[3] Troy Chemical Co. 1982.
[4] All the metal salts are water insoluble due to the large size and composition of the napthenic acid moiety (Kirk-Othmer, 1979b)
[5] Not found.

Rationale for Recommendations

I. *Exposure information*—A. *Production/use/disposal.*

All three metal naphthenates are produced by the reaction between sodium napthenate and the respective metal donors, i.e., cobaltous hydroxide, lead oxide, or an aqueous solution of calcium salts (Hawley, 1981).

The TSCA Inventory listed the followng 1977 annual production ranges:

cobalt naphthenate, 1,300,000 to 13,000,000 pounds (with 9 manufacturers); lead naphthenate, 1,440,000 to 14,400,000 pounds (with 11 manufacturers); and calcium naphthenate, 1,000,000 to 11,000,000 pounds (with 11 manufacturers) (EPA, 1982). The 1980 U.S. International Trade Commission Report included the following production figures for the solid naphthenates only: cobalt naphthenate, 2,361,000 pounds; lead naphthenate, 5,131,000 pounds; and calcium naphthenate, 741,000 pounds (USITC, 1980).

All three metal naphthenates are used primarily as driers for coatings (e.g., oil-based paints, varnishes, and printing inks) to acclerate the drying process. Additional uses may include: for cobalt, with various phenols to improve the adhesion of sulfur-vulcanized rubber to metals, and as a catalyst for oxidation of isopropyl benzene; for lead, as a lubricant for anticorrosion and extreme-pressure properties; and for calcium, in adhesives, wood fillers, grafting waxes, and cements (Kirk-Othmer, 1979b; Hawley, 1981).

B. *Evidence for exposure.* In view of the high production volumes, a considerable number of workers may be exposed to the three metal naphthenates.

The National Occupational Exposure Survey (formerly the National Occupational Hazard Survey) indicates that approximately 80,000 workers are potentially exposed to cobalt naphthenate (NIOSH, 1980). OSHA has established a limit of 0.1 mg/m³ as the 8-hour TWA concentration for exposure to cobalt metal, fumes, and dust (OSHA, 1981a).

An estimated 2 million workers are potentially exposed to lead naphthenate (NIOSH, 1980). OSHA's current TWA standard for lead, which includes organic lead salts, is 50 ug/m³ (OSHA, 1881b).

The number of workers potentially exposed to calcium naphthenate has been estimated to be 9,960 (NIOSH, 1980). OSHA has established an 8-hour TWA of 5 mg/m³ for calcium oxide (OSHA, 1981a).

Since all three metal naphthenates are used primarily as driers in paints, varnishes, and printing inks, there exists potential exposure for the general population. In addition, because of their large volumes of production and wide variety of uses, the cobalt, lead, and calcium naphthenates are likely to enter the aquatic environment.

II. *Chemical fate information.*

No test data on the environmental transport or persistence of naphthenate metal salts have been identified. The extent of dissociation of the metal salts—cobalt, lead, and calcium naphthenates—is unknown. The molecular weight and complexity of the naphthenates (e.g., the number of chemical rings, branched side-chains, or number of chemical additions to the rings) will depend on the feedstock of these materials. Several of the metal naphthenates with higher molecular weights are expected to resist biodegradation.

III. *Biological effects of concern to human health—A. Toxicokinetics (absorption, distribution, and excretion).*

Skin-painting studies have shown that lead naphthenate may be absorbed through the skin of rats and mice. The absorbed lead may be distributed to the kidneys, blood, liver, spleen, muscle, and brain (Rastogi and Clausen, 1976; Rasstogi et al., 1976; Baldwin et al., 1964).

The absorption of lead naphthenate after oral administration to rats was studied (Rockhold, 1955). Twenty doses of a 0.25 ml solution of lead naphthenate were given to rats over a 1-month period, after which the animals were sacrificed. Analyses of the hair and liver indicated distribution and accumulation of lead in the hair, but not in the liver. In a separate study, the author also found that about 40 percent of the total lead naphthenate administered by gavage (3.78 g/kg) was excreted in about 3 days.

Toxicokinetic studies have not been found for cobalt or calcium naphthenate.

B. *Mutagenicity.* No data on the mutagenic activity of the three metal naphthenates have been found.

C. *Short-term (acute) effects.* The LD_{50}s in rats after oral administration were determined to be 3.9 g/kg for cobalt naphthenate and 5.1 g/kg for lead naphthenate (Rockhold, 1955).

D. *Long-term (subchronic/chronic) effects.*

1. *Neurotoxicity.* In a skin painting and subcutaneous injection study (Rastogi and Clausen, 1976), total lead accumulation in the rat brain was found to be higher after lead naphthenate treatment than after lead acetate treatment to separate groups of rats. In addition, a paralytic syndrome was found in the lead naphthenate-treated animals. The groups of rats were either skin painted or injected with 0.5 ml of lead naphthenate of lead acetate solution on alternate days over a 9-day period, with a total of 5 doses administered. Two days after dosing was completed, the animals were sacrificed and various organs removed and analyzed for lead content.

The distribution of lead in organs (other than the brain) such as the kidneys, liver, spleen, and muscles was found to be higher after lead acetate than after lead naphthenate treatment.

Information on the neurotoxicity of cobalt and calcium naphthenates has not been found.

2. *Behavioral effects.* Cutaneous application of a 0.2 ml lead naphthenate solution on alternate days for one week resulted in hyperactivity and aggressiveness in rats (Rastogi et al., 1976). Such behavioral changes are recognized as the earliest symptoms of lead poisoning (NAS, 1972).

Information on behavioral effects of cobalt and calcium naphthenates was not found.

3. *Carcinogenicity.* The carcinogenicity of cobalt naphthenate has been studied in both rabbits and mice (Nowak, 1961, 1966).

The development of tumors at the site of injection was reported in 9 of 12 rabbits (Nowak, 1961). The animals were injected with cobalt naphthenate in one of the following sites: thigh muscle, blood vessel of the ear, liver, or pleura. The tumor-inducing dose appeared to be 0.1 ml/kg administered two to four times weekly until termination of the experiment at 6 months. Controls were not discussed by the author.

Nowak also reported a carcinogenic effect of cobalt naphthenate in mice (Nowak, 1966). Thirty mice received single intramuscular injections of 0.02 ml of cobalt naphthenate. Injection-site tumors developed in 8 of the 30 animals over a one-to three-month period. Controls were not discussed.

Lead naphthenate was considered to be carcinogenic in a skin painting study with mice (Baldwin et al., 1964). A 20 percent solution of lead naphthenate in benzene was applied to the dorsal skin of 59 mice once or twice weekly for 12 months (the total dose of lead naphthenate was 6 ml). The animals were observed for an additional 6 months before being sacrificed. Skin tumors were found in 2 of 59 mice. However, the authors described marked kidney damage and tubular adenomata (including one renal carcinoma) in 4 of the 59 animals skin painted with lead naphthenate. Controls were not discussed.

No information was found on the carcinogenicity of calcium naphthenate.

E. *Reproductive effects.* No information was found on the reproductive effects of the three metal naphthenates.

F. *Teratogenicity.* No information was found on cobalt, lead, or calcium naphthenates; however, adequate information does exist on the teratogenicity of other lead compounds.

G. *Rationale for health effects recommendations.* Although trace amounts of cobalt and calcium are needed for normal body function, sufficient evidence in humans exists that indicates the toxic effects of the three metals—cobalt, lead, and calcium. Cobalt metal, cobalt oxides, and certain cobalt salts may cause respiratory and cardiovascular disease (NIOSH, 1982). Lead compounds have been shown to attack the central nervous system as well as the urinary and hematopoietic systems (NAS, 1972). Certain calcium salts, calcium oxide and calcium cyanamide are known to cause diseases of the skin and respiratory system (DHEW, 1977). Sufficient evidence does not exist, however, to characterize properly the overall toxicological properties of the naphthenate salts of these three metals.

The available caricinogenicity studies on cobalt naphthenate (Nowak, 1961, 1966) and lead naphthenate (Baldwin, 1964) are inadequate, mainly because of the omission of data on experimental controls. No data were found concerning the carcinogenic potential of calcium naphthenate. For all three metal naphthenates there exists considerable occupational exposure and a concern for human health. Therefore, carcinogenicity studies are recommended for cobalt, lead, and calcium naphthenates. It is also recommended that the route of administration be via inhalation, which may be more relevant to the occupational exposure.

Reproductive and teratogenic effects studies are recommended for all three metal naphthenates to determine any adverse effects on male and female organs of reproduction, as well as adverse effects on offspring.

Mutagenicity studies are recommended for all three metal naphthenates to investigate the potential for any genotoxic effects.

Toxicokinetic studies are also recommended for all three metal naphthenates to determine the absorption, distribution, excretion, and major metabolic products of cobalt, lead, and calcium naphthenates.

IV. *Ecological effects of concern.*—A. *Short-term (acute) effects.*

No studies on the short-term effects of cobalt, lead, and calcium naphthenates have been found for either aquatic animals or plants.

B. *Long-term (subchronic/chronic) effects.* No studies on the long-term effects of cobalt, lead, or calcium naphthenates have been found for either aquatic animals or plants.

C. *Other effects (physiological/behavioral/ecosystem processes).* No studies on physiological, behavioral, or ecosystem effects of lead, cobalt, or calcium naphthenate have been found.

D. *Bioconcentration and food-chain transport.* The octanol-water partition coefficients for cobalt, lead or calcium naphthenates cannot be calculated by the method of Leo et al. (1971); consequently, the bioconcentration factors cannot be estimated.

E. *Rationale for ecological effects recommendations.* Cobalt, lead, and calcium naphthenates are produced in large quantities with a variety of uses; consequently, it is likely that they will enter the aquatic environment. The rate of degradation of naphthenate and a metal complex (cvobalt, lead, or calcium) is not known, but naphthenate salts are expected to be persistent. Chemical fate studies are recommended to provide information on the abiotic and biotic transformation rates of these chemicals.

The results of the recommended chemicals fate studies are important in determining the approach to the ecological effects testing of cobalt, lead, or calcium naphthenates. If dissociation does not occur, or occurs only partly, it will be necessary to test cobalt, lead, and calcium naphthenates to determine their toxicities. By contrast, if complete dissociation does occur, it will be necessary to determine only the toxicity of the naphthenate fraction, since the toxicities of the metal ions are already known. Acute toxicity studies on fish and aquatics invertebrates and toxicity tests on plants are recommended because of anticipated exposure and insufficient toxicity data.

Bioconcentration testing is recommended to characterize the bioconcentration potential for cobalt, lead, and calcium naphthenates.

2.2.c *2-Phenoxyethanol*

Summary of recommended studies. It is recommended that 2-phenoxyethanol be tested for the following:

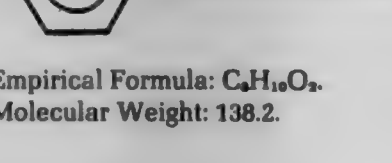
Health Effects: Reproductive effects, teratogenicity, short-term genotoxicity, subchronic toxicity.

Physical and Chemical Information

CAS number: 122–99–6.

Synonyms: Ethanol, 2-phenoxy- (CA index name); glycol monophenyl ether; β-hydroxyethyl phenyl ether; 1-hydroxy-2-phenoxyethane; phenyl Cellosolve®; Dowanol EP®

Structural Formula:



Empirical Formula: $C_8H_{10}O_2$.

Molecular Weight: 138.2.

Description: Colorless liquid with a slight rose odor (Dow Chemical Co., 1982).

Melting Point: 12° C (Rohm and Haas Co., 1982).

Boiling Point: 244.9° C (Dow Chemical Co., 1982).

Vapor Pressure: 0.03 mm Hg at 20° C (Dow Chemical Co., 1982).

Specific Gravity: 1.104 (25/25° C) (Dow Chemical Co., 1982).

Solubility in Water: 2.6 g/100 ml (Dow Chemical Co., 1982).

Solubility in Organic Solvents: Miscible with propylene glycol, ethanol, ether, benzene (Dow Chemical Co., 1982).

Log Octanol/Water Partition Coefficient: 1.20 (measured; Gilbert et al., 1978).

RATIONALE FOR RECOMMENDATIONS

I. *Exposure information—A. Production/use/disposal.*

The current industry estimate of 2-phenoxyethanol production is in excess of 5 million pounds annually. U.S. production of 2-phenoxyethanol in 1977 was reported in the TSCA Inventory to be from 1 million to 10 million pounds (EPA, 1982).

2-Phenoxyethanol is used primarily as a coalescing agent in latex paints (Dow Chemical Co., 1982) and as a solvent in paint removers, industrial cleaners and photographic processing (Borghi, 1982). A minor portion of total production is used as a carrier for the dyeing of polyester fibers, as an ink solvent for ballpoint and felt tip pens (Dow Chemical Co., 1982), as a preservative in cosmetics, and as a fragrance in household cleaners (Borghi, 1982). It is also used as an intermediate in the manufacture of an industrial surfactant (Rohm and Haas Co., 1982). The compound is also used in the synthesis of plasticizers, germicides, and pharmaceuticals (Hawley, 1977).

B. *Evidence for exposure.* In a 1972–74 survey, NIOSH estimated that 10,000 workers were potentially exposed to 2-phenoxyethanol in the workplace (NIOSH, 1982). Its use in paints and paint removers, household cleaners and various other consumer products indicates the potential for exposure of the general population to the compound.

II. *Chemical fate information.*

2-Phenoxyethanol is a relatively nonvolatile chemical that is expected to biodegrade in the environment and in waste treatment plants at environmentally relevant concentrations (Roesch and Dietrichs, 1971; Gilbert et al., 1977, 1978; Stickler, 1974). No chemical fate testing is recommended.

III. *Biological effects of concern to human health.—A. Toxicokinetics and metabolism.*

No information was found. 2-Phenoxyethanol is expected to be biotransformed to 2-phenoxyacetic acid by analogy with mono alkyl glycol ethers.

B. *Genotoxicity.* No explicit information on the genotoxicity of 2-phenoxyethanol was found. The compound was evaluated as a solvent for bacterial mutagenicity testing and was found to be too toxic for this use (Maron et al., 1981).

Two alkyl analogs of 2-phenoxyethanol have been tested for genotoxicity. 2-Ethoxyethanol was negative in the *Salmonella* assay, both with and without metabolic activation. It was positive for chromosomal aberrations and sister chromatid exchanges in Chinese hamster ovary cells. 2-Methoxyethanol induced an increased incidence of sex-linked recessive mutations in *Drosophila*, but was negative in the unscheduled DNA synthesis and rat bone marrow cytology assays. 2-Methoxyethanol caused sterility in rats in a dominant lethal assay and an increased incidence of abnormally shaped sperm in mice (NTP, 1982).

C. *Short term (acute) effects.* The acute oral LD_{50} in rodents is 1–4 g/kg of body weight (Smyth et al., 1941; Dow Chemical Co., 1982; American Cyanamid Co., 1982; Union Carbide Corp., 1982). The acute dermal LD_{50} in rats is 2.3–3.8 g/kg of-body weight (Union Carbide Corp., 1982; American Cyanamid Co., 1982), and in rabbits it is 5.0 g/kg of body weight (RTECS, 1980). A 7- or 8-hour inhalation exposure to air saturated with vapors of 2-phenoxyethanol produced no untoward effects or signs of intoxication in rats (Union Carbide Corp., 1982; American Cyanamid Co., 1982).

Various studies have been conducted that demonstrate the antimicrobial properties of the compound (Hall, 1981; Maron et al., 1981).

D. *Long term (chronic) effects.* No information was found.

E. *Reproductive effects and teratogenicity:* A 5 week oral feeding study conducted in mice on a series of ethylene glycol monoethers (glycol ethers) indicated that certain of these compounds produce significant testicular atrophy. 2-Phenoxyethanol produced slight tubular degeneration in the testes of one mouse; however, only 5 animals were tested at each of 3 dose levels (i.e., 500, 1,000 and 2,000 mg/kg) (Nagano, et al., 1979).

A review of the literature on reproductive toxicity of glycol ethers disclosed that a number are teratogenic and/or produce testicular atrophy or infertility in laboratory animals following treatment (Hardin, 1982).

In inhalation teratology assays, 2-methoxyethanol and 2-ethoxyethanol were found to be teratogenic and embryotoxic in laboratory animals. 2-Ethoxyethanol exhibited the same effects in rats when exposed by the dermal route (NTP, 1982).

Manufacturers of glycol ethers are also studying the inhalation toxicity of 2-methoxyethanol and 2-ethoxyethanol. 2-Methoxyethanol was found to be teratogenic and fetotoxic in rabbits, slightly fetotoxic in mice, and fetotoxic in rats (CMA, 1982, 1983). Results of the study of 2-ethoxyethanol have not yet been received.

F. *Rationale for health effects recommendations:* Consumer and worker exposure is expected from the use of 2-phenoxyethanol in consumer products and in industrial solvents.

In view of the teratogenic effects of a number of alkyl glycol ethers and the lack of such data on 2-phenoxyethanol, testing for teratogenicity is recommended. Testing of 2-phenoxyethanol for other reproductive effects is also recommended since the one reported study addressed only one indicator of reproductive effects, and the results were equivocal. The route of administration in the recommended studies should be given careful consideration.

Structurally related glycol ethers were positive in several genotoxicity test systems. Since no relevant data on 2-phenoxyethanol were found, a battery of short-term genotoxicity tests should also be conducted. Finally, subchronic-effects testing is recommended to permit a more thorough evaluation of the toxocity potential of the compound.

IV. *Ecological effects.*

2-Phenoxyethanol is expected to have low toxicity to aquatic organisms and is not expected to bioconcentrate. The compound is also expected to biodegrade readily. For these reasons, ecological effects testing is not recommended.

BILLING CODE 6560-50-M

[PF-328; PH-FRL 2370-1]

Certain Companies; BFC Chemicals, Inc. et al.; Pesticide Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide petitions relating to the establishment and/or amendment of tolerances for certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below:

Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF–328] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *PP 3F2879.* BFC Chemicals, Inc., 4311 Lancaster Pike, P.O. Box 2867, Wilmington, DE 19805. Proposes amending 40 CFR 180.402 by establishing tolerances for the combined residues of the herbicide diethatyl-ethyl and its metabolites (free and bound) determinable as the *N*-acetyl *N*-(2,6-diethylphenyl) glycine derivative in or on the commodities red beet, roots and tops at 0.2 part per million (ppm) and spinach at 1.0 ppm. The proposed analytical methods for determining residues is Raney nickel hydrogenolysis, derivatization, and gas chromatography. (PM–23, Richard Mountfort, 703–557–1830).

2. *PP 3F2883.* Merck & Co. Inc., P.O. Box 2000, Rahway, NJ 07065. Proposes amending 40 CFR 180.242 by establishing a tolerance for residues of the fungicide thiabendazole (2-(4-thiazolyl) benzimidazole in or on the commodity mushrooms at 40 ppm. The proposed analytical method for determining residues is spectrophotofluorometry. (PM–21, Henry Jacoby, 703–557–1900).

3. *PP 3F2882.* Merck & Co., Inc. Proposes amending 40 CFR 180.242 by increasing the established tolerance for residues of thiabendazole in or on potatoes (pre and post-H) from 3.0 to 8.0 ppm. The proposed analytical method for determining residues is spectrophotofluorometry. (PM–21, Henry Jacoby, 703–557–1900).

B. Amended Petition

PP 1F1105. Pennwalt Corp., Agricultural Division, Three Parkway, Philadelphia, PA 19102. EPA issued a notice published in the **Federal Register** of April 9, 1971 (37 FR 6848) which announced that Pennwalt Corp. had submitted pesticide petition 1F1105 to the Agency proposing the establishment of tolerances for negligible residues of the herbicide endothall (7-oxabicyclo[2.2.1]heptane-2,3-dicarboxylic acid) in or on the raw agricultural commodity sugar beets and in water at 0.2 ppm, resulting from the application of its dimethylalkylamine, potassium, or sodium salts as herbicides.

Pennwalt Corp. has amended the petition as follows:

1. Tolerances are proposed for residues of the herbicide endothall (7-oxabicyclo[2.2.1]heptane-2,3-dicarboxylic acid) resulting from application of its potassium, sodium, di-(*N,N*-dimethylakylamine) and mono-(*N,N*-dimethylalkylamine) salts wherein the alkyl group is the same as in the fatty acid of coconut oil in or on the following raw agricultural commodities:

Commmodities	Parts per million
Eggs	0.02
Fat, meat, and meat byproducts of cattle, goats, horses, sheep, and swine	0.02
Fish	0.1
Milk	0.02
Poultry	0.02
Sugar beet, roots	0.1
Sugar beet, tops	0.1

2. Tolerances are proposed for residues of the herbicide endothall (7-

oxabicyclo[2.2.1]heptane-2,3-dicarboxylic acid) resulting from application of its potassium, sodium, di-(*N,N*-dimethylalkylamine) and mono-(*N,N*-dimethylalkylamine) salts wherein the alkyl group is the same as in the fatty acid of coconut oil to fresh water canals, ditches, lakes, ponds and rivers for aquatic plant control in or on the following:

Commmodities	Parts per million
Avocados	0.1
Citrus	0.1
Cottonseed	0.1
Cucurbits	0.1
Forage grasses	1.0
Forage legumes	1.0
Fruiting vegetables	0.1
Grain crops	0.1
Hops	0.1
Leafy vegetables	0.1
Nuts	0.1
Pome fruits	0.1
Root crop vegetables	0.1
Seed and pod vegetables	0.1
Small fruits	0.1
Stone fruits	0.1

Where tolerances are established at higher levels from other uses of endothall on the subject crops, the higher tolerance applies also to residues resulting from these aquatic uses. The proposed analytical method for determining residues is microcoulometric gas chromatography using a nitrogen specific detector. (PM-23, Richard Mountfort, 703-557-1830).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136)).

Dated: May 17, 1983.

Announcement of Fuel Economy Retrofit Device Evaluation for Kamei Spoilers

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Fuel Economy Retrofit Device Evaluation.

SUMMARY: This document announces the completion of the EPA evaluation of the "Kamei Spoilers" under the provisions of Section 511 of the Motor Vehicle Information and Cost Savings Act. The notice also announces our findings, conclusions, and the availability of the report.

FOR FURTHER INFORMATION CONTACT: Merrill W. Korth, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105, Telephone: (313) 668-4299.

SUPPLEMENTARY INFORMATION:

I. Background

Section 511(b)(1) and Section 511(c) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2011(b)) require that:

(b)(1) Upon application of any manufacturer of a retrofit device (or prototype thereof), upon the request of the Federal Trade Commission pursuant to subsection (a), or upon his own motion, the EPA Administrator shall evaluate, in accordance with rules prescribed under subsection (d), any retrofit device to determine whether the retrofit device increases fuel economy and to determine whether the representations (if any) made with respect to such retrofit devices are accurate.

(c) The EPA Administrator shall publish in the **Federal Register** a summary of the results of all tests conducted under this section, together with the EPA Administrator's conclusions as to—

(1) the effect of any retrofit device on fuel economy;

(2) the effect of any such device on emissions of air pollutants; and

(3) any other information which the Administrator determines to be relevant in evaluating such device.

EPA published final regulations establishing procedures for conducting evaluations of fuel economy retrofit devices on March 23, 1979 [44 FR 17946].

II. Origin of Request for Evaluation, Device Descriptions and Report Identification

Kamei Spoilers

On March 5, 1982, the EPA received a request from Kamei USA, Inc. for evaluation of the Kamei Spoilers as a fuel saving device. This device is designed to reduce the aerodynamic drag forces retarding the vehicle and thereby improve fuel economy. The device is a plastic air dam that is installed beneath the front bumper to reduce the flow of air under the front of the vehicle.

Report: "EPA Evaluation of the Kamei Spoilers Under Section 511 of the Motor Vehicle Information and Cost Savings Act". Report number EPA-AA-TEB-511-83-6 contains the analysis and conclusions and consists of 33 pages.

III. Availability of Evaluation Reports.

Copies of these reports may be obtained from the National Technical Information Service by using the above report numbers. Address requests to: National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161, Telephone: (703) 487-4650 or FTS 737-4650.

IV. Summary of Evaluation

The evaluation of the Kamei Spoilers was based on the information submitted by the applicant and our engineering judgment. The overall conclusion is that the Kamei Spoilers have the potential to improve the fuel economy of some vehicles.

The amount of this fuel economy benefit depends on several factors. The most important is the percentage reduction in the drag force due to the spoiler. Vehicles for which the device is well matched will likely experience an increase in fuel economy. The second important factor is the type of driving cycle. The device will be more effective in highway driving than urban driving. Since a typical improvement in fuel economy would be one or two percent, it is unlikely the cost of the unit would be offset by fuel saving during the life of the vehicle.

Installation is quick and simple and could be accomplished by most owners.

Dated: May 23, 1983.

Charles L. Elkins,

Acting Assistant Administrator for Air, Noise, and Radiation.

BILLING CODE 6560-50-M

[OPP-31062; PH-FRL 2374-1]

Pet Chemicals, Inc.; Application to Conditionally Register a Pesticide Product Involving a Changed Use Pattern

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice

SUMMARY: This notice announces receipt of an application to conditionally register, or amend registration of, a pesticide product involving a changed use pattern pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comment by July 1, 1983.

ADDRESS: Written comments, identified by the document control number [OPP-

31062] and the file symbol, should be submitted to: William Miller, Product Manager (PM) 16, Registration Division (TS–767C), Office of Pesticide Programs, CM No. 2, Rm. 211, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: William Miller (703–557–2600).

SUPPLEMENTARY INFORMATION: Pet Chemicals, Inc., PO Box 660656, Miami Springs, FL 33166, has submitted an application to EPA to conditionally register, or amend registration of, the pesticide product Hill's Holiday Carpet Spray, EPA File Symbol 4758–RUT, containing the active ingredient *d*-limonene at 4.85 percent, involving a changed use pattern pursuant to the provisions of section 3(c)(4) of FIFRA. The application proposes that the product be classified for general use to include in its presently registered use the new outdoor use on fleas and ticks. Notice of receipt of this application does not imply a decision by the Agency on the application.

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice will be available in the product manageer's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing such comments telephone the product manager's office to ensure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended).

Dated: May 23, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–M

[PP 9G2160/T415; PH–FRL 2373–6]

Fluridone; Extension of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended the temporary tolerance for residues of the herbicide fluridone in or on the raw agricultural commodity fish.

DATE: This temporary tolerance expires June 1, 1984.

FOR FURTHER INFORMATION CONTACT: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 237, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1830).

SUPPLEMENTARY INFORMATION: EPA issued a notice, that was published in the **Federal Register** of March 17, 1981 (46 FR 17015), announcing the extension of a temporary tolerance for residues of the herbicide fluridone 1-methyl-3-phenyl-5-[3-(trifluoromethyl) phenyl]-4(1*H*)-pyridinone in or on the raw agricultural commodity fish at 0.1 part per million (ppm). The tolerance had been established in response to pesticide petition PP 9G2160, submitted by Elanco Products Co., 740 South Alabama St., Indianapolis, IN 46285. since then, the company has requested a further extension of the tolerance which EPA has granted. A related food additive petition, 9H5202 extending a food additive regulation for residues of the herbicide fluridone in or on potable water at 0.01 part per million was also submitted. This temporary tolerance has been extended to permit the continued marketing of the raw agricultural commodity named above when treated in accordance with the provisions of experimental use permit (1471–EUP–67), which is being extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that the extension of this temporary tolerance will protect the public health. Therefore, the temporary tolerance has been extended on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Elanco Products Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires June 1, 1984. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981, (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, 21 U.S.C 346a(j))).

Dated: May 23, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–M

[OPP–180622; PH–FRL 2373–8]

Emergency Exemptions; California et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions to the Army Corps of Engineers and the States listed below for the control of various pests. Also listed are eight crisis exemptions initiated by six States.

DATES: See each specific and crisis exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific and crisis exemption for the name of the contact person. The following information applies to all contact people: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. California Department of Food and Agriculture for the use of methiocarb on tomato and cucurbit seeds to repel birds; April 8, 1983 to January 25, 1984. (Libby Welch)

2. California Department of Food and Agriculture for the use of methamidophos on celery to control leafminers; April 23, 1983 to April 1, 1984. (Gene Asbury)

3. Delaware Department of Agriculture for the use of azinphos-methyl on carrots to control carrot weevils; April 15, 1983 to August 31, 1983. (Gene Asbury)

4. Delaware Department of Agriculture for the use of triadimefon on cucurbits to control powdery mildew; April 27, 1983 to October 31, 1983. (Libby Welch)

5. Idaho Department of Agriculture for the use of oxyfluorfen on dry bulb onions to control broadleaf weeds; April 8, 1983 to June 15, 1983. (Jim Tompkins)

6. Illinois Department of Agriculture for the use of oxyfluorfen on dry bulb onions to control broadleaf weeds; April 8, 1983 to December 31, 1983. (Jim Tompkins)

7. New Jersey Department of Environmental Protection for the use of aldicarb on eggplants to control Colorado potato beetles; April 8, 1983 to June 15, 1983. (Gene Asbury)

8. New Jersey Department of Environmental Protection for the use of triadimefon on cucurbits to control powdery mildew; April 27, 1983 to October 31, 1983. (Libby Welch)

9. Oregon Department of Agriculture for the use of methomyl on caneberries to control leafrollers, tortrix, and loopers; April 8, 1983 to September 30, 1983. (Jim Tompkins)

10. Oregon Department of Agriculture for the use of disulfoton on asparagus to control asparagus aphids; April 18, 1983 to October 31, 1983 (Gene Asbury)

11. Oregon Department of Agriculture for the use of traidimefon on sugar beets to control powdery mildew; April 21, 1983 to September 30, 1983. (Gene Asbury)

12. Texas Department of Agriculture for the use of triadimefon on cucurbits to control powdery mildew; April 27, 1983 to February 14, 1984. (Libby Welch)

13. Utah Department of Agriculture for the use of oxyfluorfen on dry bulb onions to control broadleaf weeds; April 8, 1983 to November 30, 1983. (Jim Tompkins)

14. Washington Department of Agriculture for the use of disulfoton on asparagus to control asparagus aphids; April 21, 1983 to October 31, 1983. (Gene Asbury)

15. Department of the Army, Corps of Engineers, for the use of dipotassium salt of endothall on Pat Mayse Lake, Texas, to control Eurasian watermilfoil; April 27, 1983 to April 27, 1984.(Libby Welch)

Crisis exemptions were initiated by the:

1. California Department of Food and Agriculture on April 6, 1983, for the use of 2-[1-(ethoxyimino) butyl]-5-2[-(ethylthio) propyl]-3-hydroxy-2-cyclohexen-1-one on onions grown for seed to control rye grass and wild oats. Since it was anticipated that this program would be needed for more than 15 days, California requested a specific exemption to continue it. The need for this program has ended. (Libby Welch)

2. California Department of Food and Agriculture on April 7, 1983, for the use of paraquat dichloride on strawberry nursery plants to control broadleaf and grassy weeds. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. The need for this program is expected to last until May 31, 1983. (Gene Asbury)

3. California Department of Food and Agriculture on April 1, 1983, for the use of metalaxyl on almonds (non-bearing) to control *Phytophthora* crown and root rot. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. The program will end on March 30, 1984. (Libby Welch)

4. Florida Department of Agriculture and Consumer Services on March 16, 1983, for the use of cyromazine on tomatoes to control leafminers. Since it was anticipated that this program would be needed for more than 15 days, Florida has requested a specific exemption to continue it. The need for this program is expected to last until June 30, 1984. (Jack E. Housenger)

5. Idaho Department of Agriculture on April 11, 1983, for the use of metalaxyl on hops to control downy mildew. Since it was anticipated that this program would be needed for more than 15 days, Idaho has requested a specific exemption to continue it. the need for this program is expected to last until July 15, 1983. (Jack E. Housenger)

6. Maryland Department of Agriculture on April 22, 1983, for the use of ethephon on wheat and barley to control lodging. Since it was anticipated that this program would be needed for more than 15 days, Maryland has requested a specific exemption to continue it. The need for this program is expected to last until June 30, 1983. (Libby Welch)

7. Oklahoma Department of Agriculture on April 7, 1983, for the use of metalaxyl on spinach to control mildew. The program ended on April 22, 1983. (Libby Welch)

8. Oregon Department of Agriculture on April 6, 1983, for the use of metalaxyl on raspberry plants to control raspberry root rot. Since it was anticipated that this program would be needed for more than 15 days, Oregon has requested a specific exemption to continue it. The need for this program is expected to last until November 30, 1983. (Gene Asbury)

(Sec. 18, as amended, 92 Stat. 819 (7 U.S.C. 136)).

Dated: May 20, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

BILLING CODE 6560–50–M

[OPP–50596; PH–FRL 2373–4]

Issuance of Experimental Use Permits; BFC Chemicals et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each experimental use permit at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

45639–EUP–12. Issuance. BFC Chemicals, Inc., 4311 Lancaster Pike, P.O. Box 2867, Wilmington, DE 19805. This experimental use permit allows the use of 100 pounds of the herbicide ethyl

4-chloro-2-oxo-3 (2H)-benzothiazoleacetate) on soybeans to evaluate the control of weeds. A total of 200 acres are involved; the program is authorized only in the States of Alabama, Arkansas, Georgia, Illinois, Indiana, Iowa, Michigan, Mississippi, Missouri, Nebraska, South Carolina, and Tennessee. The experimental use permit is effective from May 4, 1983 to May 1, 1984. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (Richard Mountfort, PM 23, Rm. 237, CM No. 2 (703–557–1830)).

1471–EUP–67. Extension. Elanco Products Company, 740 S. Alabama St., Indianapolis, IN 46285. This experimental use permit allows the use of 8,700 pounds of the herbicide fluridone to be applied to aquatic plant management systems to evaluate the control of aquatic weeds. A total of 4,350 acres are involved; the program is authorized in the States of Alabama, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Vermont, Virginia, Washington, and West Virginia. The experimental use permit is effective from May 6, 1983 to June 1, 1984. A temporary tolerance for residues of the active ingredient in or on fish has been established. A food additive regulation for residues of the active ingredient in potable water has been established (21 CFR 193.219). (Richard Mountfort, PM 23, Rm. 237, CM No. 2 (703–557–1830)).

1471–EUP–82. Issuance. Elanco Products Company, 740 S. Alabama St., Indianapolis, IN 46285. This experimental use permit allows 1,600 pounds of the growth regulator alpha-(1-methylethyl)-alpha-[4-(trifluoromethoxy)phenyl]-5-pyrimidinemethanol on turf grasses to evaluate turf grass quality and the reduction in mowing frequency. A total of 1,280 acres are involved; the program is authorized in all 50 States except Alaska, Hawaii, Kansas, Maine, Montana, North Dakota, South Dakota, Vermont, and Wyoming. The experimental use permit is effective from May 4, 1983 to May 4, 1985. (Robert Taylor, PM 25, Rm. 245, CM No. 2 (703–557–1800)).

3125–EUP–185. Issuance. Mobay Chemical Corporation, P.O. Box 4913, Kansas City, MO 64120. This experimental use permit allows the use of four pounds of the insect growth regulator 2-chloro-N-[[[4-(trifluoromethoxy)phenyl] amino]carbonyl] benzamide on cotton to evaluate the control of the boll weevil. A total of 10 acres are involved; the program is authorized only in the State of South Carolina. The experimental use permit is effective from May 6, 1983 to May 6, 1984. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (Timothy Gardner, PM 17, Rm. 209, CM No. 2 (703–557–2690)).

4581–EUP–35. Issuance. Pennwalt Corporation, Three Parkway, Philadelphia, PA 19102. This experimental use permit allows the use of 1,626 pounds of the fungicide thiophanate-methyl on onions and wheat to evaluate the control of various diseases. A total of 2,317 acres are involved; the program is authorized only in the States of California, Colorado, Idaho, Illinois, Indiana, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, New York, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, Washington, and Wisconsin. The experimental use permit is effective from May 2, 1983 to January 1, 1985. A temporary tolerance for residues of the active ingredient in or on onions (dry and green bulbs) and wheat (grain, straw, and forage) has been established. (Henry Jacoby, PM 21, Rm. 229, CM No. 2, (703–557–1900))

359–EUP–63. Issuance. Rhone-Poulenc, Inc., P.O. Box 125, Black Horse Lane, Monmouth Junction, NJ 08825. This experimental use permit allows the use of 3,500 pounds of the fungicide 3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide on lettuce to evaluate the control of various diseases. A total of 2,000 acres are involved; the program is authorized only in the States of Arizona, California, Florida, and New York. The experimental use permit is effective from May 2, 1983 to December 31, 1984. A temporary tolerance for residues of the active ingredient in or on lettuce has been established. (Henry Jacoby, PM 21, Rm. 229, CM No. 2, (703–557–1900))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended. (7 U.S.C. 136))

Dated: May 23, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

FEDERAL HOME LOAN BANK BOARD

[No. AC–237]

Land of Lincoln Savings and Loan Association, Berwyn, Illinois; Approval of Post-Approval Amendment to Mutual-To-Stock Conversion Application; Final Action

Dated: May 25, 1983.

Notice is hereby given that on May 12, 1983, the General Counsel of the Federal Home Loan Bank Board ("Board"), acting pursuant to authority delegated to him by the Board, approved post-approval amendment to Sections 24 and 25 of the Plan of Conversion of Land of Lincoln Savings and Loan Association, Berwyn, Illinois. The Application for Conversion had been approved by the Board by Resolution No. 79–361, dated June 21, 1979. Copies of the Application and all amendments thereto are available for inspection at the Secretariat of the Board, 1700 G Street, NW., Washington, D.C. 20552, and at the Office of the Supervisory Agent, Federal Home Loan Bank of Chicago, 111 East Wacker Drive, Suite 800, Chicago, Illinois 60601.

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days

after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No. T–3570–2.

Title: Matson Terminals, Inc./ McCabe, Hamilton & Renny Co., Ltd. Terminal Equipment Lease.

Parties: Matson Terminals, Inc. and McCabe, Hamilton & Renny Co., Ltd.

Synopsis: Agreement No. T–3570–2 amends the basic agreement by revising the insurance and redelivery requirements concerning the leased equipment provided for in the agreement.

Filing party: Mr. Peter P. Wilson, Matson Navigation Company, 333 Market Street, P.O. Box 7452, San Francisco, California 94120.

Agreement No. T–3844–7.

Title: Port of Seattle/Harbor Island Marine Associates Amended Lease Agreement.

Parties: Port of Seattle (Port) and Harbor Island Marine Associates (HIMA).

Synopsis: Agreement No. T–3844–7 amends the basic agreement by extending the Port's termination rights from May 1, 1983 to August 1, 1983, to allow HIMA, the developer of the facilities, additional time to obtain the Corps of Engineers permit necessary for construction of the facilities mentioned in the agreement.

Filing party: H. H. Wittren, Associate Director of Real Estate, Leasing, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Agreement No.: T–3957–3.

Title: Port of Oakland/Neptune Orient Lines, Ltd. Preferential Assignment Amendment.

Parties: Port of Oakland (Port) and Neptune Orient Lines, Ltd. (NOL).

Synopsis: Agreement No. T–3957–3 modifies the basic agreement between the parties whereby the Port preferentially assigned certain marine terminal facilities in the Port's Outer Harbor Terminal Area to NOL. Agreement No. T–3957–3 reduces the assigned premises from 22.5909 acres to 4.6281 acres, and describes an additional area which area NOL will have a nonexclusive preferential right to use an 18 acres portion for the uses as set forth in Agreement No. T–3957. Agreement No. T–3957–3 amends the secondary use provisions to limit NOL's sharing in secondary use revenues to dockage. It provides a per container payment to the Port of $22 in event NOL's throughput revenue in any year exceeds 36,000 container. If NOL's use exceeds a volume of 43,200 containers such use may only be accomplished under a further agreement to be filed with the Federal Maritime Commission.

Filing party: John E. Nolan, Assistant Port Attorney, Port of Oakland, 66 Jack London Square, P.O. Box 2064, Oakland, California 94604.

Agreement No.: T–4067–1.

Title: Port of Oakland/Crescent Wharf & Warehouse Company Management Agreement Modification.

Parties: Port of Oakland (Port) and Crescent Wharf and Warehouse Company (Crescent).

Synopsis: Agreement No. T–4067–1 modifies the basic agreement by changing the description of the premises at Berth No. 6 in the Port's Outer Harbor Area, to add thereto a portion of the Berth 5 area, and proportionally increases Crescent's minimum annual tariff quota from 410,000 revenue tons to 650,000 revenue tons. The amended agreement also provides that if Neptune Orient Lines, Ltd., during the term of its Preferential Assignment Agreement No. T–3957 terminated its contracts for stevedoring and terminal services with Crescent, Agreement No. T–4067–1 shall become null and void.

Filing party: John E. Nolan, Assistant Port Attorney, Port of Oakland, 66 Jack London Square, P.O. Box 2064, Oakland, California 94604.

Agreement No. T–4117.

Title: VPA/MIT Lease Assignment.

Parties: Virginia Port Authority (VPA)/Maritime Terminals, Inc. (MTI).

Synopsis: Agreement No. T–4117 is an assignment of a lease between VPA and MTI to Virginia International Terminals, Inc., non-profit operating subsidiary of VPA. The lease term will end on December 31, 1992. Among its provisions the agreement required VPA's approval of MIT's tariff charges and rates.

Filing party: J. Stanley Payne, Jr., General Counsel, Commonwealth of Virginia, Virginia Port Authority, 1600 Maritime Tower, Norfolk, Virginia 23510.

Agreement No. T–4118.

Title: VPA/PTI Lease Assignment.

Parties: Virginia Port Authority (VPA)/Portsmouth Terminals, Inc. (PTI).

Synopsis: Agreement No. T–4118 is an assignment of a lease between VPA and PTI to Virginia International Terminals, Inc., a non-profit operating subsidiary of VPA. The lease term will end on April 30, 1985. Among its provisions the agreement requires VPA's approval of PTI's tariff charges and rates.

Filing party: J. Stanley Payne, Jr., General Counsel, Commonwealth of Virginia, Virginia Port Authority, 1600 Maritime Tower, Norfolk, Virginia 23510.

Agreement No. T–4119.

Title: VPA/PAT Lease Assignment.

Parties: Virginia Port Authority (VPA)/Port Authority Terminals, Inc., (PAT).

Synopsis: Agreement No. T–4119 is an assignment of a lease between VPA and PAT to Virginia International Terminals, Inc., a non-profit operating subsidiary of VPA. The lease term will end on April 30, 1985. Among its provisions the agreement requires VPA's approval of PAT's tariff charges and rates.

Filing party: J. Stanley Payne, Jr., General Counsel, Commonwealth of Virginia, Virginia Port Authority, 1600 Maritime Tower, Norfolk, Virginia 23510.

Agreement No. T–4123.

Title: City of Los Angeles/Crescent Wharf and Warehouse Company Non-Exclusive Berth Assignment.

Parties: City of Los Angeles (City) and Crescent Wharf and Warehouse Company (Crescent).

Synopsis: Agreement No. T–4123 provides that Crescent shall have the non-exclusive right for use of Berth No. 54 in the Port of Los Angeles. Crescent shall use the premises for berthing and mooring of vessels, handling of passengers and the assembling, distributing, loading and unloading of cargo on and form such vessels. Crescent shall guarantee annual tariff revenue of $350,000. The agreement will become effective the day following approval by the Commission, and the term is for 30 day periods revocable on 30 days' notice to Crescent.

Filing party: David McKenna, Deputy City Attorney, Office of the City Attorney, Harbor Division, P.O. Box 151, San Pedro, California 90731.

Agreement No. T–4124.

Title: Port of Tacoma/International Transportation Service, Inc. Lease and Operating Agreement.

Parties: Port of Tacoma (Port) and International Transportation Service, Inc. (ITSI).

Synopsis: Agreement No. T–4124 provides for the lease by Port to ITSI of 13 acres and the preferential use of a wharf located at Terminal 7–D in the Port of Tacoma. ITSI will use the premises for loading and discharging containers from its customers' vessels and barges. The agreement also covers the use of various cranes and equipment. The term is for two years and seven months with two 5-year option periods. If ITSI's operations

require a second berth, Port will make available adjoining Berth 7C. ITSI will assess charges at the premises subject to the Port's terminal tariff.

Filing party: Richard Dale Smith, Executive Director, Port of Tacoma, P.O. Box 1837, Tacoma, Washington 98401.

Dated: May 26, 1983.

By order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 2303]

Gray International Forwarding, Inc.; Reinstatement of License

By Notice served and published in the **Federal Register**, Independent Ocean Freight Forwarder License No. 2303 was revoked, effective March 25, 1983, for failure to maintain a valid surety bond on file with the Commission. The Notice of Revocation was served on April 1, 1983.

An appropriate surety bond has been received in favor of Gray International Forwarding, Inc., and compliance pursuant to section 44, Shipping Act, 1916, and § 510.15 of the Commission's General Order 4 has been received.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in § 10.01(a) of Commission Order No. 1 (Revised), dated November 12, 1981, Independent Ocean Freight Forwarder License No. 2303 shall be reissued to Gray International Forwarding, Inc. effective May 17, 1983. A copy of this notice shall be published in the **Federal Register** and served upon Gray International Forwarding, Inc.

Albert J. Klingel, Jr.,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Bank Holding companies; Proposed de Novo Nonbank Activities

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *James Madison Limited,* Washington, D.C. (real and personal property leasing activities; Maryland, Virginia, Washington, D.C.); To engage through its subsidiary, James Madison leasing corporation, in the following activities: engaging generally in the business of leasing real and personal property and acting as agent, broker or adviser in leasing such property where the lease is to serve as the functional equivalent of an extension of credit and is on a nonoperating basis. These activities would be conducted from an office in Washington, D.C. The geographic area to be served would be Maryland, Virginia and Washington, D.C. Comments on this application must be received not later than June 22, 1983.

2. *James Madison Limited,* Washington, D.C. (data processing; United States): To engage, through a *de novo* subsidiary, JML Communications, Inc., in providing data processing and data transmission services, data bases or facilities (including data processing and data transmission hardware, software, documentation and operating personnel) for the internal operation of the holding company or its subsidiaries; providing to others data processing and transmission services, facilities, data bases or access to such services, facilities or data bases by any technologically feasible means; and providing software byproducts of permissible data processing and transmission activities. These activities would be conducted throughout the United States and performed from offices in Washington, D.C. Comments on this application must be received not later than June 22, 1983.

B. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Texas Commerce Bancshares, Inc.*, Houston, Texas (leasing activities with respect to real and personal property; Texas): To engage *de novo* through its subsidiary, Texas Commerce Bancshares Leasing Company in acquiring and leasing real and personal property as provided for in 12 CFR 225.4(a)(b) (i) and (ii) throughout the Gulf coast area, principally, and, secondarily worldwide through establishment of a wholly-owned subsidiary corporation to be located in Harris County, Texas. Comments on this application must be received not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 25, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14515 Filed 5-31-83; 8:45 am]

BILLING CODE 6210-01-M

Fidelcor, Inc.; Proposed Retention of the Philadelphia Business Operations of Dorman and Wilson, Inc.

Fidelcor, Inc., Rosemont, Pennsylvania, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to retain the assets of the Philadelphia office of Dorman and Wilson, Inc., White Plains, New York, previously acquired through its subsidiary, Latimer and Buck, Inc.

Applicant states that through this acquisition it will continue to engage, through its subsidiary, in the business of mortgage banking. These activities would be performed from offices of Applicant's subsidiary in Philadelphia, Pennsylvania, and the geographic area to be served is primarily Delaware, New Jersey, and Pennsylvania. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Philadelphia.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 25, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14513 Filed 5-31-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of a Bank Holding Company; Miami Citizens Bancorp

The company listed in this notice has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Cleveland (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Miami Citizens Bancorp*, Piqua, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of The Miami Citizens National Bank & Trust Company, Piqua, Ohio. Comments on this application must be received not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 25, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules; Allen & Co. et al.

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) Transaction No. 83-0273, Allen & Company's proposed acquisition of voting securities of Empire, Inc.	May 3, 1983.
(2) Transaction No. 83-0310, Oconomowoc Canning Co.'s proposed acquisition of certain assets of Stokely-Van Camp, Inc.	May 18, 1983
(3) Transaction No. 83-0279, Powell Duffryn PLC's proposed acquisition of all voting securities of Hiller Investments Inc. (D. Kenneth Broadwell, UPE).	May 6, 1983.
(4) Transaction No. 83-0297, Esmark, Inc.'s proposed acquisition of all voting securities of Almay, Inc.	May 5, 1983.
(5) Transaction No. 83-0313, David H. Monnich's proposed acquisition of all voting securities of Southwest Fabricating & Welding Co., Inc., and certain assets of I. U. International Corp.	May 10, 1983.
(6) Transaction No. 83-0280, The Continental Group, Inc.'s proposed acquisition of all voting securities of American Agency Life Insurance (Hanover Holdings, Inc., Vereinigte Haftpflicht Versecherung, UPE).	May 6, 1983
(7) Transaction No. 83-0294, CTS Corp.'s proposed acquisition of all voting securities of Micro Peripherals, Inc.	May 12, 1983.
(8) Transaction No. 83-0304, The LTV Corp.'s proposed acquisition of voting securities of Sierra Corp.	May 12, 1983.

Transaction	Waiting period terminated effective
(9) Transaction No. 83-0312, National Convenience Stores, Inc.'s proposed acquisition of all assets and certain voting securities of Colonial Food Stores, Inc.	May 12, 1983.
(10) Transaction No. 83-0320, Simplicity Pattern Co.'s proposed acquisition of certain voting securities of Twin Fair, Inc.	May 16, 1983.
(11) Transaction No 83-0325, Rowntree Mackintosh plc's proposed acquisition of certain assets of General Mills, Inc.	May 16, 1983
(12) Transaction No. 83-0298, CSP Operations, Inc.'s, (Clifford S. Perlman, UPE) proposed acquisition of certain assets of Dunes Hotels & Casinos, Inc.	May 16, 1983.
(13) Transaction No. 83-0326, CSP Operations, Inc.'s (Stuart Z. Perlman, UPE) proposed acquisition of certain assets of Dunes Hotels & Casinos, Inc.	May 16, 1983
(14) Transaction No. 83-0318, Litton Industries, Inc.'s proposed acquisition of all voting securities of International Laser Systems, Inc. (Martin Marietta Corp., UPE).	May 17, 1983.
(15) Transaction No. 83-0314, DWG Corp.'s proposed acquisition of all voting securities of Granteville Co.	May 17, 1983

FOR FURTHER INFORMATION CONTACT:
Patricia A. Foster, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580, (202) 523-3894.

By direction of the Commission.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Social Security Administration; Statement of Organization, Functions and Delegations of Authority

Part S of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (HHS) covers the Social Security Administration (SSA). Notice is given that Part S is being amended to reflect functional and organizational realignments required to facilitate the fulfillment of the mission of the Office of Family Assistance (OFA). A summary of the realignments is as follows:

The Office of Management and Finance (OMF) has been divided into two offices—the Office of Financial Management (OFM) with three supporting divisions, and the Office of Management and Administrative Services (OMAS) with two supporting divisions. The Office of Intergovernmental Communications (OIC) retains a two-division structure; however, one of the divisions is retitled. The program directives function is transferred to the Office of Policy and Evaluation (OPE).

The Office of Policy and Evaluation, Division of Research, Evaluation and Statistics (DRES) function is amended to reflect responsibility for the Work Incentives (WIN) Demonstration Project and for providing technical assistance to OFA central office components, as well as regional offices and States. The Office of Energy Assistance (OEA) function is rewritten to more clearly reflect the functional responsibility. The Office of the Assistant Regional Commissioner for Family Assistance is removed from the Office of the Regional Commissioner and established as the Office of Regional Family Assistance, reporting directly to the Associate Commissioner for Family Assistance.

Sec. SDB.00 *Office of Regional Commissioner—(Mission):*

Delete that portion of the narrative material which reads: "the Aid to Families with Dependent Children (AFDC) program, the program for aid to the aged, blind and disabled in Guam (Region IX), Puerto Rico and the Virgin Islands (Region II); and the U.S. Repatriation program."

Sec. SDB.10 *Office of Regional Commissioner—(Organization):*

Delete Subsection E.; reletter Subsections F. and G. as E. and F.

Sec. SDB.20 *Office of Regional Commissioner—(Functions):*

Delete Subsection E.; reletter Subsections F. and G. as E. and F.

Sec. SF.10 *Office of Family Assistance—(Organization):*

Retitle Subsection E.2 to read: E.2. The Division of Inquiries and Public Affairs (SFA4)

Retitle Subsection H. to read: H. The Office of Financial Management (SFM).

Retitle Subsection H.1. to read: H.1. The Division of Budget (SFM1).

Retitle Subsection H.2. to read: H.2. The Division of Grants Administrative Review and Policy (SFM2).

Add Subsection H.3.: H.3. The Division of Grants Management (SFM3).

Add Subsection J.: J. The Office of Management and Administrative Services (SFN).

Add Subsection J.1.: J.1. The Division of Management Analysis and Planning (SFN1).

Add Subsection J.2.: J.2. The Division of Administrative Services (SFN2).

Add Subsection K.: K. The Office of Regional Family Assistance (SF-F 1-X).

SF.20 *Office of Family Assistance—(Functions):*

Change Subsection E. to read: E. The Office of Intergovernmental Communications (SFA) serves as the focal point for developing uniform OFA policy regarding external relations with States, regions, Federal agencies, Congress, special interest groups and the public, and provides policy development for the U.S. Repatriation Program and the State emergency welfare preparedness.

1. *The Division of Welfare Management Institute (SFA3):*

a. Directs and coordinates national welfare and energy assistance publication programs, informing States and other organizations of program, technological and management developments. Provides a national welfare management information reference service.

b. Plans, conducts and coordinates national conferences, workshops and forums to address welfare and energy policy, operational and management issues.

c. Maintains a library consisting of national welfare, energy assistance and related program materials for research and analysis purposes. Solicits new information, catalogs and controls publications/references and distributes material to appropriate components.

d. Provides oversight of central office relationships with regional offices to insure effective operation, including the dissemination of information to and from the regions.

e. Serves as focal point for the development of uniform OFA policy regarding external relations with Federal agencies, States and special interest groups.

2. *The Division of Inquiries and Public Affairs (SFA4):*

a. Establishes and assesses policy for answering public, Congressional and other inquiries. Receives, controls and prepares replies to all routine public, Congressional and other inquiries on national welfare and energy issues. Performs necessary technical and general research on inquiries dealing with all aspects of OFA. Coordinates inquiries requiring specialized technical knowledge with appropriate components.

b. Develops national press strategy based on new and ongoing welfare and energy program events. Coordinates related press activities. Prepares and edits press items for national release.

c. Serves as focal point for OFA relations with Congress in regard to welfare, energy and related program issues.

d. In coordination with other components, provides advisory and

consultative services to Federal agencies, States, Congress and special interest groups on welfare and energy program initiatives.

Add paragraphs g. and h. to Subsection F.1.:

g. Reviews and coordinates preparations and publications of welfare and energy assistance operational instructions with national distribution to assure consistency, lack of duplication, receipt and access to such materials. Directs and coordinates the issuance process for public assistance program regulations and program instructions for clarifying national welfare and energy policies.

h. Establishes requirements for submission and review of State plans and amendments. Evaluates State plan materials and related policy interpretations to assess external impact and program consistency. Maintains reference center where State plans are located.

Change paragraph e. in Subsection F.2. to read:

e. Manages application review process for, and monitors and evaluates WIN Demonstrations.

Add paragraph f. to Subsection F.2.:

f. Provides technical assistance and consultation to OFA components, regional offices and States on evaluation, statistical analysis and related matters.

Change Subsection H. to read:

H. *The Office of Financial Management (SFM)* develops and directs the financial policies, budgets and controls necessary for the implementation and execution of OFA programs.

1. *The Division of Budget (SFM1):*

a. Develops OFA budgetary policies and procedures, and establishes systems for budget development and control, fund control, allotments and allowances.

b. Prepares, presents and executes the total OFA budget.

c. Reviews State budget forecasts, expenditure reports and related financial management activities; analyzes the consequences of State funding needs on the Federal budget.

d. Analyzes and presents cost data for budget formulation.

2. *The Division of Grants Administration Review and Policy (SFM2):*

a. Establishes and issues public assistance program fiscal and accounting policies and procedures.

b. Manages the procedures for making disallowances under the public assistance programs, and develops OFA position regarding amounts recommended for disallowances.

c. Provides liaison and coordination for OFA actions on audit reports; negotiates audit findings concerning fiscal matters with GAO and HHS Audit Agency.

3. *The Division of Grants Management (SFM3):*

a. Exercises financial control over grants to States for aid provided under public assistance programs.

b. Performs reviews to assure that State fiscal operations meet the requirements of their State plans and Federal regulations, and that decisions on expenditures are properly documented and technically sound.

c. Provides training, technical assistance and guidance to OFA regional components on Federal/State financial matters.

Change Subsection I. to read:

I. *The Office of Energy Assistance (SFJ)* administers programs to provide Low Income Home Energy Assistance.

1. *The Division of Energy Policy and Evaluation (SFJ1):*

a. Develops guidelines and policies to provide direction to States, Territories and Indian Tribes in administering the Low Income Home Energy Assistance Program.

b. Prepares, analyzes and recommends specific proposals for new legislation.

c. Identifies and develops research and evaluation priorities; coordinates inhouse research effort with other Federal and State agencies; develops, negotiates and monitors research and evaluation contracts.

d. Develops statistical information regarding State plan characteristics, energy consumption, fuel costs and housing demographic characteristics.

e. Assesses impact of research and evaluation findings and statistical data in terms of program direction.

f. Oversees and coordinates investigations of allegations of use of funds contrary to the statute or State plan.

2. *The Division of Energy Grants and Program Assistance (SFJ2):*

a. Administers grants to States, Territories and Indian Tribes under the Low Income Home Energy Assistance Program.

b. Facilitates the exchange of information among States, Tribes and Territories to assist them in developing energy program policies and operational procedures.

c. Conducts reviews of grantee compliance with the statute, regulations and plan, as required by statute.

d. Compiles information on grantee activities and related energy assistance issues, and serves as an informational resource for grantees.

Add Subsections J. and K.:

J. *The Office of Management and Administrative Services (SFN)* provides management support and analysis and administrative support for OFA, including personnel, training, management analysis and planning, facilities, space and equipment needs, and management services for forms, contracts, publications, mail, printing, procurement, travel, safety, records and property management.

1. *The Division of Management Analysis and Planning (SFN1):*

a. Develops a coordinated and comprehensive program for identifying major OFA operational short- and long-range planning objectives, and monitors the implementation of these goals.

b. Conducts onsite comprehensive appraisals for management and operations of OFA components.

c. Coordinates management/program audits external to OFA.

d. Develops strategies and implementation plans for special projects.

2. *The Division of Administrative Services (SFN2):*

a. Provides personal and personnel management support for OFA in accordance with SSA policies and procedures, and functions as the liaison with the Office of Human Resources, SSA.

b. Analyzes the organizational effectiveness of OFA components and insures uniform and effective work force utilization and position management.

c. Analyzes OFA training needs and provides a comprehensive and cost-effective training program for the OFA organization.

K. *The Office of Regional Family Assistance (SF–F 1–X):*

1. Provides program leadership and technical direction for family assistance program activities in the region. Issues regional operational policies and procedures necessary to insure implementation of national family assistance program policies.

2. Conducts visits to, and ongoing liaison with, State agencies to determine the effectiveness of family assistance policies and procedures, and to provide technical assistance in the resolution of operational problems. Evaluates family assistance program effectiveness regionwide. Plans, directs and coordinates regional activities with State and local entities. Negotiates with State and local authorities on State plans, plans amendments and recommendations, and recommends approval or disapproval to the appropriate SSA official.

3. Directs and coordinates a program of financial management, including the review and evaluation of grant award requests from States. Recommends approval or disapproval of these requests. Reviews State expenditure estimates and reports, and recommends approval or disapproval. Provides overview and assistance to State agencies in implementing major initiatives required by family assistance policies on financial management.

Dated: May 20, 1983.

Margaret M. Heckler,

Secretary of Health and Human Services.

BILLING CODE 4110-07-M

Social Security Administration; Statement of Organization, Functions and Delegations of Authority

Part S of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (HHS) covers the Social Security Administration (SSA). (44 FR 17218 of March 21, 1979 and last amended at 46 FR 41215 on August 14, 1981.) Notice is given that Part S as published in the Federal Register is being amended to reflect the realignment and consolidation of program and policy functions under the Deputy Commissioner of Social Security, Programs and Policy. Accordingly, Chapter SJ is changed to reflect the abolishment of the Office of Operational Policy and Procedures. Chapter SR reflects the realignment of policy functions.

Three major program-focused offices are established, each headed by an Associate Commissioner. The three new program offices are: (1) The Office of Disability Insurance (ODI) with responsibility for the planning and development of studies and the evaluation of operational policies, standards and instructions for the disability insurance program, (2) the Office of Supplemental Security Income (OCCI) with responsibility for the development, coordination and promulgation of SSI operational policy and procedures, and (3) the Office of Retirement and Survivors Insurance (ORSI) with responsibility for the development, coordination and promulgation of Retirement and Survivors Insurance operational policy and procedures. In addition, the present Office of Policy (SR) is realigned to include three major policy-focused offices. The three new policy-focused offices are: (1) the Office of Research, Statistics and International Policy with responsibility for planning and directing international program policy and conducting SSA's research and statistical program (these offices are currently in the Office of Policy and are being combined for efficiency and better coordination), (2) the Office of Legislative and Regulatory Policy with responsibility for developing and conducting the legislative planning program of SSA remains intact and in the Office of Policy and (3) a new Office of Policy Coordination, Regulations and Program Directives with responsibility for coordinating interrelated policies, developing and promulgating regulations, and developing compatible and consistent instructional materials. Broadly stated, the three new program offices are a merger and realignment of distinct program functions, which were located in the abolished Office of Operational Policy and Procedures and the existing Office of Policy. The new Office of Policy includes a consolidation of existing policy functions and a transfer of regulatory and instructional directives functions from the former Office of Operational Policy and Procedures. This realignment/consolidation of functions into distinct program and policy functions provides for a more effective and efficient organization.

The new material and changes are as follows:

Sec. S.10 *The Social Security Administration—(Organization):*

Retitle Subsection H. to read: H. The Office of Disability Insurance ( ).

Add:

Subsection: S. The Office of Supplemental Security Income ( ).

Add:

Subsection: T. The Office of Retirement and Survivors Insurance ( ).

Chapter SJ The Office of Operational Policy and Procedures is deleted. The new material for the Office of Disability Insurance reads as follows: Chapter SJ The Office of Disability Insurance:

Sec. SJ.00 *The Office of Disability Insurance—(Mission):*

The Office of Disability Insurance plans, develops, studies and evaluates the operational policies, standards and instructions for the Disability Insurance (DI) program. Develops and promulgates policies and guidelines for use by State, DDS's and VR and VR agencies in implementing the disability provisions of the Social Security Act; provides operational policy advice and technical support to regional offices and central office components in the administration of disability insurance. Evaluates the effects of proposed legislation and policies being initiated by SSA's Office of Policy, and of legislation pending before Congress, to determine disability operational policy or program administration impact. This Office plans and directs a continuing national economic and social survey program of the current impact and future needs of the DI program. The Office ensures that interrelated policy areas are coordinated. The Office also serves as the focal point of operational policy for the DI program.

Sec. SJ.10 *The Office of Disability Insurance—(Organization):*

The Office of Disability Insurance, under the leadership of the Associated Commissioner for Disability Insurance includes:

A. The Associated Commissioner for Disability Insurance ( ).

B. The Deputy Associate Commissioner for Disability Insurance ( )

C. The Immediate Office of the Associate Commissioner for Disability Insurance ( )

D. The Professional Relations Staff ( )

E. The Medical Consultant Staff ( )

F. The Division of Federal/State Programs ( )

G. The Division of Pre-Adjudicative Policy ( )

H. The Division of Post-Adjudicative and Technical Policy ( )

I. The Division of Rehabilitation Programs ( )

J. The Division of Disability Studies ( )

Sec. SJ. 20 *The Office of Disability Insurance—(Functions):*

A. *The Associate Commissioner for Disability Insurance ( )* is directly responsible to the Deputy Commissioner for carrying out ODI's mission and provides general supervision to the major components of ODI.

B. *The Deputy Associate Commissioner for Disability Insurance ( )* assists the Associate Commissioner in carrying out his/her responsibilities and performs other duties as the Associate Commissioner may prescribe.

C. *The Immediate Office of the Associate Commissioner for Disability Insurance ( )* provides the Associate Commissioner and the Deputy Associate Commissioner with staff assistance on a full range of their responsibilities and helps coordinate the activities of ODI components.

D. *The Professional Relations Staff ( ):*

1. Carries out professional relations with national medical and allied professional organizations and special

interest organizations concerned with disability programs.

2. Plans, directs and coordinates the development of national instructions and material for engaging the participation of professional medical and health services resources in the disability evaluation process.

3. Coordinates the development of regional professional relations programs for ODI and cooperates with the regional offices in directing, training, providing materials for, and assisting State Disability Determination Services in their professional relations programs at State and local levels.

4. Assists in the preparation and clearance of all information material relating to SSA disability programs for the general public. Prepares, clears, and distributes a wide variety of informational materials concerning SSA-administered programs for medical, paramedical and related audiences at the national, State, and local levels. Reviews and analyzes pending legislation, regulations, and proposed policy and procedural issuances to identify potential impact on these same groups.

E. *The Medical Consultant Staff ( ):*

1. Provides advice and consultation to the Associate Commissioner of the Office of Disability Insurance, the Commissioner and other officials of SSA and the Department on all medical aspects in the planning, direction and coordination of the title II disability insurance program and the title XVI SSA program for the blind and disabled.

2. Develops broad medical concepts and policies for the administration of the title II and title XVI (SSI) programs, and provides consultation for research studies to develop improved medical techniques for evaluating impairment severity and disability.

3. Provides leadership and professional direction to the Regional Medical Officers and consultants, and to State Disability Determination Services medical personnel engaged in title II and title XVI (SSI) related activities.

4. Provides medical consultation required in the formulation of medical evaluation and development policies and guides, and develops orientation and training programs for medical personnel in the Office of Disability Insurance, regional offices and State Disability Determination Services.

F. *The Division of Federal/State Programs ( ):*

1. Provides national direction for those portions of the disability program administered through the State Disability Determination Services (DDS) under the Federal/State agreements and the SSA regional offices; establishes guidelines and standards governing the negotiation of agreements with States under provisions of the Social Security Act dealing with the disability programs.

2. Develops and maintains a comprehensive national system of policies, standards and procedures for the administrative and fiscal management of the DDS; utilizing the processing information made available through OMBP's management information system, sets processing goals and otherwise oversees DDS operations activities; assesses overall operation activities and changes as they relate to day-to-day operations of the DDS.

G. The Division of Pre-Adjudicative Policy ( ):

1. Plans, develops and evaluates the operational policies and standards and formulates, issues and maintains instructions, guides and technical materials required to carry out the nationwide disability programs under titles II and XVI (SSI) of the Social Security Act and the Black Lung Benefits program concerning medical, vocational and work documentation and evaluation; develops, in cooperation with the Medical Consultant Staff, medical standards for determining disability and the development of evidence.

2. Coordinates the Division's areas of responsibility with the Medical Consultant Staff and with other components within SSA, and agencies outside SSA to ensure compatibility with SSA objectives.

3. Contributes to the development of, reviews and provides policy concurrence for, guides, procedures and instructions developed for personnel in the Office of Central Operations, district and branch offices, SSA regional offices, other SSA components and State agencies involved in adjudicating disability and blindness claims.

H. *The Division of Post-Adjudicative and Technical Policy ( ):*

1. Plans, develops and evaluates operational policies, standards, instructions, guides and technical materials required to carry out the nationwide disability programs under titles II and XVI (SSI) of the Social Security Act, and the black lung benefits program concerning disability claims adjudication and the continuing eligibility or entitlement to benefits for disabled beneficiaries. The policies and standards include medical and work-related aspects of continuing disability, drug addiction and alcoholism as they relate to the SSI disability program, chronic renal disease, totalization, railroad disability claims and black lung claims adjudication and determinations.

2. Plans, develops and evaluates the disability aspects of operational policies and standards in the following areas: appeals, due process, administrative finality, attorney representation and fees, medical privacy, Freedon of Information, fraud and program integrity issues unique to the disability programs.

I. *The Division of Rehabilitation Programs ( ):*

1. Develops and carries out programs to increase vocational rehabilitation of the disabled, and reviews disability program policies and operations for consistency with rehabilitation goals.

2. Formulated regulations, policies, procedures and guides governing payment for vocational rehabilitation services provided to the disabled from trust funds.

J. *The Division of Disability Studies ( ):*

1. Plans and directs a continuing basic economic and social research effort to measure the size, nature and effects of the private and social costs of disability and ill health on the population in general, and to evaluate the effectiveness of the Social Security Disability Insurance program and related service programs, including: trust-funded rehabilitation services and Medicare coverage for the disabled.

2. Designs and conducts national surveys of disabled and nondisabled adults, newly disabled, Social Security disability insurance beneficiaries, persons denied disability insurance benefits and the institutionalized.

3. Plans and directs studies of significant disability policy and program issues.

Chapter SV. The Office of Retirement and Survivors Insurance. A new Chapter SV is titled and reads as follows:

Sec. SV.00 *The Office of Retirement and Survivors Insurance—(Mission):*

The Office of Retirement and Survivors Insurance (ORSI) provides SSA-wide leadership and direction to the development, coordination and promulgation of Retirement and Survivors Insurance operational policy and procedures. This includes coverage and employment, entitlement, payment and adjudicative processes, and benefit continuity. The Office develops and promulgates program regulations and participates in legislative planning by identifying legislative needs and developing legislative proposals for consideration by SSA's Office of Policy This Office plans and directs a continuing national economic and social survey program of the current impact and future needs of the RSI program.

The Office ensures that interrelated policy areas are coordinated and serves as the focal point of operational policy for the RSI program.

Sec. SV.10. *The Office of Retirement and Survivors Insurance—(Organization):*

The Office of Retirement and Survivors Insurance, under the leadership of the Associate Commissioner for Retirement and Survivors Insurance includes:

A. The Associate Commissioner for Retirement and Survivors Insurance ( )

B. The Deputy Associate Commissioner for Retirement and Survivors Insurance ( )

C. The Immediate Office of the Associate Commissioner for Retirement and Survivors Insurance ( )

D. The Division of Payment and Adjudicative Policy ( )

E. The Division of Coverage ( )

F. The Division of Benefit Continuity ( )

G. The Division of Entitlement ( )

H. The Division of Retirement and Survivors Studies ( )

Sec. SV.20. *The Office of Retirement and Survivors Insurance—(Functions):*

A. *The Associate Commissioner for Retirement and Survivors Insurance ( )*— is directly responsible to the Deputy Commissioner, Programs and Policy for carrying out ORSI's mission and provides general supervision to the major components of ORSI.

B. *The Deputy Associate Commissioner for Retirement and Survivors Insurance ( )* assists the Associate Commissioner in carrying out his/her responsibilities and performs other duties as the Associate Commissioner may prescribe.

C. *The Immediate Office of the Associate Commissioner for Retirement and Survivors Insurance ( )* provides the Associate Commissioner and Deputy Associate Commissioner with staff assistance on the full range of their responsibilities and helps coordinates the activities of ORSI components.

D. *The Division of Payment and Adjudicative Policy ( ):*

1. Plans, develops and evaluates the operational policies, standards and instructions of the Retirement and Survivors Insurance (RSI) program and those common to RSI and one or more of the other SSA benefit programs in the broad areas of payment and adjudicative processes.

2. Develops and issues guidelines, directives, instructions and operating procedures on such subject areas as administrative appeals process, representation and attorney fees, and administrative finality, adjudicative standards, district office final adjudication, evidence, representative payment including selection of payee, accounting and onsite review, check delivery including direct deposit, cycling, garnishment, assignment and waiver of benefits. Plans and conducts RSI reviews and recommends and implements corrective actions based on findings.

E. *The Division of Coverage ( ):*

1. Plans, develops and evaluates the operational policies, standards and instructions of the Retirement and Survivors Insurance (RSI) and those common to RSI and one or more of the other SSA benefit programs in the areas of coverage and employment.

2. Develops and issues guidelines, directives, instructions and operating procedures on such coverage and employment subject areas as wages, coverage and exceptions, anti-poverty programs, earnings discrepancies, coverage aspects of international agreements, self-employment status and income, religious exemptions, State and local coverage and statutes of limitations.

F. *The Division of Benefit Countinuity ( ):*

1. Plans, develops and evaluates the operational policies, standards and instructions of the Retirement and Survivors Insurance (RSI) program and those common to RSI and one or more of the other SSA benefit programs in the broad area of benefit continuity.

2. Develops and issues guidelines, directives, instructions and operating procedures on such continuing benefit subject areas as work notices, annual and monthly earnings tests, suspensions and terminations, government pension offset and enforcement and beneficiary compliance, overpayments, underpayments, recovery and waiver.

G. *The Division of Entitlement ( ):*

1. Plans, develops and evaluates the operational policies, standards and instructions of the Retirement and Survivors Insurance (RSI) program and those common to RSI and one or more of the other SSA benefit programs in the broad area of entitlement.

2. Develops and issues guidelines, directives, instructions and operating procedures on such entitlement subject areas as applications, insured status, veterans' benefits, railroad employment, family relationships, dependency and support, proofs, school attendance, decoupling and indexing of earnings, reduction of benefits for age, family maximums, saving clauses, recomputations and recalculations of benefits, period of disability computations, awards, disallowances and abatements of claims, earnings records and claims application forms.

H. *The Division of Retirement and Survivors Studies ( ):*

1. Plans and directs a continuing national economic and social survey program to collect and study data on the aged population and survivors of deceased workers.

2. Conducts interrelated surveys of the aged, new retirees, young survivors and related family groups.

3. Plans and directs studies of significant program issues requiring research, including retirement patterns, problems of "early" retirement, the needs of widows without children before they become eligible for retirement benefits, the treatment of women under social security, the relationship of benefit levels to standards of adequacy, effects of the retirement test and the situation of individuals receiving minimum benefits.

4. Plans and carries out the analysis of social security and related programs, including private pensions, State and local retirement systems, social welfare expenditures, employee benefit plans, workers compensation, sick leave benefits and health insurance.

Chapter SW. The Office of Supplemental Security Income. A new Chapter SW. is titled and reads as follows:

Sec. SW.00 *The Office of Supplemental Security Income—(Mission):*

The Office of Supplemental Security Income (OSSI) provides SSA-wide leadership and direction to the development, coordination and promulgation of SSI operational policy and procedures. The Office develops and promulgates program regulations, participates in legislative planning, issues standards, guidelines and operating procedures to be used by operating components in implementing the SSI program, and establishes evidence and verification requirements. Develops agreements with the states that govern SSA's administration of the SSI Optional and Mandatory State Supplementation Programs, Medicaid eligibility, data exchange and fiscal reporting processes. Evaluates the implementation of policies and procedures to determine whether training is needed, and participates in the development of training materials. Conducts a continuing program of national economic and social surveys to assess the current and future needs of the SSI program. The Office ensures that interrelated policy areas are coordinated, and serves as the focal point of operational policy for the SSI program.

Sec. SW.10 *The Office of Supplemental Security Income—(Organization):*

The Office of Supplemental Security Income under the leadership of the Associate Commissioner for Supplemental Security Income includes:

A. The Associate Commissioner for Supplemental Security Income ( )

B. The Deputy Associate Commissioner for Supplemental Security Income ( )

C. The Immediate Office of the Associate Commissioner for Supplemental Security Income ( )

D. The Division of Income and Resource Standards ( )

E. The Division of Eligibility ( )

F. The Division of State Programs ( )

G. The Division of Supplemental Security Studies ( )

Sec. SW.20 *The Office of Supplemental Security Income—(Functions):*

A. *The Associate Commissioner for Supplemental Security Income ( )* is responsible to the Deputy Commissioner, Programs and Policy for carrying out OSSI's mission and provides general supervision to the major components of OSSI.

B. *The Deputy Associate Commissioner for Supplemental Security Income ( )* assists the Associate Commissioner in carrying out his/her responsibilities and performs other duties as the Associate Commissioner may prescribe.

C. *The Immediate Office of the Asssociate Commissioner for Supplemental Security Income ( )* provides the Associated Commissioner and the Deputy Associate Commissioner with staff assistance on the full range of their responsibilities and helps coordinate the activities of OSSI components.

D. *The Division of Income and Resource Standards ( ):*

1. Plans, develops and writes the operating policies, standards and instructions for implementing eligibility requirements involving income, resources and in-kind support and maintenance relating to the supplemental security income program.

2. Integrates the SSI program with other assistance and services programs, determining whether the benefits from these programs are includable or excludable as income and resources.

E. *The Division of Eligibility ( ):*

1. Plans, develops and writes the operating policies, standards and instructions for implementing the eligibility requirements of the supplemental security income program other than income, resources and in-kind support requirements.

2. Develops policies and procedures with respect to such posteligibility actions as suspensions, terminations, settlement of overpayments and underpayments and levying penalties. Ensures that operating policies provide claimants with due process by providing an adequate system of notices to alert them of their rights and develops policies and procedures on pursuing these rights.

3. Gives policy direction to SSA's efforts to exchange benefit information between the SSI program and other Federal/State programs of assistance through the establishment of electronic systems interfaces.

F. *The Division of State Program ( ):*

1. Plans and develops the operating policies, standards and instructions for all phases, with the exception of the actual computation of SSI State supplementary payments, the optional and mandatory State supplementation programs, as well as the policies governing social security activities with regard to Medicaid determinations, interim assistance reimbursement, food stamps and institutionalization.

2. Provides the focus for SSA leadership in administering the federally administered optional and mandatory State supplementation programs, as well as such related programs as State Data Exchange (SDX). This includes providing advice and assistance to regions in their administration of individual State programs, maintaining the appropriate model agreements governing SSI fiscal relationships between SSA and State governments, and acting as an expert authority in the resolution of Federal/State fiscal disputes.

G. *The Division of Supplemental Security Studies ( ):*

1. Plans and directs a continuing national economic and social survey program to study the impact of the SSI program.

2. Plans and directs studies regarding significant program matters, including variations in systems for measuring income adequacy, SSI workloads and cost projections, program trends and effects of the SSI program and State supplementation payments on the lives of recipients.

3. Obtains and presents program data for use by SSA, HHS, other Federal agencies and interested groups in assessing the SSI program.

Chapter SR. The Office of Policy. The current Chapter SR is deleted and replaced with the following:

Sec. SR.00 *The Office of Policy—(Mission):*

The Office of Policy (OP) directs the planning and analysis of programs directly administered by SSA; the retirement, survivors and disability insurance programs, and the supplemental security income program. It coordinates the development of policies across program lines to ensure consistency in implementation. The Office broadly formulates, promulgates and interprets programs objectives and policy. It directs studies and makes recommendations about the problems of income maintenance, poverty and the contributions that social insurance and related programs may provide for solving these problems. It directs legislative planning, analysis and formulation in SSA, and conducts the broad research and statistical program of the agency. The Office develops, promulgates and reviews all program regulations for consistency. It also reviews regulations for directly administered programs for consistency with statutory and Congressional intent and with SSA policy decisions and requirements. It directs and coordinates the formulation of future program policies. The Office ensures that policies are coordinated internally and that all instructional materials developed are compatible with overall operating policies and practices. The Office evaluates the effectiveness of national policies in meeting program goals and recommends program modifications. It serves as the focal point for international policy matters, other than those relating to refugee programs. Its activities with the Congress are carried out in close consultation and coordination with the Office of the Assistant Secretary for Legislation.

Sec. SR.10 *The Office of Policy—(Organization):*

The Office of Policy, under the leadership of the Associate Commissioner for Policy, includes:

A. The Associate Commissioner for Policy (SR)

B. The Deputy Associate Commissioner for Policy (SR)

C. The Immediate Office of the Associate Commissioner for Policy (SR)

D. The Office of Legislative and Regulatory Policy (SRP), which includes:

1. The Legislative Reference Staff (SRP1)

2. The Division of Disability, Coverage and Interprogram Relationships (SRP3)

3. The Division of Retirement and Survivors Benefits (SRP5)

4. The Division of Supplemental Security Studies (SRP7)

E. Office of Research, Statistics and International Policy (SRV) which includes:

1. The Publications Staff (SRV2)

2. The Research Grants and Contracts Staff (SRV3)
3. The Division of Economic Research (SRV5)
4. The Division of OASDI Statistics (SRV7)
5. The International Policy Staff (SRVE)

F. Office of Policy Coordination, Regulations and Program Directives (SRW) which includes:
1. The Policy Coordination Staff (SRW1)
2. The Regulations Staff (SRW2)
3. The Program Directives Staff (SRW3)

Sec. SR.20 *The Office of Policy—(Functions):*

A. *The Associate Commissioner for Policy (SR)* is directly responsible to the Commissioner for carrying out OP's mission and provides general supervision to the major components of OP.

B. *The Deputy Associate Commissioner for Policy (SR)* assists the Associate Commissioner in carrying out his/her responsibilities and performs other duties as the Associate Commissioner may prescribe.

C. *The Immediate Office of the Associate Commissioner for Policy (SR)* provides the Associate Commissioner and Deputy Associate Commissioner with staff assistance on the full range of their responsibilities and helps coordinate the activities of OP components.

D. *The Office of Legislative and Regulatory Policy (SRP):*

Develops and conducts the legislative planning program of SSA and serves as the focal point for all legislative activity in SSA; analyzes legislative and regulatory initiatives and develops specific legislative proposals. It reviews all proposed regulations for consistency among programs and regulations for directly-administerered program for consistency with policy requirements and decisions. The Office evaluates the effectiveness of programs administered by SSA in terms of legislative needs and analyzes and develops recommendations on related income maintenance, social service and rehabilitation program proposals, particularly those which may involve coordination with SSA-administered programs, and on other methods of providing economic security. It provides advisory service to SSA and HHS officials on legislation of interest to SSA pending in Congress. It also provides legislative specification drafting service to officials within the Executive Branch, Congressional committees, individual members of Congress and private organizations interested in social security legislation. The Office of Legislative and Regulatory Policy (OLRP) includes the following components and functions:

1. *The Legislative Reference Staff (SRP1):*

a. Tracks legislative bills, highlights items of interest from the Congressional Record, and other publications for OLRP and SSA's Executive Staff and provides support for other OLRP and SSA components at Congressional hearings.

b. Assists individual members of Congress and their staffs and Congressional committee staffs by responding for information on pending and proposed social security legislation, related legislative proposals and the legislative history of the social security program.

c. Reviews legislative proposals for consistency with existing program goals, philosophy and program requirements.

2. *The Division of Disability Coverage and Interprogram Relationships (SRP3):*

a. Studies and makes recommendations on proposals for providing economic security for the disabled and their dependents through the social security system.

b. Develops and evaluates legislative proposals for extending social security protection to groups not yet covered.

c. Evaluates proposals for program changes in light of their effect on special coverage groups.

d. Recommends methods for coordinating the protection afforded under social security with that afforded under other public retirement or disability programs.

e. Reviews proposed regulations dealing with the disability insurance (DI) program, social security coverage, interprogram relationships and various other issues, including the social security retirement test, insured status and the definitions of employment and wages, to assure cross-program consistency and consistency with policy requirements and decisions.

f. Provides technical and advisory services to other agencies within the Executive Branch, Congressional committees and individual members of Congress, State officials and private organizations having an interest in the disability program, social security coverage or interprogram relationships.

3. *The Division of Retirement and Survivors Benefits (SRP5):*

a. Develops and explains program principles and philosophy.

b. Prepares and evaluates proposals for social security program legislative changes in the area of retirement and survivors benefits.

c. Conducts studies of broad programmatic issues, including the development of basic program philosophy, tax rates, alternative methods of financing trust fund operations, and management and eligibility requirements for dependents and survivors' benefits, the level of social security benefits, value of benefits in relation to contributions, benefit computation methods, which dependents should receive benefits and the establishment of priority among these dependents.

d. Review proposed regulations for the retirement and survivors insurance (RSI) program to assure cross-program consistency and consistency with policy requirements and decisions.

e. Provides technical and advisory services to other agencies within the Executive Branch, Congressional committees, individual members of Congress, State officials and private organizations having an interest in retirement and survivors benefits.

4. *The Division of Supplemental Security Income (SRP7):*

a. Develops and evaluates legislative proposals for changes in the program of supplemental security income for the aged, blind and disabled (SSI program).

b. Reviews proposed SSI program regulations for consistency with policy requirements and decisions.

c. Studies SSI program interrelationships with social security income maintenance, child support enforcement, food stamps, employment and other Federal, State and local programs and recommends methods for coordinating these programs.

d. Provides technical and advisory services to other agencies within the Executive Branch, Congressional committees, individual members of Congress, State officials and private organizations having an interest in the SSI program.

E. *The Office of Research, Statistics and International Policy (SRV):*

Directs the planning and analysis of program matters relating to international program policy, and develops and conducts SSA's research and statistical program. It conducts research on income security, redistributive effects on the economy of social security benefits and financing and adequacy of cash benefits. It establishes linkages of SSA data with data from other statistical and record systems and develops and simulates economic models to analyze the impact of present and projected program alternatives under various conditions. The Office publishes research findings, compiles and publishes statistical data and provides SSA-wide statistical leadership and methodology about statistics. It represents SSA on matters

of research and statistics within HHS, within the academic community, and in coordination with SSA's Office of Public Affairs, with other public and private agencies and organizations. Serves as SSA liaison to international agencies and associations which deal with social security matters excluding those affairs relating to refugee programs. Negotiates with foreign governments on international social security agreements. Provides technical assistance on social security and related fields to foreign governments, international organizations and foreign visitors. The Office of Research, Statistics and International Policy (ORSIP) includes the following components and functions:

1. *The Publications Staff (SRV2):*

a. Advises ORSIP components on the development, organization and presentation of research and statistical studies to be published.

b. Directs a continuous review of the research publications program, analyzes material submitted for publication and surveys the effectiveness of ongoing publication series.

c. Assesses informational needs of the SSA staff, other government agencies, social scientists and the public for data and findings available from the ORSIP research program.

2. *The Research Grants and Contracts Staff (SRV3):*

a. Develops, coordinates and implements SSA extramural research grant and contract activities in the Cooperative Research or Demonstration Projects Program under Sections 110 and 702 of the Social Security Act, as they relate to issues under titles II and XVI (grants to the States for, aid to the aged, blind, or disabled, or for such aid and medical assistance for the aged) of the Act.

b. Stimulates interest in the Cooperative Research or Demonstration Projects Program and identifies new or existing areas of knowledge or problems which may be usefully studied under extramural programs.

c. Provides guidance to research applicants.

d. Reviews applications and preliminary proposals for research grants.

e. Monitors progress and reports findings of projects funded.

3. *The Division of Economic Research (SRV5):*

a. Plans and directs long-range program-oriented research, projecting and interpreting changing demographic, economic and social trends as they relate to the broad field of economic security and to overall economic and social policy.

b. Studies the following major areas: social security financing, economic impacts of social security income maintenance alternatives, effects of social security on lifetime income redistribution, the relationship of social security to other public and private income maintenance programs, economic projections and labor market studies.

4. *The Division of OASDI Statistics (SRV7):*

a. Plans and directs the development and maintenance of a broad statistical program concerning basic retirement, survivors and disability insurance program statistics.

b. Provides statistical services throughout SSA and technical consultation to users of these statistics both within and outside SSA.

5. *The International Policy Staff (SRVE):*

a. Serves as liaison to international agencies and associations which deal with social security matters and serves as SSA's point of contact with the State Department and other agencies involved in international affairs, excluding those affairs relating to refugee programs.

b. Provides legislative and regulatory planning and analysis on all program matters relating to nonoperational international policy.

c. Provides leadership and coordination of all activities within SSA involving negotiations with foreign governments on international social security agreements (totalization) and develops and analyzes policies for implementing provisions of totalization agreements.

4. Serves as the SSA focal point for the formulation of U.S. policy on international social security matters and provides training, orientation and technical assistance on social security and related fields to foreign governments, international organizations and foreign visitors.

F. *The Office of Policy Coordination, Regulations and Program Directives (SRW):*

The Office analyzes interrelated policy areas to ensure consistency. It develops and promulgates program regulations and participates in legislative planning by identifying legislative needs and proposals. It ensures that all instructional materials developed are compatible with program and policy objectives:

1. *The Policy Coordination Staff (SRW1):*

Participates in the study and formulation of broad policies, goals, objectives and strategies to ensure policy consistency. Coordinates with interested and affected components outside of SSA such as HHS components, the Department of Labor, the Department of Agriculture, etc. It conducts research on income security, redistributive effects on the economy of social security benefits and financing and adequacy of cash benefits.

2. *The Regulations Staff (SRW2):*

Plans, develops and writes SSA regulations and provides for the publication of regulations. Performs an ongoing assessment of the regulations process in SSA. Serves as the SSA focal point on matters concerning litigation; formulates SSA appeal recommendations to HHS's Office of General Counsel on adverse decisions and provides trend analyses of SSA's litigation activities. Plans and develops rulings to provide interpretations and application of the Social Security Act and regulations governing social security programs; develops and publishes general and special compilations of social security laws, various technical issuances and program handbooks. Coordinates within SSA the review and clearance of regulations for the claims and payment processes developed for the Retirement, Survivors, and Disability Insurance Programs, the Supplemental Security Income Program, and the Black Lung Benefits Program; assures that SSA's Office of Policy has input into the regulations development process. Provides technical, consultative and advisory services within SSA in the development of regulations. Formulates policy concerning Privacy Act provisions and serves as liaison between SSA and the Office of the Secretary on related activities. Coordinates activities with HHS's Office of General Counsel on the issuance of regulations and rulings. Negotiates with HHS and the Office of the **Federal Register** on regulations matters and other areas of concern to this Office and, in coordination with SSA's Office of Governmental Affairs, negotiates with other Federal and non-Federal agencies, organizations and institutions on matters within the Office's mission. Evaluates policies to determine whether training is needed to assure their effective implementation and participates in the development of training materials.

3. *The Program Directives Staff (SRW3):*

Directs the review, coordination, publication, and distribution of program instructions and other materials to insure uniformity, lack of duplication, and compatibility of all SSA operational, instructional and informational material; participates in determining the instructional needs of

SSA operating personnel. Directs technical review of program operating instruction to ensure proper integration, organization, clearance and audience for materials prepared by various SSA components for the program operations manual systems (POMS). Coordinates publication, distribution and warehousing of all program instructional and related materials and directs a quality review of new issuances to ensure proper reproduction of printed materials. Indexes all program instructional materials and determines user needs in this area. Participates with SSA's Systems organizations in the design, development and ongoing administration of a computerized system for storing, updating, publishing and distributing operational instructions and materials; coordinates with SSA's Office of Management, Budget and Personnel, as appropriate. Establishes policies and guidelines for the distribution, required by the Freedom of Information Act, of SSA program publications for the public.

Dated: May 20, 1983.

Margaret M. Heckler,

Secretary of Health and Human Services.

BILLING CODE 4119-07-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N-83-1246]

Availability of Funding Under the Fair Housing Assistance Program; Noncompetitive Solicitation

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Announcement of non-competitive solicitation for funding available to State and local agencies under the Fair Housing Assistance Program.

SUMMARY: HUD is soliciting applications from eligible State and local fair housing agencies for funding available under the Fair Housing Assistance Program. Agencies must meet specific eligibility criteria, set out in this announcement, as well as in 24 CFR Part 111, to qualify for consideration under this Program.

FOR FURTHER INFORMATION CONTACT: Steven J. Sacks, Director, Federal, State and Local Programs Division, Office of Fair Housing Enforcement and Section 3 Compliance, Office of Fair Housing and Equal Opportunity, Room 5214, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 426-3500. (This is not a toll-free number.) Application kits are available upon written or telephone request. To assure a prompt response, it is suggested that requests for application kits be made by telephone.

DATE: Applications may be submitted between June 1, 1983 and July 18, 1983. No application received after the specified date will be considered, unless it is received before awards are made and qualifies for a late application exception as specified in the application kit.

SUPPLEMENTARY INFORMATION: This announcement of solicitation for non-competitive funding under the Fair Housing Assistance Program (FHAP) is based upon 24 CFR Part 111. However, it should be noted that on July 1, 1983, the Department published an interim rule amending Part 111. [1] The Department anticipates that this interim rule will become effective well before funding decisions under this Announcement are made. Funding decisions will be made in accordance with Part 111, as it is to be amended by the interim rule. The principal effect of this policy will be to enable any otherwise eligible applicant to apply for training funds, regardless of the year of their participation in the Program. The rule presently in effect provides training support funds to agencies only during their first and second years of participation.

Interested agencies are urged to review Part 111, the above referenced amendment, and the information in this Announcement to determine whether they should apply.

The FHAP has two types of available funding: type I-non-competitive funding, and type II-competitive funding. Type I-non-competitive funding includes capacity building, training, complaint monitoring and reporting systems, and contributions. Type II-competitive funding includes specialized project proposals developed by State and local agencies to enhance their fair housing programs. Under this Announcement, eligible agencies can apply for type I funding only. Notice of Availability of tyep II-competitive funding will be published at a later date.

Title VIII of the Civil Rights Act of 1968, 42 U.S.C. 3601-30 (the Federal Fair Housing Law), prohibits discrimination in the sale, rental or financing of housing and in the provision of brokerage services. Section 810(c) of that title provides that wherever a State or local fair housing law provides rights and remedies substantially equivalent to those in the Federal Fair Housing law, the Secretary is required to notify the appropriate State or local agency of any complaint filed with HUD that appears to constitute a violation of the State or local law. Section 816 provides that the Secretary may cooperate with State and local agencies charged with the administration of State and local fair housing laws and, with the consent of the agencies, may use their services and their employees, and may reimburse the agencies for services rendered in carrying out the Federal Fair Housing Law. The FHAP was authorized by Congress to provide HUD with the resources to enhance the fair housing capabilities of State and local civil rights agencies.

This Program is described in the Catalog of Federal Domestic Assistance at 14.401, Fair Housing Assistance Program.

Collection of information requirements contained in this notice have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB control number 2529-0005.

FHAP Funding Requirements in This Announcement

I. Eligibility: To be eligible to apply for funds under the Program, an agency must meet the criteria prescribed in 24 CFR 111.104. Specifically, an agency: (1) Must be certified as a substantially equivalent agency under the standards enunciated at 24 CFR Part 115, and (2) must have executed with HUD a written Memorandum of Understanding, which shall describe the working relationship to be in effect between the agency and the appropriate HUD Regional Office of Fair Housing and Equal Opportunity.

However, if an agency has applied to the Department for recognition as a substantially equivalent agency and has been found by the Department to have both statutory authority equivalent to title VIII and an operational capability equivalent to that of the Department, the fact that the agency has not yet been certified will not prevent the agency from submitting funding proposals under the FHAP. At a minimum, evidence of such a Department finding will consist of Secretarial approval to publish the agency as a proposed addition to the list of recognized equivalent jurisdiction. In these circumstances, an agency may enter into negotiations with the Regional Office of Fair Housing and Equal Opportunity to develop a Memorandum of Understanding and may, at the same time, submit funding proposals. However, no funds will be committed to

[1] Published in the "Rules" section of this issue.

any agency until it has been formally recognized as substantially equivalent. All proposals considered must pertain to housing discrimination based on an individual's race, color, religion, sex or national origin.

II. Method of Distribution:

A. Scope: Applications are solicited for non-competitive funding as described at 24 CFR 111.102 (as amended by the interim rule). A total of $3,000,000 is available under this Announcement.

B. Categories of Funding:

1. Capacity Building—Under 24 CFR 111.102(a), HUD will provide all agencies seeking capacity building support for the first and second years of their participation in the FHAP with a level of funding based upon HUD records showing the number of complaints of housing discrimination received by HUD from that agency's jurisdiction during the period of January—December 1982. Payments will be determined by HUD and maximum payments will be determined in accordance with the following formula:

Number of complaints	Maximum payment
30 or less	$20,000
31 to 50	30,000
51 to 75	40,000
76 to 100	50,000
For each additional complaint over 100 (not to exceed $200,000)	500

Under 24 CFR 111.105(b) (as amended by the interim rule), all agencies seeking capacity building support must submit a written narrative justification documenting that within their jurisdiction there is a sufficient volume of current or potential complaint activity to justify the requested allocation of funds.

Any agency which is participating for non-competitive support for the second time and which can demonstrate that it would be entitled to a greater level of funding based upon direct reimbursement may apply in accordance with paragraph 4 of this Announcement, Contributions, in lieu of under this paragraph. A second-year agency electing to apply under paragraph 4 retains eligibility for complaint monitoring and reporting systems support up to the level which the agency would have been entitled to receive had it applied for capacity building support under this paragraph.

2. Training: Agencies receiving type I funds will be required to participate in HUD-sponsored training. (See 24 CFR 111.105(a)(4) (as amended by the interim rule)). Funds to support participation in this training are available to the agencies at 10% of their capacity building or contributions allocation, but such allocation shall not exceed $5,000, nor be less than $1,000. Any agency which is otherwise eligible to receive funding for capacity building or contributions, but elects not to apply for it, may apply for training support funds up to the level which the agency would have been entitled to receive had it applied for capacity building or contribution funding.

3. Complaint Monitoring and Reporting Systems: Any agency applying for capacity building funds will be entitled to receive funds for the creation, modification or improvement of the agency's compliant information and monitoring capability, to result in a system compatible with HUD's, provided that the agency has not previously been funded for that purpose. Complaint monitoring and reporting systems funds are available, in a fixed funding amount and on a one-time only basis, in accordance with the following formula, which uses the same complaints referred to in paragraph II. B. 1., above:

Number of complaints	Maximum payment
50 or fewer complaints	$3,000
51 to 100 complaints	5,000
More than 100	8,000

4. Contributions: Under 24 CFR 111.102(b), agencies eligible for their third—or later-year of noncompetitive support or agencies eligible for their second-year of support which elect to apply under this paragraph will be provided with support for complaint processing based solely on the number of dual-filed housing discrimination complaints actually processed by the agency. (A dual-filed complaint is a complaint which has been docketed at both HUD and a substantially equivalent agency.) The unit reimbursement level will be $500 per complaint, not to exceed Cooperative Agreement maxima based upon projected complaint levels that consider prior year activity and anticipated changes.

C. Applications: To receive first or second year funding, applicants must submit all information required in the type I-non-competitive application kit. Applicants eligible for third- or later-year funding will be sent a Cooperative Agreement based solely on the number of dual-filed housing discrimination complaints actually expected to be processed by the agency. HUD will incorporate the training allotment into that Agreement. (This collection of information requirement has been assigned OMB control number 2529-0005.)

D. Award Procedures: Applications for type I funding will be reviewed upon receipt for completeness and conformity with 24 CFR 111.105. (See also, paragraph III, below.)

III. Application Notification and Award Procedures:

A. Notification: All applicants will be notified of the results of their type I applications as soon as the evaluation of their applications is completed. Awards for type I applications are expected to be announced within four weeks of receipt of the application, except that no awards shall be made before the effective date of the interim rule published on June 1, 1983 appearing in the "Rules" section of this issue.

B. Negotiations: After submission of the application, but before the award, HUD may require that applicants participate in negotiations and submit application revisions resulting from those negotiations.

C. Type of Funding Instrument: Applicants most likely will be funded under fixed-price Cooperative Agreements. However, HUD reserves the right to employ the form of agreement determined after negotiation to be most appropriate.

(Title VIII, Civil Rights Act of 1968 (42 U.S.C. 3601–30). Section 7(d), Department of HUD Act (42 U.S.C. 3535(d)))

Dated: May 23, 1983.

Antonio Monroig,

Assistant Secretary for Fair Housing and Equal Opportunity.

BILLING CODE 4210-28-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Non-Competitive Lease of Public Land in Garfield County, Colorado

The following described land is being considered for lease under Section 302 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2762, 43 U.S.C. 1732) at no less than the appraised fair market rental estimated to be approximately $390.00 annually, or $32.50 per month.

Sixth Principal Meridian

T. 7 S., R. 88 W.,
Sec. 11: NW¼NW¼.

The area described aggregates approximately 5.0 acres in Garfield County, Colorado. The land is located approximately 7 (seven) miles southeast of Glenwood Springs, Colorado and 1

(one) mile north of the Cattle Creek drainage.

Lease of the above described land has been proposed By Mr. John M. Sterling to authorize the use of public land for a ski rope tow and other improvements constructed without proper authorization. The improvements are located adjacent to property owned by the proponent and no legal access to the improvements exist for the general public and the improvements are not intended for use by the general public.

The Bureau of Land Management is considering the long-term non-competitive lease to Mr. Sterling to authorize and collect rental at the appraised fair market value of the use. The lease would be dependent upon the individual filing an application for lease and including information required by Title 43 Code of Federal Regulations, part 2920.52. The terms and conditions applicable to any lease issued under this notice are those in 43 CFR 2920.7. Information about the proposal can be reviewed in the Bureau of Land Management, Glenwood Springs Resource Area Office, 50629 Hwy 6 and 24, P.O. Box 1009, Glenwood Springs, Colorado 81602, telephone (303) 945–2341.

The lessee would be required to reimburse the United States for reasonable administrative and other costs incurred by the United States in processing the lease and for monitoring construction, operation, maintenance, and rehabilitation of the facilities authorized. The reimbursement of costs would be in accordance with the provisions of 43 CFR 2920.6.

For a period of 45 days from the date of publication of this notice in the Federal Register interested parties may submit comments to the District Manager, Bureau of Land Management, Grand Junction District Office, 764 Horizon Drive, Grand Junction, Colorado 81501. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

David A. Jones,

District Manager.

BILLING CODE 4310–84–M

Bakersfield District Grazing Advisory Board; Meeting

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463) and the Federal Land Policy and Management Act (Pub. L. 94–579) that the Bakersfield District Grazing Advisory Board will meet formally on Tuesday, June 28 and Wednesday, June 29, 1983, at the Bakersfield Hilton Inn, 3535 Rosedale Highway, Bakersfield, California. The meetings will be held from 8 a.m. to 5 p.m. on Tuesday, and from 8 a.m. to noon on Wednesday.

SUPPLEMENTARY INFORMATION: The agenda for the meeting will include:

(1) A status report on the range management program in the Bakersfield District.

(2) A discussion on proposed range improvement projects for fiscal year 984.

(3) A presentation on the ongoing, joint U.S. Forest Service-Bureau of Land Management study of livestock grazing fees.

(4) A presentation on Cooperative Management Agreements.

(5) A presentation on the Susanville Stewardship Program.

(6) A field trip, scheduled for Wednesday morning, to tour grazing allotments that have Mediterranean Annual Range. Transportation for this trip is provided for staff and Board members only. Public participants are invited to join the tour, but must provide their own transportation.

The meeting is open to the public. Interested persons may make oral statements to the Board, or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify, in writing, the District Manager (Bureau of Land Management, 800 Truxtun Avenue, Room 311, Bakersfield, California, 93301) by June 21, 1983.

Summary minutes of the meeting will be maintained in the Bakersfield District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: Marta Witt, Public Affairs Officer, Bureau of Land Management, Bakersfield District, 800 Truxtun Avenue, Room 302, Bakersfield, California, 93301, (805) 861–4191.

Dated: May 23, 1983.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Commission on Security and Economic Assistance; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the third, fourth, fifth and sixth meetings of the Commission on Security and Economic Assistance, as well as public hearings of the Commission on June 13 and July 11, 1983.

The purpose of the meetings is to continue the review of U.S. security and economic assistance in light of its goals and objectives, assess the modalities used and their effectiveness, and to advise the Secretary of State and the Congress of its findings and recommendations. The Commission will receive briefings on aspects of security and economic assistance and instruct the staff to prepare additional studies for its review. The purpose of the public hearings is to receive both oral and written testimony from the public and include such testimony in its deliberations. Written testimony should be sent to the Commission on Security and Economic Assistance, 1800 K Street, Northwest, Suite 921, Washington, D.C. 20006, Attention: John K. Wilhelm. Those wishing to present oral testimony should submit their requests to the same address. Oral presentations will be limited to five minutes per participant. This time may be extended at the discretion of the Presiding Officer of the Commission. A roster of speakers and times will be posted at the hearing. While every effort will be made to accommodate all requests to present oral testimony, time limitations may require that some testimony be submitted in writing rather than presented orally.

The remaining schedule of meetings and public hearings for the Commission on Security and Economic Assistance is as follows:

First Public Hearing—June 13, 9:30 a.m. May be extended into the afternoon at the discretion of the Chairman. Georgetown University, Hall of Nations, 1221 36th Street, N.W. (Walsh Building).

Third Commission Meeting—June 27, 1:30 p.m. To be determined.

Second Public Hearing—July 11, 9:30 a.m., May be exended into the afternoon at the discretion of the Chairman. Georgetown University, Hall of Nations, 1211 36th Street, N.W., (Walsh Building).

Fourth Commission Meeting—July 18, 1:30 p.m. To be determined.

Fifth Commission Meeting—September 12, 1:30 p.m. To be determined.

Sixth Commission Meeting—October 3, 1:30 p.m. To be determined.

Locations of Commission meetings will be published in the near future.

Mr. John K. Wilhelm is the designated A.I.D. representative. In addition to the above, statements may be filed with him, or further information received by writing to him in care of the Agency for International Development, PPC/C, Room 1004 NS, Washington, D.C. 20523, or Telephone him at 202/632–7800.

Dated: May 27, 1983.

John K. Wilhelm,

A.I.D. Representative, Commission on Security and Economic Assistance.

BILLING CODE 6116-01-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision Notice

Decided: May 24, 1983.

As indicated by the findings below, the Commission has approved the following applications file under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3, (202) 275–5223.

Motor Carrier Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: May 23, 1983.

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4, at (202) 275–7669.

MC 105146 (Sub-7X), filed May 17, 1983. Applicant: COORDINATED TRANSPORTATION COMPANY, 701 Commerce St., Dallas, TX 75202. Representative: Joe C. Crawford (same address as applicant), (214) 651–6741. Sub-No. 6 certificate: remove the restriction on page 6 limiting service to be performed under the certificate to service which is auxiliary to or supplemental of rail service of Missouri-Kansas-Texas Railroad Company (MKT), and its subsidiary, and to points which are stations on a rail line of MKT.

BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such serivce has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make

available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

NOTE: All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Secretary.

[FR Doc. 83-14554 Filed 5-31-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an

application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the Applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 3 at (202) 275–5223.

Volume No. OP3–223

Decided: May 24, 1983.

MC-85205 Sub. 13, filed April 29, 1983. Applicant SMITH TRANSPORTATION CO., a Corporation, 731, S. Lincoln St., Santa Maria, CA 93454. Representative: Earl N. Miles, 3704 Candlewood Dr., Bakersfield, CA 93306, (805) 872–1106. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S.

MC 155337 (Sub-3), filed May 10, 1983. Applicant: KENNESAW TRANSPORTATION, INC., 115 Dixie Dr., Woodstock, GA 30188. Representative: Robert M. Hamilton (same address as applicant), (404) 928–2841. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

MC 157196 (Sub-1), filed May 11, 1983. Applicant: DONALD M. BISCOE, d.b.a. BISCOE TRUCKING, 10473 - 80th St. South, Cottage Grove, MN 55016. Representative: James E. Ballenthin, 1016 Conwed Tower, 444 Cedar St., St. Paul, MN 55101, (612) 227–7731. Transporting (1) *ores and minerals and metal products,* between points in IA, IL, IN, MN, and WI, and (2) *coal and coal products,* between Minneapolis, MN, on the one hand, and, on the other, points in WI.

MC 157657 (Sub-3), filed May 12, 1983. Applicant: RIVERSIDE TRANSPORTATION, INC., Tredegar St., P.O. Box 2218, Richmond, VA 23217. Representative: J. Aiden Conn. Transporting (1) *pulp, paper and related products,* and *rubber and plastic products,* between points in the U.S., under continuing contract(s) with James River-Pepperell, Inc., of East Pepperell, MA; and (2) *such commodities* as are dealt in or used by the manufacturers and distributors of grocery and food business houses.

MC 164017 (Sub-1), filed May 17, 1983. Applicant: HOUSBY FREIGHT SYSTEMS, CORP., 4733 NE 14th St., Des Moines, IA 50313. Representative: Charles A. Coppola, 4900 University Ave., Suite 101, Des Moines, IA 50311, (515) 277–6191. Transporting *food and related products, paper and paper products, vending machines,* and *such commodities* as are dealt in by farm and home supply stores, between points in Polk County, IA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 168047; filed May 16, 1983. Applicant: LEWIS MATLOCK AND DARLENE MATLOCK d.b.a. MATLOCK & SONS, 502 Shoshone St. West, Twin Falls, ID 83301. Representative: William S. Richards, P.O. Box 2465, Salt Lake City, UT 84110, (801) 531–1777. Transporting *general commodities* (except household goods and classes A and B explosives), between points in WA, OR, CA, AZ, NV, UT, ID, MT, WY, CO, NM, ND, SD, NE, KS, OK, TX, MN, IA, MO, AR, and LA.

MC 168067, filed May 16, 1983. Applicant: CHATHAM MANUFACTURING COMPANY, P.O. Box 620, Elkin, NC 28621. Representative: William M. Butler (same address as applicant), (919) 835–2211. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between those points in the U.S. in and east of MN, IA, NE, KS, OK, and TX.

MC 168076, filed May 16, 1983. Applicant: ORGAIN ENTERPRISES, INC. Box 400, Hammon, OK 73650. Representative: William P. Parker, 4400 N. Lincoln Blvd., Suite 10, Oklahoma City, OK 73105, (405) 424–3301. Transporting *metal products, farm products, machinery, Mercer commodities, and chemicals,* between points in AR, CO, FL, GA, KS, LA, MS, NE, NM, OK, SD, TX and WY.

MC 168077, filed May 16, 1983. Applicant: WESTAR TRUCKING, INC., P.O. Box 802107, Dallas, TX 75240. Representative: William Sheridan, P.O. Drawer 5049, Irving, TX 75062, (214) 255–6279. Transporting *general commodities* (classes A and B explosives, household goods, and commodities in bulk), between points in AR, LA, OK, and TX, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 168117, filed May 17, 1983. Applicant: GRAIRON EXPRESS, 780 Greenbrier SE, Grand Rapids, MI 49506. Representative: Edward Malizak, 900 Old Kent Bldg., Grand Rapids, MI 49503 (616) 459–6121. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with Sealed Power Corporation of Ravenna, MI.

MC 168126, filed May 17,1983. Applicant: NORDAHL D. BROWN, d.b.a. BILLIE BABE TRUCKING, 25200 S.W. Parkway, Suite 200, Wilsonville, OR 97070. Representative: Nordahl D. Brown (same address as applicant) (503) 682–2437. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with Superior Transportation Systems, Inc., of Wilsonville, OR.

MC 168136, filed May 16, 1983. Applicant: NOVO TRUCK & EQUIPMENT RENTALS, INC., 3028 Genessee St., Cheektowage, NY 14225. Representative: Michael A. Wargula, Suite 808, 69 Delaware Ave., Buffalo, NY 14202 (716) 856–2942. Transporting (1) *metal products,* between points in Erie, Monroe, and Chautauqua Counties, NY, and Trumbull County, OH, on the one hand, and, on the other, points in the U.S. (except AK and HI), and (2) *food and related products,* between points in Erie and Chautauqua Counties, NY, on the one hand, and, on the other, points in the U.S. (except AK and HI).

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Office of the Attorney General

Proposed Consent Decree in an Action To Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that on May 10, 1983, a proposed Consent Decree in *United States* v. *Crown Simpson Pulp Co.,* Civil Action No. C–78–0552 RHS, was lodged with the United States District Court for the Northern District of California. The proposed decree requires the Crown Simpson Pulp Company to pay a civil penalty for violations of the Clean Water Act, 33 U.S.C. 1251 *et seq.,* and modifies a compliance order entered on September 27, 1982.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments related to the proposed decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *Crown Simpson Pulp Co.,* DJ Ref. 90–5–1–1–950.

The proposed consent decree may be examined at the Region IX Office of the Environmental Protection, Enforcement Division, 215 Fremont Street, San Francisco, California 94104, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice (Room 1515), Tenth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be

obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 83-14538 Filed 5-31-83; 8:45 am]

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

National Advisory Committee on Occupational Safety and Health; Meeting

Notice is hereby given that the National Advisory Committee on Occupational Safety and Health (NACOSH) will meet in on June 13 and 14, 1983. The meeting will begin at noon on Monday, June 13, 1983 at the Hyatt Regency Woodfield, 1800 East Golf Road, Shaumburg, Illinois. The public is invited to attend.

The National Advisory Committee was established under Section 7(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) to advise the Secretary of Labor and the Secretary of Health and Human Services on matters relating to the Administration of the Act.

The meeting agenda will include a tour of the OSHA Training Institute at Des Plaines, Illinois and discussions of issues relating to training. There will be brief reports on other matters pertaining to OSHA.

Written data or views concerning these agenda items maybe submitted to the Division of Consumer Affairs. Such documents which are received before the scheduled meeting dates, preferably with 20 copies, will be presented to the Committee and included in the official of the proceedings.

Anyone who wishes to make an oral presentation should notify the Division of Consumer Affairs before the meeting date. The request should include the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the chairperson of the Committee to the extent which time permits. Those planning to make oral presentations should take notice that the electronic and print media maybe present to record and report these proceedings.

For additional information contact: Clarence Page, Division of Consumer Affairs; Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Rm. N-3635, Washington, D.C. 20210, Telephone: (202) 523-8024.

Official records of the meetings will be available for public inspection at the Division of Consumer Affairs.

Signed at Washington, D.C., this 26th day of May 1983.

Thorne G. Auchter,

Assistant Secretary.

[FR Doc. 83-14635 Filed 5-31-83; 8:45 am]

BILLING CODE 4510-26-M

LEGAL SERVICES CORPORATION

Publication System for Instructions to Recipients of Corporation Funds

AGENCY: Legal Services Corporation.

ACTION: Notice of publication system for instructions to recipients of corporation funds.

SUMMARY: Section 1008(e) of the Legal Services Corporation Act, as amended, 42 U.S.C. 299g(e) requires the Corporation to publish "Instructions" in the **Federal Register** at least 30 days prior to their effective date. During 1983, the Corporation will review the few current Instructions it has from time to time published, and it will either republish or supersede such Instructions.

Beginning with 1983, the Corporation is adopting a uniform designation for the publication of its Instructions. They will be designated by year of issuance and numbered sequentially within each year (e.g., 83-1, 83-2, 84-1, 84-2, etc.). The Instruction published on January 5, 1983 at 48 FR 561 concerning recipient fund balances is retroactively designated LSC Instruction 83-1.

Whenever an Instruction supersedes a previous Instruction, this will be explicitly stated at the beginning of the Instruction. The Corporation believes that this systematization of its Instructions will assist recipients of Corporation funds and the public to locate and refer Corporation Instructions in the future.

FOR FURTHER INFORMATION CONTACT: John C. Meyer, Deputy General Counsel, (202) 272-4010.

Dated: May 26, 1983.

Alan R. Swendiman,

General Counsel.

[FR Doc. 83-14673 Filed 5-31-83; 8:45 am]

BILLING CODE 6820-35-M

NATIONAL SCIENCE FOUNDATION

Guidelines for Two New NSF Programs in Science Education; Materials Development for Precollege Science and Mathematics (NSF 83-6); and Honors Workshops for Precollege Teachers of Science and Mathematics (NSF 83-44)

This is to announce two new National Science Foundation programs in science education, the guidelines for which accompany this notice. Further copies are also being printed and will be distributed on or about June 15, 1983. They will be sent to a wide selection of individuals including college and university deans, science department heads and reserach coordinators, heads of junior colleges, professional societies and state departments of education.

Additional copies may be obtained from the National Science Foundation by sending two, self-addressed, gummed mailing labels to Announcements, Office of Scientific and Engineering Personnel and Education, National Science Foundation, Washington, D.C. 20550.

If after having studied the guidelines you still need more information, you may telephone, Alexander J. Barton, at (202) 357-7425 for Materials Development for Precollege Science and Mathematics, and Theodore L. Reid, at (202) 357-7310 for Honors Workshops for Precollege Teachers of Science and Mathematics. These numbers are temporary until June 15, 1983, after which time both Mr. Barton and Dr. Reid may be reached on (202) 357-7539.

Dorothy K. Deringer,

Acting Head, Awards Administration and Liaison Section.

May 26, 1983.

Materials Development for Precollege Science and Mathematics (NSF 83-6)

The economy and technological leadership of the United States depend increasingly on qualified men and women trained in science and mathematics.

For a steady supply of such personnel, the nation looks to its elementary and secondary school systems, where the quality of the precollege teachers, teaching materials and educational techniques help determine whether students are motivated and how well students learn.

The Materials Development for Precollege Science and Mathematics program addresses the need to develop teacher capabilities in the critical areas of mathematics and science and imporve their instruction of student. Projects will be considered for teachers

and instruction at all precollege levels, from kindergarten through the twelfth grade.

The program has a Fiscal Year 1983 budget of $12 million. The Fiscal Year 1984 budget will be announced as soon as it is determined.

Project Activities

Projects proposed under this program should support its objective of enlisting the best scientists and science educators to develop new or improved science and mathematics instruction materials and to perform related applied research, analysis and dissemination of materials and information. Projects will be supported which are developed with the cooperation of appropriate individuals and groups. Projects should reflect awareness of the needs and potential of the diverse teacher and student populations of the U.S., for example, the gifted and talented, women, monorities, physically handicapped, and the disadvantaged. Projects will be supported through nationwide competition in these areas:

Models and Demonstrations of programs for the continuing education of teachers. These could focus on scientific and technical content or on new technologies—such as computers and telecommunications—to improve science and mathematics teaching. Models should reflect the latest scientific knowledge, practical experience and the most creative ideas that can be brought to bear on science and mathematics teaching. Projects should result in products that can be distributed to local school districts and other institutions interested in the professional develpment of science and mathematics teachers, such as universities.

Development of Materials, teaching aids, computer programs, software and systems and television based-materials, etc., to improve science and mathematics teaching. Proposals may include the design and development of teaching materials and teaching methods, the testing of prototypes, and proof that the materials to be developed would indeed be useful. Materials develpment should lead to more effective teacher training and better tools for both teachers and students to use in classrooms and laboratories.

Analysis of the precollege science and mathematics educational system. This may include monitoring and interpreting: (1) The rapid changes now occurring in science, mathematics and technology; (2) the relationship of new scientific knowledge to what is actually taught in schools; (3) teacher populations and their needs; and (4) the educational patterns of high achievers who are either studying or working as professionals, technicians, or aides in science and technology. It could compare the school's condition to the effects of programs and analyze what enhances or inhibits the ability of students to learn science and mathematics.

Dissemination of ideas and materials for sustaining high quality precollege science teaching. Efforts might aim to: (1) Make available nationally science education materials, models and information, including those produced with NSF support, so that they can be considered for use in local teacher training and instructional improvement projects, and (2) seek ways to assist school systems to be more reponsive to developments in science and technology.

Applied Research aimed at understanding how the processes of teaching and learning of precollege science and mathematics can be more effective. Applied research should be based on recognized theory and relevant state-of-the-art reviews of the field. It should focus on critical questions related to teaching, learning and cognitive processes. Research results should provide the basis for development of materials suitable for widespread use and general distribution.

To be considered for NSF support, projects must deal with issues of national rather than local importance. They should contribute to a continuing supply of U.S. scientific and technical personnel. Projects must result in products general enough in nature to be of use beyond the immediate locale where they were developed.

Eligibility

Although colleges and universities are expected to submit most proposals, project proposals from other institutions with an education mission will also be considered. (See *Grants for Scientific and Engineering Research* NSF 81–79, "Who May Submit" section.)

Eligible disciplines are limited to mathematics, engineering, the natural sciences, (including biology, chemistry, atmospheric, earth and ocean sciences, physics and astronomy) and computer science.

Proposal Evaluation

Criteria for the selection of projects are listed in NSF 81–79, p.8. The term "research" in NSF 81–79 should be taken in a generic sense. It covers applied research, analysis, development, and other science education activities. Proposals will be reviewed by scientists, science educators and other knowledgeable in the fields represented by the proposal.

Additional criteria to be used in evaluating proposals to this program are:

- Personnel—Active teachers, scientists, science educators, officials of state and local education agencies, and the private sector (such as the industrial scientists) are involved as appropriate in the project.
- Contributions—Contributions from the private sector, states and local school districts, colleges or universities, scientific and teaching societies, and other sources are of an appropriate level and nature.
- Effectiveness—Procedures are included for assuring the effectiveness of materials and training such as: (1) Evaluation and testing of materials and programs, (2) examinations at the end of programs, and (3) the awarding of college credit or another suitable recognition of achievement.
- Products—Quality end products of potential widespread utility are likely such as descriptive program guides, materials, software, research publications, and appropriate plans for distribution.
- Impact—the potential for improvement of the quality, distribution, or effectiveness of the Nation's scientific and engineering research, education and personnel base is clear. This criterion permits the evaluation of proposals in terms of their potential for improving the scientific and engineering enterprise and its educational activities in ways other than those encompassed by other criteria. Included under this criterion are questions relating to scientific and engineering personnel, including participation of women and minorities, and impact and distribution of resources with respect to institutions and geographical areas.

Preparation and Submission of Proposals

- Proposals may be submitted at any time.
- Proposals should be prepared in accordance with the guidelines contained in *Grants for Scientific and Engineering Research* (NSF 81–79).
- Fifteen (15) complete copies of the proposal and three (3) additional copies of the cover sheet and Project Summary (Form 4), prepared and addressed as prescribed in NSF 81–79, are required.
- Special Budget Consideration: Allowable participant support costs are described in NSF 81–79, p. 10.
- The discipline(s) included in the project should be indicated separately

at the bottom of NSF Form 4, *Project Summary.*

• Proposals submitted *after* September 30, 1983 may be subject to the consultation requirements of Executive Order 12372, Intergovernmental Review of Federal Programs. The proposer is responsible for determining whether or not his state has elected to review proposals to this program. The implementation plan for this Executive order will not be completed until late summer. By then, the proposer's office for sponsored research should know the state's procedural requirements, if any.

• The Foundation welcomes proposals on behalf of all qualified scientists and engineers and strongly encourages women and minorities to compete fully in any of the research and research-related programs described in this document.

• The Foundation provides awards for research and education in the sciences. The awardee is wholly responsible for the conduct of such research and preparation of the results for publication. The Foundation, therefore, does not assume responsibility for such findings or their interpretation.

Award Administration

Grants are to be administered in accord with the terms and conditions of NSF F.L. 200, *Grant General Conditions*, copies of which may be requested from the NSF Forms and Publications Unit.

Awards involving precollege students, including the development of materials for their use, will be subject to the provisions of 42 U.S.C. 1869a & b ("Myers Amendment" and "Dornan Amendment"). These laws required appropriate grantee coordination with parents, guardians and school district officials.

Questions not addressed in these publications may be directed to the NSF staff by writing to: Materials Development for Precollege Science and Mathematics, National Science Foundation, Washington, DC 20550.

Honors Workshops For Precollege Teachers of Science and Mathematics (NSF 83–44)

The economy and technological leadership of the United States depend increasingly on qualified men and women trained in science and mathematics.

For a steady supply of such personnel, the nation looks to its elementary and secondary school systems, where the quality of the precollege teachers, teaching materials and educational techniques help determine whether students are motivated and how well students learn.

Excellent teachers are at the core of good education at any level. But in precollege mathematics and science, they are in short supply. There is an urgent need to attract highly talented men and women to mathematics and science teacher careers, develop teacher's capabilities in these critical areas, and keep good teachers employed in the school systems. This requires devising for mathematics and science teachers incentives such as greater public recognition of their profession, and new emphasis on the important contribution teachers are making to the nation.

The basic goal of this program is to motivate and increase the capabilities of precollege mathematics and science teachers and thereby improve their instruction of students. Projects will be considered for teachers of all precollege levels, from kindergarten through grade twelve.

The Honors Workshops for Precollege Teachers of Science and Mathematics program has a Fiscal Year 1983 budget of $2 million. The Fiscal Year 1984 budget will be announced as soon as it is determined.

Program Objectives

This broad goal will be addressed through specific measures that aim to:

• Recognize and honor excellent precollege mathematics and science teachers;

• Provide renewal and updating for top quality teachers in science and mathematics;

• Analyze precollege science and mathematics education from the perspective of the best classroom teachers, as a planning aid; and

• Broaden the benefits to school systems of teaching workshops.

Project Activities

Projects will be supported which are developed with the cooperation of appropriate individuals and groups. Projects should reflect awareness of the needs and potential of the diverse teacher and student populations in the United States, for example, the gifted and talented, women, minorities, physically handicapped and disadvantaged, with emphasis on the following activities:

• Identifying and selecting science and mathematics teachers of proven high quality performance and assuring their recognition and prestige with certificates of honor and appropriate publicity.

• Establishing workshops with specialized training, practical experience, and leadership training in important areas of science, mathematics and technology. These might include special seminars, symposia, participation in research and coursework (including laboratory experience in industrial settings and other field-based study).

• Developing workshop materials.

• Extending the impact of workshop benefits when participants take new materials and information back to their colleagues.

• Having workshop participants jointly identify and document current trends and problems in science education. Their reports would be used by NSF for evaluation and program planning.

Workshops may vary in length according to the type of activity and the nature of participants. Workshops could take place during the academic year, in summer, or both.

Eligibility

Although colleges and universities are expected to submit most proposals, project proposals from other institutions with an education mission will also be considered. (See *Grants for Scientific and Engineering Research*, NSF 81–79, "Who May Submit" section.)

Eligible disciplines are limited to mathematics, engineering, the natural sciences (including biology, chemistry, atmospheric, Earth and ocean science, physics and astronomy) and computer science.

Proposal Evaluation

Criteria for the selection of projects are listed in NSF 81–79, p. 8. The term "research" in NSF 81–79 should be taken in a generic sense. It covers applied research, analysis, development, and other science education activities. Proposals will be reviewed by scientists science educators and other knowledgeable in the fields represented by the proposal.

Additional criteria to be used in evaluating proposals to this program are:

• Honors—Does the proposal include appropriate procedures for selecting, recognizing, and honoring participating teachers?

• Personnel—Are needed personnel such as active teachers, scientists, science educators, officials of state and local education agencies, and persons from the private sector (such as industrial scientists) included in the project?

• Contributions—Does the proposal include appropriate contributions from the private sector, states and local

school districts, colleges or universities, scientific and teaching societies, and other sources?

• Effectiveness—Does the proposal include appropriate procedures for assuring the effectiveness of training, including evaluations at the end of programs and the awarding of college credit or other suitable recognition of achievement?

• Products—Will the project produce quality end products such as instructional materials and plans for wider impact of workshop benefits?

• Impact—Does the project have potential for improvement of the quality, distribution, or effectiveness of the Nation's scientific and engineering research, education, and personnel base? This criterion permits the evaluation of proposals in terms of their potential for improving the scientific and engineering enterprise and its educational activities in ways other than those encompassed by the other criteria. Included under this criterion are questions relating to scientific and engineering personnel, including participation of women and minorities, and impact distribution of resources with respect to institutions and geographical areas.

Preparation and Submission of Proposals

• Proposals may be submitted at any time.

• Proposals should be prepared in accordance with this booklet and the guidelines contained in *pages 1–6 of, Grants for Scientific and Engineering Research* (NSF 81–79).

• Fifteen (15) complete copies of the proposal and three (3) additional copies of the cover sheet and Project Summary (Form 4), prepared and addressed as prescribed in NSF 81–79, are required.

• Special Budget consideration: Allowable participant support costs are described in NSF 81–79, p. 10.

• The discipline(s) included in the project should be listed separately at the bottom of NSF Form 4, *Project Summary.*

• Proposals submitted *after* September 30, 1983 may be subject to the consultation requirements of Executive Order 12372, Intergovernmental Review of Federal Programs. The proposer is responsible for determining whether or not his state has elected to review proposals to this program. The implementation plan for this Executive Order will not be completed until late summer. By then, the proposer's office for sponsored research should know the state's procedural requirments, if any.

• The Foundation welcomes proposals on behalf of all qualified scientists and engineers and strongly encourages women and minorities to complete fully in any of the research and research-related programs described in this document.

• The Foundation provides awards for research and education in the sciences. The awardee is wholly responsible for the conduct of such research and preparation of the results for publication. The Foundation, therefore, does not assume responsibility for such findngs or their interpretation.

Award Administration

Grants are to be administered in accord with the terms and condition of the NSF F.L.200, *Grant General Conditions,* copies of which may be requested from the NSF Forms and Publications Unit.

Awards involving precollege students, including the development of materials for their use, will be subject to the provisions of 42 U.S.C. 1869 a & b ("Myers Amendment" and "Dornan Amendment"). These laws require appropriate grantee coordination with parents, guardians and school district officials.

Inside Front Fold

This brochure provides information exclusively for the NSF Honors Workshops for Precollege Teachers of Science and Mathematics. In the preparation of a proposal, it must be used in conjunction with *Grants for Scientific and Engineering Research* (NSF 81–79). NSF 81–79 contains additional guidelines, forms, and other important information.

Questions not addressed in these publications may be directed to the NSF staff by writing to: Honors Workshops for Precollege Teachers of Science and Mathematics, National Science Foundation, Washington, DC 20550.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293]

Boston Edison Co.; Granting of Relief From ASME Code Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission), has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Boston Edison Company (the licensee). The relief relates to the inservice inspection program for the Pilgrim Nuclear Power Station (the facility) located in Plymouth County, Massachusetts. The ASME Code requirements are incorporated by reference into the Commission's regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

The action provides relief from performing certain inspections as required by the ASME Code, Section XI that are impractical because of the facility design. Alternative inspections and testing will be performed where practicable.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the letter granting relief and accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this relief.

For further details with respect to this action, see (1) the application for relief dated July 24, 1979, as revised January 31, 1980, (2) the Commission's letter dated May 19, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Plymouth Public Library, North Street, Plymouth, Massachusetts 02360. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatory Commission.

Robert A. Hermann,

Acting Chief, Operating Reactors Branch No. 2, Division of Licensing.

[FR Doc. 83-14850 Filed 5-31-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-325 and 50-324]

Carolina Power and Light Co.; Granting Relief From ASME Code Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has

granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," to the Carolina Power and Light Company, which revised the inservice inspection program for the Brunswick Steam Electric Plant, Units 1 and 2, located in Brunswick County, North Carolina. The ASME Code requirements are incorporated by reference into the Commission's Regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

This action provides relief from performing certain inspections as required by the ASME Code, Section XI, that are impractical because of the facility design. Alternative inspections and testing will be performed where practicable.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the letter granting relief and accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the letters from the Carolina Power & Light Company dated June 30, 1978, January 30, 1980, March 2 and May 20, 1981, and June 18, 1982, (2) the letter to Carolina Power & Light Company dated May 19, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Southport-Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50-254 and 50-265]

Commonwealth Edison Co., Granting Relief From ASME Code Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rule for Inservice Inspection of Nuclear Power Plant Components," to Commonwealth Edison Company, which revised the inservice inspection program for the Quad Cities Nuclear Power Station, Units 1 and 2, located in Rock Island County, Illinois. The ASME Code requirements are incorporated by reference into the Commission's Rules and Regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

This action provides relief from performing certain inspections as required by the ASME Code, Section XI that are impractical because of the facility design. Alternative inspections and testing will be performed where practicable.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the letter granting relief and accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the letters from Commonwealth Edison Company dated July 25, 1979 and June 15, 1982, (2) the letter to Commonwealth Edison Company dated May 19, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Moline Public Library, 504 17th Street, Moline, Illinois. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-412]

Duquesne Light Co., et al. (Beaver Valley Power Station, Unit No. 2); Receipt of Application for Facility Operating License; Availability of Applicant's Environmental Report; Consideration of Issuance of Facility Operating License; and Opportunity for Hearing

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has received an application from Duquesne Light Company, et al. for a facility operating license to possess, use, and operate the Beaver Valley Power Station, Unit No. 2, a pressurized water nuclear reactor (the facility) located in Beaver County, Pennsylvania, approximately 5 miles east of East Liverpool, Ohio and 22 miles northwest of Pittsburgh, Pennsylvania. The application was filed by Duquesne Light Company on behalf of itself and Ohio Edison Company, The Cleveland Electric Illuminating Company, and The Toledo Edison Company. The reactor is designed to operate at a core power level of 2,660 megawatts thermal, with an equivalent net electrical output of approximately 836 megawatts.

Pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in 10 CFR Part 51, the applicants filed and environmental report as part of the application. The report, which discusses enviromental considerations related to the proposed operation of the facility, is being made available at Pennsylvania State Clearinghouse, Governor's Budget Office, P.O. Box 1323, Harrisburg, Pennsylvania and at the Southwestern Pennsylvania Regional Planning Commission, Manor Building, 8th Floor, 564 Forbes Avenue, Pittsburgh, Pennsylvania 15219.

After the environmental report has been analyzed by the Commission's staff, a draft environmental statement will be prepared. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the **Federal Register**, a notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The notice will also contain a statement to the effect that any

comments of Federal agencies and State and local officials will be made available when received. The draft environmental statement will focus only on matters which differ from those previously discussed in the final environmental statement prepared in connection with the issuance of the construction permit. Upon consideration of comments submitted with respect to the draft environmental statement, the Commissions staff will prepare a final environmental statement, the availability of which will be published in the **Federal Register**.

The Commission will consider the issuance of a facility operating license to the applicants which would authorize the applicants to possess, use and operate the Beaver Valley Power Station, Unit 2 in accordance with the provisions of the license and the technical specifications appended thereto, upon: (1) the completion of the favorable safety evaluation of the application by the Commission's staff; (2) the completion of the environmental review required by the Commission's regulations in 10 CFR 51; (3) the receipt of a report on the applicants' application for a facility operating license by the Advisory Committee on Reactor Safeguards; and (4) a finding by the Commission that the application for the facility license, as amended, complies with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter I. Construction of the facility was authorized by Construction Permit No. CPPR–105, issued by the Commission on May 3, 1974. The applicants have advised that construction will be completed by December 31, 1985.

With regard to Executive Order 11988, Floodplain Management, the Beaver Valley 2 facility will have stuctures and construction activities located on the floodplain. The subject of floodplain management will be discussed in the Commission's environmental statement referenced below.

Prior to issuance of an operating license, the Commission will inspect the facility to determine whether it has been constructed in accordance with the application, as amended, and the provisions of the construction permit. In addition, the license will not be issued until the Commission has made the findings reflecting its review of the application under the Act, which will be set forth in the proposed license, and has concluded that the issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. Upon issuance of the license, the applicants will be required to execute an indemnity agreement as required by Section 170 of the Act and 10 CFR 140 of the Commission's regulations.

By July 1, 1983, the applicants may file a request for a hearing with respect to issuance of the facility operating license. By July 1, 1983, any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary of the Commission, or designated Atomic Safety and Licensing Board, will issue a notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by July 1, 1983. A copy of the petition must also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, N.W., Suite 900 South, Washington, D.C. 20035, attorney for the applicants. Any requests for additional information regarding the content of this notice should be addressed to the Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR §§ 2.714(a)(1) (i)–(v) and 2.714(d).

For further details pertinent to the matters under consideration, see the application for the facility operating license, including the Final Safety Analysis Report and the Environmental Report, forwarded on May 18, 1983, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. As they become available, the following documents may be inspected at the above locations: (1) the safety evaluation report prepared by the Commission's staff; (2) the draft environmental statement; (3) the final environmental statement; (4) the report of the Advisory Committee on Reactor Safeguards (ACRS) on the application for the facility operating license; (5) the proposed facility operating license; and (6) the technical specifications, which will be attached to the proposed facility operating license.

Copies of the proposed operating license and the ACRS report, when available, may be obtained by request to the Director, Division of Licensing, Office of Nuclear Reactor Regulation,

U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Commission's staff Safety Evaluation Report and Final Environmental Statement, when available, may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Bethesda, Maryland this 19th day of May 1983.

For the Nuclear Regulatory Commission.

George W. Knighton,

Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-298]

Nebraska Public Power District; Granting Relief From ASME Code Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," to the Nebraska Public Power District. The relief relates to the inservice inspection program for the Cooper Nuclear Station, located in Nemaha County, Nebraska. The ASME Code requirements are incorporated by reference into the Commission's Regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

This action provides relief from performing certain inspections as required by the ASME Code, Section XI, that are impractical because of the facility design. Alternative inspections and testing will be performed where practicable.

The request for relief complies with the standards and requirements of the Atomic Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the letter granting relief, and accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.55(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this relief.

For further details with respect to this action, see (1) the letters from the licensee dated July 29, 1977, March 23, 1978, July 18, 1978, December 18, 1980, and March 29, 1982, (2) the letter to the licensee dated May 19, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Auburn Public Library, 118 15th Street, Auburn, Nebraska. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch #2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-344]

Portland General Electric Company, et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-1, issued to Portland General Electric Company, Pacific Power and Light Company, and The City of Eugene, Oregon (the licensee), for operation of the Trojan Nuclear Plant located in Columbia County, Oregon.

The amendment would permit the continued use of a limited number of fuel assemblies which would have either three stainless steel rods or five stainless steel rods and additional supporting grid straps in lieu of fuel rods. Normally, fuel assemblies contain 264 fuel rods. The stainless steel rods are used in fuel assemblies in certain peripheral core locations (20 total) to prevent damage to the fuel rods caused by water impingement from the core baffle at certain locations. Following their use in these locations, the fuel assemblies with three stainless steel rods would be moved into the core interior for additional use.

The licensee has requested the amendment because the technical specifications describe the fuel as containing all fuel rods and approval to operate with such modified fuel was restricted to fuel cycle 5 only. No other changes to the technical specifications are proposed. The application for amendment is dated May 2, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility or a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations relates to fuel reload amendments involving no fuel assemblies significantly different than those previously found acceptable. Fuel containing stainless steel rods and additional grid straps as described above has been previously approved by NRC for the Trojan facility in Amendment No. 75 dated July 29, 1982. The modified fuel has been demonstrated to be effective in preventing damage from the baffle water-jetting phenomenon. In addition, previous use of fuel with stainless steel rods has shown that it has only a small effect on core power distribution. On this basis, the NRC staff proposes to determine that the application does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 1, 1983, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and

any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to J. W. Durham, Senior Vice President, Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the local public document room located at the Multnomah County Library, Social Science and Science Department, 801 S.W. 10th Avenue, Portland, Oregon 97205.

Dated at Bethesda, Maryland, this 24th day of May, 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590–01–M

[Docket No. 50–271]

Vermont Yankee Nuclear Power Corp. and Vermont Yankee Nuclear Power Station; Granting Relief From ASME Code Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," to Vermont Yankee Nuclear Power Corporation, which revised the inservice inspection program for the Vermont Yankee Nuclear Power Station, located near Vernon, Vermont. The ASME Code requirements are incorporated by reference into the Commission's

Regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

This action provides relief from performing certain inspections as required by the ASME Code, Section XI that are impractical because of the facility design. Alternative inspections and testing will be performed when practicable.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the letter granting relief and accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 515(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the letter from Vermont Yankee Nuclear Power Corporation dated June 25, 1979, as revised May 13, June 27, October 1 and 16, 1980, December 21, 1981, and April 14, 1982, (2) the letter to the licensee dated May 29, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatary Commissions.

BILLING CODE 7590-01-M

Documents containing reporting or recordkeeping requirements: Office of Management and Budget review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) the following information collection requirements for clearance under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: New
2. The title of the information collection: 10 CFR Parts 30 and 70, Irretrievable Well-Logging Source Reporting Requirements
3. The form number if applicable: NA
4. How often the collection is required: On occasion
5. Who will be required or asked to report: NRC Licensees
6. An estimate of the number of responses: 155
7. An estimate of the total number of hours needed annually to complete the requirement or request: 4395
8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: NA
9. Abstract: The final rule would require licensees to report the abandonment of irretrievable well-logging sources.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room 1717 H Street NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 395-7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland this 25th day of May 1983.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal of the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Revision
2. The title of the information collection: Domestic Licensing of Production and Utilization Facilities, 10 CFR 50.71a
3. The form number if applicable: Not applicable
4. How often the collection is required: One time for each Bulletin
5. Who will be required or asked to report: NRC Licenses and Permit Holders
6. An estimate of the number of responses: 480
7. An estimate of the total number of hours needed to complete the requirements or request: 144,000
8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable
9. Abstract: The IE Bulletin is an adjunct to the NRC Inspection and Enforcement program and an extension of the reporting requirements under 10 CFR 50.71(a). An NRC Bulletin may be issued requesting licensees and/or permit holders to take specific actions and requiring them to submit a written report describing actions taken and other information NRC may need to assess the need for further actions.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson B. Hill (202) 395-7340.

Office of Federal Procurement Policy

Issuance of Policy Letter No. 83-2, "Publicizing the Development of Procurement Policies and Regulations"

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Final issuance of OFPP Policy Letter No. 83-2, "Publicizing the Development of Procurement Policies and Regulations."

SUMMARY: This OFPP Policy Letter establishes uniform criteria and procedures for use by the executive agencies in soliciting the views of interested parties in the development of procurement policies, regulations, procedures, and forms. It also describes the procedures followed by OFPP in

conducting hearings or meetings in connection with the development of procurement policies. Issuance of uniform policy guidance in this area is specially required by Sections 6(d)(3) and 14(b) of the OFPP act, Pub. L. 93–400, as amended by Pub. L. 96–83 (41 U.S.C. 405(d)(3), 412(b)).

EFFECTIVE DATE: This Policy Letter is effective August 30, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. LeRoy J. Haugh, Office of Federal Procurement Policy, Office of Management and Budget, Washington, D.C. 20503, (202) 396–6166.

SUPPLEMENTARY INFORMATION: On December 30, 1981, the Office of Federal Procurement Policy published a draft of the subject Policy Letter, then entitled "Public Participation in the Developemnt of Federal Procurement Policies and Regulations," for a 60-day period of public and agency comment. Fifty-six letters of comment were received, from Federal agencies, industry and professional associations, business firms, and private citizens.

Several commenters questioned OFPP's authority to issue the policy; however, OFPP's authority and responsibility under the OFPP Act, Pub. L. 93–400, as amended by Pub. L. 96–83, is considered to be clear, and is borne out by the legislative history (Senate Report No. 93–692, on S. 2510). One commenter urges that the policy be revised to conform to the Regulatory Flexibility Act, Pub. L. 96–354; however, the Administrative Procedure Act exemptions for matters pertaining to contracts applies, and no other law requires notice of proposed rulemaking for procurement regulations, so the policy is not subject to the Regulatory Flexibility Act. Many comments involved matters of clarity, simplicity, and readability, and these have been adopted where possible.

Dated: May 25, 1983.

Donald E. Sowle,

Administrator.

May 25, 1983.

OFPP Policy Letter No. 83–2.

To the Heads of Executive Departments and Establishments.

Subject: Publicizing the Development of Procurement Policies and Regulations.

1. *Purpose.* The purpose of this Policy Letter is to establish uniform criteria and procedures for soliciting the views of all interested parties in the development of procurement policies, regulations, procedures and forms by the executive agencies.

2. *Authority.* This Policy Letter is issued pursuant to Section 6(d)(3) and Section 14(b) of the Office of Federal Procurement Policy Act, Pub. L. 93–400, as amended by Pub. L. 96–83 (41 U.S.C. 405(d)(3), 412(b)).

3. *Policy.* The views of all interested parties, including Government agencies, private organizations and associations, business firms, educational institutions and individuals are to be solicited and considered by any executive agency proposing to develop or amend a procurement policy, regulation, procedure, or form.

4. *Criteria.* The policy applies to all significant proposed procurement policies, regulations, procedures and forms. A proposal is generally considered to be significant if it has an effect beyond the internal procedures of the issuing agency, or a cost or administrative impact on contracts.

5. *Waiver.* The solicitation of views may be waived, by the heads of executive agencies or their designers, when circumstances make such solicitation impracticable, such as an emergency or a requirement to implement a new statute in a relatively short time. In such circumstances, the policy, regulation, procedure, or form shall be identified as temporary, and shall not be issued in final form until the views of all interested parties have been solicited and considered; views shall be solicited not later than 30 days after the date of temporary issuance.

6. *Procedures.* Notice of all significant proposed procurement policies, regulations, procedures, and forms shall be published in the **Federal Register** for public comment. Views of agencies directly affected shall be solicited by letter. The normal comment period shall be 60 days, but in no case less than 30 days. Matters which have been through a public comment period by one agency, including the Office of Federal Procurement Policy, and are being adopted or implemented essentially without change by another agency, need not be published again for comment.

7. *Content of Notice.* The **Federal Register** notice shall include the following:

a. A description of the proposal, the background and reasons for the proposal, and its intended effect, in the format required by Title 1, Code of Federal Regulations, Part 18.12.

b. The test of the proposal. However, if it is impracticable to publish the full text in the **Federal Register**, a summary notice shall be published, and the notice shall advise where the full text may be obtained or examined.

8. *Mailing Lists.* Agencies are encouraged to maintain lists of all interested parties that have expressed a continuing desire to be informed of proposed procurement policies, regulations, procedures, and forms, and to solicit their comments directly in addition to any notice published in the **Federal Register.**

9. *Public Hearings or Meetings of the Office of Federal Procurement Policy.* Hearings of formal meetings may be held by OFPP to provide an opportunity for discussion of OFPP policies under consideration. Such hearings and meetings shall be open to public, and notice shall normally be published in the **Federal Register** and the *Commerce Business Daily* at least 30 days in advance. Anyone may make a brief oral presentation, provided a written statement is submitted to OFPP by the day preceding the hearing or meeting. Normally, only one representative of any organization may make an oral presentation, and organizations having joint interests and views may be requested to appear as a panel with only one speaker. The Administrator may require that presentations be limited to summarizing the main points or written submissions. If time permits, others in attendence may be allowed to comment briefly on matters under discussion.

10. *Effective Date.* This Policy Letter is effective August 30, 1983.

11. *Sunset Review Date.* September 30, 1986.

12. *Concurrence.* This Policy Letter has the concurrence of the Director of the Office of Management and Budget.

Donald E. Sowle,

Administrator.

BILLING CODE 3110–01–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Northwest Power Planning Council; Regional Conservation and Electric Power Plan; Adoption and Distribution

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council.

ACTION: On April 27, 1983, the Pacific Northwest Electric Power and Conservation Planning Council ("Council") adopted a final regional conservation and electric power plan. That final plan is now being released to the public. This notice describes the plan and provides information on how to obtain copies.

ADDRESS: Copies of the final plan may be obtained by writing the Council's Central Office, Suite 200, 700 S.W. Taylor, Portland, Oregon 97205.

Attention: Beata Teberg, or by calling Ms. Teberg at 1–800–222–3355 (toll free in Montana, Idaho, Washington and California), 1–800–452–2324 (toll free in Oregon) or 503–222–5161. Persons who ordered a copy of the draft plan will automatically receive a copy of the final plan. A copy of the administrative record of plan development, including written comments on the draft plan, may be inspected and copied at the Council's Public Reading Room at the address above.

Technical exhibits, including contractor reports, staff issue papers and model documentation may be examined at the Council's central and state offices and Bonneville Power Administration area offices during regular business hours. For information, Contact Ruth Curtis at the Council's Central Office. Council state offices:

- Old Board of Health Building, 1301 Lockey, Helena, Montana.
- Towers Building, 3rd Floor, 450 W. State, Boise, Idaho.
- 505–C State Office Building, 1400 S.W. Fifth, Portland, Oregon.
- Washington State Energy Office, 400 East Union, Olympia, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Torian Donohue, Director of Public Involvement, 700 S.W. Taylor, Suite 200, Portland, Oregon 97205 at 1–800–222–3355 (toll free in Montana, Idaho, Washington and California), 1–800–425–2324 (toll free in Oregon) or 503–222–5161.

SUPPLEMENTARY INFORMATION: By passage of the Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. 96–501, 94 Stat. 2697, 16 U.S.C. 839 *et seq.* ("the Act"), Congress provided for the establishment of the Pacific Northwest Electric Power and Conservation Planning Council ("the Council"), a regional agency composed of two gubernatorial appointees each from the states of Idaho, Montana, Oregon and Washington. Congress charged the Council with two major responsibilities: (1) preparation of a program to protect, mitigate, and enhance fish and wildlife, including related spawning grounds and habitat, affected by the development, operation and management of hydroelectric facilities on the Columbia River and its tributaries; and (2) development of a conservation and electric power plan for the Bonneville Power Administration. The Council adopted its Fish and Wildlife Program on November 15, 1982. The Fish and Wildlife Program has been incorporated as Volume III of the final energy plan.

The Council adopted its draft energy plan on January 28, 1983, and released it for public review and comment (48 FR 5406, February 4, 1983). Before the public comment period ended at 5 p.m. on March 21, 1983, the Council had conducted seven days of public hearings in five locations throughout the region and had received 18,000 pages of comments from over 1,200 individuals, agencies and organizations. The final plan is the result of the evaluation and review of the draft plan based on all comments received in the Council's Portland office during the comment period.

The final plan contains the following elements:

Volume I

- Chapter 1: Introduction.
- Chapter 2: Policies.
- Chapter 3: Flexible Planning Strategy.
- Chapter 4: Forecast of Demand for Electricity.
- Chapter 5: Development of the Twenty-Year Plan.
- Chapter 6: Existing Resources and Resources Under Construction.
- Chapter 7: Conservation.
- Chapter 8: Generating Resources.
- Chapter 9: Consideration of Environmental Quality and Fish and Wildlife.
- Chapter 10: Two-Year Action Plan.
- Chapter 11: Plan Revisions and Consistency Determinations.
- Glossary.
- Appendix A: Role of the Council.
- Appendix B: Reliability and the Hydropower System.
- Appendix C: Method for Determining Quantifiable Environmental Costs and Benefits.
- Appendix D: Method for Surcharge.
- Appendix E: Conditions for Bonneville Financial Assistance to Hydropower in the Region.
- Appendix F: Economic Analysis of Resource Costs.

Volume II: Technical Appendices.

- Appendix G: Anaylsis of WPPSS *4* and *5* vs. Coal.
- Appendix H: Economic and Demographic Assumptions.
- Appendix I: Analysis of the Inclusion of Combustion Turbines in the Plan.
- Appendix J: Model Standards for Energy Conservation in New Buildings.
- Appendix K: Conservation Assessment Method and Assumptions.
- Appendix L: Efficiency Standards for Conversion to Electric Space Conditioning.

Volume III: Columbia River Basin Fish and Wildlife Program

Copies of Volume II and III are available only upon specific request.

The Council has also prepared a Volume IV, Council Response to Comments, which provides the Council's response to all significant substantive comments on the draft plan that were received during the public comment period. This document must also be requested specifically.

The Council's plan will guide Bonneville Power Administration in its acquisition of resources to meet the future electrical energy needs of its customers in the Pacific Northwest.

Section 9(e)(5) of the Act (16 U.S.C. 839f(e)(5)), provides that suits to challenge the plan must be filed within sixty days after publication in the **Federal Register** of this notice of plan adoption.

(Sec. 4, Pub. L. 96–501, 16 U.S.C. 839b)

SECURITIES AND EXCHANGE COMMISSION

[File No. 22–12484]

American Southwest Financial Corp.; Application and Opportunity for Hearing

March 25, 1983.

Notice is hereby given that American Southwest Financial Corporation (the "Company") has filed an application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended, (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that trusteeship of The Valley National Bank of Arizona ("Valley") under indentures dated as of December 1, 1982 and April 1, 1983 (the "Qualified Indentures"), between the Company and Valley which were heretofore qualified under the Act, and trusteeship by Valley under an indenture tentatively to be dated as of June 1, 1983, and which will be qualified under the Act (the "New Indenture"), are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Valley from acting as trustee under the Qualified Indentures and the New Indenture.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall

acquire any conflicting interest (as defined in the section), it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of this Section of the Act provides, with certain exceptions stated therein, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture of the same obligor.

However, pursuant to clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture or indentures under which other securities of such obligor are outstanding, if the issuer shall have sustained the burden of proving on application to the Commission, and after opportunity for hearing thereon, that the trusteeships under the indentures are not so likely to involve a material conflict of interest to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under any such indentures.

The Company alleges that:

(1) Pursuant to the Qualified Indentures, the Company has issued $50,475,000 aggregate principal amount of its 12⅞% GNMA-Collateralized Bonds, Series A (the "Series A Bonds") and $35,280,000 aggregate principal amount of its 12¼% GNMA-Collateralized Bonus, Series B (The "Series B Bond"), for which Valley serves as trustee. The Series A Bonds and Series B Bonds were registered under the Securities Act of 1933 and the Qualified Indentures were qualified under the Act.

(2) Pursuant to the New Indenture, the Company proposes to issue and sell an as yet undetermined amount of its GNMA-Collateralized Bonds Series C (the "Series C Bonds"), for which it contemplates Valley will serve as trustee. The Company contemplates that the Series C Bonds will be registered under the Securities Act of 1933 and that the New Indenture will be qualified under the Act.

(3) The collateral granted to Valley as trustee for the Series A Bonds will serve as collateral security only for the Series A Bonds and the holders of other Bonds issued by the Company (incuding the Series B Bonds and the Series C Bonds) will not have recourse to the collateral granted to Valley as trustee for the Series A Bonds.

(4) The collateral granted to Valley as trustee for the Series B Bonds will serve as collateral security only for the Series B Bonds and the holders of other Bonds issued by the Company (including the Series A Bonds and the Series C Bonds) will not have recourse to the collateral granted to Valley as trustee for the Series B Bonds.

(5) The collateral to be granted to Valley as trustee for the Series C Bonds will serve as collateral security only for the Series C Bonds and the holders of other Bonds issued by the Company (including the Series A Bonds and Series B Bonds) will not have recourse to the collateral granted to Valley as trustee for the Series C Bonds.

(6) The Company is not in default under either Qualified Indenture.

(7) Such differences as exist between the Qualified Indentures and the New Indenture are not likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Valley from acting as trustee under any of the Indentures.

The Company has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the offices of the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than June 20, 1983 request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13262; 812-5525]

Bankers Security Variable Annuity Fund M, et al.; Application

May 23, 1983.

Notice is hereby given that Bankers Security Life Insurance Society ("Bankers Security"), a stock life insurance company, and Bankers Security Variable Annuity Funds M, P and Q ("Separate Accounts"), 1701 Pennsylvania Ave. NW., Washington, D.C. 20006, a single registered unit investment trust under the Investment Company Act of 1940 ("Act"), and Oppenheimer Money Market Fund, Inc., 2 Broadway, New York, N.Y. 10004, Daily Cash Accumulation Fund, Inc., Centennial Cash Accumulation Fund, Inc., Centennial Capital Appreciation Fund, Inc., and Centennial High Yield Bond Fund, Inc., 3600 South Yosemite St., Denver, Colo. 80237, diversified open-end investment companies registered under the Act, and Oppenheimer Investor Services, Inc., 2 Broadway, New York, N.Y. 10004, principal underwriter for the contracts issued through the Separate Accounts (hereinafter collectively referred to as "Applicants"), filed an application on April 13, 1983 and an amendment thereto on May 13, 1983 for an order of the Commission pursuant to Section 11 of the Act approving the terms of certain offers of exchange to the extent necessary to permit Applicants to offer the variable annuity contracts as described in this application. All interested persons are referred to the application and amendment on file with the Commission for a statement of the facts and representations contained therein, which are summarized below, and are referred to the Act for a statement of the relevant statutory provisions.

Applicants state that the purposes of Separate Accounts P and Q are to fund variable annuity contracts offered by Bankers Security for non-tax qualified and tax-qualified retirement programs for individuals. Separate Accounts P and Q invest their assets, at net asset value, in shares of Centennial Cash Accumulation Fund, Inc., Centennial Capital Appreciation Fund, Inc. and Centennial High Yield Bond Fund, Inc., no-load diversified open-end investment companies registered under the Act. Contracts issued through Separate Account M are no longer being offered for sale. Oppenheimer Money Market Fund, Inc. and Daily Cash Accumulation Fund, Inc. are separate "money-market" mutual funds (collectively referred to as "Funds").

Applicants propose to offer variable annuity contracts funded by Separate Accounts P and Q to shareholders of (i) Oppenheimer Money Market Fund, Inc. and (ii) Daily Cash Accumulation Fund, Inc. A shareholder of a Fund would be notified of the offer of exchange. Interested shareholders would receive variable annuity materials, including prospectuses. The exchange would be initiated by written request of a shareholder and delivery of any issued share certificates to the Funds' transfer agent. The exchange would be accomplished by the redemption of the Fund shares at net asset value next determined after receipt of the request for exchange and the reinvestment of those proceeds, without a sales charge, in accumulation units of the chosen sub-account of Separate Account P or Q at a value next determined after receipt of the assets for purchase of the variable annuity contract. Any applicable premium taxes would be deducted from the proceeds; otherwise all proceeds will be reinvested in the variable annuity contract. Applicants further represent that it is expected that for a short period of time after redemption from a Fund, generally about 24 hours, the investor will not be invested in the variable annuity contract. Such an "investment lag", during which the investor's funds will not be earning any income, will be disclosed in a supplement to the variable annuity prospectus during the period the exchange offer is outstanding. Once the investor's funds are invested in a contract, he will be liable for any contingent deferred sales charge, contract maintenance charge, mortality and expense risk charge or premium tax under the Contract. Applicants request approval pursuant to Sections 11(a) and 11(c) of the Act to the extent necessary to permit the transfers described above.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 15, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specified issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request.

Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-14523 Filed 5-31-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13269; 811-2232]

Cowles Communications, Inc.; Application

May 24, 1983.

Notice is hereby given that Cowles Communications, Inc. (the "Applicant"), 444 Seabreeze Blvd., Daytona Beach, Florida 32018, registered under the Investment Company Act of 1940 (the "Act") as a nondiversified, closed-end management investment company, filed an application on February 9, 1983, and an amendment thereto on May 6, 1983, for an order of the Commission, pursuant to Section 8(f) of the Act and Rule 8f-1 thereunder, declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, a summary of which is set forth below.

Applicant, an Iowa corporation, states that it registered under the Act on October 13, 1971, and filed a registration statement on April 3, 1972. On August 20, 1982, Applicant's Board of Directors unanimously approved a voluntary Plan of Liquidation and Dissolution (the "Plan"), which was approved by shareholders at a special meeting on November 5, 1982.

According to the application, before commencing its voluntary liquidation, Applicant held 2,600,000 shares of Class A Common Stock of The New York Times Company ("Times Stock") and through its wholly-owned subsidary, Cowles Broadcasting, Inc. ("CBI"), operated two television stations, WESH-TV, Daytona Beach/Orlando, Florida and KCCI-TV, Des Moines, Iowa. It is asserted that Applicant's Board of Directors determined, however, that direct ownership by Applicant's shareholders of the Times Stock and CBI stock, together with the cash and other net assets to be distributed, would better serve their interests than indirect ownership through an investment company structure, which, it is claimed, served no independent economic purpose.

Applicant represents that, pursuant to the Plan, it distributed substantially all of its net assets to its shareholders on January 14, 1983. According to the application, the distribution amounted to $191,517,000 of Applicant's total assets of $194,573,000 at December 31, 1982. Pursuant to the Plan, at such time as the Applicant's Board of Directors shall determine that all debts, obligations, and liabilities of the Applicant have been paid, satisfied and discharged, or adequately provided for, it is represented that the Board shall distribute *pro rata* to the shareholders the remainder of the Applicant's assets to the extent they may be lawfully distributed. The Plan provides that, in the event it should not be feasible for Applicant to pay, satisfy and discharge all debts, obligations and liabilities at the time of the final liquidated distribution described in the previous sentence, or in the event Applicant's Board of Directors shall determine it not to be advisable to so distribute any amount of cash or other property, then Applicant shall make such final liquidating distribution by transferring and consigning to a liquidating trustee the cash and other property not being distributed to shareholders, which shall be held by such liquidating trustee, subject to unsatisfied debts, obligations and liabilities assumed by it, solely for the benefit of Applicant's shareholders.

The application states that the estimated liabilities on April 25, 1983, are $988,600. It is represented that this amount of cash and other liquid assets in excess of liabilities ($2,741,600 at April 25, 1983) will be distributed to Applicant's shareholders. It is further represented that Applicant presently expects to distribute $2,182,723 in cash to its shareholders on or about June 22, 1983, and, shortly thereafter, to distribute the remainder of its assets, subject to unsatisfied liabilities, to a liquidating trust established pursuant to the Plan solely for the benefit of shareholders. Based on Applicant's assets and liabilities at April 25, 1983, assets to be distributed to such liquidating trust would be $556,876. In any event, Applicant expects its final liquidating distribution of all remaining assets to its shareholders or to a liquidating trust established solely for their benefit will occur on or prior to October 1, 1983.

On December 9, 1982, the Applicant filed a statement of intent to dissolve with the Secretary of State of Iowa. The application states that, pursuant to the Plan, as soon as possible after making the final liquidating distribution, Applicant shall file Articles of

Dissolution with the Secretary of State of Iowa.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 20, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-14820 Filed 5-31-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13266; 812-5477]

First Trust Money Market Fund; Filing of Application

May 23, 1983.

Notice is hereby given that First Trust Money Market Fund ("Applicant"), 110 North Franklin Street, Chicago, IL 60606, an open-end, diversified, management investment company, registered under the Investment Company Act of 1940 Act ("Act") and organized as a Massachusetts business trust, filed an application on March 1, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to value its assets at amortized cost. All interested persons are referred to the application on file with the Commission for statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the complete text of the provisions referred to herein.

Applicant states that it will issue shares in separate portfolios of securities (the "Portfolios") each of which will have its own investment policies and restrictions, including the Applicant's General Purpose Portfolio and Government Portfolio and such other portfolios as may be offered by the Applicant. Applicant states that it is a "money market fund" that will invest in a variety of high quality money market instruments maturing in one year or less in furtherance of the investment goal of Applicant and its Portfolios to seek as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity.

Applicant's Government Portfolio will invest exclusively in the following types securities: (1) Debt securities issued or guaranteed by the United States Government or its agencies or instrumentalities; and (2) repurchase agreements involving securities listed in (1) above through such securities may have a maturity of more than one year. Applicant's General Purpose Portfolio will invest exclusively in the following types of securities: (1) Debt securities issued or guaranteed by the United States or Canadian Governments or their agencies or instrumentalities; (2) repurchase agreements involving debt securities issued or guaranteed by the United States Government or its agencies or instrumentalities though such securities may have a maturity of more than one year; (3) certificates of deposit, time deposits and bankers' acceptances of United States and Canadian banks having total assets in excess of $1 billion and of foreign branches of United States banks having total assets in excess of $10 billion; and certificates of deposit, time deposits and bankers' acceptances of other United States banks if the principal amount of such obligation is fully insured by the Federal Deposit Insurance Corporation, currently $100,000; (4) certificates of deposit and time deposits of United States savings and loan associations (federally or state chartered and members of the Federal Savings and Loan Insurance Corporation) having total assets in excess of $1 billion; (5) commercial paper at time of purchase rated Prime-1 by Moody's Investors Services, Inc. ("Moody's"), A-1 by Standard & Poor's Corporation ("S&P") or, if unrated, issued or guaranteed by a corporation with outstanding debt rated Aa or better or Moody's or AA or better by S&P; and (6) corperate notes, bonds and debentures rated Aa or better by Moody's or AA or better by S&P at time or purchase. All obligations of the Canadian Government or its agencies or instrumentalities or Canadian banks and all obligations of foreign branches of United States banks will be payable in United States dollars.

In support of the requested, Applicant states that the expefience of its investment manager indicates that two qualities are helpful in order to attract investors in a "money market" fund: (1) Stability of principal and (2) steady flow of investment income. Applicant asserts that by utilizing high quality money market instruments of short maturities combined with a stable not asset value, preferably $1.00 per share, it would be possible to provide those features to a variety of investors. Applicant states that its Trustees believe that given the nature of Applicant's policies and operations, there normally will be a relatively negligible discrepancy between market value and amortized cost value of Applicant's portfolio securities for each Portfolio of Applicant. Applicant's Trustees have determined in good faith that in light of the characteristics of Applicant, absent unusual or extraordinary circumstances, the amortized cost method of valuing portfolio securities for each Portfolio is appropriate and preferable for the Applicant and reflects the fair value of those securities.

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security or transaction, or any class or classes or persons, securities, or transactions, from any provision or provisions of the Act or of the rules thereunder, if and to the extent that such exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant asserts that its application meets the standards of Section 6(c) of the Act in light of the management policies, and has agreed that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

1. In supervision the Applicant's operations and delegating special responsibilities involving portfolio management to the Applicant's investment manager, the Trustees of the Applicant undertake—as a particular responsibility within the overall duty of care owed to the Applicant's shareholders—to establish procedures reasonably designed, taking into account current market conditions and the investment goal for each Portfolio of

Applicant, to stabilize the Applicant's net asset value per share for each Portfolio, as computed for the purpose of distribution, redemption and repurchase at $1.00 per share.

2. To be included within the procedures to be adopted by the Trustees of the Applicant are the following:

(a) Review by the Trustees, as they deem appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share for each Portfolio as determined by using available market quotations if available or, if not available, fair value as determined by the Trustees from the Applicant's $1.00 amortized cost price per share for each Portfolio, and maintenance of records of such review.[1]

(b) In the event such deviation from the $1.00 amortized cost price per share for any portfolio exceeds ½ of 1 percent, the Trustees of the Applicant will promptly consider what action, if any, should be initiated.

(c) Where the Trustees believe the extent of any deviation from the Applicant's $1.00 amortized cost price per share for any Portfolio may result in material dilution or other unfair results to investors or existing shareholders, they shall take such action as they deem appropriate to eliminate or to reduce to the extent resonably practicable such dilution or unfair results. Such action may include: the sale of portfolio securities prior to maturity to realize capital gains or losses or to shorten the average portfolio maturity of such Portfolio; withholding dividends; or utilizing a net asset value per share as determined by using actual quotations or estimates of market value reflecting current market conditions selected by the Trustees as appropriate indicators of value.

3. The Applicant will maintain a dollar-weighted average portfolio maturity for each portfolio appropriate to its objective of maintaining a stable net asset value per share; provided, however, that the Applicant will not (1) purchase any instrument with a remaining maturity at the date of acquisition of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity for any portfolio in excess of 120 days. In fulfilling this condition, if the disposition of a protfolio instrument results in a dollar-weighted average portfolio maturity for any portfolio in excess of 120 days, the Applicant will invest its cash in such a manner as to reduce its dollar-weighted average portfolio maturity for such Portfolio to 120 days or less as soom as reasonably practicable.

4. The Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition (a) above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Trustees' considerations and actions taken in connection with the discharge of their responsibilities, as set forth above, to be included in the minutes of the Trustees' meetings. The documents preserved pursuant to this condition shall be subject to inspection in accordance with Section 31(b) of the Act as though such documents were records required to be maintined pursuant to rules adopted under Section 319a) of the Act.

5. The Applicant will limit the portfolio investments of each portfolio, including repurchase agreements, if any, to those United States dollar-denominated instruments which the Trustees of the Applicant determine present minimal credit risks, and which are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the Trustees.

6. The Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition (2)(c) was taken during the prededing fiscal quarter, and, if any action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[1] To fulfill this condition, the Applicant will use actual quotations or estimates of market value reflecting current market conditions selected by its Trustees in the exercise of their discretion to be appropriate indicators of value. The quotations or estimates utilized may include, *inter alia*, (1) quotations of market value for individual protfolio instruments, or (2) estimates of market value for individual protfolio securities obtained from yield data relating to classes of money market instruments furnished by reputable sources.

[Release No. 13267; 812–5486]

Security Pacific Bank Canada; Filing of Application

May 23, 1983.

Notice is hereby given that Security Pacific Bank Canada ("Applicant"), c/o David L. Johnson, Esq., Security Pacific National Bank, 333 South Hope Street, Los Angeles, CA 90071, filed an application on March 9, 1983, and an amendment thereto on May 2, 1983, requesting an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant from all the provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the text of the provisions from which Applicant seeks to be exempted.

Applicant states that it is a third-tier wholly-owned subsidiary of Security Pacific National Bank ("SPNB"), a national banking association incorporated under the National Bank Act, which in turn is a wholly-owned subsidiary of Security Pacific Corporation ("SPC"), a Delaware corporation and a bank holding company registered under the Bank Holding Company Act of 1956. Applicant states that it provides to domestic and foreign governments and corporations a wide range of commercial banking services, including term and working capital facilities and project financing in the resource and real estate sectors. As of October 31, 1982, the end of its last fiscal year, Applicant had total assets of $128,113,000 of which approximately $105,276,000, or 82%, were loans and deposits. According to Applicant, approximately 78% of its gross income for 1982 was interest income from loans and deposits.

The application states that SPNB is the tenth largest commercial bank in the United States and provides a full line of commercial and retail banking and fiduciary services. The application further states that SPNB also engages in international activities through overseas branches, offices, subsidiaries and affiliates; Edge Act subsidiaries an international banking facilities located in the United States; and international banking operations in California. The application states that SPC is principally engaged in the business of banking through SPNB and is also engaged in several banking-related activities, principally leasing, consumer and commercial finance, factoring, mortgage banking and venture capital. Such activities are conducted both through subsidiaries of SPNB and through other subsidiaries of SPC.

Applicants represents that as a Canadian Bank chartered under the Bank Act of Canada ("Bank Act"), it is required to compile and publish annual statements of assets and liabilities, income, appropriations for contingencies and changes in shareholders' equity as well as quarterly income statements that are also sent to the Canadian Inspector General of Banks ("Inspector"). The Applicant represents that the Inspector is permitted to examine Applicant as often as is deemed necessary or expedient, and in no event less than once a year.

Applicant represents that the corporate powers that a Canaidan chartered bank such as Applicant may exercise are expressly set out in the Bank Act. Prohibited activities such as dealing in goods, wares and merchandise or engaging in any trade or business other than the business of banking are also set out in the Bank Act, as are limitations on certain activities such as the sale or underwriting of securities. The Bank Act also governs matters such as reserve and liquidity requirements.

Applicant states that is proposes to obtain additional funding for its operation through the issuance of debt securities in the United States. Applicant further states that such debt securities are expected to include promissory notes issued pursuant to Section 3(a)(2) of the Securities Act of 1933 ("1933 Act"), which specifically exempts from registration the sale of notes "guaranteed by a bank" (e.g., SPNB). Applicant states that other alternatives are the issuance of commercial paper pursuant to the exemption from registration provided by Section 3(a)(3) of the 1933 Act; the issuance of promissory notes in the United States to qualified investors pursuant to the exemption from registration provided by Section 4(2) of the 1933 Act; and registered public offerings of debt securities. Applicant states that any debt securities issued pursuant to an offering within the United States will rank *pari passu* among themselves, equally with all its other unsecured, unsubordinated indebtedness, including Applicant's deposit liabilities, and ahead of its equity securities.

Regardless of the alternative(s) utilized, Applicant represents that it will appoint an agent for service of process in either New York City or Los Angeles, California for any actions arising out of the sale of its securities and instituted in any state or federal court in the State of New York or California, respectively, by the holder of any such security. Applicant represents that it will expressly accept the jurisdiction of any state or federal court in the state in which it appoints an agent for service of process in respect of any such action. Applicant represents that it will also be subject to suit in any other court in the United States which would have jurisdiction because of manner of the offering of such securities or otherwise. Applicant represents that such appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the securities have been paid.

Applicant represents that any commercial paper issued pursuant to Section 3(a)(3) of the 1933 Act will be sold in minimum denominations of $100,000 and will have original maturities of 270 days or less. Such commercial paper may be offered publicly through one or more major commercial paper dealers but only to the types of sophisticated and largely institutional investors that ordinarily participate in the commercial paper market. While an announcement of the establishment of the commercial paper facility may be made as a matter of record, the offering will not be advertisd. Applicant further represents that prior to issuance such commercial paper will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization, and that its United States counsel shall have certified that such rating has been received.

Applicant undertakes to provide each purchaser of its commercial paper prior to the purchase thereof a memorandum which briefly describes the business of Applicant and includes its most recent publicly available annual financial statements, audited in accordance with Canadian accounting principles applied in the preparation of such financial statements and "generally accepted accounting principles" employed by United States banks, will be at least comprehensive as those memoranda customarily used in offering commercial paper in the United States, and will be updated promptly to reflect material changes in the Applicant's financial condition.

Applicant further represents that other offerings of debt securities in the United States will be made only pursuant to a registration statement under the 1933 Act or pursuant to any applicable exemption from registration under such Act. Any such offerings will be made on the basis of disclosure documents appropriate and customary for such registration or exemption and in any event at least as comprehensive as those used in offerings of similar debt securities in the United States by United States banks. Applicant undertakes to ensure that such disclosure documents will be provided to each purchaser of such securities prior to their purchase, except that in the case of an offering made pursuant to a registration statement under the 1933 Act, such disclosure documents will be provided to such persons and in such manner as may be required by the 1933 Act and the pertinent rules and regulations thereunder. Applicant consents to having any order granting the relief requested hereby expressly conditioned upon its compliance with the foregoing undertakings regarding disclosure documents.

Applicant represents that it will not issue and sell any security pursuant to Section 3(a)(3), 3(a)(2) and/or 4(2) of the 1933 Act until it has received an opinion of its United States legal counsel to the effect that, under the circumstances of the proposed offering, the security will be entitled to the exemption provided by the appropriate section of the 1933 Act. Applicant does not request Commission review or approval of counsel's opinion(s) regarding the availability of an exemption from the registration requirements of the 1933 Act.

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary

or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant states that approval of this application is appropriate in the public interest since and exemption would benefit not only it, but also institutional and other sophisticated investors in the United States. Without this type of exemption, these investors would be unable to purchase securities issued by foreign banks, which are representing an increasingly important segment of the prime quality securities market. Applicant further states that an exemption would be consistent with the protection of investors because there already exists regulatory structures which afford protection to investors.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13268; 812-5511]

Sunbelt Growth Fund, Inc.; Filing of Application

May 23, 1983.

Notice is hereby given that Sunbelt Growth Fund, Inc. ("Sunbelt"), Commerce Income Shares, Inc. ("Commerce") and Pilot Fund, Inc. ("Pilot") (collectively, the "Funds"), each registered under the Investment Company Act of 1940 (the "Act") as a diversified, open-end, management investment company, and Funds, Inc. Services Corp. ("Services"), principal underwriter for the Funds (collectively with the Funds, "Applicants"), 333 Clay Street, Suite 4300, Houston, TX 77002, filed an application for an order: (1) Pursuant to Section 11(a) of the Act, permitting Applicants to offer shares of the Funds (a) in exchange for shares of the Municipal Bond Portfolio (the "Bond Portfolio") of Criterion Tax Free Fund, Inc. ("Tax Free"); and (b) in exchange for shares of Investment Quality Interest, Inc. ("IQI"), or shares of any presently organized or subsequently created portfolios of Tax Free or Current Interest, Inc. ("Current Interest") the shares of which are sold to the public without imposition of any sales charge, that were acquired through one or more exchanges of shares which are attributable to shares of the Bond Portfolio, in each case on a basis other than their relative net asset values per share at the time of the exchange; and (2) pursuant to Section 6(c) of the Act, exempting sales of shares of the Funds pursuant to such exchanges from the provisions of Section 22(d) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act of the text of the provisions from which Applicants seek exemption.

Applicants state that the Funds, IQI, Tax Free and Current Interest have different investment objectives and policies. Each company is registered under the Act as a diversified, open-end, management investment company. Shares of each of the Funds, IQI and Current Interest are registered under the Securities Act of 1933 and presently are offered for sale to the public in continuous offerings. Tax Free has filed a registration statement with the Commission under the Securities Act of 1933, pursuant to which it seeks to register its shares for sale to the public. That registration statement had not become effective at the time of the filing of the appliclation.

Applicants state that Services acts as the distributor of shares of Current Interest in certain states, without remuneration, and serves as principal underwriter for the Funds, IQI and Tax Free. Services (formerly called Systematic Plans, Inc.) is a wholly owned subsidiary of Funds, Inc. It is registered with the Commission as a broker-dealer and is a member of the National Association of Securities Dealers. Funds, Inc., a registered investment adviser and a wholly owned subsidiary of The Criterion Management Company, serves as the investment adviser of each of the Funds, IQI, Tax Free and Current Interest.

According to Applicants, Tax Free is organized as a series company in that shares of its Class A Common Stock may be divided into series, each of which represent interests in a separate portfolio of investments. As of the date of the filing of this application, the Board of Directors of Tax Free had authorized the creation of two portfolios: (1) The Bond Portfolio; and (2) the Money Market Portfolio. Current Interest is also organized as a series company and presently offers investors the opportunity to purchase shares of five different portfolios, each of which invests in money market instruments pursuant to varying investment policies: (1) the Money Market Portfolio; (2) the United States Government Portfolio; (3) the Institutional Money Market Portfolio; (4) the Total Management Money Market Portfolio; and (5) the Total Management United States Government Portfolio.

Applicants represent that shares of each portfolio of Current Interest are sold to the public with no sales load. Upon the effective date of the Tax Free's registration statement under the Securities Act of 1933, Applicants state that shares of the Money Market Portfolio will similarly be offered to the public at no load. Shares of the Funds are sold to the public at their respective current net asset values per share, plus a sales charge based upon the amount invested, ranging from 8% for purchases of less than $15,000 to 0.5% for purchases of $2 million or more.

According to Applicants, shares of IQI are sold to the public, and shares of the Bond Portfolio will be sold to the public, at their respective current net asset values per share, plus a sales charge ranging from 4.5% for purchases of less than $25,000 to 1% for purchases of $500,000 or more.

Applicants represent that the Funds, IQI and the Bond Portfolio each permit reinvestment of dividends and capital gains distributions at net asset value per share, without the imposition of a sales charge. The reduced sales charges for large purchases, which apply to single purchases of specified amounts, are also applicable to purchases of shares made pursuant to a letter of intent and, by virtue of "rights of accumulation" available to shareholders, the amount of a shareholder's holdings of shares of one of the Funds, IQI or the Bond Portfolio is aggregated with the amount of a subsequent purchase of shares for purposes of determining the sales charge applicable to such subsequent purchase.

Applicants represent the following offers of exchange are presently made available or, when the offering of Tax

Free shares to the public begins, will be made available, to shareholders in each case on the basis of relative net asset value per share at the time of the exchange, without imposition of a sales charge:

(1) Shares of one of the Funds may be exchanged for shares of another one of the Funds, IQI, the Bond Portfolio, or the Money Market or United States Government Portfolios of Current Interest, and any share so acquired may thereafter be exchanged in one or a series of exchanges for shares of any of the foregoing companies or portfolios.

(2) Shares of IQI and the Bond Portfolio may by be exchanged for each other or exchanged for shares of the Money Market Portfolio or the Money Market or United States Government Portfolios of Current Interest, and any shares so acquired may thereafter be exchanged in one or a series of exchanges for shares of IQI or the Bond Portfolio.

(3) Shares of the Money Market Portfolio and the Money Market and United States Government Portfolios of Current Interest may be exchanged for each other.

(4) Shares of the Funds, IQI, the Bond Portfolio, the Money Market Portfolio, or the Money Market or United States Government Portfolios of Current Interest acquired through the reinvestment of dividends or capital gains distributions may be exchanged for shares of any of the foregoing companies or portfolios.

Applicants state that, in the case of each of the offers of exchange described above, the shares being exchanged must have a net asset value of at least the minimum initial amount required for investment in shares of the investment company whose shares are to be acquired pursuant to the exchange.

With respect to each exchange, a service charge of $5.00 is, or will be, deducted and retained by Services to defray clerical and other administrative expenses.

Applicants propose to permit investors to exchange shares of the Bond Portfolio and shares of Current Interest, the Money Market Portfolio of Tax Free acquired in exchange for shares of the Bond Portfolio for shares of the Funds, at their relative net asset values per share at the time of the exchange, plus a sales load differential determined by (1) calculating the sales charge, described in the then current prospectus of the relevant Fund, that would normally be payable on the purchase of shares in the same dollar amount as the shares being exchanged, giving recognition to shareholders' "rights of accumulation," and (2) subtracting from the charge so determined an amount equal to the sales charge described in the then current prospectus of the Bond Portfolio that would be payable on the purchase of the dollar amount of shares of the Bond Portfolio being exchanged (or that would have been payable upon the purchase of a dollar amount of Bond Portfolio shares equal in amount to the dollar amount of the shares of the Money Market Portfolio, Current Interest or any subsequently created no load portfolio of Tax Free being exchanged for shares of a Fund). The sales charges payable on the proposed exchanges would be received by Services as principal underwriter for the Funds, and a portion of those sales charges could be reallowed to dealers.

Applicants state that, as is the case with respect to the offers of exchange presently being made, the shares being exchanged would be required to have a net asset value of at least the minimum initial amount required for investment in one of the Funds, and a $5.00 service charge would be deducted and retained by Services. Applicants represent that in the event that a shareholder desires to exchange only a portion of his holding of shares, those shares which could be exchanged on the basis of relative net asset values, without imposition of a sales charge, would be exchanged first.

Section 11(a) of the Act provides, in pertinent part, that it shall be unlawful for any registered, open-end investment company or any principal underwriter for such company to make or cause to be made an offer to the holder of a security of such company or of any other open-end investment company to exchange such security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission.

Applicants state that the proposed offers of exchange would be on a basis other than relative net asset values per share because a shareholder would be required to pay a sales charge differential. For that reason, Applicants state that the making of such offers is not permissible under Section 11(a) of the Act, absent an order of the Commission. According to the application, an exemption from the provisions of Section 22(d) of the Act (pursuant to an order under Section 6(c) of the Act) is required to permit the reduced sales charges that would be imposed with respect to the proposed exchanges because the reduced sales charges would result in the sale of shares of the Funds to investors at a current public offering price other than that described in the prospectuses of the Funds.

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants state that the proposed exchange offers are designed to permit shareholders of the Bond Portfolio, and shareholders of IQI, and no load portfolios of Tax Free and Current Interest whose shares were acquired as a result of an exchange of shares of the Bond Portfolio, who change their investment objectives, to transfer their investments into one of the Funds without paying the full sales charge normally applicable. While Applicants note that such offers could be made on the basis of relative net asset values per share, Applicants submit that exchanges effected on that basis would in some cases inequitably benefit the exchanging shareholders by permitting them to pay substantially less sales charges for their acquisitions of shares of the Funds than investors who purchased shares of the Funds directly. Applicants assert that exchanges made on the basis they proposes would avoid such inequities and, at the same time, be fair to the shareholders involved. Accordingly, Applicants submit that the granting of an order pursuant to Section 11(a) of the Act permitting the proposed offers of exchange would be appropriate.

Applicants further submit that the granting of an exemption from the provisions of Section 22(d) of the Act would also be appropriate. In this regard, Applicants note that the sales charges payable in connection with the proposed offers of exchange would be equal to the difference between the sales charge that would have been paid if shares of a Fund had been purchased directly and the sales charge, if any, that would be paid on the purchase of shares of the Bond Portfolio being exchanged (or on the purchase of Bond Portfolio shares in a dollar amount equal to the amount of shares of IQI, Tax Free or Current Interest being exchanged) based upon the then, current offering price of shares of the Bond Portfolio. Applicants submit, therefore, that a shareholder making the exchange would, in effect, be

required to pay a total sales charge approximating that which would have been paid had shares of a Fund been purchased directly. Accordingly, Applicants submit that the terms of the proposed offers of exchange assure that all investors who purchase shares of the Funds will be treated on an equal basis, regardless of whether shares were purchased directly or through an exchange.

In view of the foregoing, Applicants state that the proposed offers of exchange would be fair and equitable to shareholders of the Funds, and would be beneficial to shareholders of Tax Free, IQI and Current Interest. Under the circumstances, Applicants submit that the granting of the order requested would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19793; File No. SR-CBOE-83-10]

Self-Regulatory Organizations; Proposed Rule Change by Chicago Board Options Exchange, Inc., Relating to Index Options

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 10, 1983, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of Proposed Rule Change

The text of the proposed rule change is ass follows with additions italicized and deletions bracketed.

Option Contracts Open for Trading

Rule 5.5. The Securities Committee shall, from time to time, open for trading series of options in respect of underlying securities which have been approved by the Board in accordance with Rule 5.3. Only option contracts of series of options currently open for trading may be purchased or written on the Exchange. The opening of a new series of options shall not affect other series of options of the same class previously opened. On the business day prior to the expiration date of particular option series, the closing rotation for such series shall commence at 2:00 p.m., *except that the closing rotation for index option series shall commence at 3:00 p.m.*

Exercise of Option Contraction

Rule 11.1 (a) no change.

(b) no change.

Interpretation and policies.

.01 through .03 no change.

.04 With respect to index option contracts, Clearing Members must follow the procedures of the Clearing Corporation for tendering exercise notices and Member Organizations also must follow the procedures set forth below:

(a) a memorandum to exercise any contract issued or to be issued in a customer or Market-Maker account at the Clearing Corporation must be received or prepared by the Member Organization no later than 3:10 P.M. Chicago time and must be stamped at the time it is received or prepared. Member Organizations must accept exercise instructions until 3:10 P.M. Chicago time;

(b) a memorandum to exercise any contract issued or to be issued in a firm account at the Clearing Corporation must be prepared by the Member Organization no later than 3:10 P.M. Chicago time and must be time stamped at the time it is prepared;

(c) failure of any member to follow the procedures and meet the deadlines in this section .04 may result in the assessment of fines in an amount determined by the Exchange and may be referred to the Business Conduct Committee.

(d) all memoranda of exercise instructions are subject to SEC Rules 17a-3(a)(6) and 17a-4(b); and

(e) the above provisions [are not applicable] *do not apply* to expiring series on the business day prior to expiration. *The exercise cut-off time pursuant to Rule 11.1(b) for index option contracts shall be 5:30 P.M. Chicago time on the business day immediately prior to expiration. In the event a member organization does not carry accounts for customers, it shall nevertheless be subject to such exercise cut-off time for the purposes of the third and fourth sentences of Rule 11.1(b).*

II. Self-regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of this proposed rule change is to extend, from 2:00 p.m. to 3:00 p.m., the time that index option contracts are open for trading on the business day prior to expiration. When the exchange commenced options trading in 1973 the clearing function was performed on Friday night, and the purpose of the 2:00 p.m. cut-off was to give the clearing corporation and clearing firms one extra hour to perform their functions. Because of enhanced operational capabilities the Options Clearing Corporation and clearing firms do not need the extra hour. Yet, the early cut-off could impair the market for cash-settled index options because the underlying stock that determines the closing index value would continue trading. Under this circumstance the early close of trading on the day before expiration is an unnecessary restriction.

The basis under the Securities Exchange Act of 1934 for the proposed rules change is Section 6(b)(5) in that it will remove an impediment to and perfect the mechanism of a free and open market.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe the proposed amendment will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Many traders of index optons requested this change. Clearing firms and the Options Clearing Corporation agree that it will not impose any operational difficulties. The American Stock Exchange, where index options are also traded, agrees with the proposal and intends to file a similar rules change proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commiesion will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 20, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19800; File No. SR-NASD-83-7]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc., Relating to Transaction Fee on Agency Cleared Trades

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 12, 1983, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule is to provide for the assessment of a fee upon NASD members in an amount not to exceed 12¢ per side for transactions cleared through a registered clearing agency.

II. Self-Regulatory Organization's Statements Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the rule change is to prevent the loss of the revenue flow presently provided to the Association, as well as to the American and New York Stock Exchanges, by the regulatory fee paid by the National Securities Clearing Corporation. The proposed rule will not be implemented until the expiration of that fee on June 30, 1983. The proposed fee is being levied on agency-cleared trades only because of the difficulty of reporting and monitoring the accuracy of reporting of any fees on non-agency cleared transactions. Section 15A(b)(5) of the Act provides for the equitable allocation of reasonable fees among members of the Association. The Association believes that the proposed rule is the most efficient fee that can be assessed and that the fee will form a part of a total flow of revenues for the Associaton which are equitably allocated among the members.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Association does not believe that the proposed rule change will result in a significant burden on competition nor will it hinder efforts to facilitate national clearance and settlement of securities transactions in that the fee is similar to the existing NSCC regulatory fee which has not proved to be a substantial disincentive to agency clearing and which has ultimately been borne by those NASD members now clearing through NSCC.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Association's Rules of Fair Practice provide that Schedule A may be amended by the Board without recourse to the membership. Thus, no comments on the proposed change were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the

Secretary, Securities and Exchange Commisson, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within (21) days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 23, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19801; SR-MSRB-83-1]

Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

May 23, 1983.

The Municipal Securities Rulemaking Board ("MSRB"), 1150 Connecticut Avenue, NW., Washington, D.C. 20036, submitted on January 17, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to review the application of MSRB rules to private placement of municipal securities and interpret the application of MSRB Rules G-1, G-3 and G-23 to financial advisory services rendered to a corporate obligor on an issue of industrial development bonds ("IDB"). With respect to private placement activity for IDBs by a bank, the interpretation notes that it must be conducted through the registered dealer department of the bank. The MSRB warns bank dealers to review their organizations to ensure that all departments or units of the bank which engage in private placement of IDBs are designated on the bank's Form MSD and other applicable bank records as part of its separately identifiable department or division pursuant to Rule G-1. The MSRB also states that private placements of IDBs must be effected and supervised by persons qualified pursuant to the requirements of Rule G-3.

The proposed rule change also interprets the application of MSRB Rules G-1, G-3 and G-23 to financial advisory services rendered to a corporate obligor for an issue of IDBs. The proposed MSRB interpretation states that these three rules do not apply to financial advisory services given to a corporate obligor for an IDB issue, if such financial advisory services are limited to advice on the structure, timing, terms, and other similar matters concerning a proposed issue. The MSRB states, however, that other financial advisory services, such as participating in negotiations with prospective purchasers or engaging in placement of the issue, would be subject to Rules G-1 and G-3. The MSRB states that its rules would continue to apply to any advisory relationship with a governmental unit or direct communication with public customers. At this time, however, the MSRB is not aware of problems associated with the furnishing of financial advisory services to corporate obligors on IDBs which indicate a need for MSRB regulation. The MSRB states that it does not believe it is appropriate or necessary at this time to extend its regulatory reach to persons who are in the business of advising corporations about various financing alternatives merely because one alternative involves the issuance of tax-exempt securities.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19672, April 13, 1983) and by publication in the **Federal Register** (48 FR 17010, April 20, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19802; File No. SR-PSDTC-83-3]

Filing and Immediate Effectiveness of Proposed Rule Change by Pacific Securities Depository Trust Company

May 23, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 19, 1983, the Pacific Securities Depository Trust Company ("PSDTC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would permit PSDTC to make bonds with a face value of less that $1,000 ("Small Bonds") ineligible for deposit at PSDTC. PSDTC submitted the proposal because PSDTC believes that some transfer agents' treatment of Small Bonds makes it difficult for PSDTC to satisfy participants' needs promptly. The proposal would permit PSDTC to withdraw Small Bonds from its inventory and return them to the appropriate participants to the extent that PSDTC can obtain suitably denominated Small Bonds. Any remaining positions would be carried in Pacific Clearing Corporation's ("PCC") settlement records. Trading in Small Bonds, however, would continue at the Pacific Stock Exchange and trades would be settled through PCC's continuous net settlement system. PSDTC explains that participants would settle their Small Bond obligations by netting away any residual Small Bond positions appearing on PCC's settlement records or by delivering physical securities. Accordingly, PSDTC anticipates that all uncertificated positions ultimately would be eliminated since (i) settlement activity would reduce some positions to zero; (ii) settlement activity would increase some positions to amounts for which certificates are available; or (iii) the physical delivery of Small Bond certificates to PCC would permit PCC to redeliver those certificates to PCC

[1] 17 CFR 200.30-3(a)(1).

participants with uncertificated long positions, thereby eliminating them from PCC's system. PSDTC states that the proposal is consistent with Section 17A(b)(3)(F) because it facilitates the prompt and accurate clearance and settlement of securities transactions.

The foregoing proposed rule change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR–PSDTC–83–3.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available or inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Divison of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19798; File No. SR–OCC–83–8]

Filing and Immediate Effectiveness of Proposed Rule Change by the Options Clearing Corporation

May 23, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 19, 1983, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change increases OCC's participant fees for providing participants or their agents with daily options trade data on computer tapes or through data terminals. OCC requires the fees change, it states, because its costs of providing these services have increased. The proposal would not alter OCC's pricing policy of allocating among two participants the costs of one computer terminal serving both participants. For example, assume that Participant A has a Local Control Unit ("LCU") data terminal installed at his office for his own use and to facilitate access to trade data by OCC Participant B. The proposal would provide that if Participant A receives equity options data for his account, he would pay $800 per month to OCC; if Participant B also has his daily equity option's data sent to Participant A's terminal, Participant B would pay $250 per month to OCC. The proposal provides, however, that the maximum charge for an LCU terminal serving more than one participant is $1,000 per month. Accordingly, Participant A's fee is reduced to $800 to $750, reducing OCC's revenue from that terminal from $1,050 to $1,000. Participant B's fee is not reduced. OCC believes that the proposal is consistent with Section 17A(b)(3)(D) of the Act because it provides for the equitable allocation of dues, fees, and other charges among its participants.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–OCC–83–8.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19803; File No. SR–OCC–83–11]

Filing and Immediate effectiveness of Proposed Rule Change by the Options Clearing Corporation

May 23, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 27, 1983, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change adds two "Interpretations and Policies" ("Interpretations") under Article VI, § 1 of OCC's By-laws. The first Interpretation incorporates into OCC's By-laws OCC's existing policy described in OCC's Clearing Manual that allows Clearing Members to effect certain adjustments to their positions and accounts with OCC. The second Interpretation enables Clearing Members to rectify coding errors made in reporting trades in near-the-threshold expiring options up to the time Clearing Members return to OCC the Final Exercise Report on expiration day.

Under the first Interpretation, Clearing Members may adjust their positions and accounts in the following situations: (1) adjustments at the time of a transfer of an account, in which the entire account of a customer or market-maker is

transferred from one Clearing Member to another; (2) adjustments in transactions effected pursuant to OCC's "Clearance of Exchange Member Transactions and Adjustments Agreement" ("CMTA"), which permits an "Initiating Clearing Member" to correct errors in the reporting of CMTA transactions (*i.e.*, options transactions effected on an Options Exchange by another Clearing Member (an "Authorized Exchange Member") on behalf of the account of a Clearing Member that is not a member of the Exchange (the "Initiating Clearing Member")); and (3) correction of *bona fide coding errors made in reporting Exchange transactions e.g.*, incorrect account number or opening versus closing coding errors).

The second Interpretation allows a Clearing Member to adjust certain positions after the Member returns OCC's Preliminary Exercise Report and up to the time the Member returns to OCC the Final Exercise Report. Under this portion of the rule change, Clearing Members may submit adjustments that relate only to Exchange transactions in expiring options series with exercise prices in the range of ⅝ of a point below or above the closing price of the security issue underlying the options series. Moreover, the only positions that may be adjusted are those that are the result of *bona fide* errors or omissions, *i.e.*, coding errors that occur during the trade recording process. Previously, OCC did not authorize Clearing Members to correct such *bona fide* errors and omissions after OCC's issuance of the Final Exercise Report to Clearing Members (by 2:00 p.m. Central Time on expiration day). Under the proposal, however, such adjustments can be made up to 4:00 p.m. Central Time, the time by which OCC Rule 805 requires Clearing Members to return the Final Exercise Report to OCC.

OCC states in its filing that the first purpose of the proposed rule change is to incorporate into OCC's By-laws OCC's existing procedures relating to the adjustment of Clearing Members' positions to reflect transfers of accounts, the correction of errors in reporting CMTA transactions and the correction of *bona fide* coding errors occurring in the Exchange transaction reporting process.

OCC's second purpose is to expand the time period during which, in limited circumstances, Clearing Members can adjust *bona fide* errors relating to expiring options positions. This expansion, OCC argues, should reduce financial exposure to Clearing Members and improve the accuracy of Clearing Members' record. In its filing, OCC illustrated by way of the following example the need for the second Interpretation: A Clearing Member's Final Exercise Report shows that the Member is both short and long identical expiring options, *i.e.*, it has written an IBM May 50 call option and has bought an IBM May 50 call option. The IBM option is ⅝ of a point in-the-money. The Clearing Member's internal records, however, show no IBM option positions whatsoever because the two IBM 50's are offsetting opening and closing transactions. Presumably, both positions reflected on the Final Exercise Report were erroneously coded as opening transactions. In this situation, under current procedures, the Member must decide whether to exercise the long call position to obtain stock for delivery against any potential exercise of the short call position. If the member fails to exercise the long position, the Member risks that the short position will be assigned an exercise notice, requiring the Member to cover the assignment by purchasing sufficient IBM stock in the open market at a price in excess of the call's strike price. Thus, the Clearing Member could incur additional clearing and transaction costs. On the other hand, if the Clearing Member exercises the long position, the short position may not be assigned an exercise notice during OCC's exercise assignment allocation procedure. In this circumstance, the Clearing Member would be forced to carry a stock position, the liquidation of which could expose the Member to market risks and transaction and other costs. OCC believes that the second Interpretation in the proposal should remedy the Clearing Member's dilemma by providing him with a mechanism for correcting the *bona fide* error.

In its filing, OCC states that the proposed Interpretations reflect an incorporation and limited extension of OCC's current policy respecting adjustments to correct certain *bona fide* errors. To assure that the adjustment position system will not be abused, however, OCC has represented that it will continue to monitor its Clearing Members' use of adjustments. Indeed, the proposal is designed to reduce the possibilities of abuse since only those expiring options positions that logically should be adjusted are eligible for adjustment under the second Interpretation.

Finally, OCC believes that the proposal is consistent with Section 17A of the Act because it promotes the prompt and accurate clearance of securities transactions and protects investors by permitting the correction of inadvertent errors.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–OCC–83–11.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 23, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted

trading privileges in the following stocks:

BMC Industries, Inc., Common Stock, No Par Value (File No. 7–6663)
First Boston, Inc., Common Stock, No. Par Value (File No. 7–6664)
Intermedics, Inc., Common Stock, $.10 Par Value (File No. 7–6665)
Key Banks, Inc., Common Stock, $5 Par Value (File No. 7–6666)
Telerate, Inc., Common Stock, $.01 Par Value (File No. 7–6667)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 14, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No 13265; 812–5465]

Banque Nationale de Paris (Canada); Filing of Applicating Exemption Applicant From All Provisions

May 23, 1983.

Notice is hereby given that Banque Nationale de Paris (Canada), c/o George M. Cohen, Esq., Clearly, Gottlieb, Steen & Hamilton, One State Street Plaza, New York, NY 10004, ("Applicant") filed an application on March 2, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act") exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for statement of the representations contained therein, which are summarized below.

Applicant represents that it is a bank chartered under the laws of Canada, wholly-owned by Banque Nationale de Paris ("BNP"), a bank organized under the laws of France. Applicant states that Societe Financiere Pour le Commerce et l'Industrie Lt'ee ("S.F.C.I."), incorporated in November, 1961, served as BNP's principal financial operation in Canada. Applicant was created in November, 1982, as the result of the merger of BNP Canada, S.F.C.I.'s successor corporation, into a Canadian banking corporation under Applicant's name.

On August 7, 1979, the Commission issued an order pursuant to Section 6(c) of the Act exempting BNP from all provisions of the Act (Investment Company Act Release No. 10813). Information regarding BNP, including a description of its business and banking regulations to which it is subject, is included in BNP's application requesting that order (File No. 812–4997).

Applicant represents that it has succeeded to all of BNP Canada Inc.'s business and activities, which have now been significantly broadened to a full service wholesale banking business; and that its present and planned activities are commercial banking activities, including: short and medium term commercial lending; deposit-taking; investing in commercial paper, bank instruments and government obligations; discounting of trade bills; letters of credit; and foreign exchange trading. As of October 31, 1982, Applicant's audited balance sheet showed total assets equivalent to approximately $1,035,500,000; approximately 58% of its assets consisted of loans, and the balance sheet showed total liabilities equivalent to approximately $995,520,000. Applicant's share capital as of October 31, 1982 was approximately Can. $50,000,000. (All figures relating to the Applicant are in United States dollars except where otherwise indicated, converted from Canadian dollars at the rate of United States $1 = Can. $0.8160, the prevailing rate on January 31, 1983).

Applicant states that BNP exercises substantial supervision and control over the Applicant's activities: all credit approvals for facilities in excess of a predetermined dollar limit in any one name are referred to BNP's head office in Paris for its review and opinion; monthly reports on the Applicant's financial position are sent to BNP for review; the Applicant's books, records, securities and the like are subject to audit by BNP internal inspectors; and the president of the Applicant operates within a clearly defined set of duties and authorities established by BNP.

Applicant represents that, as a bank, it is subject to the extensive regulatory structure imposed by Canadian Law. The Bank Act of Canada, under which all Canadian chartered banks are regulated, contains provisions pertaining to all aspects of banking in Canada, including business and powers types of loans, shareholders and directors, capital stock and debentures, maintenance of reserves, auditing requirements, financial disclosure, and regular inspection by the Inspector General of Banks, the regulatory authority charged with the administration of the Bank Act. Applicant asserts that the regulation to which it is subject affords substantial protection to investors.

Applicant proposes to issue and sell in the United States unsecured short term promissory notes of the type generally referred to as commercial paper (the "Notes"). Under the proposal

the Notes will be denominated in United States dollars, be of prime quality and be issued in bearer form in minimum denominations of $100,000. Payments of the Notes will be unconditionally guaranteed by BNP. The Notes will be direct liabilities of the Applicant and will rank *pari passu* among themselves and equally with all other unsecured indebtedness of the Applicant, including deposits, and superior to the rights of shareholders of the Applicant. The guarantees by BNP of the Notes will rank *pari passu* with all other unsecured indebtedness of BNP (including its deposit liabilities). Applicant states that while it cannot predict with certainty the aggregate amount of Notes which will be outstanding at any one time, it is estimated that in the first year in which the Notes are issued this amount will not exceed $150 million.

Applicant undertakes to ensure that the Notes will be issued and sold through one or more American commercial paper dealers to the types of investors who normally participate in the United States commercial paper market and that the Notes will not be advertised or otherwise offered for sale to the general public. Applicant undertakes to ensure that the dealer or dealers will provide each offeree of the Notes, prior to any sale of Notes to such offeree, with a memorandum which describes the business of the Applicant and BNP and contains their most recent publicly available fiscal year-end balance sheet and full fiscal year income statements, which shall have been audited in such manner as is customarily done for the Applicant and BNP by their Canadian and French auditors, respectively, accompanied by a description of any material differences between the accounting principles applicable to the Applicant and BNP in the preparation of such financial statements and generally accepted accounting principles applicable to banks in the United States. This memorandum will be updated as promptly as practicable to reflect any material changes in the business and financial condition of the Applicant or BNP and will be at least as comprehensive as those customarily used in offering commercial paper in the United States. The Applicant consents to any order granting the relief requested being expressly conditioned upon its compliance with the foregoing undertaking.

Applicant states that it is intended that the characteristics of the Notes and the manner of offering to investors will be such as to qualify the Notes for the exemption from registration under Section 3(a)(3) of the Securities Act of 1933, as amended (the "1933 Act"). The Applicant further states that, in addition to the factors summarized above, the Notes will arise out of and/or generate funds for "current transactions", have a maturity of nine months or less, exclusive of days of grace, and neither be payable on demand nor provide for any extension, renewal or automatic "roll-over" at the option of either the holder or the issuer. Accordingly, the Applicant states that the Notes will not be registered under the 1933 Act.

Applicant represents that it will not issue or sell the Notes until an opinion of special legal counsel in the United States has been received to the effect that the proposed issuance of commercial paper described in this application is entitled to the exemption afforded by Section 3(a)(3) of the 1933 Act. Applicant represents that it is not subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, and will not become subject to such requirements in connection with the issuance and sale of the Notes.

Applicant undertakes to appoint a bank or a branch of a foreign bank in the United States as authorized agent to issue the Notes from time to time. The Applicant further undertakes that the Applicant and BNP will each appoint that bank or branch, or some other United States person which normally acts in such capacity to accept any process which may be served in any action based on the Notes or the guarantees relating thereto and instituted in any State or Federal court by the holder of any Note. Applicant undertakes that the Applicant and BNP will expressly consent to the jurisdiction of any State or Federal court in the City and State of New York in respect of any such action. Such appointment of an authorized agent to accept service of process and consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Notes have been paid. Applicant and BNP will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes or otherwise. The authorized agent will not be a trustee for the Noteholders and will not have any responsibilities or duties to act for such holders as would a trustee.

Applicant states that it may, from time to time, offer other debt securities unconditionally guaranteed by BNP for sale in the United States, but the Applicant will not offer equity securities for sale in the United States without a further order of the Commission pursuant to Section 6(c) of the Act. In connection with any such offering, the Applicant undertakes to ensure that offerees will be provided, prior to any sale of such debt securities, with disclosure documents at least as comprehensive in their description of the Applicant and BNP, their business and financial condition as the dealer's memorandum referred to above and that in no event will such disclosure documents be less comprehensive than is customary for offering in the United States of similar debt securities. In addition, any future offering of securities of the Applicant which is subject to the registration requirements of the 1933 Act will be made pursuant to offering documents which comply with the requirements of the 1933 Act. Applicant consents to any order granting the relief requested below pursuant to Section 6(c) of the Act being expressly conditioned upon its compliance with this undertaking regarding such disclosure documents.

The Applicant also undertakes, in connection with any future offering in the United States of its securities, to appoint, and to cause BNP to appoint, an agent to accept any process which may be served on it in any action based on such securities or guarantee by BNP thereof and instituted in any State or Federal court by any holder of any such securities and to obtain an opinion of special legal counsel in the United States as to compliance with, or the availabilility of an exemption from, the 1933 Act.

The Applicant further undertakes that it will expressly, and will cause BNP to expressly, consent to the jurisdiction of any State or Federal Court in the City and State of New York in respect of any such action. Such appointment of an agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of such securities have been paid. Applicant and BNP will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of such securities or otherwise. Applicant represents that the presently proposed issue of commercial paper and all future issues of securities publicly offered for sale in the United States by the Applicant shall have received, prior to issuance, one of the three highest investment grades from at least one nationally recognized statistical rating organization and that its United States counsel shall certify that such rating has been received.

Applicant states that it believes that as a commercial bank it is not an "investment company" within the

meaning of the Act; it recognizes, however, that uncertainty exists as to whether at least some foreign commercial banks are "investment companies" under the Act. Accordingly, the Applicant represents that its application is being made under Section 6(c) of the Act, which provides that by order upon application the Commission may conditionally or unconditionally exempt any person from the provisions of the Act.

Applicant asserts that approval of this application would be appropriate in the public interest. The Applicant represents that if it were deemed to be an "investment company" for the purposes of the Act, and if the requested exemption were not granted, it would be effectively precluded from selling securities in the United States. Applicant asserts that in such event, it would be denied access to the United States commercial paper market, a major financing source. Applicant asserts that this effect would put it at a disadvantage vis-a-vis other banks which are competitors of the Applicant and which have access to the United States commercial paper market (either directly or through commercial paper offerings by their affiliates where the proceeds of such offerings are subsequently relent to such banks). Applicant further asserts that putting it and other foreign commercial banks at a competitive disadvantage with these United States banks would seem, in its view, contrary to the United States public interest as expressed by the enactment of the International Banking Act of 1978. Applicant believes, moreover, that granting it a Section 6(c) exemption will not give it a competitive advantage over United States banks in obtaining funds in the United States commercial paper market. Finally, according to the Applicant, an exemption would also benefit institutional and other sophisticated investors in the United States by making readily available to such investors additional investment opportunities in short-term, high-grade securities.

Applicant asserts that an exemption would be consistent with the protection of investors and the purposes and policies fairly intended by the Act. The Applicant cites, as support for this assertion, the extension regulations and other measures to which the Applicant is subject under Canadian banking law, and asserts that such regulation affords substantial protection to investors. The Applicant notes in this regard that the obligations of the Applicant will be unconditionally guaranteed by BNP, and the Commission, by exempting BNP from the Act, has previously recognized that holders of BNP obligations are adequately protected by French banking regulations. Moreover, the Applicant notes that, in compliance with the requirements of Section 3(a)(3) of the 1933 Act and with 1933 Act Release No. 4412 pursuant thereto, the commercial paper would be short-term and of prime quality and would not be sold to the public and that, in addition, certain anti-fraud provisions of the United States Federal securities laws would apply to any offering of securities by the Applicant in the United States. Any resulting risks to investors in securities of the Applicant would thus be no greater than those inherent in the securities of other substantial, regulated issuers.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13231; 812-5457]

National Westminster Bank of Canada; Application for Order Exempting Applicant From All Provisions

May 11, 1983.

Notice is hereby given that National Westminster Bank of Canada (the "Applicant"), c/o Bruce W. Nichols, Esquire, Davis Polk & Wardwell, One Chase Manhattan Plaza, New York, New York 10005, filed an application on February 16, 1983, and an amendment thereto on May 3, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act") exempting Applicant from all provisions of the Act so that it will be in a position to issue U.S. dollar-denominated short term notes ("Notes") in the United States. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, a summary of which is set forth below.

The application states that Applicant, a Canadian chartered bank wholly-owned by National Westminster Bank PLC ("NWB"), was incorporated on August 17, 1955, under the laws of Canada. It is further stated that, by order dated June 10, 1980 (Release No. 11210) and reissued on September 10, 1980 (Release No. 11346), the Commission exempted NWB from all of the provisions of the Act. The order (the "NWB Order") was granted in response to NWB's applicaiton (filed on February 13, 1980 and subsequently amended) describing NWB's intention to sell commercial paper in the United States, as well as the possibility of issuance and sale of long-term debt securities in the United States.

By letters patent dated January 21, 1982, Applicant was converted into a Canadian chartered bank pursuant to the Bank Act of Canada. Applicant represents that all of its outstanding capital stock, currently consisting of 35,000,000 common shares, are owned by NWB. According to the application, Applicant offers wholesale banking services through its head office in Toronto and its branches in Vancouver, Calgary, and Montreal, including the provision of Canadian Dollar and foreign currency corporate loans, the issuance of letters of credit and guarantees, the issuance of certificates of deposit and bearer deposit notes in Canadian Dollars and other currencies, unconditionally guaranteed by NWB, and spot and forward foreign exchange trading services with banks and corporate clients. Applicant asserts that, as of October 31, 1982, its total assets were Can. $756,387,000 with authorized capital of Can. $50,000,000 and paid up capital of Can. $35,000,000.

According to the application, Canadian chartered banks are subject to the exclusive jurisdiction of the federal Parliament and are incorporated and governed by the provisions of the Canadian Bank Act. In addition, the application states, the Governor in Council (*i.e.*, the Canadian Cabinet) makes regulations and orders covering in detail certain matters dealt with under the Bank Act. The application represents that the Bank Act requires banks to maintain primary reserves in

varying percentages depending upon different types of demand and notice deposit liabilities and may require banks to maintain secondary reserves. The application further represents that the Inspector General of Banks is responsible generally for the administration of the Bank Act and more particularly for the day-to-day regulation of Canadian banks to ensure compliance with Canadian banking law. It is stated that banks are required to file with the Inspector General, the government-owned Bank of Canada, or both weekly, monthly, quarterly, and annual reports which include information pertaining to a bank's deposits, directors, assets and liabilities, revenues, expenses, and changes in capital and reserves and interest rates on loans. In addition, it is stated, banks are required to publish in at least one daily newspaper in each province where the bank has a branch its financial position and results of operation for the financial year as approved by the board of directors and summary financial statements with respect to its first, second, and third quarter operations. According to the application, the Bank Act allows foreign banks to carry on the business of banking in Canada. The application notes, however, that all foreign bank subsidiaries are subject to special rules and regulations, in addition to the rules applicable to all banks.

Applicant states that NWB and its subsidiaries (the "NWB Group") are one of the largest international banking groups in the world in terms of deposits, assets, and profits with branches in the United Kingdom and branches, agencies, and representative offices in 31 foreign countries. In addition, the application represents that NWB has an indirect but wholly-owned U.S. national banking subsidiary, National Bank of North America, and is registered as a bank holding company under the Bank Holding Company Act of 1956 (the "1956 Act"). The application states that, under the 1956 Act, NWB is subject to regulation by the Board of Governors of the Federal Reserve System (the "Federal Reserve Board") which governs, among other things, the types of activities in the United States in which NWB may engage. The application further states that as a foreign bank having branches in the United States, NWB is also subject to the International Banking Act of 1978 (the "IBA"). Under the 1956 Act and the IBA, the application represents, NWB is required to file with the Federal Reserve Board an annual report containing detailed information with respect to NWB and its U.S. subsidiaries and to furnish the Board with any additional information the Board may request.

Applicant states that it obtains its funds from a variety of sources, including deposits and short-term borrowings, and it would like to broaden its sources of finance by selling the Notes in bearer or registered form in the United States through U.S. commercial paper dealers. Applicant further states that payment of principal of and interest, if any, on the Notes would be unconditionally guranteed by NWB.

Applicant represents that the Notes will arise out of, or the proceeds of the Notes will be used for, current transactions of Applicant, and the Notes will have other characteristics, including their negotiability, maturity, and minimum denomination, such as to qualify them for the exemption from registration under Section 3(a)(3) of the Securities Act of 1933 (the "1933 Act"). Furthermore, Applicant represents that the Notes will be prime quality, negotiable commercial paper of a type eligible for discount by Federal Reserve Banks, and the proceeds of the sale of the Notes (to the extent not applied to the repayment of maturing Notes or to the payment of current expenses) would be used by Applicant for current transactions as comtemplated by 1933 Act Release No. 4412. As a result, Applicant asserts, it will not be required to register the Notes under the 1933 Act. Applicant also asserts that it will not issue or sell any Notes until it has received an opinion of its special counsel in the United State that the Notes would be entitled to such exemption. Applicant states that it does not request Commission review or approval of such opinion letter.

Applicant also states that the proposed issue of the Notes and any future issue in the United States of its debt securities shall have received, prior to issuance, on the basis of the guarantee thereof by NWB, one of the three highest investment grade ratings from at least one of the nationally recognized investment rating organizations and that Applicant's special counsel in the United States shall have certified that such rating has been received. Applicant states that no such rating will be required to be obtained if, in the opinion of United States counsel for the Applicant, such counsel having taken into account the doctrine of integration for the purpose thereof, an exemption from registration is available with respect to such issue under Section 4(2) of the 1933 Act.

According to Applicant, the Notes will be issued and sold in large ($100,000 minimum) denominations through commercial paper dealers. Applicant states that it will secure an undertaking from each such dealer that Notes will be sold to institutional investors and other entities and individuals who normally purchase commercial paper and will not be offered for sale to the general public. Applicant states that it will provide each such dealer with sufficient information to prepare, and will undertake to insure that each dealer will provide each offeree of the Notes with, a memorandum (the "offering memorandum") which describes the business of NWB, the NWB Group, and Applicant and contains the most recently published financial statements of the NWB Group and Applicant audited in accordance with United Kingdom and Canadian auditing practices, respectively. In addition, it is represented that the offering memorandum will include brief paragraphs highlighting the material differences between generally accepted accounting principles employed by United States banks and (i) United Kingdom accounting principles applicable to United Kingdom Clearing Banks and used by NWB and (ii) Canadian accounting principles applicable to Canadian banks and used by the Applicant, as well as any other information that would be required by the NWB Order. Applicant asserts that the offering memorandum will be at least as comprehensive as those customarily used by United States issuers in offering commercial paper in the United States and will be updated periodically to reflect material changes in the business or financial status of the NWB Group or Applicant. The Applicant consents to any order granting the relief requested being expressly conditioned upon the compliance by NWB and the Applicant with the foregoing.

The application states that the Notes will be direct liabilities of Applicant, and will rank *pari passu* among themselves and with all other unsecured unsubordinated indebtedness (including deposit liabilities) of Applicant and superior to rights of shareholders. The guarantee by NWB as to payment of principal of and interest on the Notes will rank *pari passu* with all other unsecured unsubordinated indebtedness (including deposit liabilities) of NWB and superior to rights of shareholders.

Applicant states that NWB and Applicant will each expressly submit to the jurisdiction of New York State and United States Federal courts sitting in The City of New York for the purpose of any suit, action, or proceeding brought on the Notes or the guarantees or with

respect to the offer and sale of Notes by means of the offering memorandum, and in that connection, will each appoint the issuing agent (a bank or trust company having an office in New York City) or a corporation with an office in New York City engaged in providing corporate services for lawyers as agent to accept service of process in any action based on the Notes or the guarantees or with respect to the offer and sale of the Notes by means of the offering memorandum and instituted in any State or Federal court by the holder of any Note. Applicant further states that such appointments of an agent to accept service of process and such consents to jurisdiction shall be irrevocable until all amounts due and to become due in respect of the Notes and the guarantees have been paid.

Applicant states that it may, from time to time, offer and sell in the United States debt securities other than the Notes but will not offer or sell equity securities. According to Applicant, in the case of any such offering in the United States, the payment of principal and premium, if any, and interest on any such debt securities will be unconditionally guaranteed by NWB. Applicant undertakes to provide to any person to which it offers its debt securities in the United States (and undertakes to assure that any underwriter or dealer through whom it makes such offers will provide to each person to whom such offers are made) disclosure documents which are at least as comprehensive in their description of Applicant and NWB as those which may be used by United States issuers in U.S. offerings of such securities and which contain the financial statements of Applicant and the NWB Group and will be updated periodically to reflect material changes in the business or financial status of Applicant or the NWB Group. Applicant consents to any Commission order being expressly conditioned on its compliance with the foregoing undertaking. The application states that, in connection with any future offering by Applicant of debt securities in the United States, Applicant and NWB will each appoint an agent to accept service of process in any suit, action, or proceeding brought on the debt securities or the guarantees of NWB and instituted in any State or Federal court by the holder of any debt securities. The application further states that Applicant and NWB will each expressly submit to the jurisdiction of the New York State and United States Federal courts sitting in The City of New York with respect to any such suit, action, or proceeding. According to the application, such appointments of an agent to accept service of process and such consents to jurisdiction shall be irrevocable until all amounts due and to become due in respect of such debt securities and such guarantees have been paid.

Section 6(c) of the Act empowers the Commission to grant an exemption from the provisions of the Act when such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant states that, in addition to exempting NWB from the provisions of the Act, thereby entitling it directy to sell debt securtities in the United States, the Commission has also exempted NatWest Capital Corporation ("NatWest Capital"), a wholly-owned Delaware subsidiary of NWB, from the provisions of the Act, thereby entitling it to sell debt securities in the United States bearing the unconditional guarantee of NWB. According to Applicant, in so doing, the Commission has acknowledged that both such exemptions meet the statutory criteria. Applicant asserts that, although it is a Canadian chartered bank offering wholesale banking services and is therefore not a mere vehicle for the sale of securities of NWB, the analysis of its application should be the same as that for NatWest Capital because all of its proposed Notes or other debt securities (together, the "Securities") will be unconditionally guaranteed by NWB. Applicant asserts that, as in the case of the NatWest Capital application, the unconditional guarantee of NWB has the effect that the holders of Securities would look to NWB as the ultimate obligor, and the terms of the NWB guarantees—for example, whether such guarantees have senior or subordinated status—would determine the nature of the investment, although any Securities would also be senior to the stock of Applicant. For these reasons, Applicant asserts, the purchase of Securities issued and sold by Applicant would be the equivalent of purchasing obligations of NWB. Accordingly, Applicant asserts that the same policy considerations pursuant to which the Commission approved the NWB and NatWest Capital exemptions should apply in its case, and the requested exemption should be granted.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 6, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13264; 812-5533]

Sears Government Investment Trust, et al., Filing of Application for an Order of Exemption

May 23, 1983.

Notice is hereby given that Sears Government Investment Trust, GNMA Portfolio Series 1 and all subsequent and similar series of Trusts ("Trusts"), and their sponsor, Dean Witter Reynolds Inc. ("Sponsor") (Trusts and Sponsor hereinafter collectively referred to as "Applicants"), Unit Investment Trust Department, 5 World Trade Center, New York, NY 10048, filed an application on April 22, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting them from the provisions of Section 22(d) of the Act to the extent necessary to permit them to establish a reinvestment program ("Reinvestment Program" or "Program"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of Section 22(d).

The application states that the Trusts are unit investment trusts. Applicants assert that the sponsor intends to act as sponsor of Sears Government Investment Trust, GNMA Portfolio Series 1, and for all subsequent and similar series of Trusts. Subsequent Trusts to be included in the requested order will meet the description of such Trusts in the application; similar Trusts will be structured in the same manner, but may contain different types or

maturities of debt obligations ("Securities") and in some cases, units of previously issued series of Trusts.

The application states that Sears Government Investment Trust, GNMA Portfolio Series 1 is, and each future Trust will be, governed by a trust indenture ("Indenture") under New York law and a Standard Terms and Conditions of Trust ("Agreement") for that Trust (hereinafter collectively referred to as the "Indenture and Agreement"), under which the Sponsor will act as Depositor, United States Trust Company of New York will act as Trustee and Interactive Data Services, Inc., will act as Evaluator. The Sponsor will initially deposit $1,000,000 or more face amount of mortgage-backed securities of the modified pass-through type fully guaranteed as to principal and interest by the Government National Mortgage Association ("Ginnie Maes") with the Trustee in exchange for certificates representing ownership of all the units of fractional undivided interest ("Units") of the Trust. With the initial deposit, a percentage relationship is established between the principal amounts of Ginnie Maes in the protfolio having specified interest rates and ranges of maturities. According to the application, the Indenture and Agreement permit the Sponsor to make subsequent deposits of Ginnie Maes in exchange for additional Units provided the original percentage relationship is maintained so far as is practicable. Such Units may then be sold by the Sponsor at the then current public offering price (which includes a sales charge of 3.50%).

The application states that the Sponsor proposes to offer a Reinvestment Program as follows: monthly distributions to Certificateholders of interest and principal would be used by the Trustee to acquire additional Units of the same series issued in respect to subsequent deposits of Securities at the price (about $1 per Unit) based on the offering side evaluation of the portfolio of such series computed at the close of business of the distribution date plus a reduced sales charge of 2.90% of the public offering price and accrued interest. According to Applicants, holders of Units purchased at any time would normally receive cash, but would be given an opportunity to participate in the Program by notifing the Trustee in writing at least 10 days before the first record date to which such election is to apply. A notice recieved less than ten days before a record date will become effective commencing with the second succeeding distribution. Appliants further state that a Certificateholder who chooses to participate in the Program would elect to reinvest distributions of interest and principal on his Units, and such elections must apply to all of his Units of that series. Each prospectus will contain a reply card to facilitate making such election. Elections unless specified otherwise will continue as to all subsequent distributions until changed upon similar notice to the Trustee. As each Program participant will receive a prospectus describing the series and the Program, new prospectuses would be sent only when updated to Certificateholders participating in the Program. A confirmation of each purchase made under the Reinvestment Program will be sent to the Certificateholder monthly. Both the Sponsor and the Trustee reserve the right to suspend, modify or terminate the Program at any time. All participants in the Reinvestment Program at such time would be promptly notified of any such action.

The application represents that Applicants believe that the proposed 2.90% sales charge is proper and fully justified. In support of their request to permit a reduced charge on purchases of units under the Program, Applicants maintain that such a charge benefits participants in the Reinvestment Program while also passing along certain savings in selling costs under the Program.

According to the application, Applicants' experience demonstrates that the interests of investors are generally better served when their account executives are offered appropriate financial incentives. Participants in the Reinvestment Program may seek professional advice both as to the basic operation of the Reinvestment Program as well as changes which may become advisable from time to time because of altered financial situations or investment objectives. The account executive may also be more willing to take the time to help an investor expedite any changes in instructions as to participation in the Reinvestment Program and to assure better service with respect to reinvestment if he is compensated for such services than if he is asked to perform his professional services without compensation.

Furthermore, Applicants maintain that the expenses of unit trusts are significantly lower than those of mutual funds. An open-end investment company, such as one that might be formed to act as a reinvestment vehicle for the Trust (the portfolio of which is constantly changing), would have significant additional administrative expenses not incurred by a unit trust (the portfolio of which is fixed). In a unit investment trust, many of these expenses are not incurred and others are assumed by the underwriters out of the sales charge. Applicants maintain that this substantial difference in expenses should, over time, by itself compensate for the proposed 2.90% sales charge on reinvestments.

In addition, Applicants state that some portion of a mutual fund's assets is frequently held in cash or lower yielding short-term securities to meet redemptions. If a unit investment trust is used as a reinvestment vehicle, there will be virtually no need to hold assets aside for redemption, since the Sponsor proposes to maintain a secondary market in the Units at a price above the redemption price. Therefore, the unit investment trust will be able to be fully invested in Ginnie Maes which are higher yielding securities than the cash or short-term securities held by mutual funds.

Applicants further represent that a participant in the Reinvestment Program will be able to maintain his investment in the same portfolio of securities, so that his risk and investment performance will not be altered. Applicants assert that this is truly "reinvestment," not a mere general equivalency of investment in the same general types of securities which may have a great variety of different coupon rates and maturities. The anticipated rate of return from a unit investment trust is also more predictable than that of a mutual fund because the portfolio of a unit investment trust is fixed.

In order to provide the professional services in connection with operation of the Program described earlier, Applicants believe that compensation to the soliciting broker is a reasonable and justifiable expense. However, in recognition that the broker will already have made the initial customer solicitation, ascertained the customer's financial requirements, and counseled him on the general attributes of the Series, Applicants propose that this compensation be at a reduced level. Accordingly, on the sale of Units under the Reinvestment Program, members of the National Association of Securities Dealers, Inc., would be accorded a price concession of 1.30% of the public offering price (approximately $13.00 per 1,000 Units as contrasted to a concession of $19.00 per 1,000 Units in primary and secondary market purchases.)

In addition to the foregoing, Applicants represent that implementation of the Reinvestment

Program will give rise to certain special costs which reasonably should be borne by the participants therein. It is the Sponsor's belief that special out-of-pocket expenses related to the Program will amount to approximately 0.8% of the public offering price per Unit. Finally, under the Indenture and Agreement, the Sponsor is required to bear the expenses incurred in the initial offering of any Units, including offerings made upon subsequent deposits. Applicants anticipate that the normal out-of-pocket costs relating to subsequent deposits approximate 0.8% of the public offering price.

Therefore, the Sponsor submits that a sales charge of 2.90% of the public offering price (2.987%) of the net amount invested), instead of the 3.50% charge on primary and secondary distributions of Units, is warranted in that such charge should cover expenses related to professional financial assistance, the issuance and sale of Units and other expenses of the Reinvestment Program and yet give participants an opportunity to share in the cost savings realized by this method of reinvestment.

Section 6(c) of the Act provides, in pertinent part, that the Commission by order upon application, may, conditionally or unconditionally, exempt any person, security, or transaction, or any class or classes of persons, securities or transactions from any provision of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the Act.

NOTICE IS FURTHER GIVEN that any interested person wishing to request a hearing on the application may, not later than June 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19799; File No. SR-NASD-82-15]

Self-Regulatory Organization; Proposed Rule Change By National Association of Securities Dealers, Inc.; Relating to NASD Interpretation on Free-Riding and Withholding

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) notice is hereby given that on August 26, 1982, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed amended rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

This Rule filing involves amendments to the Board of Governors Interpretation on Free-Riding and Withholding. New material is in italics and deleted materials in brackets.

Introduction

[No change]

Interpretation

[No change]

Scope and Intent of Interpretation

[No change]

Issuer Directed Securities

This Interpretation shall apply to securities which are part of a public offering notwithstanding that some or all of those securities are specifically directed by the issuer to accounts which are included within the scope of paragraphs (3) through (8) above. Therefore, if a person within the scope of those paragraphs to whom securities were directed did not have an investment history with the member or registered representative from whom they were to be purchased, the member would not be permitted to sell him such securities. Also, the "disproportionate" and "insubstantial" tests would apply as in all other situations. Thus, the directing of a substantial number of securities to any one person would be prohibited as would the directing of securities to such accounts which would be disproportionate as compared to sales to members of the public. This Interpretation shall also apply to securities which are part of a public offering notwithstanding that some of those securities are specifically directed by the issuer on a non-underwritten basis. In such cases, the managing underwriter of the offering shall be responsible for insuring compliance with this Interpretation in respect to those securities.

Notwithstanding the above, sales of issuer directed securities may be made to restricted persons without the required investment history after receiving permission from the Board of Governors. Permission will be given only if there is a demonstration of valid business reasons for such sales (such as sales to distributors and suppliers or key employees, who are in each case incidentially restricted persons), and the member seeking permisson is prepared to demonstrate that the aggregate amount of securities so sold is insubstantial and not disproportionate as compared to sales to members of the public, and that the amount sold to any one of such persons is insubstantial in amount.

Investment Partnerships and Corporations

A member may not sell securities of a public offering which immediatedly after the distribution process is commenced, trade at a premium in the secondary market ("hot issue"), to the account of any investment partnership or corporation, domestic or foreign, (except companies registered under the Investment Company Act of 1940) including but not limited to, hedge funds, investment clubs, and other like accounts unless the member receives from such account, prior to the execution of the transaction, the names and business connections of all persons having any beneficial interest in the account, and if such information discloses that any person enumerated in paragraphs (1) through (4) hereof has a beneficial interest in such account, any sale of securities to such account must be consistent with the provisions of this Interpretation; provided, however, that of the disclosure if such information by the account is prohibited by law, then in such case, the member must receive written assurance from the account that no person enumerated in paragraphs (1) through (4) hereof has a beneficial interest in such account. *The term beneficial interest means not only ownership interests, but every type of*

direct financial interest of any persons enumerated in paragraphs (1) through (4) hereof in such account, including, without limitation, management fees based on the performance of the account.

Violations by Recipient

In those cases where a member or person associated with a member has been the recipient of securities of a public offering to the extent that such violated the Interpretation, the member or person associated with a member shall be deemed to be in violation of Article III, Section 1 of the Rules of Fair Practice and this Interpretation as well as the member who sold the securities since their responsibility in relation to the public distribution is equally as great as that of the member selling them. In those cases where a member or a person associated with a member has caused, directly or indirectly, the distribution of securities to a person falling within the restrictive provisions of this Interpretation *the member or person associated with a member* [he] shall also be deemed to be in violation of Article III, Section 1 of the Rules of Fair Practice and this Interpretation. Receipt by a member or a person associated with a member or a person associated with a member of securities of a hot issue which is being distributed by an issuer itself without the assistance of an underwriter and/or selling group is also intended to be subject to the provisions of this Interpretation.

Violations by Registered Representative Executing Transaction

The obligation which members have to make a bona fide public distribution at the public offering price of securities of a *hot issue* [which immediately after the distribution process is commenced trade at a premium in the secondary market ("hot issue"), as stated above], is also an obligation of every person associated with a member who causes a transaction to be executed. Therefore, where sales are made by such persons in a manner inconsistent with the provisions of this Intepretation, such persons associated with a member will be considered equally culpable with the member for the violations found taking into consideration the facts and circumstances of the particular case under consideration.

Disclosure

The fact that a disclosure is made in the prospectus or offering circular that a sale of securities would be made in a manner inconsistent with this Interpretation does not take the matter out of its scope. In sum, therefore, disclosure does not affect the proscriptions of this Interpretation.

Explanation of Terms

The following explanation of terms is provided for the assistance of members. Other words which are defined in the By-Laws and Rules of Fair Practice shall, unless the context otherwise requires, have the meaning as defined therein.

Public Offering

The term public offering shall mean all distributions of securities whether underwritten or not; whether registered, unregistered or exempt from registration under the Securities Act of 1933, and whether they are primary or secondary distributions, including intrastate distributions and Regulation A issues, which sell at an immediate premium, in the secondary market. It shall not mean exempted securities as defined in Section 3(a)(12) of the Securities Exchange Act of 1934.

Immediate Family

The term immediate family shall include parents, mother-in-law or father-in-law, husband or wife, brother or sister, brother-in-law or sister-in-law, *son-in-law or daughter-in-law,* and children. *In addition, the term shall [also] include* any *other person* [relative to whose support the member, person associated with the member], *who is supported, directly or indirectly, to a material extent by the member, person associated with the member* or other person *specified in paragraphs (2), (3), or (4) above. [in categories (2), (3) or (4) above, contribute directly or indirectly.]*

Normal Investment Practice

Normal investment practice shall mean the history of investment of a restricted person in an account or accounts maintained with the member making the allocation. In cases where an account was previously maintained with another member, but serviced by the same registered representative as the one currently servicing the account for the member making the allocation, such earlier investment activity may be included in the restricted person's investment history. Usually the previous one-year period of securities activity is the basis for determining the adequacy of a restricted persons's investment history. Where warranted, however, a longer or shorter period may be reviewed. It is the responsibility of the registered representative effecting the allocation, as well as the member, to demonstrate that the restricted persons's investment history justifies the allocation of hot issues. Copies of customer account statements or other records maintained by the registered representative or the member may be utilized to demonstrate prior investment activity. In analyzing a restricted person's investment history the Association believes the following factors should be considered:

(1) The frequency of transactions in the account or accounts during that period of time. Relevant in this respect are the nature and size of investments.

(2) A comparison of the dollar amount of previous transactions with the dollar amount of the hot issue purchase. If a restricted person purchases $1,000 of a hot issue and his account revealed a series of purchases and sales in $100 amounts, the $1,000 purchase would not appear to be consistent with the restricted person's normal investment practice.

(3) The practice of purchasing mainly hot issues would not constitute a normal investment practice. The Association does, however, consider as contributing to the establishment of a normal investment practice, the purchase of new issues which are not hot issues as well as secondary market transactions.

Disproportionate

In respect to the determination of what constitutes a disproportionate allocation, the Association uses as a guideline 10% of the member's participation in the issue, however acquired. It should be noted, however, that the 10% factor is merely a guideline and is one of a number of factors which are considered in reaching determinations of violations of the Interpretation on the basis of disproportionate allocations. These other factors include, among other things: The size of the participation; the offering price of the issue; the amount of securities sold to restricted accounts; and, the price of the securities in the aftermarket.

It should be noted that disciplinary action has been taken against members for violations of the Interpretation where the allocations made to restricted accounts were less than 10% of the member's participation. The 10% guideline is applied as to the aggregate of the allocations.

Notwithstanding the above, a normal unit of trading (100 shares or 10 bonds) will in most cases not be considered a disproportionate allocation regardless of the amount of the member's participation. This means that if the aggregate number of shares of a member's participation which is allocated to restricted accounts does not exceed a normal unit of trading, such

allocation will in most cases not be considered disproportionate. For example, if a member receives 500 shares of a hot issue, he may allocate 100 shares to a restricted account even though such allocation represents 20% of that member's participation. Of course, all of the remaining shares would have to be allocated to unrestricted accounts and all other provisions of the Interpretation would have to be satisfied. Specifically, the allocation would have to be consistent with the normal investment practice of the account to which it was allocated and the member would not be permitted to sell to restricted persons who were totally prohibited from receiving hot issues.

Insubstantiality

This requirement is separate and distinct from the requirements relating to disproportionate allocations and normal investment practice. In addition, this term applies both to the aggregate of the securities sold to restricted accounts and to each individual allocation. In other words, there could be a substantial allocation to an individual account in violation of the Interpretation and yet be no violation on that ground as to the total number of shares allocated to all accounts. The determination of whether an allocation to a restricted account or accounts is substantial is based upon, among other things, the number of shares allocated and/or the dollar amount of the purchase.

[Definitions]

[Where possible, the terms of any interpretation should be defined specifically, but it would be unwise and impractical to attempt to define every word in an interpretation which is based upon business ethics. However, the terms "public offering," and "immediate family" and "normal investment practice" shall hve the meaning for purposes of this Interpretation as stated hereafter. Other words which are defined in the By-Laws and Rules of Fair Practice shall, unless the context otherwise requires, have the meaning as defined therein.]

[Public Offering]

[The term public offering shall mean all distributions of securities whether underwritten or not; whether registered, unregistered or exempt from registration under the Securities Act of 1933, and whether they are primary or secondary distributions, including intrastate distributions and Regulation A issues, which sell at an immediate premium, in the secondary market. It shall not mean exempted securities as defined in Section 3(a)(12) of the Securities Exchange Act of 1934.]

[Immediate Family]

[The term immediate family shall include parents, mother-in-law or father-in-law, husband or wife, brother or sister, brother-in-law or sister-in-law, children and or any other relative to whose support the member, person associated with the member, or other person in categories (2), (3) or (4) above contributes directly or indirectly.]

[Normal Investment Practice]

["Normal investment practice" shall mean the history of investment in an account with the member. Such history must include purchases with some regularity. If such history discloses a practice of purchasing mainly "hot issues" such record would not constitute a "normal investment practice" as used in this Interpretation.]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* The NASD is amending its interpretation on Free-Riding and Withholding to incorporate certain clarifications of its interpretation previously made known to the membership in Notices to Members in addition to other amendments which are responsive to inquiries received during the last few years. Of particular interest are clarifications to the definitions of: beneficial interest in investment partnerships, substantial and disproportionate, immediate family and normal investment practice. Also, included is a provision whereby the Board of Governors will respond to inquiries involving issuer directed securities that result in hot issues being directed to restricted individuals. The Board of Governors authority for amending these provisions is found in Sections 15A(b) (6) and (8) of the Securities Exchange Act of 1934.

B. *Self-Regulatory Organization's Statement on Burden on Competition.* The NASD does not believe the clarifying provisions impose any burden on competition not necessary or appropriate. Those provisions which expand the scope of restricted persons are considered necessary and appropriate to enforce just and equitable principles of trade, even though such would limit trading with certain individuals or entities.

C. *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* In response to this matter six comment letters were received. They are hereafter referred to as letters 1 through 6.

Letter 1 suggested that paragraph 3 of the Interpretation which restricts finders and others acting in a fiduciary capacity to the managing underwriter was too broad in that it could be interpreted to mean each person in a law or accounting firm involved in the underwriting. The Board recognized that broad interpretation but believed there is adequate flexibility for each District Business Conduct Committee to deal with such situations on a case-by-case basis.

Disagreement was also voiced with the Board's "not disproportionate" designation of normal unit of trading allocations to restricted accounts. It was suggested that a fluid measurement for purposes of meeting the disproportionate test might better accommodate situations where standard customer investments exceed 100 shares. The comment iterated concern for flexible applications of insubstantiality guidelines, as well, based upon typical customer investment units that vary among firms. The Board recognized that the tests will differ as to individual firms, but believes that a firm may feel safe in providing 100 shares to any customer unless that 100 shares is considered substantial. This letter also questioned the Board's approach to hedge funds managed on a performance basis by restricted personnel. The Board found no reason to modify its restriction on investment partnership managers and its reasoning is further explained in response to Letter 2.

Letter 2 was also critical of the restriction on investment partnership managers whose restricted managers earn a management fee based on account performance. The author states in part that it is "a distortion of free enterprise" to reject an investment if the issue is a hot new issue "and accept his investment if the issue does not appreciate to a certain level." The Board

does not accept this characterization of its policy. The amendment by the Board is designed to reflect the Board's belief that a restricted person cannot benefit indirectly by purchasing hot issues for a managed account while he is being compensated according to the performance of that account. The free enterprise system allows such managed accounts to be: (1) managed by non-restricted personnel, or (2) managed by restricted personnel who are paid on other than a performance basis.

Letter 3 raised the question of what happens when an offering unexpectedly becomes hot and the distribution included restricted persons. The Board has considered this possibility on numerous occasions and has determined that it can only be handled on a case-by-case basis. In some instances it may be necessary to break the trades with the restricted persons.

Letter 4 raised the same question about managed accounts raised in letters 1 and 2. It suggested "the proposed rule change be expanded to expressly permit the purchase of a "hot issue" by advisory client[s] under management with an investment advisor so long as no other restricted personnel have beneficial interests in the account." For the reasons previously stated, the Board chose to maintain the language initially proposed.

Letter 5 suggested a number of technical changes which were for the most part accepted.

Letter 6 suggested language relating to the application of Rule 10b–6 under the Act be included in the Interpretation. The Board took the matter under study and will consider amending the Interpretation at a later date.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve such propose rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Georger A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19794; SR–Amex–83–11; SR–CBOE–83–9]

American Stock Exchange, Inc. and Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Changes

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 27, 1983 and on May 4, 1983, respectively, the American Stock Exchange, Inc. ("Amex") 86 Trinity Place, New York, NY 10006 and the Chicago Board Options Exchange Incorporated ("CBOE") LaSalle at Jackson, Chicago, Ill., 60604, filed with the Securities and Exchange Commission the proposed rule changes described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule changes would extend the operation of temporary rules, and postpone for six months the effective date of certain permanent rules relating to branch office supervision and the testing of Registered Options Principals ("ROPs") and Branch Office Managers ("BOMs") engaging in activities relating to debt options. Under the proposed rule change, the new effective date of the permanent rules would be October 24, 1983. At that time all Registered Representatives ("RRs") and ROPS handling debt options transactions for customers would be required to have passed a "Series 5" examination (under the temporary rules, examinations are required only of RRs); all discretionary orders in discretionary accounts would require approval of a BOM or ROP who has passed both the debt and equity options exams, and the principal supervisor of each branch office where more than three RRs engage in debt option transactions would be required to have qualified as a ROP as to both debt and equity options.

Interested persons are invited to submit written data, views and arguments concerning the proposed rule changes within 21 days from the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, 450 Fifth Street, Washington, D.C. 20549. Reference should be made to File No. SR–Amex–83–11 and SR–CBOE–83–9.

Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule changes which are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room Copies of the filings and of any subsequent amendments also will be available at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule changes prior to the thirtieth day after the date of publication of notice of filing thereof, in that the period allowed by current Amex and CBOE rules for members to operate under temporary rules has elapsed, and, because trading volume in the debt options has been relatively modest to date, exchange members have been unable to devote the efforts expected to debt options operations. Approval of the proposed rule change at this time will

afford member firms six additional months to comply with the new rules.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule changes referenced above be, and hereby are, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements under OMB Review

ACTION: Notice of Reporting Requirements Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before June 30, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible.

COPIES: Copies of the proposed form, the request for clearance (S.F. 83), supporting statement, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

AGENCY CLEARANCE OFFICER: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 20416, Telephone: (202) 653-8538.

OMB REVIEWER: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503, Telephone (202) 395-4814.

FORMS SUBMITTED FOR REVIEW:

Title: Record of Hotline Call.
Form No.: CO 266
Frequency: On Occasion.
Description of Respondents: Individuals wishing to advise SBA's Office of Inspector General of possible areas for investigation, including suspected fraud, waste, and abuse.
Annual Responses: 1,000.
Annual Burden Hours: 250.
Type of Request: New.

Title: Liability Certificate.
Form No.: SBA 856.
Frequency: Annually.
Description of Respondents: Small Business Investment Companies during audits by SBA Office of Inspector General.
Annual Responses: 500.
Annual Burden Hours: 500.
Type of Request: New.

Title: Financial Institution Confirmation Request.
Form No.: SBA 860.
Frequency: Annually.
Description of Respondents: Banks, Savings and Loans, and similar financial institutions during audits by SBA Office of Inspector General.
Annual Responses: 1,500.
Annual Burden Hours: 750.
Type of Request: New.

Title: Questionnaire for Company Doing Business with a Section 503 Development Company.
Form No.: SBA 1302.
Frequency: On Occasion.
Description of Respondents: Section 503 development company clients during audits by SBA Office of Inspector General.
Annual Responses: 720.
Annual Burden Hours: 1,440.
Type of Request: New.

Title: Questionnaire for Section 503 Development Company.
Form No.: SBA 1301.
Frequency: On Occasion.
Description of Respondents: Section 503 development companies used during audits by SBA Office of Inspector General.
Annual Responses: 90.
Annual Burden Hours: 180.
Type of Request: Annually.

Title: Request for Information Concerning Portfolio Financing.
Form No.: SBA 857, 858.
Frequency: Annually.
Description of Respondents: Individuals who complete forms for small business concerns during audits of small business investment companies.
Annual Responses: 2,403.
Annual Burden Hours: 2,221.
Type of Request: New.

Title: Management Assistance Control Board.
Form No.: SBA 1062.
Frequency: On Occasion.
Description of Respondents: Counselors completing the reporting form and providing data on the client and/or the counseling assistance provided.
Annual Responses: 450,000.
Annual Burden Hours: 90,000.
Type of Request: New.

Title: Retention of Books and Records on and Evidence of Use of Disaster Loan Proceeds.
Form No.: N/A.
Frequency: On Occasion.
Description of Respondents: Individuals and businesses receiving disaster loans of $5,000 or more.
Annual Responses: 3,750.
Annual Burden Hours: 3,750.
Type of Request: New.

Dated: ——— —, 1983.

1

FEDERAL COMMUNICATIONS COMMISSION

May 26, 1983.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, June 2, 1983, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

General—1—*Title:* Memorandum Opinion and Order addressing the Petition for Reconsideration filed by M/A-COM Corporation. *Summary:* The Commission will consider the merits of the Petition for Reconsideration of the Report and Order in Docket 81–415. The Petition requested a relaxation of the frequency tolerance specification for the TV Auxiliary Broadcast Stations operating in the 38.6–40 GHz band.

General—2—*Title:* Implementation of the Final Acts of the World Administrative Radio Conference Geneva 1979. *Summary:* The FCC will consider amendment of Part 2 of its Rules to implement domestically radio frequency spectrum allocations in the 11.7–12.2 GHz band adopted by the 1979 World Administrative Radio Conference.

Common Carrier—1—*Title:* Third Notice of Proposed Rulemaking and Order in Docket No. CC 81–216. *Summary:* The Commission is considering revisions to Part 68 of the Rules to accommodate registration of equipment for direct connection to AT&T's Dataphone Digital Service, and inclusion of RM–4054 in this docket.

Common Carrier—2—*Title:* In the matter of the Application of GTE Corporation and Southern Pacific Company for Consent to Transfer Control of Southern Pacific Communications Company and Southern Pacific Satellite Company. *Summary:* The Commission will deteremine whether or not to grant the application for transfer of control to GTE of SP's or its subsidiaries' domestic and satellite radio licenses and 214 service authorizations.

Common Carrier—3—*Title:* In the Matter of Inquiry into the Policies to be Followed in the Authorization of Common Carrier Facilities to Meet Pacific Telecommunications Needs During the Period 1981–1995. *Summary:* The Commission will consider whether to grant a petition filed by Hawaiian Telephone Co. for partial reconsideration of its December 3, 1982, Report and Order setting forth the policies which will govern the authorization of facilities in the Pacific through 1986.

Common Carrier—4—*Title:* Petition for Reconsideration of GTE Satellite Corporation, 90 FCC 2d 1009 (1982). *Summary:* The Commission will consider whether to grant the petition for reconsideration filed by United States Satellite Broadcasting Company requesting rescission of the grant or imposition of a condition on the grant of GSAT's application to lease transponders on a Canadian satellite.

Common Carrier—5—*Title:* In the Matter of the Consolidated Capitalization Plan for 1983–1985 of the Communications Satellite Corporation (Comsat). *Summary:* The Commission will consider whether to authorize Comsat to implement its consolidated Capitalization Plan for financing the activities of Comsat and its various subsidiaries during the years 1983–1985. Comsat's request for authority was filed pursuant to Section 201(c)(8) of the Communications Satellite Act of 1962.

Video—1—*Title:* Request of Broadcast Corporation of Georgia (WVEU(TV)), Channel 69, Atlanta, Georgia, for authority to resume full power operation. *Summary:* The Commission will consider what measures may be utilized by WVEU(TV), to eliminate interference to land mobile licensees in Atlanta, Georgia, thereby, allowing WVEU(TV) to resume full power operations.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: May 26, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S–775–83 Filed 5–27–83; 12:46 pm]

BILLING CODE 6712–01–M

2

FEDERAL COMMUNICATIONS COMMISSION

Deletion of Agenda Item From May 26th Closed Meeting

May 25, 1983.

The following item has been deleted from the list of agenda items scheduled for consideration at the May 26, 1983, Closed Meeting and previously listed in the Commission's Notice of May 19, 1983.

Agenda, Item No., and Subject

Hearing—3—Court remand of the RKO General, Inc., Fidelity Television, Inc., comparative television renewal proceeding (Docket Nos. 16679–16680).

Issue: May 25, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S–776–83 Filed 5–27–83; 12:46 pm]

BILLING CODE 6712–01–M

3

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

May 25, 1983.

TIME AND DATE: 10 a.m., Wednesday, June 1, 1983.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Inverness Mining Company, Docket No. LAKE 81–45. (Issues include whether the judge appropriately approved a settlement motion.)

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632.

[S–773–83 Filed 5–27–83; 12:02 pm]

BILLING CODE 6735–01–M

4

FEDERAL RESERVE SYSTEM

BOARD OF GOVERNORS

TIME AND DATE: 10 a.m. Monday, June 6, 1983.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Federal Reserve Bank and Branch director appointments. (This item was originally announced for a meeting on June 1, 1983.)

2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452–3204.

Dated: May 27, 1983.

James McAfee,

Assistant Secretary of the Board.

[S–777–83 Filed 5–27–83; 3:13 pm]

BILLING CODE 6210–01–M

5

NATIONAL LABOR RELATIONS BOARD

TIME AND DATE: 10 a.m., Friday, May 27, 1983.

PLACE: Board Conference Room, sixth floor, 1717 Pennsylvania Avenue NW.

STATUS: Closed to public observation pursuant to 5 U.S.C. 552b(c)(2) (internal personnel rules and practices), and (c)(10) (specifically concern * * * the agency's participation in a civil action or proceeding, * * *).

MATTERS TO BE CONSIDERED: Personnel matters.

CONTACT PERSON FOR MORE INFORMATION: John C. Truesdale, Executive Secretary, Washington, D.C. 20570, Telephone: (202) 254–9430.

Dated: Washington, D.C., May 26, 1983

By direction of the Board.

John C. Truesdale,

Executive Secretary, National Labor Relations Board.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 48 FR 22677, May 19, 1983.

STATUS: Closed/open meetings.

PLACE: 450 5th Street NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Monday, May 16, 1983.

CHANGE IN THE MEETING: Additional item/deletion. The following additional item will be considered at a closed meeting scheduled for Wednesday, May 25, 1983, at 10 a.m.:

Settlement of an injunctive action.

The following item will not be considered at an open meeting scheduled for Thursday, May 26, 1983, at 10:00 a.m.:

Consider of whether to allow, or under what conditions to allow, the use of letters of credit: (1) As "cover," in lieu of margin, when establishing short options positions in foreign currency or stock index options; (2) as collateral for secured demand notes made by subordinated lenders contributing capital to broker-dealers; and (3) as margin deposits required by the Options Clearing Corporation for certain aggregate short or exercised options positions of participants. For further information, please contact Thomas V. Sjoblom at (202) 272–7379.

Chairman Shad and Commissioners Evans, Longstreth and Treadway determined that Commission business required the above change and that no earlier notice thereof was possible.

At the changes in Commission priorities require alterations in the scheduling of meeting items. For futher information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Bob Zutz at (202) 272–2091.

May 26, 1983.

Actions Under Guidelines for Research Involving Recombinant DNA Molecules

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Recombinant DNA Research; Actions Under Guidelines

AGENCY: National Institutes of Health, PHS, HHS.

ACTION: Notice of Actions Under NIH Guidelines for Research Involving Recombinant DNA Molecules.

SUMMARY: This notice sets forth actions taken by the Director, National Institute of Allergy and Infectious Diseases (NIAID), by authority of the Director, NIH, under the August 1982 NIH Guidelines for Research Involving Recombinant DNA Molecules (47 FR 38048).

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Additional information can be obtained from Dr. William J. Gartland, Office of Recombinant DNA Activities (ORDA), National Institutes of Health, Bethesda, Maryland 20205, (301) 496–6051.

SUPPLEMENTARY INFORMATION: Several major actions under the NIH Guidelines for Research Involving Recombinant DNA Molecules are being promulgated today. These proposed actions were published for comment in the **Federal Register** of March 4, 1983 (48 FR 9436), and reviewed and recommended for approval by the Recombinant DNA Advisory Committee (RAC) at its meeting on April 11, 1983. In accordance wth Section IV–C–1–b of the NIH Guidelines, these actions have been found to comply with the Guidelines and to present no significant risk to health or the environment.

Part I of this announcement provides background information on the actions. Part II provides a summary of the actions and additional announcements of the Director, NIAID.

Following this announcement, there appears in a separate section of the **Federal Register** the revised NIH Guidelines for Research Involving Recombinant DNA Molecules. These revised Guidelines differ from the previous version of the Guidelines promulgated on August 27, 1982 (47 FR 38048) by incorporating within them both the changes in the Guidelines which were recommended at the RAC meeting of October 25, 1982, and promulgated on January 10, 1983 (48 FR 1156), and April 15, 1983 (48 FR 16459), and the changes in the Guidelines which were recommended at the RAC meeting of April 11, 1983, and which are discussed in this announcement.

I. Decisions on Actions Under Guidelines

A. Field Testing of Genetically Engineered Plants—Addition of Appendix L

The RAC Working Group on Revision of the Guidelines at its January 21, 1983, meeting recommended that guidelines for field experimentation involving plants modified by recombinant DNA techniques be developed for consideration at the April 11, 1983, RAC meeting. The following changes in the Guidelines were proposed.

Section III–A–2 would be modified to read as follows:

III–A–2. Deliberate release into the environment of any organism containing recombinant DNA except certain plants as described in Section III–B–4–c.

A new section, III–B–4–c, would be added as follows:

III–B–4–c. Approval may be granted by the IBC with notification to ORDA for growing plants containing recombinant DNA in the field under the following guidelines:

III–B–4–c–1. The plant species is an annual cultivated crop of a genus that has no species known to be a noxious weed,

III–B–4–c–2. The introduced DNA consists of well characterized genes containing no sequences harmful to humans, animals, or plants. Antibiotic resistance genes may be introduced as selectable marker traits if stable integration into the host DNA is known to occur,

III–B–4–c–3. The vector consists of DNA from (i) exempt host-vector systems (Appendix C); (ii) plants of the same or closely related species; (iii) non-pathogenic prokaryotes or non-pathogenic lower eukaryotic plants; (iv) plant pathogens if known sequences causing disease symptoms have been deleted; or (v) DNA constructed from specific sequences of any of the above sources.

The DNA may be introduced by any suitable method but if co-infection or co-cultivation is utilized absence of the assisting organism must be demonstrated.

III–B–4–c–4. Plants are grown in control access fields under specified conditions appropriate for the plant under study in the geographical location. Such conditions should include provisions for using good cultural and pest control practices, for physical isolation from plants of the same species outside of the experimental plot in accordance with pollination characteristics of the species, and for preventing plants containing recombinant DNA from becoming established in the environment. Review of the IBC should include an appraisal by scientists knowledgeable in the crop, its production practices, and the local geographic conditions.

The proposal was published in the March 4, 1983, **Federal Register** (48 FR 9436). During the comment period, one comment was received which was distributed to the RAC.

The current Guidelines require not only IBC approval, but also RAC review and NIH approval of "deliberate release into the environment of any organism containing recombinant DNA." The proposal would have changed this so that, provided they met certain criteria, growing plants containing recombinant DNA in the field could proceed without RAC review and NIH approval, with only IBC approval and notification to ORDA.

The RAC considered the proposal at its April 11, 1983, meeting and discussed it extensively. The RAC made several modifications in the specific criteria as the result of scientific considerations. The RAC also modified the procedural aspects of the proposal, recommending that the paragraphs proposed to be added as Section III–B–4–c instead be incorporated into a new appendix, which would require review and approval of experiments both by the Institutional Biosafety Committee (IBC) and also a RAC Plant Working Group. The RAC then voted twelve in favor, six opposed, and two abstentions, to incorporate the proposal as modified into the Guidelines.

An alternative motion to allow such experiments to be approved by the local IBC only without the necessity for review by the RAC Plant Working Group failed to pass by a vote of eight in favor, eleven opposed, and one abstention.

The exact wording of parts of Appendix L below was developed by NIH staff subsequent to the RAC meeting based on the recommendations made at the RAC meeting. The United States Department of Agriculture (USDA) Recombinant DNA Committee has reviewed the RAC recommendation, including the proposed wording for Appendix L given below, and has endorsed their adoption.

I accept the recommendations of the RAC and the USDA Recombinant DNA Committee, and the following changes are incorporated into the Guidelines:

Section III-A-2 would be amended to read as follows:

Deliberate release into the environment of any organism containing recombinant DNA, except certain plants as described in Appendix L.

A new appendix, Appendix L, would be added as follows:

Appendix L. *Release Into the Environment of Certain Plants.*

Appendix L-I. *General Information.*

Appendix L specifies conditions under which certain plants, as specified below, may be approved for release into the environment. Experiments in this category cannot be initiated without submission of relevant information on the proposed experiment to NIH, review by the RAC Plant Working Group, and specific approval by NIH. Such experiments also require the approval of the IBC before initiation. Information on specific experiments which have been approved will be available in ORDA and will be listed in Appendix L-III when the Guidelines are republished.

Experiments which do not meet the specifications of Appendix L-II fall under Section III-A and require full RAC review and NIH and IBC approval before initiation.

Appendix L-II. *Criteria Allowing Review by the RAC Plant Working Group Without The Requirement for Full RAC Review.*

Approval may be granted by ORDA In consultation with the RAC Plant Working Group without the requirement for full RAC review (IBC review is also necessary) for growing plants containing recombinant DNA in the field under the following conditions:

Appendix L-II-A. The plant species is a cultivated crop of a genus that has no species known to be a noxious weed.

Appendix L-II-B. The introduced DNA consists of well-characterized genes containing no sequences harmful to humans, animals, or plants.

Appendix L-II-C. The vector consists of DNA (i) from exempt host-vector systems (Appendix C); (ii) from plants of the same or closely related species; (iii) from nonpathogenic prokaryotes or nonpathogenic lower eukaryotic plants; (iv) from plant pathogens only if sequences causing disease have been deleted, or (v) chimeric vectors constructed from sequences defined in (i) to (iv) above. The DNA may be introduced by any suitable method.

Appendix L-II-D. Plants are grown in controlled access fields under specified conditions appropriate for the plant under study and the geographical location. Such conditions should include provisions for using good cultural and pest control practices, for physical isolation from plants of the same species outside of the experimental plot in accordance with pollination characteristics of the species, and for preventing plants containing recombinant DNA from becoming established in the environment. Review by the IBC should include an appraisal by scientists knowledgeable of the crop, its production practices, and the local geographical conditions. Procedures for assessing alternations in and the spread of organisms containing recombinant DNA must be developed. The results of the outlined test must be submitted to and reviewed by the IBC. Copies must also be submitted to the RAC Plant Working Group.

Appendix L-III. *Specific Approvals.*

B. Release of Strains of Pseudomonas Syringae and Erwinia Herbicola.

Drs. Nickolas Panopoulos and Steven Lindow of the University of California, Berkeley, submitted a revised request to construct and release *Pseudomonas syringae* pv. *syringae* and *Erwinia herbicola* carrying *in vitro* generated deletions of all or part of the genes involved in ice nucleation for purposes of biological control of frost damage in plants. The aim of the experiments is to investigate possibilities for biological control of frost damage in plants.

Certain bacteria, such as *Pseudomonas syringae* and *Erwinia herbicola* cause nucleation of ice crystals. These bacteria are common plant epiphytes. A causal relationship has been established between frost damage on forst-senstive crop plants in the temperature range of 0° to −5°C, and the populations of ice nucleation active bacteria present on the plants. There are chemically induced mutants of *P. syringae* and *E. herbicola* that do not cause ice nucleation, and their effectiveness under field conditions has been demonstrated. The investigators now propose to construct deletion mutants for ice nucleation activity in prototype strains of *P. syringae* and *E. herbicola* and to evaluate their efficacy as bilogical competitors of naturally occuring populations of these bacteria. The investigators state that the advantages of such mutants compared to chemically induced equivalents are genetic stability and the absence of silent mutations which may adversely effect competitive fitness. Prior to the field applications, the investigators plan to test the mutant strains in a contained environment, such as growth chambers and greenhouse, to verify that they do not induce frost or other injury to plants, and that they are capable of colonizing leaves.

The RAC reviewed a similar proposal from these investigators at its October 25, 1982, meeting. The RAC had passed a motion recommending approval of the requested field tests. However, approval by NIH was deferred because of concerns raised at that meeting (48 FR 1158).

The Revised proposal was summarized in the March 4, 1983, **Federal Register** (48FR 9441). After the comment period, USDA received one letter urging the RAC to consider the request favorably.

The RAC reviewed the revised proposal at the April 11, 1983, meeting. It was pointed out that the revised proposal responds to the concerns previously raised. The investigators propose to use chromosomal antibiotic resistance markers to monitor the strains. The revised proposal discusses several antibiotics not used in clinical medicine that could be tried, in addition to refamycin, for marking of the strains with chromosomal antibiotic resistance. The revised submission to conduct field testing at a single location, the University of California Field Station at Tulelake in Northern California, rather than six locations requested previously. The investigators noted that this site is geographically isolated from all major fruit tree and citrus growing regions of the state. It was pointed out at the RAC meeting that fields have already been sprayed with chemically induced (nonrecombinant DNA) mutant organisms. Also, it was noted that the populations of bacteria proposed to be released are approximately eight to ten orders of magnitude lower than you would find normally at any given time of year. With regard to an emergency plan described in the proposal, the RAC did not recommend spraying with antibotics to eliminate organisms; they recommended instead either burning or preferably burying the material. The RAC concluded that the investigators had satisfactorily answered the issues raised at the previous meeting and voted to recommend approval of the proposal excluding the use of antibiotics in emergency procedures. The vote was nineteen in favor, none opposed, and no abstentions.

The USDA Recombinant DNA Committee reviewed the proposal and recommended that it be approved.

I accept the recommendations of the RAC and the USDA Recombinant DNA Committee, and the following wording has been added to Appendix D:

Appendix D–X. Permission is granted to Drs. Steven Lindow and Nickolas Panopoulos of the University of California, Berkeley, to release under specified conditions

Pseudomonas syringae pv. *syringae* and *Erwinia herbicola* carrying *in vitro* generated deletions of all or part of the genes involved in ice nucleation.

C. Proposed Modification of Section III–B–5

The RAC Large-Scale Review Working Group, which met on October 26, 1982, forwarded to RAC without comment a proposal by Dr. Allan Waitz of DNAX Corporation (a wholly owned subsidiary of Schering-Plough Corporation) to amend Section III–B–5 of the NIH Guidelines. Section III–B–5 falls under that part of the Guidelines which defines experiments which require IBC approval before initiation. Section III–B–5 currently reads:

–B–5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC. Where appropriate, the large-scale containment recommendations of the NIH should be used (45 FR 24968).

Dr. Waitz said greater flexibility in scale-up procedures would be gained if the IBC could be notified simultaneously with initiation of large-scale procedures involving *E. coli* K–12, *Saccharomyces cerevisiae* and *Bacillus subtilis* host-vector systems. He suggested that Section III–B–5 be modified to read as follows:

III–B–5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC except where exempted under Section III–D–5. Where appropriate, the large-scale containment recommendations of the NIH should be used (45 FR 24968).

Language in Appendix C, *Exemptions Under III–D–5*, would also be modified to reflect this change. The relevant paragraphs of Appendix C–II, C–III, and C–IV, which deal with exceptions to the exemption would be modified to read as follows:

Large-scale experiments (i.e., more than 10 liters of culture) require IBC notice simultaneously with the initiation of experiments where IBC-approved practices and an IBC-approved P1–LS containment facility will be used. Where these conditions are not satisfied, refer to Section III–B–5.

The proposal was published in the March 4, 1983, **Federal Register** (48 FR 9436). During the comment period, no comments were received. The RAC discussed the proposal at its April 11, 1983, meeting. By a vote of ten in favor, eight opposed, and one abstention, the RAC recommended this proposal.

Because of the close vote and because I regard the present requirements for IBC prior approval as prudent and not overly restrictive, I do not accept this recommendation.

D. Proposed Modifications of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules (45 FR 24968, Federal Register of April 11, 1980)

1. *Proposed Modification of Section VII–D–6.* Mr. Richard F. Geoghegan of E. I. DuPont de Nemours and Company in a letter dated July 15, 1982, requested that Section VII–D–6 of the Large-Scale Recommendations be revised. Section VII–D–6 reads as follows:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at or slightly below atmospheric pressure.

Mr. Geoghegan proposed that Section VII–D–6 be modified to read as follows:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level be maintained at no more than 10 psig.

He argued that the revision will permit fermentations more in line with industrial practices (high biomass production through efficient oxygen transfer) to be conducted without compromising safety by operating at unnecessarily high vessel pressures. However, the RAC Large-Scale Review Working Group, at its meeting on October 26, 1982, felt the language might appropriately be modified, but felt no specific pressure limit should be indicated as any pressure limit should be dependent on the maximum design pressure of the system.

The working group, thus, suggested the following language:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at a pressure as low as possible, consistent with equipment design, in order to maintain the integrity of containment features.

The Large-Scale Review Working Group at its meeting on October 26, 1982, recommended this language by a vote of five in favor, none opposed, and no abstentions.

Both proposed modifications of Section VII–D–6 were published for comment in the March 4, 1983, **Federal Register** (48 FR 9437). No comments were received during the comment period.

The proposals were discussed by the RAC at its April 11, 1983, meeting. It was pointed out that operation of vessels at pressures below or at atmospheric pressure may result in poor yield, and that the integrity of seals and other components must be assured under the Large-Scale Recommendations. By a vote of nineteen in favor, none opposed, and no abstentions, the RAC recommended the language proposed by the Large-Scale Review Working Group.

I accept this recommendation.

2. *Proposed Modification of Section VII–B–3.* Dr. Allan Waitz of DNAZ Corporation also proposed amending Section VII–B–3 which reads as follows:

VII–B–3. Sample collection from a closed system; the addition of materials to a closed system and the transfer of culture fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Dr. Waitz suggested that the word "prevents" implies an absolute condition which at the P1–LS level is neither realistic nor necessary. He suggested that the word "minimizes" be substituted for the word "prevents." The Large-Scale Review Working Group did not discuss this proposal at its meeting on October 26, 1982.

The March 4, 1983, **Federal Register** (48 FR 9437) described the proposal. No comments were received during the thirty day comment period.

At the April 11, 1983, meeting, RAC evaluated the proposal. The RAC recommended that in Section VII–B–3 the word "minimizes" be substituted for "prevents" by a vote of ten in favor, four opposed, and four abstentions. I accept this recommendation.

E. Proposed Incorporation Into Guidelines of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

Dr. Allan Waitz of DNAX Corporation at the October 26, 1982, meeting of the RAC Large-Scale Review Working Group proposed that the Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules (45 FR 24968) be formalized by incorporating them into the Guidelines as a new appendix. Dr. Waitz said industry believes such an action would provide a more efficient mechanism for further comment or change to the Recommendations. He expressed industry's concern that failure to take such action may leave a perceived gap in the overall regulatory scheme, thereby, encouraging the development of conflicting regulatory requirements.

The Large-Scale Review Working Group which met on October 26, 1982, forwarded this proposal to the RAC and

to the RAC Working Group on Revision of the Guidelines without comment.

The Working Group on Revision of the Guidelines at its January 21, 1983, meeting recommended incorporation into the Guidelines of the physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules. They pointed out that if the RAC recommends this action, editorial modifications to revise and update sections of the Physical Containment Recommendations will be necessary. The proposed incorporation of the Physical Containment Recommendations into the Guidelines as a new Appendix K would require all sections to be renumbered.

Minor editorial changes would be introduced throughout the document to reflect the modifications introduced into the Guidelines since the Recommendations were published in April 1980. Proposed changes within the text are enumerated below. The sections in the Recommendations which contain proposed revisions are identified by their current sections numbering. The proposed modified language is identified by new section numbering.

1. *Section VII. Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules.*

a. Section VII would become Appendix K.

b. The language of the first paragraph would be modified. It currently reads:

> This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containing recombinant DNA molecules. It shall apply to all large-scale research or production activities approved by the Director, NIH, in accordance with Sections IV–E–2–b–(1)–(e) and IV–E–1–b–(3)–(d) of the NIH Guidelines.

That paragraph would be modified to read as follows:

> This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containng recombinant DNA molecules. It shall apply to large-scale research or production activities as specified in Section III–B–5 of the Guidelines.

c. The third paragraph (first bullet) will be modified to read:

> Appendix K shall replace Appendix G when quantities in excess of 10 liters of culture are involved in research or production.

d. An editorial modification, substituting "Section IB–B–4" for "Section IV–D–4," will be introduced into the third paragraph of the introduction. That paragraph will be modified to read:

> The institution shall appoint a biological safety officer if it engages in large-scale research or production activities involving viable organisms containing recombinant DNA molecules. The duties of the biological safety officer shall include those specified in Section IV–B–4 of the Guidelines.

2. *Section VII–A. Selection of Physical Containment Levels.* This section will be renumbered as Appendix K–I.

3. *Section VII–B. P1–LS Level.*

a. Section VII–B will be renumbered as Appendix K–II.

b. Section VII–B–1 will be renumbered to Appendix K–II–A and an editorial modification will substitute "Appendix G–II–A" for "Section II–B–1." The last sentence of Section VII–B–1 will read:

> Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G–II–A of the Guidelines are met.

c. Section VII–B–2 will be renumbered Appendix K–II–B and an editorial modification will substitute "Appendix K–II–C" for the current "Section VII–B–3." The first sentence of Section VII–B–2 would read:

> Appendix K–II–B. Culture fluids (except as allowed in Appendix K–II–C) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure.

d. In Section VII–B–6, an editorial modification will change the language to read:

> Appendix K–II–F. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

4. *Section VII–C. P2–LS Level.*

a. Section VII–C will be renumbered to Appendix K–III.

b. Section VII–C–1 will be renumbered Appendix K–III–A and in the last sentence of Section VII–C–1, an editorial modification will substitute "Appendix G–II–B" for the current "Section II–B–2."

c. Section VII–B–2 will be renumbered to Appendix K–III–B and an editorial modification will substitute "Appendix K–III–C" for the current "Section VII'C–3."

d. In Section VII–C–11, to be renumbered Appendix K–III–K, an editorial modification will substitute "Section IV–B–3–f" for the current "Section IV–D–3–d."

5. *Section VII–D. P3–LS Level.*

a. Section VII–D will be renumbered to Appendix K–IV.

b. Section VII–D–1 will be renumbered to Appendix K–IV–A and an editorial modification will substitute "Appendix G–II–C" for the current "Section II–B–3."

c. Section VII–D–2 will be renumbered to Appendix K–IV–B and an editorial modification will substitute "Appendix K–IV–C" for the current "Section IV–D–3."

d. In Section VII–D–12, to be renumbered Appendix K–IV–L, an editorial modification will substitute "Section IV–B–3–f" for the current "Section IV–D–3–d."

e. In Section VII–D–14–a, to be renumbered Appendix K–IV–N–1, an editorial modification will substitute "Appendix K–IV–M–1" for "Section VII–D–13–a."

Note.—In addition, the language of Section III–B–5 of the Guidelines would also be modified to read as follows:

> III–B–5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC. Where appropriate, Appendix K, *Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules,* should be used.

The proposal appeared in the March 4, 1983, **Federal Register** (48 FR 9437). One comment was received during the comment period. Dr. Irving S. Johnson of Lilly Research Laboratories, a division of Eli Lilly and Company, said Eli Lilly and Company saw no need to incorporate the Large-Scale Recommendations into the Guidelines. He said other agencies (NIOSH and EPA) have the authority to deal with manufacturing processes and these agencies have undertaken evaluations of recombinant DNA activities.

The RAC evaluated this proposal at its April 11, 1983, meeting. Dr. Waitz and Dr. Wensink said that incorporating the Large-Scale Recommendations into the Guidelines would aid investigators and IBCs by having all the recommendations together in one document. By a vote of sixteen in favor, none opposed, and one abstention, the RAC recommended this action.

I accept this recommendation.

II. Summary of Actions.

A. *Appendix L—Field Testing of Genetically Engineered Plants*

Section III–A–2 is amended to read as follows:

> Deliberate release into the environment of any organism containing recombinant DNA, except certain plants as described in Appendix L.

A new appendix, Appendix L, is added as follows:

Appendix L. *Release Into the Environment of Certain Plants*

Appendix L–1. *General Information.*

Appendix L specifies conditions under which certain plants, as specified below, may be approved for release into the environment. Experiments in this category cannot be initiated without submission or relevant information on the proposed experiment to NIH, review by the RAC Plant Working Group, and specific approval by NIH. Such experiments also require the approval of the IBC before initiation. Information on specific experiments which have beer approved will be available in ORDA and will be listed in Appendix L–III when the Guidelines are republished.

Experiments which do not meet the specifications of Appendix L–II fall under Section III–A and require RAC review and NIH and IBC approval before initiation."

Appendix L–II. *Criteria Allowing Review by the RAC Plant Working Group Without the Requirement for Full RAC Review.*

Approval may be granted by ORDA in consultation with the RAC Plant Working Group without the requirement for full RAC review (IBC review is also necessary) for growing plants containing recombinant DNA in the field under the following conditions:

Appendix L.II—A. The plant species is a cultivated crop of a genus that has no species known to be a noxious weed.

Appendix L–II–B. The introduced DNA consists of well-characterized genes containing no sequences harmful to humans, animals, or plants.

Appendix L–II–C. The vector consists of DNA (i) from exempt host-vector systems (Appendix C); (ii) from plants of the same or closely related species; (iii) from nonpathogenic prokaryotes or nonpathogenic lower eukaryotic plants; (iv) from plant pathogens only if sequences causing disease have been deleted; or (v) chimeric vectors constructed from sequences defined in (i) to (iv) above. The DNA may be introduced by any suitable method.

Appendix L–II–D. Plants are grown in controlled access fields under specified conditions appropriate for the plant under study and the geographical location. Such conditions should include provisions for using good cultural and pest control practices, for physical isolation from plants of the same species outside of the experimental plot in accordance with pollination characteristics of the species, and for preventing plants containing recombinant DNA from becoming established in the environment. Review by the IBC should include an appraisal by scientists knowledgeable of the crop, its production practices, and the local geographical conditions. Procedures for assessing alterations in and the spread of organisms containing recombinant DNA must be developed. The results of the outlined tests must be submitted for review by the IBC. Copies must also be submitted to the Plant Working Group of the RAC.

Appendix L–III. *Specific Approvals.*

B. Addition to Appendix D—Release of Strains of Pseudomonas Syringae and Erwinia Herbicola

The following paragraph is added to Appendix D:

Appendix D–X. Permission is granted to Drs. Steven Lindow and Nickolas Panopoulos of the University of California, Berkeley, to release under specified conditions *Pseudomonas syringae* pv. *syringae* and *Erwinia herbicola* carrying *in vitro* generated deletions of all or part of the genes involved in ice nucleation.

C. Modifications of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

1. *Modification of Section VII–D–6.* Section VII–D–6 is modified to read:

VII–D. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at a pressure as low as possible, consistent with equipment design, in order to maintain the integrity of containment features.

2. *Modification of Section VII–B–3.* Section VII–B–3 is modified to read:

VII–B–3. Sample collection from a closed system, the addition of materials to a closed system and the transfer of culture fluids from one closed system to another shall be done in a manner which minimizes the release of aerosols or contamination of exposed surfaces.

See D below for incorporation of these sections in new Appendix K.

D. Incorporation Into Guidelines of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

The Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Moleculés are incorporated into the Guidelines as Appendix K. All sections are renumbered. Minor editorial changes are introduced through the document to reflect the modifications introduced into the Guidelines since the Recommendations were published in April 1980. Revisions are introduced to reflect the decisions in C above.

Additional Announcements of the Director, NIAID

A. Modification of Section III–C

An Institutional Biosafety Committee (IBC) commented that the text in the first paragraph of Section III–C does not make clear that the IBC must be notified simultaneously with initiation of experiments covered by this section. The RAC, at its April 11, 1983, meeting also recommended that the wording of this section be clarified. Accordingly, the first paragraph of Section III–C is amended to read as follows:

III–C. *Experiments that Require IBC Notice Simultaneously with Initiation of Experiments.* Experiments not included in Sections III–A, III–B, III–D, and subsections of these sections are to be considered in Section III–C. All such experiments can be carried out at P1 containment. For experiments in this category, a registration document as described in Section III–B must be dated and signed by the investigator and filed with the local IBC at the time of initiation of the experiment. The IBC shall review all such proposals, but IBC review prior to initiation of the experiment is not required. (The reader should refer to the policy statement in the first two paragraphs of Section IV–A.)

B. Modification of Appendix K–A

A representative of the Public and Scientific Affairs Board of the American Society for Microbiology commented that a mechanism for establishing requirements for P4 large-scale containment is not specified in the new Appendix K. Accordingly, the last sentence of Appendix K–A is amended to read as follows:

If necessary, these requirements will be established by NIH on an individual basis.

C. Modifications to Appendix F–IV

Additional specific approvals for experiments involving toxins are added to Appendix F–IV.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance.* Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private

organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: May 19, 1983

Richard M. Krause, M.D.,

Director, National Institute of Allergy and Infectious Deseases, National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Guidelines for Research Involving Recombinant DNA Molecules; June 1983

These NIH guidelines supersede earlier versions and will be in effect until further notice.

Table of Contents

I. Scope of the Guidelines
I–A Purpose
I–B Defintion of Recombinant DNA Molecules
I–C General Applicability
I–D General Definitions
II. Containment
III. Containment Guidelines for Covered Experiments
III–A Experiments that Require RAC Review and NIH and IBC Approval Before Initiation
III–B Experiments that Require IBC Approval Before Initiation
III–B–1 Experiments Using Human or Animal Pathogens (Class 2, Class 3, Class 4, or Class 5 Agents) as Host-Vector Systems
III–B–2 Experiments in Which DNA from Human or Animal Pathogens (Class 2, Class 3, Class 4, or Class 5 Agents) is Cloned in Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector Systems
III–B–3 Experiments Involving the Use of Infectious Animal or Plant Viruses or Defective Animal or Plant Viruses in the Presence of Helper Virus in Tissue Culture Systems
III–B–4 Recombinant DNA Experiments Involving Whole Animals or Plants
III–B–5 Experiments Involving More than 10 Liters of Culture
III–C Experiments that Require IBC Notice Simultaneously with Initiation of Experiments
III–D Exempt Experiments
IV. Roles and Responsibilities
IV–A Policy
IV–B Responsibilities of the Institution
IV–B–1 General Information
IV–B–2 Membership and Procedures of the IBC
IV–B–3 Functions of the IBC
IV–B–4 Biological Safety Officer
IV–B–5 Principal Investigator
IV–B–5–a PI—General
IV–B–5–b Submissions by the PI to NIH
IV–B–5–c Submissions by the PI to the IBC
IV–B–5–d PI Responsibilities Prior to Initiating Research
IV–b–5–e PI Responsibilities During the Conduct of the Research
IV–C Responsibilities of NIH
IV–C–1 Director
IV–C–1–a General Responsibilities of the Director, NIH
IV–C–1–b Specific Responsibilities of the Director, NIH

Appendix L–I General Information
Appendix L–II Criteria Allowing Review by the RAC Plant Working Group Without the Requirement for Full RAC Review
Appendix L–III Specific Approvals

I. Scope of the Guidelines

I–A. *Purpose.* The purpose of these Guidelines is to specify practices for constructing and handling (i) recombinant DNA molecules and (ii) organisms and viruses containing recombinant DNA molecules.

I–B. *Definition of Recombinant DNA Molecules.* In the context of these Guidelines, recombinant DNA molecules are defined as either (i) molecules which are constructed outside living cells by joining natural or synthetic DNA segments to DNA molecules that can replicate in a living cell, or (ii) DNA molecules that result from the replication of those described in (i) above.

Synthetic DNA segments likely to yield a potentially harmful polynucleotide or polypeptide (e.g., a toxin or a pharmacologically active agent) shall be considered as equivalent to their natural DNA counterpart. If the synthetic DNA segment is not expressed *in vivo* as a biologically active polynucleotide or polypeptide product, it is exempt from the Guidelines.

I–C. *General Applicability.* The Guidelines are applicable to all recombinant DNA research within the United States or its territories which is conducted at or sponsored by an Institution that receives any support for recombinant DNA research from NIH. This includes research performed by NIH directly.

An individual receiving support for research involving recombinant DNA must be associated with or sponsored by an Institution that can and does assume the responsibilities assigned in these Guidelines.

The Guidelines are also applicable to projects done abroad if they are supported by NIH funds. If the host country, however, has established rules for the conduct of recombinant DNA projects, then a certificate of compliance with those rules may be submitted to NIH in lieu of compliance with the NIH Guidelines. NIH reserves the right to withhold funding if the safety practices to be employed abroad are not reasonably consistent with the NIH Guidelines.

I–D. *General Definitions.* The following terms, which are used throughout the Guidelines, are defined as follows:

I–D–1. "Institution" means any public or private entity (including Federal, State, and local government agencies).

I–D–2. "Institutional Biosafety Committee" or "IBC" means a committee that (i) meets the requirements for membership specified in Section IV–B–2, and (ii) reviews, approves, and oversees projects in accordance with the responsibilities defined in Sections IV–B–2 and IV–B–3.

I–D–3. "NIH Office of Recombinant DNA Activities" or "ORDA" means the office within NIH with responsibility for (i) reviewing and coordinating all activities of NIH related to the Guidelines, and (ii) performing other duties as defined in Section IV–C–3.

I–D–4. "Recombinant DNA Advisory Committee" or "RAC" means the public advisory committee that advises the Secretary, the Assistant Secretary for Health, and the Director of the National Institutes of Health concerning recombinant DNA research. The RAC shall be constituted as specified in Section IV–C–2.

I–D–5. "Director, NIH" or "Director" means the Director of the National Institutes of Health or any other officer or employee of NIH to whom authority has been delegated.

II. Containment

Effective biological safety programs have been operative in a variety of laboratories for many years. Considerable information, therefore, already exists for the design of physical containment facilities and the selection of laboratory procedures applicable to organisms carrying recombinant DNAs [3–16]. The existing programs rely upon mechanisms that, for convenience, can be divided into two categories: (1) A set of standard practices that are generally used in microbiology laboratories, and (ii) special procedures, equipment, and laboratory installations that provide physical barriers which are applied in varying degrees according to the estimated biohazard. Four levels of physical containment, which are designated as P1, P2, P3, and P4 are described in Appendix G. P4 provides the most stringent containment conditions, P1 the least stringent.

Experiments on recombinant DNAs, by their very nature, lend themselves to a third containment mechanism—namely, the application of highly specific biological barriers. In fact, natural barriers do exist which limit either (i) the infectivity of a *vector*, or *vehicle*, (plasmid or virus) for specific hosts or (ii) its dissemination and survival in the environment. The vectors that provide the means for replication of the recombinant DNAs and/or the host cells in which they replicate can be genetically designed to decrease by many orders of magnitude the probability of dissemination of recombinant DNAs outside the laboratory. Further details on biological containment may be found in Appendix I.

As these means of containment are complementary, different levels of containment appropriate for experiments with different recombinants can be established by applying various combinations of the physical and biological barriers along with a constant use of the standard practices. We consider these categories of containment separately in order that such combinations can be conveniently expressed in the Guidelines.

In constructing the Guidelines, it was necessary to defined boundary conditions for the different levels of physical and biological containment and for the classes of experiments to which they apply. We recognize that these difinitions do not take into account all existing and anticipated information on special procedures that will allow particular experiments to be carried out under different conditions than indicated here without affecting risk. Indeed, we urge that individual investigators devise simple and more effective containment procedures and that investigators and institutional biosafety comittees recommend changes in the Guidelines to permit their use.

III. Containment Guidelines for Covered Experiments

Part III discusses experiments involving recombinant DNA. These experiments have been divided into four classes:

III–A. Experiments which require specific RAC review and NIH and IBC approval before initiation of the experiment;

III–B. Experiments which require IBC approval before initiation of the experiment;

IIIII–C. Experiments which require IBC notification at the time of initiation of the experiment;

III–D. Experiments which are exempt from the procedures of the Guidelines.

If an experiment falls into both class III–A and one of the other classes, the rules pertaining to Class III–A must be followed. If an experiment falls into class III–D and into either class III–B or III–C as well, it can be considered exempt from the requirements of the Guidelines.

Changes in containment levels from those specified here may not be instituted without the express approval of the Director, NIH. (See Sections IV–C–1–b–(1), IV–C–1–b–(2), and subsections.)

III–A. *Experiments that Require RAC Review and NIH and IBC Approval Before Initiation.* Experiments in this category cannot be initiated without submission of relevant information on

the proposed experiment to NIH, the publication of the proposal in the **Federal Register** for thirty days of comment, review by the RAC, and specific approval by NIH. The containment conditions for such experiments will be recommended by RAC and set by NIH at the time of approval. Such experiments also require the approval of the IBC before initiation. Specific experiments already approved in this section and the appropriate containment conditions are listed in Appendices D and F. If an experiment is similar to those listed in Appendices D and F, ORDA may determine appropriate containment conditions according to case precedents under Section IV–C–1–b–(3)–(g).

III–A–1. Deliberate formation of recombinant DNAs containing genes for the biosynthesis of toxic molecules lethal for vertebrates at an LD_{50} of less than 100 nanograms per kilogram body weight (e.g., microbial toxins such as the botulinum toxins, tetanus toxin, diphtheria toxin, *Shigella dysenteriae* neurotoxin). Specific approval has been given for the cloning in *E. Coli* K–12 of DNAs containing genes coding for the biosynthesis of toxic molecules which are lethal to vertebrates at 100 nanograms to 100 micrograms per kilogram body weight. Containment levels for these experiments are specified in Appendix F.

III–A–2. Deliberate release into the environment of any organism containing recombinant DNA, except certain plants as described in Appendix L.

III–A–3. Deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire it naturally [2], if such acquisition could compromise the use of the drug to control disease agents in human or veterinary medicine or agriculture.

III–B. *Experiments that Require IBC Approval Before Initiation.* Investigators performing experiments in this category must submit to their Institutional Biosafety Committee (IBC), prior to initiation of the experiments, a registration document that contains a description of: (a) The source(s) of DNA, (b) the nature of the inserted DNA sequences, (c) the hosts and vectors to be used, (d) whether a deliberate attempt will be made to obtain expression of a foreign gene, and, if so, what protein will be produced, and (e) the containment conditions specified in these Guidelines. This registration document must be dated and signed by the investigator and filed only with the local IBC. The IBC shall review all such proposals prior to initiation of the experiments. Requests for lowering of containment for experiments in this category will be considered by NIH. (See Section IV–C–1–b–(3).)

III–B–1. *Experiments Using Human or Animal Pathogens (Class 2, Class 3, Class 4, or Class 5 Agents [1]) as Host-Vector Systems.*

III–B–1–a. Experiments involving the introduction of recombinant DNA into Class 2 agents can be carried out at P2 containment.

III–B–1–b. Experiments involving the introduction of recombinant DNA into Class 3 agents can be carried out at P3 containment.

III–B–1–c. Experiments involving the introduction of recombinant DNA into Class 4 agents can be carried out at P4 containment.

III–B–1–d. Containment conditions for experiments involving the introduction of recombinant DNA into Class 5 agents will be set on a case-by-case basis following ORDA review. A USDA permit is required for work with Class 5 agents [18, 20].

III–B–2. *Experiments in Which DNA from Human or Animal Pathogens (Class 2, Class 3, Class 4, or Class 5 Agents [1]) is Closed in Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector Systems.*

III–B–2–a. Recombinant DNA experiments in which DNA from Class 2 or Class 3 agents [1] is transferred into nonpathogenic prokaryotes or lower eukaryotes may be performed under P2 containment. Recombinant DNA experiments in which DNA from Class 4 agents is transferred into nonpathogenic prokaryotes or lower eukaryotes can be performed at P2 containment after demonstration that only a totally and irreversibly defective fraction of the agent's genome is present in a given recombinant. In the absence of such a demonstration, P4 containment should be used. Specific lowering of containment to P1 for particular experiments can be approved by the IBC. Many experiments in this category will be exempt from the Guidelines. (See Sections III–D–4 and III–D–5.) Experiments involving the formation of recombinant DNAs for certain genes coding for molecules toxic for vertebrates require RAC review and NIH approval (see Section III–A–1), or must be carried out under NIH specified conditions as described in Appendix F.

III–B–2–b. Containment conditions for experiments in which DNA from Class 5 agents is transferred into nonpathogenic prokaryotes or lower eukaryotes will be determined by ORDA following a case-by-case review. A USDA permit is required for work with Class 5 agents [18, 20].

III–B–3. *Experiments Involving the Use of Infectious Animal or Plant Viruses or Defective Animal or Plant Viruses in the Presence of Helper Virus in Tissue Culture Systems.*

Caution: Special care should be used in the evaluation of containment levels for experiments which are likely to either enhance the pathogenicity (e.g., insertion of a host oncogene) or to extend the host range (e.g., introduction of novel control elements) of viral vectors under conditions which permit a productive infection. In such cases, serious consideration should be given to raising the physical containment by at least one level.

Note.—Recombinant DNA molecules which contain less than two-thirds of the genome of any eukaryotic virus (all virus from a single Family [17] being considered identical [19]) may be considered defective and can be used, in the absence of helper, under the conditions specified in Section III–C.

III–B–3–a. Experiments involving the use of infectious Class 2 animal viruses [1], or defective Class 2 animal viruses in the presence of helper virus, can be performed at P2 containment.

III–B–3–b. Experiments involving the use of infectious Class 3 animal viruses [1], or defective Class 3 animal viruses in the presence of helper virus, can be carried out at P3 containment.

III–B–3–c. Experiments involving the use of infectious Class 4 viruses [1], or defective Class 4 viruses in the presence of helper virus, may be carried out under P4 containment.

III–B–3–d. Experiments involving the use of infectious Class 5 [1] viruses, or defective Class 5 viruses in the presence of helper virus will be determined on a case-by-case basis following ORDA review. A USDA permit is required for work with Class 5 pathogens [18, 20].

III–B–3–e. Experiments involving the use of infectious animal or plant viruses, or defective animal or plant viruses in the presence of helper virus, not covered by Sections III–B–3–a, III–B–3–b, III–B–3–c, or III–B–3–d may be carried out under P1 containment.

III–B–4. *Recombinant DNA Experiments Involving Whole Animals or Plants.*

III–B–4–a. DNA from any source except for greater than two-thirds of a eukaryotic viral genome may be transferred to any non-human vertebrate organism and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study [2]. It is important that the investigator demonstrate that the fraction of the viral genome being utilized does not lead to productive infection. A USDA permit is required for work with Class 5 agents [18,20].

III–B–4–b. For all experiments involving whole animals and plants and not covered by III–B–4–a, the appropriate containment will be determined by the IBC.

III–B–5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC. Where appropriate, the large-scale containment recommendations of the HIH should be used (45 FR 24968).

III–C. *Experiments that Require IBC Notice Simultaneously with Initiation of Experiments.* Experiments not included in Sections III–A, III–B, III–D, and subsections of these Sections are to be considered in Section III–C. All such experiments can be carried out at P1 containment. For experiments in this category, a registration document as described in Section III–B must be dated and signed by the investigator and filed with the local IBC at the time of initiation of the experiment. The IBC shall review all such proposals, but IBC review prior to initiation of the experiment is not required. (The reader should refer to the policy statement in the first two paragraphs of Section IV–A.)

For example, experiments in which all components derive from non-pathogenic prokaryotes and non-pathogenic lower eukaryotes fall under Section III–C and can be carried out at P1 containment.

Caution: *Experiments Involving Formation of Recombinant DNA Molecules Containing no more Than Two-Thirds of the Genome of any Eukaryotic Virus.* Recombinant DNA molecules containing no more than two-thirds of the genome of any eukaryotic virus (all viruses from a single Family [17] being considered identical [19]) may be propagated and maintained in cells in tissue culture using P1 containment. For such experiments, it must be shown that the cells lack helper virus for the specific Families of defective viruses being used. If helper virus is present, procedures specified under Section III–B–3 should be used. The DNA may contain fragments of the genome of viruses from more than one Family but each fragment must be less than two-thirds of a genome.

III–D. *Exempt Experiments.* The following recombinant DNA molecules are exempt from these Guidelines and no registration with the IBC is necessary.

III–D–1. Those that are not in organisms or viruses.

III–D–2. Those that consist entirely of DNA segments from a single non-chromosomal or viral DNA source, though one or more of the segments may be a synthetic equivalent.

III–D–3. Those that consist entirely of DNA from a prokaryotic host, including its indigenous plasmids or viruses, when propagated only in that host (or a closely related strain of the same species) or when transferred to another host by well established physiological means; also, those that consist entirely of DNA from an eukaryotic host, including its chloroplasts, mitrochondria, or plasmids (but excluding viruses), when propagated only in that host (or a close related strain of same species).

III–D–4. Certain specified recombinant DNA molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment. (See Section IV–C–1–b–(1)–(c).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix A. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

III–D–5. Other classes of recombinant DNA molecules, if the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment, finds that they do not present a significant risk to health or the environment. (See Section IV–C–1–b–(1)–(c).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix C. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

IV. Roles and Responsibilities

IV–A. *Policy.* Safety in activities involving recombinant DNA depends on the individual conducting them. The Guidelines cannot anticipate every possible situation. Motivation and good judgment are the key essentials to protection of health and the environment.

The Guidelines are intended to help the Institution, the Institutional Biosafety Committee (IBC), the Biological Safety Officer, and the Principal Investigator determine the safeguards that should be implemented. These Guidelines will never be complete or final, since all conceivable experiments involving recombinant DNA cannot be foreseen. Therefore, *it is the responsibility of the Institution and those associated with it to adhere to the intent of the Guidelines as well as to their specifics.*

Each Institution (and the IBC acting on its behalf) is responsible for ensuring that recombinant DNA activities comply with the Guidelines. General recognition of institutional authority and responsibility properly establishes accountability for safe conduct of the research at the local level.

The following roles and responsibilities constitute an administrative framework in which safety is an essential and integral part of research involving recombinant DNA molecules. Further clarifications and interpretations of roles and responsibilities will be issued by NIH as necessary.

IV–B. *Responsibilities of the Institution.*

IV–B–1. *General Information.* Each Institution conducting or sponsoring recombinant DNA research covered by these Guidelines is responsible for ensuring that the research is carried out in full conformity with the provisions of the Guidelines. In order to fulfill this responsibility, the Institution shall:

IV–B–1–a. Establish and implement policies that provide for the safe conduct of recombinant DNA research and that ensure compliance with the Guidelines. The Institution, as part of its general responsibilities for implementing the Guidelines, may establish additional procedures, as deemed necessary, to govern the Institution and its components in the discharge of its responsibilities under the Guidelines. This may include (i) statements formulated by the Institution for general implementation of the Guidelines and (ii) whatever additional precautionary steps the Institution may deem appropriate.

IV–B–1–b. Establish an Institutional Biosafety Committee (IBC) that meets the requirements set forth in Section IV–B–2 and carries out the functions detailed in Section IV–B–3.

IV–B–1–c. If the Institution is engaged in recombinant DNA research at the P3 or P4 containment level, appoint a Biological Safety Officer, (BSO), who shall be a member of the IBC and carry out the duties specified in Section IV–B–4.

IV–B–1–d. Require that investigators responsible for research covered by these Guidelines comply with the provisions of Section IV–B–5, and assist investigators to do so.

IV–B–1–e. Ensure appropriate training for the IBC chairperson and members, the BSO, Principal Investigators (PIs), and laboratory staff regarding the Guidelines, their implementation, and

laboratory safety. Responsibility for training IBC members may be carried out through the IBC chairperson. Responsibility for training laboratory staff may be carried out through the PI. The Institution is responsible for seeing that the PI has sufficient training, but may delegate this responsibility to the IBC.

IV–B–1–f. Determine the necessity, in connection with each project, for health surveillance of recombinant DNA research personnel, and conduct, if found appropriate, a health surveillance program for the project. [The Laboratory Safety Monograph (LSM) discusses various possible components of such a program—for example, records of agents handled, active investigation of relevant illnesses, and the maintenance of serial serum samples for monitoring serologic changes that may result from the employees' work experience. Certain medical conditions may place a laboratory worker at increased risk in any endeavor where infectious agents are handled. Examples given the LSM include gastrointestinal disorders and treatment with steroids, immunosuppressive drugs, or antibiotics. Workers with such disorders or treatment should be evaluated to determine whether they should be engaged in research with potentially hazardous organisms during their treatment or illness. Copies of the LSM are available from ORDA.]

IV–B–1–g. Report within 30 days to ORDA any significant problems with any violations of the Guidelines and significant research-related accidents and illnesses, unless the institution determines that the PI or IBC has done so.

IV–B–2. *Membership and Procedures of the IBC.* The Institution shall establish an Institutional Biosafety Committee (IBC) whose responsibilities need not be restricted to recombinant DNA. The committee shall meet the following requirements:

IV–B–2–a. The IBC shall comprise no fewer than five members so selected that they collectively have experience and expertise in recombinant DNA technology and the capability to assess the safety of recombinant DNA research experiments and any potential risk to public health or the environment. At least two members shall not be affiliated with the Institution (apart from their membership on the IBC) and shall represent the interest of the surrounding community with respect to health and protection of the environment. Members meet this requirement if, for example, they are officials of State or local public health or environmental protection agencies, members of other local governmental bodies, or persons active in medical, occupational health, or environmental concerns in the community. The Biological Safety Officer (BSO), mandatory when research is being conducted at the P3 and P4 levels, shall be a member. (See Section IV–B–4.)

IV–B–2–b. In order to ensure the competence necessary to review recombinant DNA activities, it is recommended that (i) the IBC include persons with expertise in recombinant DNA technology, biological safety, and physical containment; (ii) the IBC include, or have available as consultants, persons knowledgeable in institutional commitments and policies, applicable law, standards of professional conduct and practice, community attitudes, and the environment; and (iii) at least one member be from the laboratory technical staff.

IV–B–2–c. The Institution shall identify the committee members by name in a report to the NIH Office of Recombinant DNA Activities (ORDA) and shall include relevant background information on each member in such form and at such times as ORDA may require.

IV–B–2–d. No member of an IBC may be involved (except to provide information requested by the IBC) in the review or approval of a project in which he or she has been, or expects to be, engaged or has a direct financial interest.

IV–B–2–e. The Institution, who is ultimately responsible for the effectiveness of the IBC, may establish procedures that the IBC will follow in its initial and continuing review of applications, proposals, and activities. (IBC review procedures are specified in Section IV–B–3–a.)

IV–B–2–f. Institutions are encouraged to open IBC meetings to the public whenever possible, consistent with protection of privacy and proprietary interests.

IV–B–2–g. Upon request, the Institution shall make available to the public all minutes of IBC meetings and documents submitted to or received from funding agencies which the latter are required to make available to the public. If comments are made by members of the public on IBC actions, the Institution shall forward to NIH both the comments and the IBC's response.

IV–B–3. *Functions of the IBC.* On behalf of the Institution, the IBC is responsible for:

IV–B–3–a. Reviewing for compliance with the NIH Guidelines recombinant DNA research as specified in Part III conducted at or sponsored by the Institution, and approving those research projects that it finds are in conformity with the Guidelines. This review shall include:

IV–B–3–a–(1). An independent assessment of the containment levels required by these Guidelines for the proposed research, and

IV–B–3–a–(2). An assessment of the facilities, procedures, and practices, and of the training and expertise of recombinant DNA personnel.

IV–B–3–b. Notifying the Principal Investigator (PI) of the results of their review.

IV–B–3–c. Lowering containment levels for certain experiments as specified in Sections III–B–2.

IV–B–3–d. Setting containment levels as specified in Section III–B–4–b and III–B–5.

IV–B–3–e. Reviewing periodically recombinant DNA research being conducted at the Institution, to ensure that the requirements of the Guidelines are being fulfilled.

IV–B–3–f. Adopting emergency plans covering accidential spills and personnel contamination resulting from such research.

Note.—Basic elements in developing specific procedures for dealing with major spills of potentially hazardous materials in the laboratory are detailed in the Laboratory Safety Monograph (LSM). Included are information and references on decontamination and emergency plans. NIH and the Centers for Disease Control are available to provide consultation, and direct assistance if necessary, as posted in the LSM. The Institution shall cooperate with the State and local public health departments, reporting any significant research-related illness or accident that appears to be a hazard to the public health.

IV–B–3–g. Reporting within 30 days to the appropriate institutional official and to the NIH Office of Recombinant DNA Activities (ORDA) and significant problems with or violations of the Guidelines, and any significant research-related accidents or illnesses, unless the IBC determines that the PI has done so.

IV–B–3–h. The IBC may not authorize initiation of experiments not explicitly covered by the Guidelines until NIH (with the advice of the RAC when required) establishes the containment requirement.

IV–B–3–i. Performing such other functions as may be delegated to the IBC under Section IV–B–1.

IV–B–4. *Biological Safety Officer.* The Institution shall appoint a BSO if it engages in recombinate DNA research at the P3 of P4 containment level. The officer shall be a member of the

Institutional Biosafety Committee (IBC), and his or her duties shall include (but need not be limited to):

IV–B–4–a. Ensuring through periodic inspections that laboratory standards are rigorously followed;

IV–B–4–b. Reporting to the IBC and the Institution all significant problems with and violations of the Guidelines and all significant research-related accidents and illnesses of which BSO becomes aware, unless the BSO determines that the Principal Investigator (PI) has done so;

IV–B–4–c. Developing emergency plans for dealing with accidental spills and personnel contamination, and investigating recombinant DNA research laboratory accidents;

IV–B–4–d. Providing advice on laboratory security;

IV–B–4–e. Providing technical advice to the PI and the IBC on research safety procedures.

Note.—See Laboratory Safety Monograph for additional information on the duties of the BSO.

IV–B–5. *Principal Investigator.* On behalf of the Institution, the PI is responsible for complying fully with the Guidelines in conducting any recombinant DNA research.

IV–B–5–a. *PI—General.* As part of this special responsibility, the PI shall:

IV–B–5–a–(1). Initiate or modify no recombinant DNA research requiring approval by the IBC prior to initiation (see Sections III–A and III–B) until that research, or the proposed modification thereof, has been approved by the IBC and has met all other requirements of the Guidelines;

IV–B–5–a–(2). Determine whether experiments are covered by Section III–C and follow the appropriate procedures;

IV–B–5–a–(3). Report within 30 days to the IBC and NIH (ORDA) all significant problems with and violations of the Guidelines and all significant research-related accidents and illnesses;

IV–B–5–a–(4). Report to the IBC and to NIH (ORDA) new information bearing on the Guidelines;

IV–B–5–a–(5). Be adequately trained in good microbiological techniques;

IV–B–5–a–(6). Adhere to IBC-approved emergency plans for dealing with accidental spills and personnel contamination; and

IV–B–5–a–(7). Comply with shipping requirements for recombinant DNA molecules. (See Appendix H for shipping requirements and the Laboratory Safety Monograph for technical recommendations.)

IV–B–5–b. *Submissions by the PI to NIH.* The PI shall:

IV–B–5–b–(1). Submit information to NIH (ORDA) in order to have new host-vector systems certified;

IV–B–5–b–(2). Petition NIH, with notice to the IBC, for exemptions to these Guidelines;

IV–B–5–b–(3). Petition NIH, with concurrence of the IBC, for approval to conduct experiments specified in Section III–A of the Guidelines;

IV–B–5–b–(4). Petition NIH for determination of containment for experiments requiring case-by-case review;

IV–B–5–b–(5). Petition NIH for determination of containment for experiments not covered by the Guidelines.

IV–B–5–c. *Submissions by the PI to the IBC.* The PI shall:

IV–B–5–c–(1). Make the initial determination of the required levels of physical and biological containment in accordance with the Guidelines;

IV–B–5–c–(2). Select appropriate microbiological practices and laboratory techniques to be used in the research;

IV–B–5–c–(3). Submit the initial research protocol if covered under Guidelines Sections III–A, III–B, or III–C (and also subsequent changes—e.g., changes in the source of DNA or host-vector system) to the IBC for review and approval or disapproval; and

IV–B–5–c–(4). Remain in communication with the IBC throughout the conduct of the project.

IV–B–5–d. *PI Responsibilities Prior to Initiating Research.* The PI is responsible for:

IV–B–5–d–(1). Making available to the laboratory staff copies of the protocols that describe the potential biohazards and the precautions to be taken;

IV–B–5–d–(2). Instructing and training staff in the practices and techniques required to ensure safety and in the procedures for dealing with accidents; and

IV–B–5–d–(3). Informing the staff of the reasons and provisions for any precautionary medical practices advised or requested, such as vaccinations or serum collection.

IV–B–5–e. *PI Responsibilities During the Conduct of the Research.* The PI is responsible for:

IV–B–5–e–(1). Supervising the safety performance of the staff to ensure that the required safety practices and techniques are employed;

IV–B–5–e–(2). Investigating and reporting in writing to ORDA, the Biological Safety Officer (where applicable), and the IBC any significant problems pertaining to the operation and implementation of containment practices and procedures;

IV–B–5–e–(3). Correcting work errors and conditions that may result in the release of recombinant DNA materials;

IV–B–5–e–(4). Ensuring the integrity of the physical containment (e.g., biological safety cabinets) and the biological containment (e.g., purity, and genotypic and phenotypic characteristics).

IV–C. *Responsibilities of NIH.*

IV–C–1. *Director.* The Director, NIH, is responsible for (i) establishing the NIH Guidelines for Research Involving Recombinant DNA Molecules, (ii) overseeing their implementation, and (iii) their final interpretation.

The Director has responsibilities under the Guidelines that involve the NIH Office of Recombinant DNA Activities (ORDA) and the Recombinant DNA Advisory Committee (RAC). ORDA's responsibilities under the Guidelines are administrative. Advice from the RAC is primarily scientific and technical. In certain circumstances, there is specific opportunity for public comment, with published response, before final action.

IV–C–1–a. *General Responsibilities of the Director, NIH.* The responsibilities of the Director shall include the following:

IV–C–1–a(1). Promulgating requirements as necessary to implement the Guidelines;

IV–C–1–a–(2). Establishing and maintaining the RAC to carry out the responsibilities set forth in Section IV–C–2. The RAC's membership is specified in its charter and in Section IV–C–2;

IV–C–1–a–(3). Establishing and maintaining ORDA to carry out the responsibilities defined in Section IV–C–3; and

IV–C–1–a–(4). Maintaining the Federal Interagency Advisory Committee on Recombinant DNA Research established by the Secretary, HEW (now HHS), for advice on the coordination of all Federal programs and activities relating to recombinant DNA, including activities of the RAC. (See Appendix J.)

IV–C–1–b. *Specific Responsibilities of the Director, NIH.* In carrying out the responsibilities set forth in this Section, the Director or a designee shall weigh each proposed action, through appropriate analysis and consultation, to determine that it complies with the Guidelines and presents no significant risk to health or the environment.

IV–C–1–b–(1). *Major Actions.* To execute major actions the Director must seek the advice of the RAC and provide an opportunity for public and Federal agency comment. Specifically, the agenda of the RAC meeting citing the major actions will be published in the Federal Register at least 30 days before

the meeting, and the Director will also publish the proposed actions in the **Federal Register** for comment at least 30 days before the meeting. In addition, the Director's proposed decision, at his discretion, may be published in the **Federal Register** for 30 days of comment before final action is taken.

The Director's final decision, along with response to the comments, will be published in the **Federal Register** and the *Recombinant DNA Technical Bulletin.* The RAC and IBC chairpersons will be notified of this decision:

IV–C–1–a–(1)–(a). Changing containment levels for types of experiments that are specified in the guidelines when a major action is involved;

IV–C–1–(b). Assigning containment levels for types of experiments that are not explicitly considered in the Guidelines when a major action is involved;

IV–C–1–b–(1)–(c). Promulgating and amending a list of classes of recombinant DNA molecules to be exempt from these guidelines because they consist entirely of DNA segments from species that exchange DNA by known physiological processes, or otherwise do not present a significant risk to health or the environment;

IV–C–11–b–(1)–(d). Permitting experiments specified by Section III–A of the Guidelines;

IV–C–1–b–(1)–(e). Certifying new host-vector systems, with the exception of minor modifications of already certified systems (the standards and procedures for certification are described in Appendix I–II–A. Minor modifications constitute, for example, those of minimal or no consequence to the properties relevant to containment); and

IV–C–1–b–(b)–(f). Adopting other changes in the Guidelines.

IV–C–1–b–(2). *Lesser Actions.* To execute lesser actions, the Director must seek the advice of the RAC. The Director's decision will be transmitted to the RAC and IBC chairpersons and published in the *Recombinant DNA Technical Bulletin:*

IV–C–1–b–(2)–(a). Interpreting and determining containment levels, upon request by ORDA;

IV–C–1–b–(2)–(b). Changing containment levels for experiments that are specified in the Guidelines (see Section III);

IV–C–1–b–(2)–(c). Assigning containment levels for experiments not explicitly considered in the Guidelines;

IV–C–1–b–(2)–(d). Revising the "Classification of Etiologic Agents" for the purpose of these Guidelines [1].

IV–C–1–b–(3). *Other Actions.* The Director's decision will be transmitted to the RAC and IBC chairpersons and published in the *Recombinant DNA Technical Bulletin:*

IV–C–1–b–(3)–(a). Interperting the Guidelines for experiments to which the Guidelines specifically assign containment levels;

IV–C–1–b–(3)–(b). Setting containment under Section III–B–1–d and Section III–B–3–d;

IV–C–1–b–(3)–(c). Approving minor modifications of already certified host-vector systems (the standards and procedures for such modifications are described in Apprendix I–II);

IV–C–1–b–(3)–(d). Decertifying already certified host-vector systems;

IV–C–1–b–(3)–(e). Adding new entries to the list of molecules toxic for vertebrates (see Appendix F);

IV–C–1–b–(3)–(f). Approving the cloning of toxin genes in host-vector systems other than *e. coli* K–12 (See Appendix F); and

IV–C–1–b–(3)–(g). Determining appropriate containment conditions for experiments according to case precedents developed under Section IV–C–1–b–(2)–(c).

IV–C–1–b–(4). The Director shall conduct, support, and assist training programs in laboratory safety for Institutional Biosafety Committee members, Biological Safety Officers, Principal Investigators, and laboratory staff.

IV–C–2. *Recombinant DNA Advisory Committee.* The NIH Recombinant DNA Advisory Committee (RAC) is responsible for carrying out specified functions cited below as well as others assigned under its charter or by the Secretary, HHS, the Assistant Secretary for Health, and the Director, NIH.

The members of the committee shall be chosen to provide, collectively, expertise in scientific fields relevant to recombinant DNA technology and biological safety—e.g., microbiology, molecular biology, virology, genetics, epidemiology, infectious diseases, the biology of enteric organisms, botany, plant pathology, ecology, and tissue culture. At least 20 percent of the members shall be persons knowledgeable in applicable law, standards of professional conduct and practice, public attitudes, the environment, public health, occupational health, or related fields. Representatives from Federal agencies shall serve as nonvoting members. Nominations for the RAC may be submitted to the NIH Office of Recombinant DNA Activities, Bethesda, Md. 20205.

All meetings of the RAC will be announced in the **Federal Register**, including tentative agenda items, 30 days in advance of the meeting, with final agendas (if modified) available at least 72 hours before the meeting. No item defined as a major action under Section IV–C–1–b–(1) may be added to an agenda after it appears in the **Federal Register.**

The RAC shall be responsible for advising the Director, NIH, on the actions listed in Section IV–C–1–b–(1) and IV–C–1–b–(2).

IV–C–3. *The Office of Recombinant DNA Activities.* ORDA shall serve as a focal point for information on recombinant DNA activities and provide advice to all within and outside NIH, including Institutions, Biological Safety Committees, Principal Investigators, Federal agencies, State and local governments, and institutions in the private sector. ORDA shall carry out such other functions as may be delegated to it by the Director, NIH, including those authorities described in Section IV–C–1–b–(3). In addition, ORDA shall be responsible for the following:

IV–C–3–a. Reviewing and approving Institutional Biosafety Committee (IBC) membership;

IV–C–3–b. Publishing in the **Federal Register:**

IV–C–3–b–(1). Announcements of Recombinant DNA Advisory Committee (RAC) meetings and agendas at least 30 days in advance;

Note.—If the agenda for an RAC meeting is modified, ORDA shall make the revised agenda available to anyone, upon request, at least 72 hours in advance of the meeting.

IV–C–3–b–(2). Proposed major actions of the type falling under Section IV–C–1–b–(1) at least 30 days prior to the RAC meeting at which they will be considered; and

IV–C–3–b–(3). The NIH Director's final decision on recommendations made by the RAC.

IV–C–3–c. Publishing the *Recombinant DNA Technical Bulletin;* and

IV–C–3–d. Serving as executive secretary of the RAC.

IV–C–4. *Other NIH Components.* Other NIH components shall be responsible for certifying P4 facilities, inspecting them periodically, and inspecting other recombinant DNA facilities as deemed necessary.

IV–D. *Compliance.* As a condition for NIH funding of recombinant DNA research, Institutions must ensure that such research conducted at or sponsored by the Institution, irrespective of the source of funding, shall comply with these Guidelines. The policies on noncompliance are as follows:

IV–D–1. All NIH-funded projects involving recombinant DNA techniques must comply with the NIH Guidelines. Noncompliance may result in (i) suspension, limitation, or termination of financial assistance for such projects and of NIH funds for other recombinant DNA research at the Institution, or (ii) a requirement for prior NIH approval of any or all recombinant DNA projects at the Institution.

IV–D–2. All non-NIH funded projects involving recombinant DNA techniques conducted at or sponsored by an Institution that receives NIH funds for projects involving such techniques must comply with the NIH Guidelines. Noncompliance may result in (i) suspension, limitation, or termination of NIH funds for recombinant DNA research at the Institution, or (ii) a requirement for prior NIH approval of any or all recombinant DNA projects at the Institution.

IV–D–3. Information concerning noncompliance with the Guidelines may be brought forward by any person. It should be delivered to both NIH (ORDA) and the relevant Institution. The Institution, generally through the IBC, shall take appropriate action. The Institution shall forward a complete report of the incident to ORDA, recommending any further action indicated.

IV–D–4. In cases where NIH proposes to suspend, limit, or terminate financial assistance because of noncompliance with the Guideline, applicable DHHS and Public Health Service procedures shall govern.

See Appendix J for information on the Federal Interagency Advisory Committee on Recombinant DNA Research.

IV–D–5. *Voluntary Compliance.* Any individual, corporation, or institution that is not otherwise covered by the Guidelines is encouraged to conduct recombinant DNA research activities in accordance with the Guidelines, through the procedures set forth in Part VI.

V. Footnotes and References of Sections I–IV

1. The original reference to organisms as Class 1, 2, 3, 4, or 5 refers to the classification in the publication *Classification of Etiologic Agents on the Basis of Hazard,* 4th Edition, July 1974; U.S. Department of Health, Education, and Welfare, Public Health Service, Centers for Disease Control, Office of Biosafety, Atlanta, Georgia 30333.

The Director, NIH, with advice of the Recombinant DNA Advisory Committee, may revise the classification for the purposes of these Guidelines (see Section IV–C–1–b–(2)–(d)). The revised list of organisms in each class is reprinted in Appendix B to these Guidelines.

2. In Part III of the Guidelines, there are a number of places where judgments are to be made. In all these cases the principal investigator is to make the judgment on these matters as part of his responsibility to "make the initial determination on the required levels of physical and biological containment in accordance with the Guidelines" (Section IV–B–5–c–(1)). In the cases falling under Sections III–A, –B, or –C, this judgment is to be reviewed and approved by the Institutional Biosafety Committee as part of its reponsibility to make "an independent assessment of the containment levels required by these Guidelines for the proposed research" (Section IV–B–3–a–(1)). If the IBC wishes, any specific cases may be referred to the NIH Office of Recombinant DNA Activities as part of ORDA's functions to "provide advice to all within and outside NIH" (Section IV–C–3), and ORDA may request advice from the Recombinant DNA Advisory Committee as part of the RAC's responsibility for "interpreting and determining containment levels upon request by ORDA" (Section IV–C–1–b–(2)–(a)).

17. As classified in the Third Report of the International Committee on Taxonomy of Viruses: Classification and Nomenclature of Viruses, R. E. F. Matthews, Ed. Intervirology 12 (129–296). 1979.

18. A USDA permit, required for import and interstate transport of pathogens, may be obtained from the Animal and Plant Health Inspection service, USDA, Federal Building, Hyattsville, MD 20782.

19. i.e., the total of all genomes within a Family shall not exceed two-thirds of the genome.

20. All activities, including storage of variola and whitepox are restricted to the single national facility (World Health Organization (WHO) Colaborating Center for Smallpox Research, Centers for Disease Control, in Atlanta).

VI. Voluntary Compliance

VI–A. *Basic Policy.* Individuals, corporations, and institutions not otherwise covered by the Guidelines are encouraged to do so by following the standards and procedures set forth in Parts I–IV of the Guidelines. In order to simplify discussion, references hereafter to "institutions" are intended to encompass corporations, and individuals who have no organizational affiliation. For purposes of complying with the Guidelines, an individual intending to carry out research involving recombinant DNA is encouraged to affiliate with an institution that has an Institutional Biosafety Committee approved under the Guidelines.

Since commercial organizations have special concerns, such as protection of proprietary data, some modifications and explanations of the procedures in Parts I–IV are provided below, in order to address these concerns.

VI–B. *IBC Approval.* The NIH Office of Recombinant DNA Activities (ORDA) will review the membership of an institution's Institutional Biosafety Committee (IBC) and, where it finds the IBC meets the requirements set forth in Section IV–B–2, will give its approval to the IBC membership.

It should be emphasized that employment of an IBC member solely for purposes of membership on the IBC does not itself make the member an institutionally affiliated member for purposes of Section IV–B–2–a.

Except for the unaffiliated members, a member of an IBC for an institution not otherwise covered by the Guidelines may participate in the review and approval of a project in which the member has a direct financial interest, so long as the member has not been and does not expect to be engaged in the project. Section IV–B–2–d is modified to that extent for purposes of these institutions.

VI–C. *Certification of Host-Vector Systems.* A host-vector system may be proposed for certification by the Director, NIH, in accordance with the procedures set forth in Appendix I–II–A.

In order to ensure protection for proprietary data, any public notice regarding a host-vector system which is designated by the institution as proprietary under Section VI–E–1 will be issued only after consultation with the institution as to the content of the notice.

VI–D. *Requests for Exemptions and Approvals.* Requests for exemptions or other approvals required by the Guidelines should be requested by following the procedures set forth in the appropriate sections in Parts I–IV of the Guidelines.

In order to ensure protection for proprietary data, any public notice regarding a request for an exemption or other approval which is designated by the institution as proprietary under Section VI–E–1 will be issued only after consultation with the institution as to the content of the notice.

VI–E. *Protection of Proprietary Data.* In general, the Freedom of Information Act requires Federal agencies to make their records available to the public upon request. However, this requirement does not apply to, among other things, "Trade secrets and commercial and financial information obtained from a person and privileged or confidential." 18 U.S.C. 1905, in turn makes it a crime for an officer or employee of the United States or any Federal department or agency to publish, divulge, disclose, or make known "in any manner or to any extent not authorized by law any information coming to him in the course of his employment or official duties or by reason of any examination or investigation made by, or return, report or record made to or filed with, such department or agency or officer or employee thereof, which information concerns or relates to the trade secrets, [or processes . . . of any person, firm, partnership, corporation, or association." This provision applies to all employees of the Federal Government, including special Government employees. Members of the Recombinant DNA Advisory Committee are "special Government employees."

VI–E–1. In submitting information to NIH for purposes of complying voluntarily with the Guidelines, an institution may designate those items of information which the institution believes constitute trade secrets or privileged or confidential commercial or financial information.

VI–E–2. If NIH receives a request under the Freedom of Information Act for information so designated, NIH will promptly contact the institution to secure its views as to whether the information (or some portion) should be released.

VI–E–3. If the NIH decides to release this information (or some portion) in response to a Freedom of Information request or otherwise, the institution will be advised; and the actual release will not be made until the expiration of 15 days after the institution is so advised, except to the extent that earlier release, in the judgement of the Director, NIH, is necessary to protect against an imminent hazard to the public or the environment.

VI–E–4. *Presubmission Review.*

VI–E–4–a. Any institution not otherwise covered by the Guidelines, which is considering submission of data or information voluntarily to NIH, may request presubmission review of the records involved to determine whether, if the records are submitted, NIH will or will not make part or all of the records available upon request under the Freedom of Information Act.

VI–E–4–b. A request for presubmission review should be submitted to ORDA, along with the records involved. These records must be clearly marked as being the property of the institution, on loan to NIH solely for the purpose of making a determination under the Freedom of Information Act. ORDA will then seek a determination from the HHS Freedom of Information Officer, the responsible official under HHS regulations (45 CFR Part 5), as to whether the records involved (or some portion) are or are not available to members of the public under the Freedom of Information Act. Pending such a determination, the records will be kept separate from ORDA files, will be considered records of the institution and not ORDA, and will not be received as part of ORDA files. No copies will be made of the records.

VI–E–4–c. ORDA will inform the institution of the HHS Freedom of Information Officer's determination and follow the institution's instructions as to whether some or all of the records involved are to be returned to the institution or to become a part of ORDA files. If the institution instructs ORDA to return the records, no copies or summaries of the records will be made or retained by HHS, NIH, or ORDA.

VI–E–4–d. The HHS Freedom of Information Officer's determination will represent that official's judgement, as of the time of the determination, as to whether the records involved (or some portion) would be exempt from disclosure under the Freedom of Information Act, if at the time of the determination the records were in ORDA files and a request was received from them under the Act.

Appendix A—Exemptions Under III–D–4

Section III–D–4 states that exempt from these Guidelines are "certain specified recombinant DNA molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment. (See Section IV–C–1–b–(1)–(c).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix A."

Under Section III–D–4 of these Guidelines are recombinant DNA molecules that are: (1) Composed entirely of DNA segments from one or more of the organisms within a sublist and (2) to be propagated in any of the organisms within a sublist. (Classification of *Bergey's Manual of Determinative Bacteriology*, eighth edition. R. E. Buchanan and N. E. Gibbons, editors. Williams and Wilkins Company: Baltimore, 1974.)

Sublist A

1. Genus *Escherichia.*
2. Genus *Shigella.*
3. Genus *Salmonella* (including *Arizona*).
4. Genus *Enterobacter.*
5. Genus *Citrobacter* (including *Levinea*).
6. Genus *Klebsiella.*
7. Genus *Erwinia.*
8. *Pseudomonas aeruginosa, Pseudomonas putida* and *Pseudomonas fluorescens.*
9. *Serratia marcescens.*
10. *Yersinia enterocolitica.*

Sublist B

1. *Bacillus subtilis.*
2. *Bacillus licheniformis.*
3. *Bacillus pumilus.*
4. *Bacillus globigii.*
5. *Bacillus niger.*
6. *Bacillus nato.*
7. *Bacillus amyloliquefaciens.*
8. *Bacillus aterrimus.*

Sublist C

1. *Streptomyces aureofaciens.*
2. *Streptomyces rimosus.*
3. *Streptomyces coelicolor.*

Sublist D

1. *Streptomyces griseus.*
2. *Streptomyces cyaneus.*
3. *Streptomyces venezuelae.*

Sublist E

One way transfer of *Streptococcus mutans* or *Streptococcus lactis* DNA into *Streptococcus sanguis.*

Sublist F

1. *Streptococcus sanguis.*
2. *Streptococcus pneumoniae.*
3. *Streptococcus faecalis.*
4. *Streptococcus pyogenes.*

Appendix B—Classification of Microorganisms of the Basis of Hazard

Appendix B—I. *Classification of Etiologic Agents.* (The original reference for this classification was the publication "Classification of Etiological Agents on the Basis of Hazard," 4th edition, July 1974, U.S. Department of Health, Education, and Welfare, Public Health Service, Center for Disease Control, Office of Biosafety, Atlanta, Georgia 30333. For the purposes of these Guidelines, this list has been revised by the NIH.)

Appendix B–I–A. *Class 1 Agents.* All bacterial, parasitic, fungal, viral, rickettsial, and chlamydial agents not included in higher classes.

Appendix B–I–B. *Class 2 Agents.*

Appendix B–I–B–1. *Bacterial Agents.*

Acinetobacter calcoaceticus
Actinobacillus—all species
Aeromonas hydrophila
Arizona hinshawii—all serotypes
Bacillus anthracis
Bordetella—all species
Borrelia recurrentis, B. vincenti
Campylobacter fetus
Campylobacter jejuni
Chlamydia psittaci
Chlamydia trachomatis
Clostridium botulinum:
Cl. chauvoei, Cl. haemolyticum, Cl. histolyticum, Cl. novyi, Cl. septicum, Cl. tetani
Corynebacterium diphtheriae:
C. equi, C. haemolyticum, C. pseudotuberculosis, C. pyogenes, C. renale
Edwardsiella tarda
Erysipelothrix insidiosa
Escherichia coli—all enteropathogenic, enterotoxigenic, enteroinvasive and strains bearing Kl antigen
Haemophilus ducreyi, H. influenzae
Klebsiella—all species and all serotypes
Legionella pneumophila
Leptospira interrogans—all serotypes
Listeria—all species
Moraxella—all species
Mycobacteria—all species except those listed in Class 3
Mycoplasma—all species except Mycoplasma mycoides and *Mycoplasma agalactiae,* which are in Class 5
Neisseria gonorrhoeae, N. meningitidis
Pasteurella—all species except those listed in Class 3
Salmonella—all species and all serotypes
Shigella—all species and all serotypes
Sphaerophorus necrophorus
Staphylococcus aureus
Streptobacillus moniliformis
Streptococcus pneumoniae
Streptococcus pyogenes
Treponema carateum, T. pallidum, and *T. pertenue*
Vibrio cholerae
Vibrio parahemolyticus
Yersinia enterocolitica

Appendix B–I–B–2. *Fungal Agents.*

Actinomycetes (including *Nocardia* species and *Actinomyces* species and *Arachnia propionica*) [2]
Blastomyces dermatitidis
Cryptococcus neoformans
Paracoccidioides braziliensis

Appendix B–I–B–3. *Parasitic Agents.*

Endamoeba histolytica
Leishmania sp.
Naegleria gruberi
Schistosoma mansoni
Toxoplasma gondii
Toxocara canis
Trichinella spiralis
Trypanosoma cruzi

Appendix B–I–B–4. *Viral, Rickettsial, and Chlamydial Agents.*

Adenoviruses—human—all types
Cache Valley virus
Coxsackie A and *B viruses*
Cytomegaloviruses
Echoviruses—all types
Encephalomyocarditis virus (EMC)
Flanders virus
Hart Park virus
Hepatitis—associated antigen material
Herpes viruses—except *Herpesvirus simiae* (*Monkey B virus*) which is in Class 4
Corona viruses
Influenza viruses—all types except A/PR8/34, which is in Class 1
Langat virus
Lymphogranuloma venereum agent
Measles virus
Mumps virus
Parainfluenza virus—all types except Parainfluenza virus 3, SF4 strain, which is in Class 1
Polioviruses—all types, wild and attenuated
Poxviruses—all types except *Alastrim, Smallpox,* and *Whitepox,* which are Class 5 and *Monkey pox,* which depending on experiments, is in Class 3 or Class 4
Rabies virus—all strains except *Rabies street virus,* which should be classified in Class 3
Reoviruses—all types
Respiratory syncytial virus
Rhinoviruses—all types
Rubella virus
Simian viruses—all types except *Herpesvirus simiae (Monkey B virus)* and *Marburg virus,* which are in Class 4
Sindbis virus
Tensaw virus
Turlock virus
Vaccinia virus
Varicella virus
Vesicular stomatitis virus [3]
Vole rickettsia
Yellow fever virus, 17D vaccine strain

Appendix B–I–C. *Class 3 Agents.*

Appendix B–I–C–1. *Bacterial Agents.*

Bartonella—all species
Brucella—all species
Francisella tularensis
Mycobacterium avium, M. bovis, M. tuberculosis
Pasteurella multocide type *B* ("buffalo" and other foreign virulent strains) [3]
Pseudomonas mallei [3]
Pseudomonas pseudomallei [3]
Yersinia pestis

Appendix B–I–C–2. *Fungal Agents.*

Coccidioides immitis
Histoplasma capsulatum
Histoplasma capsulatum var. *duboisii*

Appendix B–I–C–3. *Parasitic Agents.*

None

Appendix B–I–C–4. *Viral, Rickettsial, and Chlamydial Agents.*

Monkey pox, when used *in vitro* [4]
Arboviruses—all strains except those in Class 2 and 4 (*Arboviruses* indigenous to the United States are in Class 3, except those listed in Class 2. *West Nile* and *Semliki Forest* viruses may be classified up or down, depending on the conditions of use and geographical location of the laboratory.)
Dengue virus, when used for transmission or animal inoculation experiments
Lymphocytic choriomeningitis viris (LCM)
Rabies street virus
Rickettsia—all species except *Vole rickettsia* when used for transmission or animal inoculation experiments
Yellow fever virus—wild, when used *in vitro*

Appendix B–I–D. *Class 4 Agents.*

Appendix B–I–D–1. *Bacterial Agents.*

None.

Appendix B–I–D–2. *Fungal Agents.*

None.

Appendix B–I–D–3. *Parasitic Agents.*

None.

Appendix B–I–D–4. *Viral, Rickettsial, and Chlamydial Agents.*

Ebola fever virus
Monkey pox, when used for transmission or animal inoculation experiments [4]
Hemorrhagic fever agents, including *Crimean hemorrhagic fever, (Congo), Junin,* and *Machupo* viruses, and others as yet undefined
Herpesvirus simiae (Monkey B virus)
Lassa virus
Marburg virus
Tick-borne encephalitis virus complex, including *Russian spring-summer encephalitis, Kyasanur forest disease, Omsk hemorrhagic fever,* and *Central European encephalitis viruses*

Venezuelan equine encephalitis virus, epidemic strains, when used for transmission or animal inoculation experiments
Yellow fever virus—wild, when used for transmission or animal inoculation experiments

Appendix B–II. *Classification of Oncogenic Viruses on the Basis of Potential Hazard* [5].

Appendix B–II–A *Low-Risk Oncogenic Viruses.*

Rous Sarcoma
SV–40
CELO
Ad7–SV40
Polyoma
Bovine papilloma
Rat mammary tumor
Avian Leukosis
Murine Leukemia
Murine Sarcoma
Mouse mammary tumor
Rat Leukemia
Hamster Leukemia
Bovine Leukemia
Dog Sarcoma
Mason-Pfizer Monkey Virus
Marek's
Guinea Pig Herpes
Lucke (Frog)
Adenovirus
Shope Fibroma
Shope Papilloma

Appendix B–II–B. *Moderate-Risk Oncogenic Viruses.*

Ad2–SV40
FeLV
HV Saimiri
HHV
SSV–1
GaLV
HV ateles
Yaba
FeSV

Appendix B–III. *Class 5 Agents.*

Appendix B–III–A. *Animal Disease Organisms Which are Forbidden Entry into the United States by Law.*

Foot and mouth disease virus.

Appendix B–III–B. *Animal Disease Organisms and Vectors Which are Forbidden Entry into the United States by USDA Policy.*

African horse sickness virus
African swine fever virus
Besnoitia besnoiti
Borna disease virus
Bovine infectious petechial fever
Camel pox virus
Ephemeral fever virus
Fowl plague virus
Goat pox virus
Hog cholera virus
Louping ill virus
Lumpy skin disease virus
Nairobi sheep disease virus
Newcastle disease virus (Asiatic strains)
Mycoplasma mycoides (contagious bovine pleuropneumonia)
Mycoplasma agalactiae (contagious agalactia of sheep)
Rickettsia ruminatium (heart water)
Rift valley fever virus
Rhinderpest virus
Sheep pox virus
Swine vesicular disease virus
Teschen disease virus
Trypanosoma vivax (Nagana)
Trypanosoma evansi
Theileria parva (East Coast fever)
Theileria annulata
Theileria lawrencei
Theileria bovis
Theileria hirci
Vesicular exanthema virus
Wesselsbron disease virus
Zyonema

Appendix B–III–C. *Organisms Which May Not Be Studied in the United States Except At Specified Facilities.*

Small pox [4]
Alastrim [4]
White pox [4]

Appendix B–IV. *Footnotes and References of Appendix B.*

1. The original reference for this classification was the publication *Classification of Etiologic Agents on the Basis of Hazard*, 4th edition, July 1974, U.S. Department of Health, Education, and Welfare, Public Health Service, Center for Disease Control, Office of Biosafety, Atlanta, Georgia 30333. For the purposes of these Guidelines, this list has been revised by the NIH.

2. Since the publication of the classification in 1974 [1], the *Actinomycetes* have been reclassified as bacterial rather than fungal agents.

3. A USDA permit, required for import and interstate transport of pathogens, may be obtained from the Animal and Plant Health Inspection Service, USDA, Federal Building, Hyattsville, MD 20782.

4. All activities, including storage of variola and whitepox are restricted to the single national facility [World Health Organization (WHO) Collaborating Center for Smallpox Research, Center for Disease Control, in Atlanta].

5. *National Cancer Institute Safety Standards for Research Involving Oncogenic Viruses* (October 1974). U.S. Department of Health, Education, and Welfare Publication No. (NIH) 75–790.

6. U.S. Department of Agriculture, Animal and Plant Health Inspection Service.

Appendix C—Exemptions Under III–D–5

Section III–D–5 states that exempt from these Guidelines are "Other classes of recombinant DNA molecules, if the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment, finds that they do not present a significant risk to health or the environment. (See Section IV–C–1–b–(1)–(c).) Certain classes are exempt as of publication of these Revised Guidelines."

The following classes of experiments are exempt under Section III–D–5 of the Guidelines:

Appendix C–I. *Recombinant DNAs in Tissue Culture.* Recombinant DNA molecules derived entirely from non-viral components (that is, no component is derived from a eukaryotic virus), that are propagated and maintained in cells in tissue culture are exempt from these Guidelines with the exceptions listed below.

Exceptions

Experiments described in Section III–A which require specific RAC review and NIH approval before initiation of the equipment.

Experiments involving DNA from Class 3, 4, or 5 organisms [1] or cells known to be infected with these agents.

Experiments involving the deliberate introduction of genes coding for the biosynthesis of molecules toxic for vertebrates. (See Appendix F.)

Appendix C–II. *Experiments Involving E. coli K–12 Host-Vector Systems.* Experiments which use *E. coli* K–12 host-vector systems, with the exception of those experiments listed below, are exempt from these Guidelines provided that (a) the *E. coli* hos shall not contain conjugation proficient plasmids or generalized transducing phages, and (b) lamboda or lambdoid or Ff bacteriophages or nonconjugative plasmids [2] shall be used as vectors. However, experiments involving the insertion into *E. coli* K–12 of DNA from prokaryotes that exchange genetic information [3] with *E. coli* may be performed with any *E. coli* K–12 vector (e.g., conjugative plasmid). When a nonconjugative vector is used, the *E. coli* K–12 host may contain conjugation-proficient plasmids either autonomous or integrated, or generalized transducing phages.

For these exempt experiments, P1 physical containment conditions are recommended.

Exceptions

Experiments described in Section III–A which require specific RAC review and NIH approval before initiation of the experiment.

Experiments involving DNA from Class 3, 4, or 5 organisms [1] or from cells known to be infected with these agents may be conducted under containment conditions specified in Section III–B–2 with prior IBC review and approval.

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval. (See Section III–B–5.)

Experiments involving the deliberate cloning of genes coding for the

biosynthesis of molecules toxic for vertebrates. (See Appendix F.)

Appendix C–III. *Experiments Involving Saccharomyces cerevisiae Host-Vector Systems.* Experiments which use *Saccharomyces cerevisiae* host-vector systems, with the exception of experiments listed below, are exempt from these Guidelines provided that laboratory strains are used.

For these exempt experiments, P1 physical containment conditions are recommended.

Exceptions

Experiments described in Section III–A which require specific RAC review and NIH approval before initiation of the experiment.

Experiments involving Class 3, 4 or 5 organisms [1] or cells known to be infected with these agents may be conducted under containment conditions specified in Section III–B–2 with prior IBC review and approval.

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval. (See Section III–B–5.)

Experiments involving the deliberate cloning of genes coding for the biosynthesis of molecules toxic for vertebrates. (See Appendix F.)

Appendix C–IV. *Experiments Involving Bacillus subtilis Host-Vector Systems.* Any asporogenic *Bacillus subtilis* strain which does not revert to a sporeformer with a frequency greater than 10^{-7} can be used for cloning DNA, with the exception of those experiments listed below. Indigenous *Bascillus* plasmids and phages, whose host-range does not include *Bacillus cereus* or *Bacillus anthracis,* may be used as vectors.

For these exempt experiments P1 physical containment conditions are recommended.

Exceptions

Experiments described in Section III–A which require specific RAC review and approval before initiation of the experiment.

Experiments involving Class 3, 4, or 5 organisms [1] or cells known to be infected with these agents may be conducted under containment conditions specified by Section III–B–2 with prior IBC review and approval.

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval. (See Section III–B–5.)

Experiments involving the deliberate cloning of genes coding for the biosynthesis of molecules toxic for vertebrates. (See Appendix F.)

Appendix C–V. *Footnotes and References of Appendix C.*

1. The original reference to organisms as Class 1, 2, 3, 4, or 5 refers to the classification in the publication *Classification of Etiologic Agents on the Basis of Hazard,* 4th Edition, July 1974; U.S. Department of Health, Education, and Welfare, Public Health Service, Centers for Disease Control, Office of Biosafety, Atlanta, Georgia 30333.

The Director, NIH, with advice of the Recombinant DNA Advisory Committee, may revise the classification for the purposes of these Guidelines (see Section IV-C-1-b-(2)-(d)). The revised list of organisms in each class is reprinted in Appendix B to these Guidelines.

2. A subset of non-conjugative plasmid vectors are also poorly mobilizable (e.g., pBR322, pBR313). Where practical, these vectors should be employed.

3. Defined as observable under optimal laboratory conditions by transformation, transduction, phage infection, and/or conjugation with transfer of phage, plasmid, and/or chromosomal genetic information. Note that this definition of exchange may be less stringent than that applied to exempt organisms under Section III–D–4.

Appendix D—Actions Taken Under the Guidelines

As noted in the subsections of Section IV–C–1–o–(1), the Director, NIH, may take certain actions with regard to the Guidelines after the issues have been considered by the RAC

Some of the actions taken to date include the following:

Appendix D–I. Permission is granted to clone Foot-and-Mouth Disease Virus in the EK1 host-vector system consisting of *E. coli* K–12 and the vector pBR322, all work to be done at the Plum Island Animal Disease Center.

Appendix D–II. Certain specified clones derived from segments of the Foot-and-Mouth Disease Virus may be transferred from Plum Island Animal Disease Center to the facilities of Genentech, Inc., of South San Francisco, California. Further development of the clones at Genentech has been approved under P1 + EK1 conditions.

Appendix D–III. The Rd strain of *Hemophilus influenzae* can be used as a host for the propagation of the cloned Tn 10 tet R gene derived from *E. coli* K–12 employing the non-conjugative *Haemophilus* plasmid, pRSF0885, under P1 conditions.

Appendix D–IV. Permission is granted to clone certain subgenomic segments of Foot-and-Mouth Diesease Virus in HV1 *Bacillus subtilis* and *Saccharomyces cerevisiae* host-vector systems under P1 conditions at Genentech, Inc., South San Francisco, California.

Appendix D–V. Permission is granted to Dr. Ronald Davis of Stanford University to field test corn plants modified by recombinant DNA techniques under specified containment conditions.

Appendix D–VI. Permission is granted to clone in *E. coli* K–12, under P1 physical containment conditions, subgenomic segments of Rift Valley Fever Virus subject to conditions which have been set forth by the RAC.

Appendix D–VII. Attenuated laboratory strains of *Salmonella typhimurium* may be used under P1 physical containment conditions to screen for the *Saccharomyces cerevisiae* pseudouridine synthetase gene. The plasmid YEp13 will be employed as the vector.

Appendix D–VIII. Permission is granted to transfer certain clones of subgenomic segments of Foot-and-Mouth Disease Virus from Plum Island Animal Disease Center to the laboratories of Molecular Genetics, Inc., Minnetonka, Minnesota, and to work with these clones under P1 containment conditions. Approval is contingent upon review of data on infectivity testing of the clones by a working group of the RAC.

Appendix D–IX. Permission is granted to Dr. John Sanford of Cornell University to field test tomato and tobacco plants transformed with bacterial (*E. coli* K–12) and yeast DNA using pollen as a vector.

Appendix D–X. Permission is granted to Drs. Steven Lindow and Nickolas Panopulos of the University of California, Berkeley, to release under specified conditions *Pseudomonas syringae* pv. *syringae* and *Erwinia herbicola* carrying *in vitro* generated deletions of all or part of the genes involved in ice nucleation.

Appendix E—Certified Host-Vector Systems

While many experiments using *E. coli* K–12, *Saccharomyces cerevisiae* and *Bacillus subtilis* are currently exempt from the Guidelines under Exemption III–D–5, some derivatives of these host-vector systems were previously classified as HV1 or HV2. A listing of those systems follows.

HV1. The following plasmids are accepted as the vector components of certified *B. subtilis* HV1 systems: pUB110, pC194, pS194, pSA2100, pE194, pT127, pUB112, pC221, pC223, and pAB124. *B. subtilis* strains RUB 331 and BGSC 1S53 have been certified as the host component of HV1 systems based on these plasmids.

HV2. The asporogenic mutant derivative of *Bacillus subtilis,* ASB 298, with the following plasmids as the vector component: pUB110, pC194,

pS194, pSA2100, pE194, pT127, pUB112, pC221, pC223, and pAB124.

HV2—The following sterile strains of *Saccharomyces cerevisiae*, all of which have the ste–VC9 mutation, SHY1, SHY2, SHY3, and SHY4. The following plasmids are certified for use: YIp1, YEp2, YEp4, YIp5, YEp6, YRp7, YEp20, YEp21, YEp24, YIp25, YIp26, YIp27, YIp28, YIp29, YIp30, YIp31, YIp32, and YIp33.

EK2 Plasmid Systems. The *E. coli* K–12 strain chi–1776. The following plasmids are certified for use: pSC101, pMB9, pBR313, pBR322, pDH24, pBR325, pBR327, pGL101, pHB1. The following *E. coli/S. cerevisiae* hybrid plasmids are certified as EK2 vectors when used in *E. coli* chi–1776 or in the sterile yeast strains, SHY1, SHY2, SHY3 and SHY4: YIp1, YEp2, YEp4, YIp5, YEp6, YRp7, YEp20, YEp21, YEp24, YIp25, YIp26, YIp27, YIp28, YIp29, YIp30, YIp31, YIp32, YIp33.

EK2 Bacteriophage Systems. The following are certified EK2 systems based on bacteriophage lambda:

Vector	
λgt*WES*.λB'	Charon 4A
λgt*WES*.λB'	Charon 16A
λgtZ]*vir*.λB'	Charon 21A
λgtALO.λB	Charon 23A
Charon 3A	Charon 24A
Host	
DP50*supF*	DP50 or DP50*supF*
DP50*supF*	DP50 or DP50*supF*
E. coli K–12	DP50*supF*
DP50*supF*	DP50 or DP50*supF*
DP50 or DP50*supF*	DP50 or DP50*supF*

E. coli K–12 strains chi–2447 and chi–2281 are certified for use with lambda vectors that are certified for use with strain DP50 or DP50supF provided that the su– strain not be used as a propagation host.

Additional certified host-vector systems.

HV1—The following specified strains of *Neurospora crassa* which have been modified to prevent aerial dispersion:

In1 (inositolless) strains 37102, 37401, 46316, 64001, and 89601.

Csp–1 strain UCLA37 and csp–2 strains FS 590, UCLA101 (these are conidial separation mutants).

Eas strain UCLA191 (an "easily wettable" mutant).

HV1—The following *Streptomyces* species: *Streptomyces coelicolor, S. lividans, S. parvulus,* and *S. griseus.* The following are accepted as vector components of certified *Streptomyces* HV1 systems: *Streptomyces* plasmids SCP2, SLP1.2, pIJ101, actinophage phi C31, and their derivatives.

HV1—*Pseudomonas putida* strain KT2440 with plasmid vectors pKT262, pKT263, and pKT264.

Appendix F—Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Molecules Toxic for Vertebrates

Appendix F–I. *General Information.* Appendix F specifies the containment to be used for the deliberate cloning of genes coding for the biosynthesis of molecules toxic for vertebrates. The cloning of genes coding for molecules toxic for vertebrates that have an LD_{50} of less than 100 nanograms per kilogram body weight (e.g., microbial toxins such as the botulinum toxins, tetanus toxin, diphtheria toxin, *Shigella dysenteriae* neurotoxin) is covered under Section III–A–1 of the Guidelines and requires RAC review and NIH and IBC approval before initiation. No specific restrictions shall apply to the cloning of genes if the protein specified by the gene has an LD_{50} of 100 micrograms or more per kilogram of body weight. experiments involving genes coding for toxic molecules with an LD_{50} of 100 micrograms or less per kilogram body weight shall be registered with ORDA prior to initiating the experiments. A list of toxic molecules classified as to LD_{50} is available from ORDA. Testing procedures for determining toxicity of toxic molecules not on the list are available from ORDA. The results of such tests shall be forwarded to ORDA, which will consult with an *ad hoc* working group on toxic molecules prior to inclusion of the molecule on the list. (See Section IV–C–1–b–(2)–(e).)

Appendix F–II. *Containment Conditions for Cloning of Toxic Molecule Genes in E. coli K–12.*

Appendix F–II–A. Cloning of genes coding for molecules toxic for vertebrates that have an LD_{50} in the range of 100 nanograms to 1000 nanograms per kilogram body weight (e.g., abrin, *Clostridium perfringens* epsilon toxin) may proceed under P2+EK2 or P3+EK1 containment conditions.

Appendix F–II–B. cloning of genes for the biosynthesis of molecules toxic for vertebrates with an LD_{50} in the range of 1 microgram to 100 micrograms per kilogram body weight may proceed under P1+EK1 containment conditions (e.g., *Staphylococcus aureus* alpha toxin, *Staphylococcus aureus* beta toxin, ricin, *Pseudomonas aeruginosa* exotoxin A, *Bordatella pertussis* toxin, the lethal factor of *Bacillus Anthracis*, the *Pasteurella pestis* murine toxins, the oxygen-lable hemolysins such as streptolysin O, and certain neurotoxins present in snake venoms and other venoms).

Appendix F–II–C. Some enterotoxins are substantially more toxic when administered enterally than parenterally. The following enterotoxins shall be subject to P1+EK1 containment conditions: cholera toxin, the heat labile toxins of *E. coli, Klebsiella,* and other related proteins that may be identified by neutralization with an antiserum monospecific for cholera toxin, and the heat stable toxins of *E. coli* and of *Yersinia enterocolitica.*

Appendix F–III. *Containment Conditions for Cloning of Toxin Molecule Genes in Organisms Other than E. coli K–12.* Requests involving the cloning of genes coding for molecules toxic for vertebrates in host-vector systems other than *E. coli* K–12 will be evaluated by ORDA, which will consult with the *ad hoc* working group on toxic molecules. (See Section IV–C–1–b–(3)–(f).).

Appendix F–IV. *Specific Approvals.*

Appendix F–IV–A. Permission is granted to clone the Exotoxin A gene of *Pseudomonas aeruginosa* under P1 conditions in *Pseudomonas aeruginosa* and in *Pseudomonas putida.*

Appendix F–IV–B. The pyrogenic exotoxin type A (Tox A) gene of *Staphylococcus aureus* may be cloned in an HV2 *Bacillus subtilis* host-vector system under P3 containment conditions.

Appendix F–IV–C. Restriction fragments of *Corynephage Beta* carrying the structural gene for diphtheria toxin may be safely cloned in *E. coli* K–12, in high containment Building 550 at the Frederick Cancer Research Facility. Laboratory practices and containment equipment are to be specified by the IBC. If the investigators wish to proceed with the experiments, a prior review will be conducted to advise NIH whether the proposal has sufficient scientific merit to justify the use of the NIH P4 facility.

Appendix F–IV–D. The genes coding for the *Staphylococcus aureus* determinants, A, B, and F, which may be implicated in toxic shock syndrome, may be cloned in *E. coli* K–12 under P2 + EK1 conditions. The *Staphylococcus aureus* strain used as the donor is to be alpha toxin minus. It is suggested that, if possible, the donor *Staphylococcus aureus* strain should lack other toxins with LD_{50}s in the range of one microgram per kilogram body weight, such as the exfoliative toxin.

Appendix F–IV–E. Fragments F–1, F–2, and F–3 of the diphtheria toxin gene (tox) may be cloned in *E. coli* K–12 under P1 + EK1 containment conditions and may be cloned in *Bacillus subtilis* host-vector systems under P1 containment conditions. Fragment F–1 and fragment F–2 both contain: (i) Some or all of the transcriptional control elements of *tox,* (ii) the signal peptide,

and (iii) fragment A (the center responsible for ADP-ribosylation of elongation factor 2). Fragment F–3 codes for most of the non-toxic fragment B of the toxin, and contains no sequences coding for any portion of the enzymatically-active fragment A moiety.

Appendix F–IV–F. The gene(s) coding for a toxin (designated LT-like) isolated from *E. coli* which is similar to the *E. coli* heat labile enterotoxin (LT) with respect to its activities and mode of action, but is not neutralized by antibodies against cholera enterotoxin or against LT from human or porcine *E. coli* strains and sequences homologous to the *E. coli* LT-like toxin gene may be cloned under P1 + EK1 conditions.

Appendix F–IV–G. Genes from *Vibrio fluvialis, Vibrio Mimicus* and non 0–1 *Vibrio cholerae*, specifying virulence factors for animals, may be cloned under P1 + EK1 conditions. The virulence factors to be cloned will be selected by testing fluid induction in suckling mice and Y–1 mouse adrenal cells.

Appendix F–IV–H. The structural gene of the Shiga-like toxin from clinically isolated strains of *E. coli* may be safely cloned in *E. coli* K–12 under P4 + EK1 containment conditions. If the investigators wish to proceed with the experiments in the NIH P4 facility, a prior review will be conducted to advise NIH whether the proposal has sufficient scientific merit to justify the use of the NIH P4 facility.

Appendix F–IV–I. A hybrid gene in which the gene coding for the melanocyte stimulating hormone (MSH) is joined to a segment of the gene encoding diphtheria toxin may be safely propagated in *E. coli* K–12, under P4 containment, in high containment building 550 at the Frederick Cancer Research Facility. If the investigators wish to proceed with the experiment, a prior review will be conducted to advise NIH whether the proposal has sufficient scientific merit to justify the use of the NIH P4 facility. Before any of the strains may be removed from the P4 facility, data on their safety shall be evaluated by the RAC Working Group on Toxins, and the Working Group recommendation shall be acted upon by NIH.

Appendix F–IV–J. The gene segment encoding the A subunit of cholera toxin of *Vibrio cholerae* may be joined to the transposons Tn5 and the Tn–131 and the A–subunit::Tn5–131 hybrid gene cloned in *E. coli* K–12 and *V. cholerae* under P1 containment conditions.

Appendix G—Physical Containment

Appendix G–I. *Standard Practices and Training.* The first principle of containment is a strict adherence to good microbiological practices [1–10]. Consequently, all personnel directly or indirectly involved in experiments on recombinant DNA's must receive adequate instruction. (See Sections IV–B–1–e and IV–B–5–d.) This shall, as a minimum, include instructions in aseptic techniques and in the biology of the organism used in the experiments, so that the potential biohazards can be understood and appreciated.

Any research group working with agents with a known or potential biohazard shall have an emergency plan which describes the procedures to be followed if an accident contaminates personnel or the environment. The principal investigator must ensure that everyone in the laboratory is familiar with both the potential hazards of the work and the emergency plan. (See Section IV–B–3–d and IV–B–5–e.) If a research group is working with a known pathogen where there is an effective vaccine it should be made available to all workers. Where serological monitoring is clearly appropriate it shall be provided. (See Section IV–B–1–f.)

The "Laboratory Safety Monograph," available from ORDA, describes practices, equipment, and facilities in detail.

Appendix G–II. *Physical Containment Levels.* The objective of physical containment is to confine organisms containing recombinant DNA molecules, and thus to reduce the potential for exposure of the laboratory worker, persons outside of the laboratory, and the environment to organisms containing recombinant DNA molecules. Physical containment is achieved through the use of laboratory practices, containment equipment, and special laboratory design. Emphasis is placed on primary means of physical containment which are provided by laboratory practices and containment. Special laboratory design provides a secondary means of protection against the accidental release of organisms outside the laboratory or to the environment. Special laboratory design is used primarily in facilities in which experiments of moderate to high potential hazards are performed.

Combinations of laboratory practices, containment equipment, and special laboratory design can be made to achieve different levels of physical containment. Four levels of physical containment, which are designated as P1, P2, P3, and P4, are described. It should be emphasized that the descriptions and assignments of physical containment detailed below are based on existing approaches to containment of pathogenic organisms. For example, the "Classification of Etiologic Agents on the Basis of Hazard," [2] prepared by the Centers for Disease Control, describes four general levels which roughly correspond to our descriptions for P1, P2, P3, and P4; and the National Cancer Institute describes three levels for research on oncogenic viruses which roughly correspond to our P2, P3, and P4 levels. [3]

It is recognized that several different combinations of laboratory practices, containment equipment, and special laboratory design may be appropriate for containment of specific research activities. The Guidelines, therefore, allow alternative selections of primary containment equipment within facilities that have been designed to provide P3 and P4 levels of physical containment. The selection of alternative methods of primary containment is dependent, however, on the level of biological containment provided by the host-vector system used in the experiment. Consideration will also be given by the Director, NIH, with the advice of the Recombinant DNA Advisory Committee to other combinations which achieve an equivalent level of containment. (See Section IV–C–1–b–(2)–(b).)

Appendix G–III–A. *P1 Level.*

Appendix G–II–A–1. *Laboratory Practices.*

Appendix G–II–A–1–a. *Laboratory doors shall be kept closed while experiments are in progress.*

Appendix G–II–A–1–b. Work surfaces shall be decontaminated daily, and immediately following spills of organisms containing recombinant DNA molecules.

Appendix G–II–A–1–c. All biological wastes shall be decontaminated before disposal. Other contaminated materials, such as glassware, animal cages, and laboratory equipment, shall be decontaminated before washing, reuse, or disposal.

Appendix G–II–A–1–d. Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

Appendix G–II–A–1–e. Eating, drinking, smoking, and storage of foods are not permitted in the laboratory area in which recombinant DNA materials are handled.

Appendix G–II–A–1–f. Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

Appendix G–II–A–1–g. Care shall be taken in the conduct of all procedures to minimize the creation of aerosols.

Appendix G–II–A–1–h. Contaminated materials that are to be decontaminated at a site away from the laboratory shall be placed in a durable leak-proof

container, which is closed before removal from the laboratory.

Appendix G–II–A–1–i. An insect and rodent control program shall be instituted.

Appendix G–II–A–1–j. The use of laboratory gowns, coats, or uniforms is discretionary with the laboratory supervisor.

Appendix G–II–A–1–k. Use of the hypodermic needle and syringe shall be avoided when alternative methods are available.

Appendix G–II–A–1–l. The laboratory shall be kept neat and clean.

Appendix G–II–A–2. *Containment Equipment.* Special containment equipment is not required at the P1 level.

Appendix G–II–A–3. *Special Laboratory Design.* Special laboratory design is not required at the P1 level.

Appendix G–II–B. *P2 Level.*

Appendix G–II–B–1. *Laboratory Practices.*

Appendix G–II–B–1–a. Laboratory doors shall be kept closed while experiments are in progress.

Appendix G–II–B–1–b. Work surfaces shall be decontaminated daily, and immediately following spills of organisms containing recombinant DNA molecules.

Appendix G–II–B–1–c. All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other contaminanted materials such as glassware, animal cages, laboratory equipment, and radioactive wastes shall be decontaminated by a means demonstrated to be effective before washing, reuse, or disposal.

Appendix G–II–B–1–d. Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

Appendix G–II–B–1–e. Eating, drinking, smoking, and storage of food are not permitted in the laboratory area in which recombinant DNA materials are handled.

Appendix G–II–B–1–f. Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

Appendix G–II–B–1–g. Care shall be exercised to minimize the creation of aerosols. For example, manipulations such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splaters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

Appendix G–II–B–1–h. Contaminated materials that are to be steam sterilized (autoclaved) or decontaminated at a site away from the laboratory shall be placed in a durable leak-proof container, which is closed before removal from the laboratory.

Appendix G–II–B–1–i. Only persons who have been advised of the nature of the research being conducted shall enter the laboratory.

Appendix G–II–B–1–j. The universal biohazard sign shall be posted on all laboratory access doors when experiments requiring P2 containment are in progress. Freezers and refrigerators or other units used to store organisms containing recombinant DNA molecules shall also be posted with the universal biohazard sign.

Appendix G–II–B–1–k. An insect and rodent control program shall be instituted.

Appendix G–II–B–1–l. The use of laboratory gowns, coats, or uniforms is required. Laboratory clothing shall not be worn to the lunch room or outside of the building in which the laboratory is located.

Appendix G–II–B–1–m. Animals not related to the experiment shall not be permitted in the laboratory.

Appendix G–II–B–1–n. Use of the hypodermic needle and syringe shall be avoided when alternative methods are available.

Appendix G–II–B–1–o. The laboratory shall be kept neat and clean.

Appendix G–II–B–1–p. Experiments of lesser biohazard potential can be carried out concurrently in carefully demarcated areas of the same laboratory.

Appendix G–II–B–1–2. *Containment Equipment.* Biological safety cabinets [12] shall be used to contain aerosol-producing equipment, such as blenders, lyophilizers, sonicators, and centrifuges, when used to process organisms containing recombinant DNA molecules, except where equipment design provides for containment of the potential aerosol. For example, a centrifuge may be operated in the open if a sealed head or safety centrifuge cups are used.

Appendix G–II–B–1–3. *Special Laboratory Design.* An autoclave for sterilization of wastes and contaminated materials shall be available in the same building in which organisms containing recombinant DNA molecules are used.

Appendix G–II–C. *P3 Level.*

Appendix G–II–C–1. *Laboratory Practices.*

Appendix G–II–C–1–a. Laboratory doors shall be kept closed while experiments are in progress.

Appendix G–II–C–1–b. Work surfaces shall be decontaminated following the completion of the experimental activity, and immediately following spills of organisms containing recombinant DNA molecules.

Appendix G–II–C–1–c. All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other contaminated materials, such as glassware, animal cages, laboratory equipment, and radioactive wastes, shall be decontaminated by a method demonstrated to be effective before washing, reuse, or disposal.

Appendix G–II–C–1–d. Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

Appendix G–II–C–1–e. Eating, drinking, smoking, and storage of food are not permitted in the laboratory area in which recombinant DNA materials are handled.

Appendix G–II–C–1–f. Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

Appendix G–II–C–1–g. Care shall be exercised to minimize the creation of aerosols. For example, manipulation such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splatters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

Appendix G–II–C–1–h. Contaminated materials that are to be steam-sterilized (autoclaved) or decontaminated at a site away from the laboratory shall be placed in a durable leak-proof container, which is closed before removal from the laboratory.

Appendix G–II–C–1–i. Entry into the laboratory shall be through a controlled access area. Only persons who have been advised of the nature of the research being conducted shall enter the controlled access area. Only persons required on the basis of program or support needs shall be authorized to enter the laboratory. Such persons shall be advised of the nature of the research being conducted before entry, and shall comply with all required entry and exit procedures.

Appendix G–II–C–1–j. Persons under 16 years of age shall not enter the laboratory.

Appendix G–II–C–1–k. The universal biohazard sign shall be posted on the controlled access area door and on all laboratory doors when experiments requiring P3-level containment are in progress. Freezers and refrigerators or other units used to store organisms containing recombinant DNA molecules shall also be posted with the universal biohazard sign.

Appendix G–II–C–1–l. An insect and rodent control program shall be instituted.

Appendix G–II–C–1–m. Laboratory clothing that protects street clothing (e.g., long-sleeve solid-front or wrap-around gowns, no-button or slipover jackets) shall be worn in the laboratory. Front-button laboratory coats are unsuitable. Laboratory clothing shall not be worn outside the laboratory and shall be decontaminated before it is sent to the laundry.

Appendix G–II–C–1–n. Raincoats, overcoats, topcoats, coats, hats, caps, and such street outer-wear shall not be kept in the laboratory.

Appendix G–II–C–1–o. Gloves shall be worn when handling materials requiring P3 containment. They shall be removed aseptically immediately after the handling procedure and decontaminated.

Appendix G–II–C–1–p. Animals and plants not related to the experiment shall not be permitted in the laboratory.

Appendix G–II–C–1–q. Vacuum outlets shall be protected by filter and liquid disinfectant traps.

Appendix G–II–C–1–r. Use of hypodermic needle and syringe shall be avoided when alternative methods are available.

Appendix G–II–C–1–s. The laboratory shall be kept neat and clean.

Appendix G–II–C–1–t. If experiments involving other organisms which require lower levels of containment are to be conducted in the same laboratory concurrently with expermiments requiring P3-level physical containment, they shall be conducted in accordance with all P3-level laboratory practices.

Appendix G–II–C–2. *Containment Equipment.*

Appendix G–II–C–2–a. Biological safety cabinets [12] shall be used for all equipment and manipulations that produce aerosols—e.g., pipetting, dilutions, transfer operations, plating, flaming, grinding, blending, drying, sonicating, shaking, centrifuging—where these procedures involve organisms containing recombinant DNA molecules, except where equipment design provides for containment of the potential aerosol.

Appendix G–II–C–2–b. Laboratory animals held in a P3 area shall be housed in partial-containment caging systems, such as Horsfall units [11], open cages placed in ventilated enclosures, solid-wall and -bottom cages covered by filter bonnets, or solid-wall and -bottom cages placed on holding racks equipped with ultraviolet radiation lamps and relectors.

Note.—Conventional caging systems may be used, provided that all personnel wear appropriate personal protective devices. These shall include, at a minimum, wrap-around gowns, head covers, gloves, shoe covers, and respirators. All personnel shall shower on exit from areas where these devices are required.

Appendix G–II–C–2–c. *Alternative Selection of Containment Equipment.* Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified can be conducted in the P3 laboratory using containment equipment specified for the P2 level of physical containment. Experimental procedures involving a host-vector system that provides a one-step lower level of biological containment than that specified can be conducted in the P3 laboratory using containment equipment specified for the P4 level of physical containment. Alternative combinations of containment safeguards are shown in Table I.

TABLE I.—POSSIBLE COMBINATIONS OF CONTAINMENT SAFEGUARDS

Classification of experiment		Alternate combinations of physical and biological containment			
		Physical Containment			
Physical containment	Biological containment [1]	Laboratory design specified for	Laboratory practices specified for	Containment equipment specified for	Biological containment
P3	HV2	P3	P3	P3	HV2
P3	HV2	P3	P3	P4	HV1
P3	HV1	P3	P3	P3	HV1
P3	HV1	P3	P3	P2	HV2

[1] See Appendix I for description of biological containment.

Appendix G–II–C–3. *Special Laboratory Design.*

Appendix G–II–C–3–a. The laboratory shall be separated by a controlled access area from areas that are open to unrestricted traffic flow. A controlled access area is an anteroom, a change room, an air lock or any other double-door arrangement that separates the laboratory from areas open to unrestricted traffic flow.

Appendix G–II–C–3–b. The surfaces of walls, floors, and ceilings shall be readily cleanable. Penetrations through these surfaces shall be sealed or capable of being sealed to facilitate space decontamination.

Appendix G–II–C–3–c. A foot-, elbow-, or automatically-operated handwashing facility shall be provided near each primary laboratory exit area.

Appendix G–II–C–3–d. Windows in the laboratory shall be sealed.

Appendix G–II–C–3–e. An autoclave for sterilization of wastes and contaminated materials shall be available in the same building (and preferably within the controlled laboratory area) in which organisms containing recombinant DNA molecules are used.

Appendix G–II–C–3–f. The laboratory shall have a ventilation system that is capable of controlling air movement. The movement of air shall be from areas of lower contamination potential to areas of higher contamination potential (i.e., from the controlled access area to the laboratory area). If the ventilation system provides positive pressure supply air, the system shall operate in a manner that prevents the reversal of the direction of air movement or shall be equipped with an alarm that would be actuated in the event that reversal in the direction of air movement were to occur. The exhaust air from the laboratory area shall not be recirculated to other areas of the building unless the exhaust air is filtered by HEPA filters or equivalent. The exhaust air from the laboratory area can be discharged to the outdoors without filtration or other means for effectively reducing an accidental aerosol burden provided that it can be dispersed clear of occupied buildings and air intakes.

Appendix G–II–C–3–g. The treated exhaust-air from Class I and Class II biological safety cabinets [12] may be discharged either to the laboratory or to the outdoors. The treated exhaust-air from a Class III cabinet shall be discharged directly to the outdoors. If the treated exhaust-air from these cabinets is to be discharged to the outdoors through a building exhaust air system, it shall be connected to this system so as to avoid any interference with the air balance of the cabinet and the building ventilation system.

Appendix G–II–D. *P4 Level.*

Appendix G–II–D–1. *Laboratory Practices.*

Appendix G–II–D–1–a. Laboratory doors shall be kept closed while experiments are in progress.

Appendix G–II–D–1–b. Work surfaces shall be decontaminated following the completion of the experimental activity and immediately following spills of organisms containing recombinant DNA molecules.

Appendix G–II–D–1–c. All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other

contaminated materials such as glassware, animal cages, laboratory equipment, and radioactive wastes shall be decontaminated by a method demonstrated to be effective before washing, reuse, or disposal.

Appendix G–II–D–1–d. Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

Appendix G–II–D–1–e. Eating, drinking, smoking, and storage of food are not permitted in the P4 facility.

Appendix G–II–D–1–f. Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

Appendix G–II–D–1–g. Care shall be exercised to minimize the creation of aerosols. For example, manipulations such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splatters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

Appendix G–II–D–1–h. Biological materials to be removed from the P4 facility in a viable or intact state shall be transferred to a nonbreakable sealed container, which is then removed from the P4 facility through a passthrough disinfectant dunk tank or fumigation chamber.

Appendix G–II–D–1–i. No materials, except for biological materials that are to remain in a viable or intact state, shall be removed from the P4 facility unless they have been steam-sterilized (autoclaved) or decontaminated by a means demonstrated to be effective as they pass out of the P4 facility. All wastes and other materials as well as equipment not damaged by high temperature or steam shall be steam sterilized in the double-door autoclave of the P4 facility. Other materials which may be damaged by temperature or steam shall be removed from the P4 facility through a passthrough fumigation chamber.

Appendix G–II–D–1–j. Materials within the Class III cabinets shall be removed from the cabinet system only after being steam-sterilized in an attached double-door autoclave or after being contained in a nonbreakable sealed container, which is then passed through a disinfectant dunk tank or a fumigation chamber.

Appendix G–II–D–1–k. Only persons whose entry into the P4 facility is required to meet program or support needs shall be authorized to enter. Before entering, such persons shall be advised of the nature of the research being conducted and shall be instructed as to the appropriate safeguards to ensure their safety. They shall comply with instructions and all other required procedures.

Appendix G–II–D–1–l. Persons under 18 years of age shall not enter the P4 facility.

Appendix G–II–D–1–m. Personnel shall enter into and exit from the P4 facility only through the clothing change and shower rooms. Personnel shall shower at each egress from the P4 facility. Air locks shall not be used for personnel entry or exit except for emergencies.

Appendix G–II–D–1–n. Street clothing shall be removed in the outer side of the clothing-change area and kept there. Complete laboratory clothing, including undergarments, head cover, shoes, and either pants and shirts or jumpsuits, shall be used by all persons who enter the P4 facility. Upon exit, personnel shall store this clothing in lockers provided for this purpose or discard it into collection hampers before entering the shower area.

Appendix G–II–D–1–o. The universal biohazard sign is required on the P4 facility access doors and on all interior doors to individual laboratory rooms where experiments are conducted. The sign shall also be posted on freezers, refrigerators, or other units used to store organisms containing recombinant DNA molecules.

Appendix G–II–D–1–p. An insect and rodent control program shall be instituted.

Appendix G–II–D–1–q. Animals and plants not related to the experiment shall not be permitted in the laboratory in which the experiment is being conducted.

Appendix G–II–D–1–r. Vacuum outlets shall be protected by filter and liquid disinfectant traps.

Appendix G–II–D–1–s. Use of the hypodermic needle and syringe shall be avoided when alternate methods are available.

Appendix G–II–D–1–t. The laboratory shall be kept neat and clean.

Appendix G–II–D–1–u. If experiments involving other organisms which require lower levels of containment are to be conducted in the P4 facility concurrently with experiments requiring P4-level containment, they shall be conducted in accordance with all P4-level laboratory practices specified in this section.

Appendix G–II–D–2. *Containment Equipment.*

Appendix G–II–D–2–a. Experimental procedures involving organisms that require P4-level physical containment shall be conducted either in: (i) A Class III cabinet system or in (ii) Class I or Class II cabinets that are located in a specially designed area in which all personnel are required to wear one-piece positive-pressure isolation suits.

Appendix G–II–D–2–b. Laboratory animals involved in experiments requiring P4-level physical containment shall be housed either in cages contained in Class III cabinets or in partial containment caging systems (such as Horsfall units [11], open cages placed in ventilated enclosures, or solid-wall and -bottom cages covered by filter bonnets, or solid-wall and -bottom cages placed on holding racks equipped with ultraviolet irradiation lamps and reflectors) that are located in a specially designed area in which all personnel are required to wear one-piece positive-pressure suits.

Appendix G–II–D–2–c. *Alternative Selection of Containment Equipment.* Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified can be conducted in the P4 facility using containment equipment requirements specified for the P3 level of physical containment. Alternative combinations of containment safeguards are shown in Table II.

TABLE II.—POSSIBLE COMBINATIONS OF CONTAINMENT SAFEGUARDS

Classification of experiment		Alternate combinations of physical and biological containment			
		Physical containment			
Physical containment	Biological [1] containment	Laboratory design specified for	Laboratory practices specified for	Containment equipment specified for	Biological containment
P4	HV1	P4	P4	P4	HV1
P4	HV1	P4	P4 [2]	P3	HV2

[1] see Appendix I for description of biological containment.
[2] In this case gloves shall be worn, in addition to the clothing requirements specified in Appendix G–11–D–1–n.

Appendix G–II–D–3. *Special Laboratory Design.*

Appendix G–II–D–3–a. The laboratory shall be located in a restricted-access facility which is either a separate building or a clearly demarcated and isolated zone within a building. Clothing-change areas and shower rooms shall be provided for personnel entry and egress. These rooms shall be

arranged so that personnel leave through the shower area to the change room. A double-door ventilated vestibule or ultraviolet air lock shall be provided for passage of materials, supplies, and equipment which are not brought into the P4 facility through the change room area.

Appendix G–II–D–3–b. Walls, floors, and ceilings of the P4 facility are constructed to form an internal shell which readily allows vapor-phase decontamination and is animal- and insect-proof. All penetrations through these structures and surfaces are sealed. (The integrity of the walls, floors, ceilings, and penetration seals should ensure adequate contaiment of a vapor-phase decontiminant under static pressure conditions. This requirement does not imply that these surfaces must be airtight.)

Appendix G–II–D–3–c. A foot-, elbow-, or automatically-operated handwashing facility shall be provided near the door within each laboratory in which experiments involving recombinant DNA are conducted in openface biological safety cabinets.

Appendix G–II–D–3–d. Central vacuum systems are permitted. The system, if provided, shall not serve areas outside the P4 facility. The vacuum system shall include in-line HEPA filters near each use point or service cock. The filters shall be installed so as to permit in-place decontamination and replaceement. Water supply, liquid and gaseous services provided to the P4 facility shall be protected by devices that prevent backflow.

Appendix G–II–D–3–e. Drinking water fountains shall not be installed in laboratory or animal rooms of the P4 facility. Foot-operated water fountains are permitted in the corridors of the P4 facility. The water service provided to such fountains shall be protected from the water services to the laboratory areas of the P4 facility.

Appendix G–II–D–3–f. Laboratory doors shall be self-closing.

Appendix G–II–D–3–g. A double-door autoclave shall be provided for sterilization of material passing out of the P4 facility. The autoclave doors shall be interlocked so that both doors will not be open at the same time.

Appendix G–II–D–3–h. A pass-through dunk tank or fumigation chamber shall be provided for removal from the P4 facility of material and equipment that cannot be heat-sterilized.

Appendix G–II–D–3–i. All liquiid effluents from the P4 facility shall be collected and decontaminated before disposal. Liquid effluents from biological safety cabinets and laboratory sinks shall be sterilized by heat. Liquid effluents from the shower and hand washing facilities may be activated by chemical treatment. HEPA filters shall be installed in all vents from effluent drains.

Appendix G–II–D–3–j. An individual supply and exhaust-air ventilation system shall be provided. The system shall maintain pressure differentials and directional air flow as required to endure inflow from areas outside the facility toward areas of highest potential risk within the facility. The system shall be designed to prevent the reversal of air flow. The system shall sound an alarm in the event of system malfunction.

Appendix G–II–D–3–k. Air within individual laboratories of the P4 facility may be recirculated if HEPA filtered.

Appendix G–II–D–3–l. The exhaust air from the P4 facility shall be HEPA filtered and discharged to the outdoors so that it is dispersed clear of occupied buildings and air intakes. The filter chambers shall be designed to allow *in situ* decontamination before removal and to facilitate certification testing after replacement.

Appendix G–II–D–3–m. The treated exhaust-air from Class I and Class II biological safety cabinets [12] may be discharged directly to the laboratory room environment or to the outdoors. The treated exhaust-air from Class III cabinets shall be discharged to the outdoors. If the treated exhaust-air from these cabinets is to be discharged to the outdoors thourgh the P4 facility exhaust air system, it shall be connected to this system so as to avoid any interference with the air balance of the cabinets or the facility exhaust air system.

Appendix G–II–D–3–n. As noted in Appendix G–II–D–2–a, the P4 facility may contain specially designed areas in which all personnel are required to wear one-piece positive-pressure isolation suits. Such areas shall be airtight. The exhaust-air from the suit area shall be filtered by two sets of HEPA filters installed in series, and a duplicate filtration unit and exhaust fan shall be provided. The air pressure within the suit area shall be less than that on any adjacent area. An emergency lighting system, communication systems and power source shall be provided. A double-door autoclave shall be provided for sterilization of all waste materials to be removed from the suit area.

Personnel who enter this area shall wear a one-piece positive-pressure suit that is ventilated by a life-support system. The life-support system shall be provided with alarms and emergency backup air. Entry to this area is through an airlock fitted with airtight doors. A chemical shower area shall be provide to decontaminate the surfaces of the suit before removal.

12. Biological safety cabinets referred to in this section are classified as *Class I, Class II* or *Class III* cabinets. A *Class I* is a ventilated cabinet for personnel protection having an inward flow of air away from the operator. The exhaust air from this cabinet is filtered through a high-efficiency particulate air (HEPA) filter. This cabinet is used in three operational modes: (1) With a full-width open front, (2) with an installed front closure panel (having four 8-inch diameter openings) without gloves, and (3) with an installed front closure panel equipped with arm-length rubber gloves. The face velocity of the inward flow of air through the full-width open front is 75 feet per minute or greater.

A *Class II* cabinet is a ventilated cabinet for personnel and product protection having

an open front with inward air flow for personnel protection, and HEPA filtered mass recirculation air flow for product protection. The cabinet exhaust air is filtered through a HEPA filter. The face velocity of the inward flow of air through the full-width open front is 75 feet per minute or greater. Design and peformance specifications for *Class II* cabinets have been adopted by the National Sanitation Foundation, Ann Arbor, Michigan. A *Class III* cabinet is a closed-front ventilated cabinet of gas-tight construction which provides the highest level of personnel protection of all biohazard safety cabinets. The interior of the cabinet is protected from contaminants exterior to the cabinet. The cabinet is fitted with arm-length rubber gloves and is operated under a negative pressure of at least 0.5 inches water gauge. All supply air is filtered through HEPA filters. Exhaust air is filtered through two HEPA filters or one HEPA filter and incinerator before being discharged to the outside environment.

Appendix H—Shipment

Recombinant DNA molecules contained in an organism or virus shall be shipped only as an etiologic agent under requirements of the U.S. Public Health Service, and the U.S. Department of Transportation (Section 72.3, Part 72, Title 42, and Sections 173.386–.388, Part 173, Title 49, United States Code of Federal Regulations (CFR)) as specified below:

Appendix H–I. Recombinant DNA molecules contained in an organism or virus requiring P1, P2, or P3 physical containment, when offered for transportation or transported, are subject to all requirements of Section 72.3(a)–(3), Part 72, Title 42 CFR, and Sections 173.386–.388, Part 173, Title 49 CFR.

Appendix H–II. Recombinant DNA molecules contained in an organism or virus requiring P4 physical containment, when offered for transportation or transported, are subject to the requirements listed above under Appendix H–I and are also subject to Section 72.3(f), Part 72, Title 42 CFR.

Appendix H–III. Information on packaging and labeling of etiologic agents is shown in Figures 1, 2, and 3. Additional information on packaging and shipment is given in the "Laboratory Safety Monograph—A Supplement to the NIH Guidelines for Recombinant DNA Research," available from ORDA.

Appendix I—Biological Containment

Appendix I–I. *Levels of Biological Containment.* In consideration of biological containment, the vector (plasmid, organelle, or virus) for the recombinant DNA and the host (bacterial, plant, or animal cell) in which the vector is propagated in the laboratory will be considered together. Any combination of vector and host which is to provide biological containment must be chosen or constructed so that the following types of "escape" are minimized: (i) Survival of the vector in its host outside the laboratory and (ii) transmission of the vector from the propagation host to other nonlaboratory hosts.

The following levels of biological containment (HV, or Host-Vector, systems) for prokaryotes will be established; specific criteria will depend on the organisms to be used.

Appendix I–I–A. *HV1.* A host-vector system which provides a moderate level of containment. *Specific systems:*

Appendix I–I–A–1. *EK1.* The host is always *E. coli* K–12 or a derivative thereof, and the vectors include nonconjugative plasmids (e.g., pSC101, ColE1, or derivatives thereof [1–7]) and variants of bacteriophage, such as lambda [8–15]. The *E. coli* K–12 hosts shall not contain conjugation-proficient plasmids, whether autonomous or integrated, or generalized transducing phages.

Appendix I–I–A–2. *Other HV1.* Hosts and vectors shall be, at a minimum, comparable in containment to *E. coli* K–12 with a non conjugative plasmid or bacteriophage vector. The data to be considered and a mechanism for approval of such HV1 systems are described below (Appendix I–II).

Appendix I–I–B. *HV2.* These are host-vector systems shown to provide a high level of biological containment as demonstrated by data from suitable tests performed in the laboratory. Escape of the recombinant DNA either via survival of the organisms or via transmission of recombinant DNA to other organisms should be less than $1/10^8$ under specified conditions. *Specific systems:*

Appendix I–I–B–1. For EK2 host-vector systems in which the vector is a plasmid, no more than one in 10^8 host cells should be able to perpetuate a cloned DNA fragment under the specified nonpermissive laboratory conditions designed to represent the natural environment, either by survival of the original host or as a consequences of transmission of the cloned DNA fragment.

Apendix I–I–B–2. For EK2 host-vector systems in which the vector is a phage, no more than one in 10^8 phage particles should be able to perpetuate a cloned DNA fragment under the specified nonpermissive laboratory conditions designed to represent the natural environment either: (i) As a prophage (in the inserted or plasmid form) in the laboratory host used for phage propagation or (ii) by surviving in natural environments and transferring a cloned DNA fragment to other hosts (or their resident prophages).

Appendix I–II. *Certification of Host-Vector Systems.*

Appendix I–II–A. *Responsibility.* HV1 systems other than *E. coli* K–12, and HV2 host-vector systems, may not be designated as such until they have been certified by the Director, NIH. Application for certification of a host-vector system is made by written application to the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

Host-vector systems that are proposed for certification will be reviewed by the National Institutes of Health (NIH) Recombinant DNA Advisory Committee (RAC). (See Section IV–C–l–b–(1)–(e).) This will first involve review of the data on construction, properties, and testing of the proposed host-vector system by a Working Group composed of one or more members of the RAC and other persons chosen because of their expertise in evaluating such data. The Committee will then evaluate the report of the Working Group and any other available information at a regular meeting. The Director, NIH, is responsible for certification after receiving the advice of the RAC. Minor modifications of existing certified host-vector systems, where the modifications are of minimal or no consequence to the properties relevant to containment may be certified by the Director, NIH, without review by the RAC. (See Section IV–C–l–b–(3)–(c).)

When new host-vector systems are certified, notice of the certification will be sent by the Office of Recombinant DNA Activities (ORDA) to the applicant and to all Institutional Biosafety Committees (IBCs) and will be published in the *Recombinant DNA Technical Bulletin.* Copies of a list of all currently certified host-vector systems may be obtained from ORDA at any time.

The Director, NIH, may at any time rescind the certification of any host-vector systems. (See Section IV–C–l–b–(3)–(d).) If certification of a host-vector system is rescinded, NIH will instruct investigators to transfer cloned DNA into a different system, or use the clones at a higher physical containment level unless NIH determines that the already constructed clones incorporate adequate biological containment.

Certification of a given system does not extend to modifications of either the host or vector component of that system. Such modified systems must be independently certified by the Director, NIH. If modifications are minor, it may only be necessary for the investigator to submit data showing that the modifications have either improved or not impaired the major phenotypic traits on which the containment of the system depends. Substantial modifications of a certified system require the submission of complete testing data.

Appendix I–II–B. *Data To Be Submitted for Certification.*

Appendix I–II–B–1. *HV1 Systems Other than E. coli K–12.* The following types of data shall be submitted, modified as appropriate for the particular system under consideration: (i) A description of the organism and vector; the strain's natural habitat and growth requirements; its physiological properties, particularly those related to its reproduction and survival and the mechanisms by which it exchanges genetic information; the range of organisms with which this organism normally exchanges genetic information and what sort of information is exchanged; and any relevant information on its pathogenicity or toxicity; (ii) A description of the history of the particular strains and vectors to be used, including data on any mutations which render this organism less able to survive or transmit genetic information; (iii) A general description of the range of experiments contemplated, with emphasis on the need for developing such an HV1 system.

Appendix I–II–B–2. *HV2 Systms.* Investigators planning to request HV2 certification for host-vector systems can obtain instructions from ORDA concerning data to be submitted [14–15]. In general, the following types of data are required: (i) Description of construction steps, with indication of source, properties, and manner of introduction of genetic traits; (ii) Quantitative data on the stability of genetic traits that contribute to the containment of the system; (iii) Data on the survival of the host-vector system under nonpermissive laboratory conditions designed to represent the relevant natural environment; (iv) Data on transmissibility of the vector and/or a cloned DNA fragment under both permissive and nonpermissive conditions; (v) Data on all other

properties of the system which affect containment and utility, including information on yields of phage or plasmid molecules, ease of DNA isolation, and ease of transfection or transformation. (vi) In some cases, the investigator may be asked to submit data on survival and vector transmissibility from experiments in which the host-vector is fed to laboratory animals and human subjects. Such *in vivo* data may be required to confirm the validity of predicting *in vivo* survival on the basis of *in vitro* experiments.

Data must be submitted in writing to ORDA. Ten to twelve weeks are normally required for review and circulation of the data prior to the meeting at which such data can be considered by the RAC. Investigators are encouraged to publish their data on the construction, properties, and testing of proposed HV2 systems prior to consideration of the system by the RAC and its subcommittee. More specific instructions concerning the type of data to be submitted to NIH for proposed EK2 systems involving either plasmids or bacteriophage in *E. coli* K–12 are available from ORDA.

Appendix J—Federal Interagency Advisory Committee on Recombinant DNA Research

Appendix J–I. *Federal Interagency Advisory Committee.* The Federal Interagency Advisory Committee on Recombinant DNA Research advises the Secretary of the Department of Health and Human Services, the Assistant Secretary for Health, and the Director, National Institutes of Health, on the coordination of those aspects of all Federal programs and activities relating to recombinant DNA research. The Committee provides for communication and exchange of information necessary to maintain adequate coordination of such programs and activities. The Committee is responsible for facilitating compliance with a uniform form set of guidelines in the conduct of this research in the public and private sectors and, where warranted, to suggest administrative or legislative proposals.

The Director of the NIH, or his designee, serves as Chairman, and the Committee includes representation from all Departments and Agencies whose programs involve health functions or responsibilities as determined by the Secretary.

Departments and Agencies which have representation on this Committee, as of December 1980, are

Department of Agriculture
Department of Commerce
Department of Defense
Department of Energy
Environmental Protection Agency
Executive Office of the President
Department of Health and Human Services.
  Office of the Assistant Secretary for Health, Centers for Disease Control, Food and Drug Administration, National Institutes of Health
Department of the Interior
Department of Justice
Department of Labor
National Aeronautics and Space Administration
National Science Foundation
Nuclear Regulatory Commission
Department of State
Department of Transportation
Arms Control and Disarmament Agency
Veterans Administration

At the second meeting of the Committee on November 23, 1976, all of the Federal agencies endorsed the NIH Guidelines, and Departments which support or conduct recombinant DNA research agreed to abide by the NIH Guidelines [1].

Appendix J–II. *Footnote of Appendix J.*

1. Minutes of the first eight meetings of the Federal Interagency Advisory Committee on Recombinant DNA Research are reproduced in *Recombinant DNA Research, Volume 2. Documents Relating to "NIH Guidelines for Research Involving Recombinant DNA Molecules," June 1976–November 1977.*

Appendix K—Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containing recombinant DNA molecules. It shall apply to large-scale research or production activities as specified in Section III–B–5 of the NIH Guidelines.

All provisions of the NIH Guidelines shall apply to large-scale research or production activities with the following modifications:

- Appendix K shall replace Appendix G when quantities in excess of 10 liters of culture are involved in research or production.
- The institution shall appoint a biological safety officer if it engages in large-scale research or production activities involving viable organisms containing recombinant DNA molecules. The duties of the biological safety officer shall include those specified in Section IV–B–4 of the Guidelines.
- The institution shall establish and maintain a health surveillance program for personnel engaged in large-scale research or production activities involving viable organisms containing recombinant DNA molecules which require P3 containment at the laboratory

scale. The program shall include: preassignment and periodic physical and medical examinations; collection, maintenance and analysis of serum specimens for monitoring serologic changes that may result from the employee's work experience; and provisions for the investigation of any serious, unusual or extended illnesses of employees to determine possible occupational origin.

Appendix K–I. *Selection of Physical Containment Levels.* The selection of the physical containment level required for recombinant DNA research or production involving more than 10 liters of culture is based on the containment guidelines established in Part III of the Guidelines. For purposes of large-scale research or production, three physical containment levels are established. These are referred to as P1–LS, P2–LS, and P3–LS. The P1–LS level of physical containment is required for large-scale research or production of viable organisms containing recombinant DNA molecules which require P1 containment at the laboratory scale. The P2–LS level of physical containment is required for large-scale research or production of viable organisms containing recombinant DNA molecules which require P2 containment at the laboratory scale. The P3–LS level of physical containment is required for large-scale research of production of viable organisms containing recombinant DNA molecules which require P3 containment at the laboratory scale. No provisions are made for large-scale research or production of viable organisms containing recombinant DNA molecules which require P4 containment at the laboratory scale. If necessary, these requirements will be established by NIH on an individual basis.

Appendix K–II. *PL–LS Level.*

Appendix K–II–A. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propagation and growth of cultures) or other primary containment equipment (e.g., biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to reduce the potential for escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G–II–A of the Guidelines are met.

Appendix K–II–B. Culture fluids (except as allowed in Appendix K–B–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organism that will serve as the host for progagating the recombinant DNA molecules.

Appendix K–II–C. Sample collection from a closed system, the addition of materials to a closed system and the transfer of culture fluids from one closed system to another shall be done in a manner which minimizes the release of aerosols or contamination of exposed surfaces.

Appendix K–II–D. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiencies equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–II–E. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–II–F. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–III. *P2–LS Level.*

Appendix K–III–A. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G–II–B of the Guidelines are met.

Appendix K–III–B. Culture fluids (except as allowed in Appendix K–C–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–III–C. Sample collection from a closed system, the addition of materials to a closed system, and the transfer of cultures fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Appendix K–III–D. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiencies equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–III–E. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–III–F. Rotating seals and other mechanical devices directly associated with a closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be designed to prevent leakage or shall be fully enclosed in ventilated housings that are exhausted through filters which have efficiencies equivalent to HEPA filters or through other equivalent treatment devices.

Appendix K–III–G. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules and other primary containment equipment used to contain operations involving viable organisms containing recombinant DNA molecules shall include monitoring or sensing devices that monitor the integrity of containment during operations.

Appendix K–III–H. A closed system used for the propagation and growth of viable organisms containing the recombinant DNA molecules shall be tested for integrity of the containment features using the organism that will serve as the host for propagating recombinant DNA molecules. Testing shall be accomplished prior to the introduction of viable organisms containing recombinant DNA molecules, and following modification or replacement of essential containment

features. Procedures and methods used in the testing shall be appropriate for the equipment design and for recovery and demonstration of the test organism. Records of tests and results shall be maintained on file.

Appendix K–III–I. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be permanently identified. This identification shall be used in all records reflecting testing, operation, and maintenance and in all documentation relating to use of this equipment for research or production activities involving viable organisms containing recombinant DNA molecules.

Appendix K–III–J. The universal biohazard sign shall be posted on each closed system and primary containment equipment when used to contain viable organisms containing recombinant DNA molecules.

Appendix K–III–K. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–IV. *P3–LS Level.*

Appendix K–IV–A. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessels used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system provided all physical containment requirements specified in Appendix G–II–C of the Guidelines are met.

Appendix K–IV–B. Culture fluids (except as allowed in Appendix K–D–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organisms that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–IV–C. Sample collection from a closed system, the addition of materials to a closed system, and the transfer of culture fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Appendix K–IV–D. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiencies equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–IV–E. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organisms that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–IV–F. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at a pressure as low as possible, consistent with equipment design, in order to maintain the intergrity of containment features.

Appendix K–IV–G. Rotating seals and other mechanical devices directly associated with a closed system used to contain viable organisms containing recombinant DNA molecules shall be designed to prevent leakage or shall be fully enclosed in ventilated housings that are exhausted through filters which have efficiencies equivalent to HEPA filters or through other equivalent treatment devices.

Appendix K–IV–H. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules and other primary containment equipment used to contain operations involving viable organisms containing recombinant DNA molecules shall include monitoring or sensing devices that monitor the integrity of containment during operations.

Appendix K–IV–I. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be tested for integrity of the containment features using the organisms that will serve as the host for propagating the recombinant DNA molecules. Testing shall be accomplished prior to the introduction of viable organisms containing recombinant DNA molecules, and following modification or replacement of essential containment features. Procedures and methods used in the testing shall be appropriate for the equipment design and for recovery and demonstration of the test organism. Records of tests and results shall be maintained on file.

Appendix K–IV–J. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be permanently identified: This identification shall be used in all records reflecting testing, operation and maintenance and in all documentation relating to the use of this equipment for research production activities involving viable organisms containing recombinant DNA molecules.

Appendix K–IV–K. The universal biohazard sign shall be posted on each closed system and primary containment equipment when used to contain viable organisms containing recombinant DNA molecules.

Appendix K–IV–L. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–IV–M. Closed systems and other primary containment equipment used in handling cultures of viable organisms containing recombinant DNA molecules shall be located within a controlled area which meets the following requirements:

Appendix K–IV–M–1. The controlled area shall have a separate entry area. The entry area shall be a double-doored space such as an air lock, anteroom or change room that separates the controlled area from the balance of the facility.

Appendix K–IV–M–2. The surfaces of walls, ceilings, and floors in the controlled area shall be such as to premit ready cleaning and decontamination.

Appendix K–IV–M–3. Penetrations into the controlled area shall be sealed to permit liquid or vapor phase space decontamination.

Appendix K–IV–M–4. All utilities and service or process piping and wiring entering the controlled area shall be protected against contamination.

Appendix K–IV–M–5. Handwashing facilities equipped with foot, elbow, or automatically operated values shall be located at each major work area and near each primary exit.

Appendix K–IV–M–6. A shower facility shall be provided. This facility shall be located in close proximity to the controlled area.

Appendix K–IV–M–7. The controlled area shall be designed to preclude release or culture fluids outside the controlled area in the event of an accidental spill or release from the closed systems or other primary containment equipment.

Appendix K–IV–M–8. The controlled area shall have a ventilation system that is capable of controlling air movement. The movement of air shall be from areas of lower contamination potential to areas of higher contamination potential. If the ventilation system provides positive pressure supply air, the system shall operate in a manner that prevents the reversal of the direction of air movement or shall be equipped with an alarm that would be actuated in the event that reversal in the direction of air movement were to occur. The exhaust air from the controlled area shall not be recirculated to other areas of the facility. The exhaust air from the controlled area may be discharged to the outdoors without filtration or other means for effectively reducing an accidental aerosol burden provided that it can be dispersed clear of occupied buildings and air intakes.

Appendix K–IV–N. The following personnel and operational practices shall be required.

Appendix K–IV–N–1. Personnel entry into the controlled area shall be through the entry area specified in Appendix K–D–13–a.

Appendix K–IV–N–2. Persons entering the controlled area shall exchange or cover their personal clothing with work garments such as jumpsuits, laboratory coats, pants and shirts, head cover, and shoes or shoe covers. On exit from the controlled area the work clothing may be stored in a locker separate from that used for personal clothing or discarded for laundering. Clothing shall be decontaminated before laundering.

Appendix K–IV–N–3. Entry into the controlled area during periods when work is in progress shall be restricted to those persons required to meet program or support needs. Prior to entry all persons shall be informed of the operating practices, emergency procedures, and the nature of the work conducted.

Appendix K–IV–N–4. Persons under 18 years of age shall not be permitted to enter the controlled area.

Appendix K–IV–N–5. The universal biohazard sign shall be posted on entry doors to the controlled area and all internal doors when any work involving the organism is in progress. This includes periods when decontamination procedures are in progress. The sign posted on the entry doors to the controlled area shall include a statement of agents in use and personnel authorized to enter the controlled area.

Appendix K–IV–N–6. The controlled area shall be kept neat and clean.

Appendix K–IV–N–7. Eating, drinking, smoking, and storage of food are prohibited in the controlled area.

Appendix K–IV–N–8. Animals and plants shall be excluded from the controlled area.

Appendix K–IV–N–9. An effective insect and rodent control program shall be maintained.

Appendix K–IV–N–10. Access door to the controlled area shall be kept closed, except as necessary for access, while work is in progress. Serve doors leading directly outdoors shall be sealed and locked while work is in progress.

Appendix K–IV–N–11. Persons shall wash their hands when leaving the controlled area.

Appendix K–IV–N–12. Persons working in the controlled area shall be trained in emergency procedures.

Appendix K–IV–N–13. Equipment and materials required for the management of accidents involving viable organisms containing recombinant DNA molecules shall be available in the controlled area.

Appendix K–IV–N–14. The controlled area shall be decontaminated in accordance with established procedures following spills or other accidental release of viable organisms containing recombinant DNA molecules.

Appendix L—Release Into the Environment of Certain Plants

Appendix L–1. *General Information.* Appendix L specifies conditions under which certain plants, as specified below, may be approved for release into the environment. Experiments in this category cannot be initiated without submission of relevant information on the proposed experiment to NIH, review by the RAC Plant Working Group, and specific approval by NIH. Such experiments also require the approval of the IBC before initiation. Information on specific experiments which have been approved will be available in ORDA and will be listed in Appendix L–III when the Guidelines are republished.

Experiments which do not meet the specifications of Appendix L–II fall under Section III–A and require RAC review and NIH and IBC approval before initiation.

Appendix L–II. *Criteria Allowing Review by the RAC Plant Working Group Without the Requirement for Full RAC Review.* Approval may be granted by ORDA in consultation with the RAC Plant Working Group without the requirement for full RAC review (IBC review is also necessary) for growing plants containing recombinant DNA in the field under the following conditions:

Appendix L–II–A. The plant species is a cultivated crop of a genus that has no species known to be a noxious weed.

Appendix L–II–B. The introduced DNA consists of well-characterized genes containing no sequences harmful to humans, animals, or plants.

Appendix L–II–C. The vector consists of DNA: (i) From exempt host-vector systems (Appendix C); (ii) from plants of the same or closely related species; (iii) from nonpathogenic prokaryotes or nonpathogenic lower eukaryotic plants; (iv) from plant pathogens only if sequences causing disease have been deleted; or (v) chimeric vectors constructed from sequences defined in (i) to (iv) above. The DNA may be introduced by any suitable method.

Appendix L–II–D. Plants are grown in controlled access fields under specified conditions appropriate for the plant under study and the geographical location. Such conditions should include provisions for using good cultural and pest control practices, for physical isolation from plants of the same species outside of the experimental plot in accordance with pollination characteristics of the species, and for further preventing plants containing recombinant DNA from becoming established in the environment. Review by the IBC should include an appraisal by scientists knowledgeable of the crop, its production practices, and the local geographical conditions. Procedures for assessing alterations in and the spread of organisms containing recombinant DNA must be developed. The results of the outlined tests must be submitted for review by the IBC. Copies must also be submitted to the Plant Working Group of the RAC.

Appendix L–III. *Specific Approvals.*

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance.* Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information

address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: May 19, 1983.

Richard M. Krause, M.D.,

Director, National Institute of Allergy and Infectious Diseases, National Institutes of Health.

Department of Education

Family Contribution Schedule for the Guaranteed Student Loan Program for 1984–85

DEPARTMENT OF EDUCATION

34 CFR Part 682

Family Contribution Schedule for the Guaranteed Student Loan Program for 1984–85

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues final regulations for use in determining student eligibility for interest benefits under the Guaranteed Student Loan (GSL) Program. This family contribution schedule will apply to loans for any period of instruction which begins on or after July 1, 1984, but not later than June 30, 1985. Further, the Secretary revises the definitions of "Estimated cost of attendance" and "Estimated financial assistance" to reflect statutory changes in those definitions which were made by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35).

EFFECTIVE DATES: The revised definitions of "Estimated cost of attendance" and "Estimated financial assistance" (§ 682.200) and the addition of a new paragraph (d) to § 682.605 are expected to take effect 45 days after publication in the **Federal Register**. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

Pursuant to section 482 of the Higher Education Act of 1965, the remaining provisions of these regulations which establish the GSL Family Contribution Schedule for 1984–85 are expected to take effect on July 1, 1984 and will apply to any loan for a period of instruction which begins on or after July 1, 1984, but not later than June 30, 1985, regardless of the time when the determination of the student's need for a subsidized loan is made.

FOR FURTHER INFORMATION CONTACT: Ralph Madden, Program Specialist, or Larry Oxendine, Policy Section Chief, Guaranteed Student Loan Branch, Division of Policy and Program Development, Department of Education, 400 Maryland Avenue, SW., Washington, D.C. 20202, telephone number (202) 245–2475.

SUPPLEMENTARY INFORMATION:

Background

On April 1, 1983, the Secretary published in the **Federal Register** a Notice of Proposed Rulemaking (48 FR 14344) which proposed adopting the 1983–84 Family Contribution Schedule (48 FR 14316) as the basis for the 1984–85 Family Contribution Schedule (FCS), with certain modifications. Accordingly, this schedule continues the use of systems of financial need analysis approved by the Secretary for use in the National Direct Student Loan (NDSL), College Work-Study (CWS), and Supplemental Educational Opportunity Grant (SEOG) Programs (the campus-based programs) and a revised set of tables in Appendix B of 34 CFR Part 682.

Summary of Changes

(1) Section 532(a) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) amended the definitions of "Estimated cost of attendance" and "Estimated financial assistance" found in section 428(a)(2) of the Higher Education Act of 1965 (20 U.S.C. 1078(a)(2)). The Secretary is amending these definitions in 34 CFR 682.200 to reflect the changes made by Pub. L. 97–35. Since these changes conform the definition to the statute, the Secretary has determined that public comment on the amended definitions is unnecessary under 5 U.S.C. 553(b)(3)(B).

(2) Section 682.605 of the GSL regulations requires that the school accurately and completely fill out its portion of the student's loan application. The information requested from the school pertains to the student's eligibility for a loan in accordance with § 682.201, the student's estimated cost of attendance, and the student's estimated financial assistance. The Secretary is amending § 682.605 by adding a new paragraph (d). This paragraph does not make a substantive change in the regulations but clarifies the obligations of schools under § 682.301. Paragraph (d) requires the school to complete information on the school portion of the student's loan application with regard to the determination of the student's eligibility for interest benefits found in § 682.301.

(3) This schedule requires, in § 682.301(c), the school, in determining the adjusted gross family income, to consider the income reported by each family member on the 1983 Federal income tax return. Section 682.301(c)(1) is revised to clarify that "adjusted gross income" means that term as defined in section 62 of the Internal Revenue Code. Further, references to the years 1982 and 1983 in §§ 682.301(c)(2)(iii) and 682.301(c)(4) are revised to refer to the years 1983 and 1984, respectively.

(4) In § 682.301(d), the definition of "independent student" has been deleted and a reference to section 1a of 34 CFR Part 668, Student Assistance General Provisions regulations, has been inserted. On May 23, 1983, proposed regulations were published in the **Federal Register** (48 FR 23150) which would revise the current definition of "independent student" for all title IV student assistance programs. For the 1983–84 academic year, the definition of "independent student" applies to all title IV student assistance programs and is currently found in the applicable regulations of each title IV program. Regardless of the content of the final regulations which result from the proposed change in the definition, the Secretary intends to revise 34 CFR Part 668 to include the definition of "independent student" for the 1984-85 and subsequent academic years.

(5) Section 682.301(e)(1) is amended to reference the definition of "Estimated cost of attendance" and "Estimated financial assistance" found in § 682.200 and to specify that "Expected family contribution" means the amount determined in accordance with § 682.301(f) of the GSL regulations.

(6) Although the Secretary expects to issue separate regulations regarding the verification of information provided by the student and the student's family, § 682.301(e) has been amended to add a new paragraph (e)(3). This paragraph specifies that the Secretary may require that family members whose incomes are used to determine the "adjusted gross family income" in § 682.301(c) and the "effective annual income" in Appendix B provide copies of the applicable Federal income tax return and other pertinent documents to the school.

(7) Section 682.301(f) is revised to specify that this schedule applies to loans for periods of instruction beginning on or after July 1, 1984, but not later than June 30, 1985.

(8) Sections 682.301(f)(1) and (2) are revised to require the educational institution, in determining which of the approved need analysis systems may be used to calculate the student's expected family contribution, to consider whether the student has received financial assistance under the campus-based programs for the 1984–85 award year.

(9) The tables found in Appendix B have been revised so that the maximum "Effective annual income" on the four tables is reduced from $75,000 to $65,000. Section 682.301(f)(2)(ii) has been revised to reflect this change, so that the educational institution is required to calculate under any need analysis system approved by the Secretary for use in the SEOG, CWS or NDSL programs the expected family contribution of a student whose effective annual income exceeds $65,000.

(10) The expected family contribution amounts in Tables A, B, C, and D of Appendix B have been revised to reflect

the 1983 Federal income tax and F.I.C.A. (Social Security) deductions and the Standard Maintenance Allowance (SMA), derived from the most recent Bureau of Labor Statistics low budget standard, has been updated for inflation.

(11) In previous family contribution schedules, the tables in Appendix B have been based solely on the adjusted gross income(s) of the student and his or her family. The tables for 1984–85 have been revised to include nontaxable income, such as investment income on nontaxable bonds, as well as child-support payments and welfare payments, in addition to the adjusted gross income. This "effective annual income" will form the base for calculating the expected family contributions found in Appendix B.

Public Comment

On April 1, 1983 a Notice of Proposed Rulemaking (NPRM) was published in the **Federal Register** (48 FR 14344) inviting comments on the proposed 1984–85 Family Contribution Schedule.

Fifty-one commenters, representing schools, lenders, guarantee agencies and professional groups responded to the April 1, 1983 NPRM. A summary of the comments and the Secretary's responses to them are included in the preamble. In establishing these regulations the Secretary has carefully considered all options and recommendations offered by the public.

Summary of Comments and Responses

Comment. Some commenters supported the Administration's recent proposal, introduced in the House of Representatives as H.R. 2231, to require all students, regardless of income, to prove need for a loan in order to qualify for the Federal interest benefits. However, many questioned how the need analysis would be applied and what effect would it have on the expected family contribution.

Response. If the Adminstration's proposal to require need analysis of all GSL applicants is enacted, the following changes may be required:

- Section 682.301(a)(1) would be revised to indicate that any student qualifies for interest benefits if the institution determines that the student demonstrates financial need for the loan.
- Reference to the $30,000 adjusted gross family income in section 682.301(e)(4) would be deleted.
- Reference to the $30,000 adjusted gross family income in section 682.301(d)(1) would be deleted.
- The following tables show expected family contribution for effective annual incomes from $0–$30,000. If the Administration's proposal to require need analysis of all GSL applicants is enacted, these tables could be used to calculate an expected family contribution for students whose adjusted gross incomes are $30,000 or less. These tables are provided *For Information Only.*

FOR INFORMATION ONLY DO NOT USE

BILLING CODE 4000-01-C

Comment. Several commenters recommended the continued use of the GSL tables as an approved need analysis system for the GSL Program. The most frequently cited reasons for the recommendation were simplicity and timeliness.

Response. No change has been made. Based upon the public comment the Secretary has decided to continue use of the GSL tables (Appendix B) as an approved need analysis system for the GSL Program.

Comment. Several commenters objected to the proposal to include a contribution from assets in the determination of the EFC under the GSL tables, citing increased burden on schools as their primary objection.

Response. The proposed change has not been made. Assets will *not* be considered when using the GSL tables to determine the EFC. However, to limit the use of the tables to families less likely to have a substantial amount of assets, the maximum income level of the tables has been reduced from $75,000 to $65,000. The EFC of students from families with an effective annual income greater than $65,000 must be calculated under a system of need analysis approved by the Secretary for use in the campus-based programs. All approved systems for the campus-based programs consider assets in calculating the EFC.

Comment. Several commenters recommended that nontaxable income not be included in the income used to arrive at the EFC from the GSL tables. The reasons given for the recommendation were that inclusion of nontaxable income would add to the information the school is already required to collect; make little difference in student eligibility; and complicate the school's validation efforts.

Response. Although the inclusion of non-taxable income in the amount from which the family contribution is derived may increase the burden on institutions, the Secretary concludes that fairness demands consideration of these resources. There is no reason to consider nontaxable income, a liquid asset, to be less available for educational costs to the student and family than taxable income. This schedule continues to measure adjusted gross income, as reported on the Federal income tax return, to determine if the student must undergo a need analysis. Under this schedule, those students whose adjusted gross family income is $30,000 or less will continue to qualify for Federal interest benefits without regard to family contributions for educational costs. For those students whose adjusted gross family income is greater than $30,000, the schedule requires the calculation of the "effective annual income" in order to use the tables in Appendix B. The effective annual income is determined by adding to the adjusted gross income, non-taxable income and benefits, other than those Social Security or Veterans benefits included in the definition of estimated financial assistance. This change produces a parity of treatment for students whose EFC is calculated under the tables and those whose EFC is calculated under other approved systems because the need analysis systems approved for use in the campus-based programs similarly include nontaxable income and benefits.

Comment. The commenters were equally divided regarding the proposal to require the student to submit copies of the Federal income tax returns with the GSL application. Some commenters recommended that only one page of the tax form be required and one commenter recommended that any validation effort include all title IV programs.

Response. A change has been made. The regulations have been revised simply to indicate the Secretary's authority to require copies of the income tax returns and other pertinent documents. A Notice of Proposed Rulemaking will be published later this year inviting public comment on the Secretary's proposal to implement validation for all title IV programs.

Comment. Two commenters suggested that if the student's parent(s) refuse to certify information necessary to the determination of eligibility for the GSL Program, the application should be considered incomplete and that no loan should be made on the basis of that application.

Response. No change is necessary to reach the result proposed by these commenters. As in previous schedules, if the student's parents refuse to certify information needed to determine the adjusted gross income the student does not qualify for a subsidized loan.

Comment. The majority of commenters agree that the use of the award letter is an appropriate point at which to mandate the use of the EFC calculated under a campus-based approved need analysis system rather than the tables in Appendix B. One commenter suggested that actual receipt of funds under a campus-based program may be a more appropriate point.

Response. No change has been made. This schedule, like previous schedules, continues to require that the EFC be calculated under an approved need analysis system once a campus-based program award letter is issued. The recommendation to use actual receipt of funds to trigger this requirement was rejected because the Secretary considers consistency of need measurement an important goal in student assistance administration and one which can be achieved only if the same measurement is used in as many instances as possible. Delaying the point at which the campus-based measurement must be used for the GSL Program would increase the opportunity for inconsistency of need measurement. It should be noted that the institution, at its option, may always use the EFC calculated under a campus-based need measurement system and is encouraged to do so if the EFC has been calculated but the award letter has not yet been issued.

Comment. The majority of commenters recommended that the independent student definition be revised. It was the consensus of opinion that the definition should be made more stringent, more verifiable and less susceptible to abuse.

Response. As stated in the Notice of Proposed Rulemaking, these comments will be considered along with comments received when the Secretary publishes a separate proposed rule changing the definition of independent student for the 1984–85 and subsequent academic years. For the 1983–84 academic year, the definition of independent student is found in the applicable regulations of each title IV student assistance program.

Executive Order 12291: These regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these regulations. Comments may be submitted to the address listed in this preamble.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These regulations continue the use of the formula used in previous years for determining student eligibility for interest benefits under the Guaranteed Student Loan Program. The regulations,

therefore, do not have an impact on small entities.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the absence of any comments on this matter and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

Dated: May 24, 1983.

T. H. Bell,

Secretary of Education.

PART 682—GUARANTEED STUDENT LOAN PROGRAM

The Secretary amends Part 682 of Title 34 of the Code of Federal Regulations as follows:

1. In § 682.200, the definition of the term "Allowable Costs of Attendance" is removed and a new term "Estimated cost of attendance" is inserted in correct alphabetical order as follows:

§ 682.200 General definitions.

* * * * *

Estimated cost of attendance: (a) Except as provided in paragraph (b) of this definition, the tuition and fees applicable to a student plus the school's estimate of other expenses reasonably related to attendance at that school, for the period for which the loan is sought. These costs include, but are not limited to, reasonable transportation and commuting costs, and costs for room, board, books and supplies.

(b) For a student enrolled in a correspondence study program, only the contract price of the program. However, costs described in paragraph (a) of this definition that are incurred by the student for fulfilling a required period of residential training in connection with the correspondence study program may also be included in the estimated cost of attendance.

(20 U.S.C. 1078(a)(2)(C)(i))

* * * * *

2. In § 682.200, the definition of the term "Estimated financial assistance" is revised as follows:

* * * * *

Estimated financial assistance: For the period for which the loan is sought, the estimated amount of assistance that a school is aware a student will be or has been awarded in Federal, State, or privately supported scholarship, grant, work or loan programs, including:

(a) Any Social Security benefits paid to, or on account of, the student which would not be paid if he or she were not a student, and

(b) Veterans educational benefits paid under chapters 32, 34, and 35 of title 38 of the United States Code.

Resources or financial support from the student or the student's family may not be considered financial assistance.

(20 U.S.C. 1078(a)(2)(C)(ii))

3. Section 682.605 is amended by adding a new paragraph (d) to read as follows:

§ 682.605 Certifications by a participating school in connection with a student loan application.

* * * * *

(d) The student's eligibility for interest benefits as determined in accordance with section 682.301.

(20 U.S.C. 1077, 1078, 1065, 1088f)

* * * * *

4. Section 682.301 is revised to read as follows:

§ 682.301 Eligibility for interest benefits.

(a)(1) *General* (i) If a student's adjusted gross family income is $30,000 or less, the student qualifies for interest benefits for the amount of his or her loan.

(ii) If the student's adjusted gross family income is more than $30,000, the student qualifies for interest benefits if the institution he or she attends or is planning to attend determines that the student demonstrated financial need for the loan.

(2)(i) If the student demonstrates financial need for a loan of $1,000 or more, the student qualifies for interest benefits for the amount for which the student has demonstrated financial need.

(ii) If the student demonstrates financial need for a loan between $500 and $1,000, the student qualifies for interest benefits on a loan of up to $1,000.

(b) *Application for interest benefits.* To apply for interest benefits, the student shall submit to the lender with his or her loan application a statement from the student's institution that certifies—

(1) The estimated cost of attendance for the student for the academic period for which the loan is intended;

(2) The estimated financial assistance for the student for the academic period for which the loan is intended;

(3) The adjusted gross family income of the student's family; and

(4) The student's expected family contribution if his or her adjusted gross family income exceeds $30,000.

(5) The amount of the student's need for a loan as determined by the institution pursuant to paragraph (e) of this section.

(c) *Adjusted gross family income.* The institution determines the adjusted gross family income of the student's family based upon data provided, and certified to, by each person whose income is required to be considered.

(1) The adjusted gross family income of the student's family means the adjusted gross income, as defined in section 62 of the Internal Revenue Code, as reported on the 1983 Federal income tax return(s), of—

(i) The student;

(ii) The student's spouse, if any; and

(iii) The student's mother and father if the student, at the time he or she applies, is determined to be a "dependent student" rather than an "independent student;"

(2) A student whose parents are divorced or separated follows these procedures for reporting a parents adjusted gross income to determine the adjusted gross family income—

(i) Include only the income of the parent with whom the student resided for the greater portion of the 12-month period preceding the date of application.

(ii) If the preceding criterion does not apply, include only the income of the parent who provided the greater portion of the student's support for the 12-month period preceding the date of application.

(iii) If neither of the preceding criteria apply, include only the income of the parent who provided the greater support for the period commencing January 1, 1983 and ending 12 months prior to the date of application.

(3) If either of the parents has died, the student shall include only the income of the surviving parent. If both parents have died, the student shall not report any parental income.

(4) The following rule applies if either a parent whose income is taken into account under paragraph (c)(2) of this section, or a parent who is a widow or widower and whose income is taken into account under paragraph (c)(3) of this section, has remarried. The income of that parent's spouse shall be included in determining the adjusted gross family income if, in 1983 or 1984, the student—

(i) Has received or will receive financial assistance of more than $750 from that spouse, or

(ii) Has lived or will live for more than six weeks in the home of the parent and that spouse.

(5) For a student who is divorced or separated, or whose spouse has died, the spouse's income shall not be included in determining the adjusted gross family income.

(d) "Independent student" is a student who qualifies as an independent student in 34 CFR 668.1a.

(e) *Determination of need.* (1) If the student's adjusted gross family income exceeds $30,000 the institution shall determine the student's need for a loan by subtracting from the student's estimated cost of attendance, as defined in § 682.200, his or her—

(i) Estimated financial assistance, as defined in § 682.200; and

(ii) Expected family contribution, as determined in paragraph (f) of this section.

(2) The student shall certify to the accuracy of any information he or she provides to the institution which is necessary to determine need.

(3) The Secretary may require that family members whose incomes are included in the student's adjusted gross family income under paragraph (c) of this section and the effective annual income in Appendix B provide copies of the relevant Federal income tax return(s) and other pertinent documents to support the student's application for interest benefits.

(f) *Determination of expected family contribution.* For a student who seeks a loan for a period of instruction beginning on or after July 1, 1984, but not later than June 30, 1985, the institution shall calculate his or her expected family contribution as follows:

(1) If the student has been awarded financial assistance for award year 1984–85 (July 1, 1984–June 30, 1985) under the Supplemental Educational Opportunity Grant (SEOG), College Work-Study (CWS), or National Direct Student Loan (NDSL) program, at the time he or she applies for a Guaranteed Student Loan, the student's expected family contribution is his or her expected family contribution as calculated for the SEOG, CWS or NDSL program.

(2) If the student has not been awarded financial assistance under the SEOG, CWS, or NDSL program for the 1984–85 award year at the time he or she applies for a Guaranteed Student Loan, the student's expected family contribution is determined under either—

(i) Any need analysis system which has been approved by the Secretary for the SEOG, CWS, or NDSL program; or

(ii) The tables found in Appendix B if the effective annual income of the student and his or her family does not exceed $65,000.

(20 U.S.C. 1078, 1082)

5. Appendix B to Part 682 is revised to read as follows:

Appendix B to Part 682—Guaranteed Student Loan Program Tables for Determination of Expected Family Contribution for 1984–85

If authorized under the provisions of section 682.301(f)(2)(ii), an institution may use the following tables to determine the student's expected family contribution.

For purposes of the four tables,

"Dependent student" means a student who does not qualify as an independent student;

"Independent student" is defined in 34 CFR 668.1a; and

"Effective annual income" means the sum received in 1983 from—

(a) Adjusted gross income, as defined in section 62 of the Internal Revenue Code; and

(b) Investment income upon which no Federal income tax need be paid. An example of such income is the interest on municipal bonds; and

(c) Other income upon which no income tax is paid, such as child support payments and welfare benefits, except for any Social Security benefits or Veteran's educational benefits included in the definition of "Estimated financial assistance" in § 682.200.

Table A.—Expected Family Contribution for a Dependent Student From a Two-Parent Family—1984–85

For a dependent student from a two-parent family, the educational institution determines the student's expected family contribution according to Table A. The amount obtained from the table is divided by the number of family members enrolled on at least a half-time basis in a postsecondary educational institution.

As used in Table A, "Family members" include the student, the student's spouse and their dependents, and the student's mother and father and their dependents. If the family includes a step-parent whose income is included in the adjusted gross family income, family members also include the step-parent and the dependents of the step-parent.

Table A is based on the following assumptions:

- One of the two parents is employed,
- No assets are considered, and
- All of the family income was earned by the employed parent.

The conversion of the effective annual income to the expected family contribution is performed by subtracting from the effective annual income the following:

—Federal income tax, based on standard deductions, computed at the rate applied to married taxpayers filing joint returns,
—F.I.C.A. (Social Security) for one wage earner,
—Average State and other taxes (6%), and
—A Standard Maintenance Allowance, based on the average non-discretionary living expenses for families derived from the Bureau of Labor Statistics low budget standard, as adjusted for inflation and family size. The Standard Maintenance Allowance does not include an allowance for living expenses of the dependent student for the 9 months of school because those living expenses are included in the student's cost of education.

To this balance, called "available income," which represents discretionary income, a conversion percentage is applied. The percentage increases as available income increases. The resulting value is the expected family contribution.

Table B.—Expected Family Contribution for a Dependent Student From a One-Parent Family—1984–85

For a dependent student from a one-parent family, the educational institution determines the student's expected family contribution according to Table B. The amount obtained from the table is divided by the number of family members enrolled on at least a half-time basis in a postsecondary educational institution.

As used in Table B, "Family members" include the student, the student's spouse and their dependents, and the student's parent and the parent's dependents.

Table B is based on the following asumptions:

- The parent is employed,
- No assets are considered, and
- All of the family income was earned by the parent.

The conversion of the effective annual income to the expected family contribution is performed by substracting from the effective annual income, the following:

—Federal income tax, based on standard deductions, computed at the rate applied to taxpayers who qualify as heads of households,
—F.I.C.A. (Social Security) for one wage earner,
—Average State and other taxes (8%),
—An employment allowance of 30% of income, to a maximum of $1,900, and
—A Standard Maintenance Allowance, based on the average non-discretionary living expenses for families and derived from the Bureau of Labor Statistics low budget standard, as adjusted for inflation and family size. The Standard Maintenance Allowance does not include an allowance for living expenses of the dependent student for the 9 months of school because those living expenses are included in the student's cost of education.

To this balance, called "available income," which represents discretionary income, a conversion percentage is applied. The percentage increases as available income increases. The resulting value is the expected family contribution.

Table C.—Expected Family Contribution for a Married Independent Student—1984–85

For a married independent student, the educational institution determines the student's expected family contribution according to Table C. The amount obtained from the table is divided by the number of family members enrolled on at least a half-time basis in a postsecondary educational institution. The contributions set forth in Table C are based on a 12-month budget. If an educational institution calculates an independent student budget on a 9-month basis, it must multiply the contribution in the table by .75. No family assets are considered.

As used in Table C, "Family members" include the students, the student's spouse and their dependents.

The conversion of the effective annual income to the expected family contribution is performed by subtracting from the effective annual income, the following:

—Federal income tax, based on standard deductions, computed at the rate applied to married taxpayers filing joint returns,

—F.I.C.A. (Social Security) for one wage earner, and

—Average State and other taxes (4%).

The resulting value is the expected family contribution. No deduction is made for living expenses of the student and his or her family because those expenses are included in the student's cost of education.

Table D.—Expected Family Contribution for a Single Independent Student—1984–85

For a single independent student, the educational institution determines the student's expected family contribution according to Table D. The amount obtained from the table is divided by the number of family members enrolled on at least a half-time basis in a postsecondary educational institution. The contributions set forth in Table D are based on a 12-month budget. If an educational institution calculates an independent student budget on a 9-month basis, it must multiply the contribution in the table by .75. No family assets are considered.

As used in Table D, "Family members" include the student and the student's dependents.

The conversion of the effective annual income to the expected family contribution is performed by subtracting from the effective annual income, the following:

—Federal income tax, based on standard deductions, computed at the rate applied to taxpayers who qualify as heads of households,

—F.I.C.A. (Social Security) for one wage earner, and

—Average State and other taxes (4%).

The resulting value is the expected family contribution. No deduction is made for living expenses for the student and his or her family because those expenses are included in the student's cost of education.

Part V

Department of Justice

Bureau of Prisons

Control, Custody, Care, Treatment, and Instruction of Inmates; Final Rules and Proposed Rule

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 540

Control, Custody, Care, Treatment, and Instruction of Inmates

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: The Bureau of Prisons is publishing final amendments to its rule on telephone regulations for inmates. The amendments revise existing rule sections on the monitoring of inmate telephone calls and on the expenses of inmate telephone use. Another amendment allows pre-trial inmates to make telephone calls as provided in the rule on pre-trial inmates.

EFFECTIVE DATE: July 5, 1983.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 760, 320 1st Street NW., Washington, D.C. 20534.

FOR FURTHER INFORMATION CONTACT: Mike Pearlman, Office of General Counsel, Bureau of Prisons, phone 202/724-3062.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is finalizing amendments to its rule on Telephone Regulations for Inmates. The proposed amendments were published in the **Federal Register** December 7, 1982 (at 47 FR 55131 et seq.). Interested persons were invited to submit comments on the amendments. Members of the public may submit further comments concerning the final amendments by writing the previously cited address. These comments will be considered but will receive no response in the **Federal Register.**

The Bureau of Prisons has determined that this rule is not a major rule for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to this rule since the rule involves agency management. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96-354), does not have a significant impact on a substantial number of small entities.

Summary of Changes.

1. Section 540.101—A commenter felt that the provision for placing calls to attorneys is "much too vague", that it does not provide sufficient detail as to who, when, and where such calls can be placed, nor does it allow for unmonitored calls. Existing § 540.102 specifically addresses inmate telephone calls to attorneys. This section, plus the requirement in § 540.101 that the Warden notify an inmate of the procedures to have an unmonitored telephone conversation with an attorney, addresses the commenter's concerns. Contrary to the impression of the commenter, § 540.101 does not require all calls to be monitored, but does require the Warden to establish procedures to enable telephone monitoring.

Another comment suggests that monitoring all but inmate telephone calls to attorneys violates "doctor/patient" and "clergyman/flock" privileges. These situations, however, are distinguished from the attorney situation. Medical and religious services are afforded an inmate within the institution, whereas legal services are not. With respect to the "doctor/patient" issue, Bureau policy requires an inmate's medical treatment ordinarily to be provided by the Bureau of Prisons, not by an outside physician. With respect to the "clergyman/flock" issue, because of a wide discretion on who can be considered a member of the clergy, it is necessary to maintain the monitoring potential to insure the security, discipline, and good order of the institution. The Bureau of Prisons provides clergy and pastoral counseling, by staff and other sources.

2. Section 540.104—Two commenters objected to the practice of prohibiting the electronic transfer of a call to a third party. One commenter refers to the rule as arbitrary and as not allowing the inmate and his family to conserve fiscal resources. Another commenter doubts the feasibility for enforcement of this approach, whether the Bureau has the authority to "regulate the activity of a person in the community", and whether there is any legitimate security or penal interest in establishing this rule.

The rule is necessary to ensure the security, discipline, and good order of the institution. Allowing electronic transfer of calls creates a situation whereby the caller can perpetrate a fraud or some other illegal act on an unsuspecting party. An example of this was recently reported in the December 13, 1982 *Wall Street Journal.* The article reported that a state inmate's collect call was accepted by his friends, who would put the inmate through to the intended victim. By prohibiting electronic transfer of calls, the Bureau is ensuring that the party for whom the call is intended wishes to receive the telephone call. The Bureau's monitoring procedures will be used to enforce this provision. Contrary to the thrust of a comment, the prohibition against the electronic transfer of a call is not intended to regulate the activity of any person in the community, but is intended to place the inmate on notice that he is not allowed to take part in such an activity.

3. Section 540.105—Section 540.105 is retitled and reworded to recognize that pre-trial inmates are to be given telephone privileges in accordance with the existing rule on pre-trial inmates.

List of Subjects in 28 CFR Part 540

Prisoners.

Conclusion

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), 28 CFR Chapter V is amended as set forth below.

Dated: May 25, 1983.

Norman A. Carlson,

Director, Bureau of Prisons.

Amend Subchapter C of 28 CFR Chapter V as follows: in Part 540, revise Subpart I.

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 540—CONTACT WITH PERSONS IN THE COMMUNITY

1. The authority citation for Part 540, Subpart I reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 5006-5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95-0.99.

Subpart I—Telephone Regulations for Inmates

2. In Part 540 Subpart I, revise § 540.101 to read as follows:

§ 540.101 Monitoring of inmate telephone calls.

The Warden shall establish procedures that enable monitoring of telephone conversations on any telephone located within the institution, said monitoring to be done to preserve the security and orderly management of the institution and to protect the public. The Warden must provide notice to the inmate of the potential for monitoring. Staff may not monitor an inmate's properly placed call to an attorney. The Warden shall notify an inmate of the proper procedures to have an unmonitored telephone conversation with an attorney.

3. In Part 540 Subpart I, revise § 540.104 to read as follows:

§ 540.104 Expenses of inmate telephone use.

An inmate is responsible for the expenses of inmate telephone use. Inmate calls shall ordinarily be made

collect to the party called. Third party billing and electronic transfer of a call to a third party are not permitted. The Warden may direct the government to bear the expense of inmate telephone use under compelling circumstances such as when an inmate has lost contact with his family or has a family emergency. Another example is where the inmate experiences a lack of visits over an extended period of time. This is particularly true where there are no financial resources available either from the inmate or his family.

4. In Part 540 Subpart I, revise the title of § 540.105 in the Table of Contents and revise § 540.105 to read as follows:

§ 540.105 Telephone calls for inmates in admission, holdover, segregation, or pre-trial status.

The Warden shall establish procedures for allowing inmates in admission, holdover or segregation status to make phone calls as provided in § 540.100. Pre-trial inmates may make phone calls as provided in Part 551, Subpart J. Staff may not withhold phone privileges as a disciplinary measure except where the infraction for which disciplinary action is taken involves abuse, or a clear potential for abuse, of phone privileges.

BILLING CODE 4410-05-M

---

28 CFR Parts 550, 551

Control, Custody, Care, Treatment, and Instruction of Inmates

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rules.

SUMMARY: The Bureau of Prisons is publishing its final rules on (1) Emergency Signaling Devices—Inmate Housing Units, (2) Drug Services (Urine Surveillance and Counseling for Sentenced Inmates in Contract CTCs), and (3) Inmate Organizations (amendments to the final rule). The rule on emergency signaling devices is intended to ensure that inmates in locked housing units which do not have 24-hour staff coverage have access to signaling devices for use in alerting staff in the event of an emergency. The rule on drug services requires that inmates serving a sentence in a contract community treatment center (CTC) participate in a program of urine testing for drug use. Inmates in a contract CTC who have drug aftercare as a condition of release are to receive drug counseling during their stay at the contract CTC. The rule is intended to help an inmate avoid drug usage upon return to the community. Amendments to the rule on inmate organizations establish a fiscal year for these organizations, expand the section on fund-raising activities, and identify additional ways for use of organizational funds.

EFFECTIVE DATE: July 5, 1983.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 760, 320 1st Street NW., Washington, D.C. 20534.

FOR FURTHER INFORMATION CONTACT: Mike Pearlman, Office of General Counsel, Bureau of Prisons, phone 202/724-3062.

SUPPLEMENTARY INFORMATION: In this document the Bureau of Prisons is publishing its final rules on Emergency Signaling Devices—Inmate Housing Units, on Drug Services (Urine Surveillance and Counseling for Sentenced Inmates in Contract CTCs), and amendments to the Bureau's final rule on Inmate Organizations. The proposed rule on emergency signaling devices and the proposed amendments to the rule on inmate organizations were published in the **Federal Register** December 7, 1982 (at 47 FR 55131 et seq.). The proposed rule on drug services was published in the **Federal Register** October 22, 1982 (at 47 FR 47170-71).

Interested persons were invited to submit comments on these rules. No public comment was received with respect to the rules on emergency signaling devices and on inmate organizations. Public comment was received for the rule on drug services. Members of the public may submit comments concerning the final rules by writing the previously cited address. These comments will be considered but will receive no further response in the **Federal Register.**

The Bureau of Prisons has determined that these rules are not major rules for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to these rules since the rules involves agency management. After review of the law and regulations, the Director, Bureau of Prisons has certified that these rules, for the purpose of the Regulatory Flexibility Act (Pub. L. 96-354), do not have a significant impact on a substantial number of small entities.

Summary of Changes

1. Drug Services (Urine Surveillance and Counseling for Sentenced Inmates in Contract CTCs)

A commentor points out that the rule on urine surveillance does not require prisoners to be given notice that urine tests will be conducted upon the inmate's return to the facility. The commenter cites *U.S. v. Lilly*, 576 F.2d 1240 (5th Cir. 1978), stating that the Court of Appeals overturned a conviction because prison officials had not provided a defendant with notice that she would be subject to random search upon returning to a facility. The commenter also cited Standard 6.14 of the Department of Justice Federal Standards for Prisons and jails. Our situation, however, is different in several ways. Both *Lilly* and Standard 6.14 concern the discovery of contraband, not urine surveillance to determine whether the inmate has used drugs. Further, the court's position as to the notice requirement in *Lilly* was specifically limited to the facts of that case, a body cavity search, which the court considered highly intrusive. While we do not believe that a requirement for use surveillance is comparable to a body cavity search, publication of the Bureau's present rule does provide a general notice to all inmates that urine surveillance will occur.

The Bureau agrees with, and believes its policy meets the thrust of, a comment that urine surveillance should be conducted no more frequently than necessary, and that when done, staff avoid unnecessary force and strive to preserve the dignity and integrity of inmates. As specified in the rule, center staff collect a minimum of six samples per month from an inmate who has drug aftercare as a condition of release, a known history of drug abuse, or who is suspected of using drugs. Internal implementing language limits Center staff to random testing, once each month, for all other sentenced inmates. Any additional testing of these inmates must be approved by the Community Programs Manager. The rule further requires that staff of the same sex as the inmate witness the collection of the sample and that staff provide an inmate a reasonable time to provide a urine sample.

Comments to § 550.43 support the requirement that contract CTCs provide drug counseling, but believe the minimum of a 30-minute second session each week is inadequate. Two inmates at a Bureau institution suggested a stratified program, with the person initially involved in two (2) hours of individual, and two to three (2-3) hours of group counseling per week. The total number of hours would be reduced as the individual made satisfactory progress and approached release from the facility. To meet budgetary concerns, the commenters suggested that the Bureau use inmates trained as substance abuse counselors and designate centrally located CTCs to provide the

counseling services with inmates at other CTCs participating in the centrally located program.

As noted by the commenters, the 30-minute session is a minimum guideline, intended to provide all contract facilities with the basic requirement. Each contract CTC may extend the time provided for counseling based on the Center's own situation—for example, its clientele and resources available. As specified in the rule, this counseling must be provided by qualified staff; i.e., a professional counselor with appropriate qualifications (advanced degree in one of the behavioral sciences or a bachelor's degree plus two years drug treatment experience or training). Implementing instructions authorize the use of para-professionals with appropriate training and experience, provided they are under the direct supervision of the professional counselor. The use of inmates in this type position poses a number of concerns. The qualifications of the individuals would be one aspect, as well as that person's eligibility for transfer to a CTC (for example, the inmate's sentence and custody status). Another concern is the pressures which might be encountered, and the effect of these on the Center's operation, by an individual who is serving a staff function while residing in the CTC. While an individual offender who is eligible for a CTC may also qualify for a para-professional position, this determination is best made on a case-by-case situation.

We do not believe it is practical to adopt the suggestion that centrally located CTCs be designated to provide counseling services. The distance between CTCs in the majority of instances, and the time and transportation costs that could result in other instances are not conducive to such an approach.

2. Inmate Organizations

A. Section 551.34—Section 551.34 is expanded to recognize that inmate organizations may sell tickets (includes coupons, tokens, etc.) for a fund-raising activity. Prior to the Warden's authorizing the selling of such tickets, the inmate organization must be able to show sufficient resources to redeem all outstanding tickets.

B. Section 551.36—Section 551.36 is clarified by inserting the word "inmate" before "treasurer" in subsection (a) and, in subsection (g), the phrase "in addition to those ordinarily furnished by the government" for "not ordinarily furnished by the government".

3. Emergency Signaling Devices—Inmate Housing Units

The final rule is inserted in Part 551, Subpart L rather than in Part 540, Subpart J.

List of Subjects in 28 CFR Parts 550 and 551

Prisoners.

Conclusion

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), Subchapter C of 28 CFR Chapter V is revised as follows:

1. In Part 550, add a new Subpart E.
2. In Part 551, amend Subpart D, and add a new Subpart L.

Dated: May 25, 1983.

Norman A. Carlson,

Director.

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

1. In Part 550, add a new Subpart E to read as follows:

PART 550—DRUG PROGRAMS

* * * * *

Subpart E—Drug Services (Urine Surveillance and Counseling for Sentenced Inmates in Contract CTCs)

Sec.
550.40 Purpose and scope.
550.41 Urine surveillance.
550.42 Procedures for urine surveillance.
550.43 Drug counseling.
550.44 Procedures for arranging drug counseling.

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4251–4255, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart E—Drug Services (Urine Surveillance and Counseling for Sentenced Inmates in Contract CTCs)

§ 550.40 Purpose and scope.

The Bureau of Prisons requires that an inmate who is serving a sentence in a contract community treatment center (CTC) participate in a program of urine testing for drug use. An inmate who is serving a sentence in a contract CTC, and who has drug aftercare as a condition of release also shall receive drug counseling during the inmate's stay at the contract CTC.

§ 550.41 Urine surveillance.

A program of urine testing for drug use shall be established in contract CTCs.

(a) Urine surveillance shall be conducted on all inmates serving their sentence in a contract CTC:

(1) Who have drug aftercare as a condition of release;

(2) Who have a known history of drug abuse; or

(3) Who are suspected of using drugs.

Center shall shall collect a minimum of six samples per month from an inmate who meets one or more of the criteria listed in paragraph (a)(1)–(3) of this section.

(b) The Center Director shall establish a schedule for random collection for all other sentenced inmates not identified in paragraph (a) of this section.

§ 550.42 Procedures for urine surveillance.

(a) Contractor authorized personnel of the same sex as the inmate must witness collection of the inmate's urine sample. Inmates may not be involved in the collection, recording, mailing, or processing of the test results.

(b) If an inmate fails to provide a urine sample within two hours of a request for it, center staff may file a disciplinary report. To eliminate the possibility of diluted or adulterated samples, center staff shall keep the inmate under direct supervision during this two-hour period.

(c) Center staff shall have each positive urine test validated to substantiate the positive result. Center staff shall file a disciplinary report if the inmate's urine test shows a positive result for the presence of drugs which the inmate cannot satisfactorily justify to center staff.

(d) The results of disciplinary hearings and a copy of positive urine testing results which the inmate cannot satisfactorily justify to center staff shall be sent to the appropriate Regional U.S. Parole Commission Office, the Community Programs Manager (CPM), and the U.S. Probation Office.

§ 550.43 Drug counseling.

(a) Drug counseling shall be provided to sentenced inmates in contract community treatment centers who have drug aftercare as a condition of release.

(b) Counseling shall include a minimum of a 30-minute session each week, provided by qualified staff.

(c) Center staff shall document in the inmate's file the date and time of each counseling session. The counselor must prepare a monthly summary of each inmate's progress. This report shall be placed in the inmate's file.

§ 550.44 Procedures for arranging drug counseling.

The contract center staff shall hold a program planning conference with a sentenced inmate who has drug aftercare as a condition of release. At

this meeting, held within one week of the inmate's arrival at the center, plans are made for the inmate to receive drug counseling. The meeting is attended by center staff, the inmate, and the Chief U.S. Probation Officer or designee.

2. In Part 551, amend Subpart D to read as follows:

PART 551—MISCELLANEOUS

a. The authority citation for Part 551, Subpart D reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4161–4166, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

b. In Part 551, Subpart D, revise § 551.34 to read as follows:

Subpart D—Inmate Organizations

* * * * *

§ 551.34 Fund-raising projects.

All activities and projects sponsored by the organization require the Warden's approval. Inmates shall do most of the work in fund-raising projects. The Warden may not approve a project that is competitive with the commissary nor one that creates work beyond the resources available to the institution.

On occasion, an inmate organization may request to sell tickets (includes coupons, tokens, etc.) as part of a fund-raising effort. Prior to authorizing an inmate organization to sell such tickets, the Warden shall require the organization to establish an accountability procedure to ensure that the organization has sufficient reserves to redeem all outstanding tickets. The Warden may require the inmate organization both to periodically change the ticket in some manner (e.g., color) and to publicize the change to ensure that old tickets are redeemed.

c. In Part 551, Subpart D, revise paragraphs (a), (b) and (c) and add new paragraphs (f) and (g) to § 551.36 to read as follows:

§ 551.36 Accountability for funds.

(a) The organization's inmate treasure shall keep financial records to reflect:

(1) Income identified by source; and

(2) Expenditures with applicable receipts.

(b) The fiscal year for each organization shall begin January 1 and end December 31. The treasurer of the inmate organization shall prepare financial statements (cumulative-to-date) by January 20, April 20, July 20, and October 20 each year. The treasurer shall present copies of the financial reports to the membership, the staff sponsor, and the Warden.

(c) The Warden shall require an internal audit of each inmate organization to be conducted immediately following the end of the fiscal year.

* * * * *

(f) Upon approval of the Warden, an inmate organization may use its funds to provide financial assistance to an inmate who has insufficient resources to meet the expenses necessary for an emergency humanitarian purpose, such as a bedside visit or funeral trip.

(g) Upon approval of the Warden, an inmate organization may be allowed to purchase items for use in the institution, provided that the items intended for purchase are in addition to those ordinarily furnished by the government.

3. In Part 551, add a new Subpart L to read as follows:

Subpart L—Emergency Signaling Devices—Inmate Housing Units

Sec.
551.140 Purpose and scope.

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081; 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart L—Emergency Signaling Devices—Inmate Housing Units

§ 551.140 Purpose and scope.

The Warden shall ensure that inmates in locked housing units have access to signaling devices for use in alerting correctional staff in the event of an emergency. Signaling devices shall be available:

(a) In dormitories (both open and cubicle style) that are locked and which do not have 24-hour staff coverage; and

(b) In housing units with rooms or cells (both single and multiple occupancy) lacking 24-hour staff coverage. The signaling device shall be located in the common area of the unit and must be accessible to inmates when not locked in their rooms or cells.

BILLING CODE 4410–05–M

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Parts 547, 570, and 571

Control, Custody, Care, Treatment, and Instruction of Inmates

AGENCY: Bureau of Prisons, Justice.

ACTION: Proposed rules.

SUMMARY: The Bureau of Prisons is publishing proposed amendments to its rules on (1) Religious Diet Requirements, (2) Furloughs, and (3) Pre-Release Program. The revised rule on Religious Diet Requirements is intended to provide inmates who wish to observe religious dietary laws with a diet which meets or exceeds recommended daily allowances, and which complies with religious dietary laws to the extent practicable. In addition to several clarifying changes, the amended rule on furloughs adds a new reason for an inmate to receive a furlough. The rule also contains a standardized list of conditions which the inmate must agree to meet while on furlough. The amended rule on the pre-release program expands the section on program responsibility. The rule also contains a provision whereby an inmate who is not being released through a community treatment center may receive the assistance of the United States Probation Officer in establishing a release plan.

DATE: Comments must be received on or before July 18, 1983.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 760, 320 1st Street NW., Washington, D.C. 20534. Comments received will be available for examination by interested persons at the above address.

FOR FURTHER INFORMATION CONTACT: Mike Pearlman, Office of General Counsel, Bureau of Prisons, phone 202/724–3062.

SUPPLEMENTARY INFORMATION: Pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons, in 28 CFR 0.96(q), notice is hereby given that the Bureau of Prisons intends to publish in the **Federal Register** proposed amendments to its rules on (1) Religious Diet Requirements, (2) Furloughs, and (3) Pre-Release Program. The final rule on Religious Diet Requirements was published in the **Federal Register** June 29, 1979 (at 44 FR 38250 et seq.), on Furloughs, July 1, 1981 (at 46 FR 34550 et seq.), and on the Pre-Release Program, June 30, 1980 (at 45 FR 44234 et seq.).

The existing rule on religious diet requirements is being revised. The proposed amendment states that an inmate who wishes to observe religious dietary laws will be provided a diet which meets or exceeds recommended daily allowances published by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, and which complies with religious dietary laws to the extent practicable. This change recognizes the Bureau's intent to accommodate, within the constraints of budgetary limitations and the security and orderly running of the institution, the wide range of religious beliefs which may exist within an institution.

Several changes are proposed for the rule on furloughs. In § 570.31(a), the qualifying phrase "or state of federal agents" is added. Section 570.31(b)(5) used U.S. Parole Commission guidelines to determine an inmate's anticipated release date. Because there is no certainty that the Bureau would interpret these guidelines the same as the U.S. Parole Commission, paragraph (b)(5) is to be deleted. Based on the deletion of paragraph (b)(5), paragraph (b)(3) and (b)(4) are amended, but the intent is unchanged. Section 570.32(a)(9) is new. This section allows an inmate the opportunity to participate in special training courses or in institution work assignments, of 30 calendar days or less, when daily commuting from the institution is not feasible. Based on new paragraph (a)(9), paragraphs (a)(7) and (a)(8) are amended, but the intent is unchanged. Section 570.32(b) is expanded to include psychiatric treatment and § 570.33(b) is expanded to encompass psychiatric treatment and participation in special training courses or in institution work assignments as described in § 570.32(a)(9). In § 570.34, existing paragraph (e)(1) through (e)(5) become new paragraph (e)(2) through (e)(6). The definition of emergency furlough contained in new § 570.34(e)(2) is now included as part of a new proposed § 570.34(e)(1). This section states that the Warden may approve only emergency furloughs for an inmate who has been confined at the initially designated institution for less than 90 days. While only a small number of inmates will be considered for furlough within 90 days of their arrival at the initially designated institution, the 90-day period ensures an assessment period prior to consideration.

Sections 570.35 (d) and (e) are new. These sections concern Bureau policy towards U.S. Marshal prisoners in contract jails (refer request to U.S. Marshals) and towards pre-trial inmates (see Part 551, Subpart J).

A new § 570.36(d) is added. The existing rule refers to an inmate returning from furlough being subject to search. This is one of several conditions that an inmate going on furlough must agee to meet. Accordingly, new § 570.36(d) states that an inmate must agree to abide by the specified conditions of the furlough. Included in this section are conditions wich all inmates going on furlough will be expected to meet.

Several changes are made to the rule on the pre-release program. In § 571.11, the subject matter of paragraph (a)(1) and (a)(3) is retained but placed in a different order. Added is a new statement that the person responsible for the pre-release program is to determine the pre-release needs of the inmate population. Sections 571.12 (b) and (c) are reworded, but the intent is unchanged. Section 571.12(e) is new and states that an inmate who is not being released through a community treatment center (CTC) may ask staff to request the assistance of a United States Probation Office in establishing a release plan.

The Bureau of Prisons has determined that these rules are not major rules for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to these rules since the rules involve agency management. After review of the law and regulations, the Director, Bureau of Prisons has certified that these rules, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), do not have a significant impact on a substantial number of small entities.

Interested persons may participate in this proposed rulemaking by submitting data, views, or arguments in writing to the Bureau of Prisons, Room 760, 320 1st Street, NW., Washington, D.C. 20534. Comments received during the comment period will be considered before final action is taken. The proposed rules may be changed in light of the comments received. No oral hearings are contemplated.

List of Subjects in 28 CFR Parts 547, 570, and 571

Prisoners.

In consideration of the foregoing, it is proposed to amend Subchapters C and D of 28 CFR Chapter V as follows: In Subchapter C Part 547, amend Subpart B; in Subchapter D Part 570, amend Subpart C, and in Part 571, amend Subpart B as described below:

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 547—FOOD SERVICE

1. In Part 547, revise Subpart B to read as follows:

Subpart B—Religious Diet Requirements

Sec.
547.10 Purpose and scope.

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart B—Religious Diet Requirements

§ 547.10 Purpose and scope.

Inmates who wish to observe religious dietary laws will be provided a diet which meets or exceeds recommended daily allowances established by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, and which complies with religious dietary laws to the extent practicable within the constraints of budget limitations and the security and orderly running of the institution. In many instances, this will be achieved by selecting items from the regular food line.

SUBCHAPTER D—COMMUNITY PROGRAMS AND RELEASE

A. In Subchapter D, Part 570, Subpart C is amended as follows:

PART 570—COMMUNITY PROGRAMS

Subpart C—Furloughs

1. The authority citation for Part 570, Subpart C is as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 751, 4001, 4042, 4081, 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. In § 570.31, paragraph (a) introductory text is revised to read as follows:

§ 570.31 Definitions.

(a) A furlough is an authorized absence from an institution by an inmate who is not on a work/study release program nor under escort of a staff member, U.S. Marshal, or state or federal agents. The two types of furloughs are:

* * * * *

3. In § 570.31, existing paragraph (b)(5) is removed with paragraphs (b)(3) and (b)(4) revised to read as follows:

§ 570.31 Definitions.

* * * * *

(b) * * *

(3) The inmate's presumptive parole date; or

(4) The inmate's effective parole date.

4. In § 570.32, revise paragraphs (a)(7) and (a)(8), add paragraph (a)(9), and revise paragraph (b) introductory text to read as follows:

§ 570.32 Justification for furlough.

(a) * * *

(7) To comply with an official request to appear before a grand jury, or to comply with a request from a legislative body or regulatory or licensing agency;

(8) To appear in a criminal court proceeding, but only when the use of a furlough is requested or recommended by the applicable court or prosecuting attorney; or

(9) To participate in special training courses or in institution work assignments, of 30 calendar days or less, when daily commuting from the institution is not feasible.

(b) The Warden may recommend a furlough for an inmate to obtain necessary medical, surgical, psychiatric, or dental treatment not otherwise available. In addition to the recommendation of the Warden, a furlough of this nature requires the recommendation of the Chief Medical Officer (Chief of Health Programs). Approval for a furlough of this type occurs in one of the following ways:

* * * * *

5. In § 570.33, revise paragraph (b) to read as follows:

§ 570.33 Expenses of furlough.

* * * * *

(b) The government may bear the expense of a furlough only when the purpose of the furlough is to obtain necessary medical, surgical, psychiatric, or dental treatment not otherwise available, or to transfer an inmate to another correctional institution (includes community treatment centers), or to participate in special training courses or institutional work assignments as outlined in § 570.32(a)(9).

6. In § 570.34, paragraphs (e) (1)–(5) are redesignated as (e) (2)–(6) respectively and revised, and a new (e)(1) is added to read as follows:

§ 570.34 Eligibility requirements.

* * * * *

(e) * * *

(1) The Warden may approve only an emergency furlough (family crisis or other urgent situation) for an inmate who has been confined at the initially designated institution for less than 90 days.

(2) The Warden may approve only an emergency furlough for an inmate with more than two years remaining until the inmate's anticipated release date.

(3) The Warden may approve a day furlough for an inmate with two years or less remaining until the inmate's anticipated release date.

(4) The Warden may approve an overnight furlough within the institution's commuting area for an inmate with 18 months or less remaining until the inmate's anticipated release date.

(5) The Warden may approve an overnight furlough outside the institution's commuting area for an inmate with one year or less remaining until the inmate's anticipated release date. The Warden may ordinarily approve an overnight furlough not to exceed once each 90 days.

(6) If the Warden approves a furlough outside the above guidelines, the Warden shall document the reasons by memorandum for placement in the inmate's central file.

7. In § 570.35, paragraphs (d) and (e) are added to read as follows:

§ 570.35 Limitations on eligibility.

* * * * *

(d) The Bureau of Prisons does not have the authority to furlough U.S. Marshal's prisoners in contract jails. Staff are to refer requests for such furloughs to the U.S. Marshals.

(e) furloughs for pretrial inmates will be arranged in accordance with the rule on pretrial inmates (see Part 551, Subpart J).

8. In § 570.36 remove the existing paragraph (d) and add a new paragraph (d) to read as follows

§ 570.36 Procedures

* * * * *

(d) Each inmate who is approved for a furlough must agree to abide by the specified conditions (Table 1) of the furlough.

Table 1—Conditions of Furlough

1. I will not violate the laws of any jurisidiction (federal, state, or local). I understand that I am subject to prosecution for escape if I fail to return to the institution at the designated time.

2. I will not leave the area of my furlough without permission, with the exception of traveling to the furlough, and returning to the institution.

3. While on furlough status, I understand that I remain in the custody of the U.S. Attorney General. I agree to conduct myself in a manner not to bring discredit to myself or to the Bureau of Prisons. I understand that I am subject to arrest and/or institution disciplinary action for violating any condition(s) of my furlough.

4. I will not purchase, possess, use, consume, or administer any narcotic drugs, marijuana, intoxicants in any form, nor will I frequent any place where such articles are unlawfully sold, dispensed, used, or given away.

5. I will not use any medication that is not prescribed and given to me by the institution medical department for use. I will not have any medical/dental/surgical/psychiatric treatment without the written permission of staff, except where an emergency arises and necessitates such treatment.

6. I will not have in my possession any firearm or other dangerous weapon.

7. I will not get married, sign any legal papers, contracts, loan applications, or conduct any business without the written permission of staff.

8. I will not associate with persons having a criminal record or with those persons who I know are engaged in illegal occupations.

9. I agree to contact the institution (or United States Probation Officer) in the event of arrest, or any other serious difficulty or illness.

10. I will not drive a motor vehicle without the written permission of staff. I understand that I must have a valid driver's license and sufficient insurance to meet any applicable financial responsibility laws.

11. I will not return from furlough with any article I did not take out with me (for example, clothing, jewelry, or books). I understand that I may be thoroughly searched and given a urine and/or breathalyzer test upon my return to the institution. I understand that I will be held accountable for the results of the search and tests.

12. Special Instructions:

I have read, or had read to me, and I understand the above conditions concerning my furlough and agree to abide by them.

Inmate's Signature:——— Reg. No.: ———

Signature/Printed Name of Staff Witness: —

B. In Subchapter D, Part 571, Subpart B is amended as follows:

PART 571—RELEASE FROM CUSTODY

Subpart B—Pre-Release Program

1. The authority citation for Part 571, Subpart B is as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. In Part 571.11, paragraph (a) is revised to read as follows:

§ 571.11 Program responsibility.

(a) The Warden shall delegate to a staff member the responsibility to:

(1) Establish outlines of inmate need areas;

(2) Determine the pre-release needs of the inmate population;

(3) Coordinate the pre-release program for the entire institution; and

(4) Contact and schedule volunteers from the local community to participate in the pre-release program.

* * * * *

3. In § 571.12, paragaraphs (b) and (c) are revised and paragraph (e) is added to read as follows:

§ 571.12 General characteristics.

* * * * *

(b) Staff shall strongly encourage and support an inmate's participation in both unit and institution pre-release programs. Staff may require an inmate to participate in a specific number of pre-release sessions with other sessions on a voluntary basis. Staff shall document the inmate's participation in the pre-release program in the inmate's central file.

(c) To assist in the release process, the Warden may, in accordance with the Bureau of Prisons' rule on furloughs, grant an inmate a furlough for release preparation.

* * * * *

(e) An inmate who is not being released through a community treatment center (CTC) may ask staff to request the assistance of a United States Probation Officer in establishing a release plan. Bureau staff are to encourage the inmate to give at least one employment lead or contact. Where the inmate or the inmate's family has already identified employment, the case manager shall notify the U.S. Probation Officer so that the usual verification of release plans may be made. Where employment has not been identified, the case manager shall notify the U.S. Probation Officer of the employment need. This notification should ordinarily occur at least six weeks prior to the inmate's release.

Norman A. Carlson,

Director.

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 902]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 25, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
Section 102–2: New well (2.5 Mile rule)
Section 102–3: New well (1000 Ft rule)
Section 102–4: New onshore reservoir
Section 102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
Section 107–GB: Geopressured brine
Section 107–CS: Coal Seams
Section 107–DV: Devonian Shale
Section 107–PE: Production enhancement
Section 107–TF: New tight formation
Section 107–RT: Recompletion tight formation
Section 108: Stripper well
Section 108–SA: Seasonally affected
Section 108–ER: Enhanced recovery
Section 108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Volume 903]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 25, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

Part VII

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program: Subsidence Control, Concurrent Surface and Underground Mining Operations and Contemporaneous Reclamation; Final Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 784, 785, 816, 817, and 818

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program: Subsidence Control, Concurrent Surface and Underground Mining Operations and Contemporaneous Reclamation

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is issuing final rules on information required for subsidence control plans for underground mining operations and on performance standards for subsidence from underground mining operations, concurrent surface and underground mining, and contemporaneous reclamation.

A subsidence control plan is required, to furnish the regulatory authority with information on the underground mining operation. The subsidence control plan must be submitted and approved as part of the permit application for the underground mine.

The final performance standards establish a distinction between damage to land and damage to structures or facilities. All subsidence-caused material damage to land or diminution of the value and reasonably foreseeable use of land is required to be corrected by restoration of the land. Operator responsibility for material damage to structures or facilities resulting from subsidence is tied to liability under State law. The final rule for contemporaneous reclamation allows the regulatory authority to establish schedules that define contemporaneous reclamation. The final rule also provides requirements for obtaining a variance from the requirement of reclamation as contemporaneously as possible for concurrent surface and underground mining. The part containing special permanent program performance standards for concurrent operations is removed as proposed.

EFFECTIVE DATE: July 1, 1983.

FOR FURTHER INFORMATION CONTACT: C.Y. Chen, Division of Engineering Analysis, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; 202–343–3190.

SUPPLEMENTARY INFORMATION:

I. Background
II. Response to Comments and Rules Adopted
III. Procedural Matters

I. Background

On April 16, 1982, OSM proposed permanent program rules (47 FR 16604) to amend 30 CFR 784.20, 817.121, 817.122, 817.124, and 817.126 pertaining to subsidence control, in order to eliminate unnecessary or confusing requirements in the previous rules. For a discussion of the extent of the problem and the legal basis for those rules under the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act), see the **Federal Register** preamble to the proposed rules. The rules adopted today require a subsidence control plan as part of the permit application for an underground mining operation. The subsidence control plan must be submitted and approved before the permit is issued. The final performance standards recognize a distinction between operations that intend to use planned subsidence and those that intend to use available technology to prevent or minimize subsidence. The final rule also distinguishes between damage to land and damage to structures or facilities. All material damage to land that results in a diminution of its value and reasonably foreseeable use must be corrected by restoration of the land. Operator responsibility for damage to structures or facilities is tied to liability under State law.

OSM also, on April 16, 1982 (47 FR 16604), proposed to revise 30 CFR 785.18, 816.79, 816.100, and 817.100 and to eliminate 30 CFR Part 818. These rules pertain to the variance from the contemporaneous reclamation requirement and the minimum distance between surface and underground mines where concurrent surface and underground mining operations will be conducted. These rules implement Sections 515 (b)(12) and (b)(16) of the Act and are adopted as final with some modifications.

A public hearing was initially scheduled for May 13, 1982, but no one requested to testify. The public comment period was initially open until May 17, 1982 (47 FR 16604); was reopened on May 13, 1982 (47 FR 20631); was extended until August 25, 1982 (47 FR 30266, July 13, 1982); and was later extended until September 10, 1982 (47 FR 39201, September 7, 1982). During this comment period, OSM received comments from sources representing industry and associations, environmental groups, and Federal and State agencies. Comments received concerning each of the proposed rules in this rulemaking are addressed below.

II. Response to Comments and Rules Adopted

A. Subsidence Control Plan Requirement—Section 784.20

Authority for this section is found in Sections 102, 201(c), 501(b), 503(a), 505, 507(b) 508(a), 510(b), 515(b), and 516 of the Act.

Section 784.20 sets out minimum requirements for subsidence control plans in permit applications for underground mining activities. The subsidence control plan must be submitted as part of the permit application for the operation.

The introductory paragraph of previous § 784.20 provided for a survey by the operator to be used in determining whether a subsidence control plan would have to be submitted and for conditions under which the regulatory authority could waive the requirement and for a subsidence control plan. The proposed rule would have deleted this paragraph and included the requirements for a survey and a waiver of certain of the subsidence control plan requirements in proposed §§ 784.20(a)(1) and (c). Several commenters supported the attempt to eliminate the uncertainty of whether a subsidence control plan would be required and to require a plan for every underground mining operation. One State commenter recommended that the flexibility and requirements of the previous rule be retained. This commenter also suggested that the applicability of the survey to structures and renewable resource lands be retained as in the previous rule and not be revised to include surface features, such as topographic features.

Numerous commenters expressed confusion concerning the proposed change with respect to the survey requirements of proposed Paragraph (a)(1) and the waiver provisions of proposed Paragraph (c). One commenter was concerned that the survey requirement would be an expansion of the performance standards and that mining would be prohibited under any of the features mentioned in Paragraph (a)(1). This commenter also was concerned that the requirement could be used to prohibit room-and-pillar mining. The commenter suggested revising the language to clarify that the regulatory authority may not disapprove a subsidence control plan unless it fails to meet the performance standards. Another commenter suggested that the survey be eliminated because such a

requirement would be inappropriate for a general subsidence control plan. A commenter suggested that the language of the proposed rule be modified to clarify whether or not consideration of the public health and safety would apply to all the items listed. One commenter asserted that the information required in the general plan would not be sufficient to enable the regulatory authority to make the waiver of the detailed plan in proposed § 784.20(c).

After review of the comments on proposed Paragraphs (a)(1) and (c), OSM has concluded that the proposal did not accomplish the goal of eliminating the uncertainty and ambiguity of the previous rule. In fact, the comments indicate that the proposed rule may have been more confusing than the previous rule. For this reason, OSM has decided to accept the comments suggesting that the previous provision be retained and not to eliminate the introductory paragraph of previous § 784.20.

Thus, proposed Paragraphs (a)(1) and (c) have not been adopted in the final rule. The language of the introductory paragraph of previous § 784.20 has been retained and is repeated in the final rule solely for convenience in understanding the other requirements adopted in the final rule.

Several commenters raised legal objections to OSM's authority to regulate planned subsidence, stating that planned subsidence is exempted by the Act. Other commenters stated that planned subsidence must be allowed, but regulated, and that a subsidence control plan should be required for both planned and unplanned subsidence.

OSM recognizes that Section 516(b)(1) of the Act allows the use of planned subsidence, but does not believe that Congress intended operations that cause subsidence, which could result in material damage or diminution in the value or reasonably foreseeable use of the land surface, to be exempt from the Act's environmental protection performance requirements.

The National Coal Association (NCA) raised the issue of whether a subsidence control plan could be required for planned subsidence. In *In re: Permanent Surface Mining Regulation Litigation*, No. 79–1144, D.D.C. (memorandum opinion filed February 26, 1980), the U.S. District Court upheld the requirement. 14 Envir. Rep. Cas. at 1083. The court reasoned that an operator intending to use a method which completely removes the coal has to establish that the consequent subsidence will occur in a predictable and controlled manner. 14 Envir. Rep. Cas. at 1098. Thus, underground mine operators proposing to use a longwall mining method may not be exempted from the permitting requirements.

In the preamble discussion to the proposed rulemaking (47 FR 16606), OSM stated its interpretation of the exception in Section 516(b)(1) of the Act. Whereas Section 516(b)(1) requires an operator to adopt certain measures to prevent subsidence from occurring, subsidence from longwall mining or any other full-extraction method cannot be prevented. The exception recognizes this and does not require subsidence-prevention measures in such instances. It allows for full-extraction methods to be used which inevitably cause subsidence to occur. OSM's view of the statutory provisions is that the exception does not extend to an exemption from the separate responsibilities to submit a subsidence control plan, or to comply with the environmental protection performance standards. This is consistent with the legislative history of the Act which simply states that the exception "specifically allows for the uses of longwall and other mining techniques which completely remove the coal." H.R. Rep. 95–218, 95th Congress, 1st Session at 126 (1977). Because there is no indication in the legislative history of the exception being as broad as a complete exemption from the other performance standards and permitting requirements of the Act, and in light of the underground mining regulatory provisions upheld by the district court in the permanent program litigation, which is discussed later in this preamble, OSM sees no reason to expand the scope of its regulatory exception.

Consequently, the final rule regulates planned subsidence, as well as operations that plan to prevent or minimize subsidence. The subsidence control plan includes informational requirements as necessary to ensure compliance with the performance standards of § 817.121. This issue is further discussed below in relation to the application of performance standards to operations using planned subsidence.

Final § 784.20 requires a subsidence control plan consisting of seven major elements: (a) a description of the method of coal removal; (b) a map of underground workings describing the location and extent of areas in which planned subsidence is to be used and including those areas in which measures will be taken to prevent or minimize subsidence or subsidence-related damage; (c) a description of the physical conditions that affect the likelihood or extent of subsidence and subsidence-related damage; (d) a description of the subsidence control measures proposed to be taken to prevent or minimize subsidence or subsidence-related damage, except for those areas where planned subsidence will be used; (e) an estimation of the anticipated effects of planned subsidence, if any; (f) a description of measures to be taken to mitigate or remedy any subsidence-related material damage or diminution in value or reasonably foreseeable use of (1) the land or (2) structures or facilities to the extent required under State law; and (g) other information required by the regulatory authority as necessary to demonstrate that the operation will be conducted in accordance with the performance standards of § 817.121 for subsidence control.

The proposed rule would have separated the subsidence control plan into two parts: a general plan and a detailed plan. Several commenters questioned whether there would be sufficient information in the permit application to allow approval of the permit if the detailed subsidence control plan were not included, and whether the subsidence control plan could be approved until the regulatory authority had received public comment on, and approved, the detailed plan. One commenter contended that the requirement that both a general and detailed subsidence control plan be submitted and approved is unworkable. Another commenter was concerned that submittal of a separate detailed plan could result in mining delays if it was not approved in a timely manner by the regulatory authority. This commenter suggested that the review and approval period be clearly stated in the rule.

Upon review of the comments, OSM agrees that the proposed two-tiered concept could have been unnecessarily complex. For this reason, the final rule retains the format of the previous rule and requires a single subsidence control plan that must be approved as part of the permit application before underground workings may proceed into an area.

With the inclusion of the specific elements described above, sufficient information will be contained in the permit application to allow necessary review and permit approval. Any significant revision of the operation that would extend the underground workings into new areas not previously covered by the permit must be approved as part of a permit revision and thereby will be subject to all the public participation and procedural requirements for processing permit revisions.

One commenter complained that OSM's proposed rules were limited to onsite and surface impacts and did not address offsite or underground impacts.

OSM's final rules are not limited to onsite impacts. OSM recognizes that certain offsite areas could be affected by subsidence. The final permitting rules and performance standards apply to all lands that may be affected by subsidence. There is no limitation that these rules would only apply to lands within the permit area.

OSM continues to believe, however, that the subsidence control plan is properly directed only to the evaluation of the surface impacts of underground mines. Section 701(28) of the Act specifically defines underground mining activities regulated under the Act to include only the surface impacts incident to an underground coal mine.

Two commenters stated that insufficient information was required in the detailed plan to evaluate the hydrologic impacts. These comments are rejected. The commenters appear to have misunderstood the purpose of the subsidence control plan. Information required to evaluate hydrologic impacts is required under the rules covering hydrologic impacts. OSM is aware that underground mining and related fracturing of the geologic structure overlying a mine can result in disruption to ground-water resources and that these changes may have a surface impact. However, it is unnecessary to extend the subsidence control plan to include general hydrologic impacts. The performance standards of Section 516 of the Act and the permitting requirements of Sections 507 and 508 of the Act contain extensive requirements relating to protection of the hydrologic balance. These requirements are included in the hydrology rules. Among the permitting requirements is a requirement that the applicant provide an analysis of the probable hydrologic consequences of mining. This analysis must include potential hydrologic consequences from underground mine workings. The subsidence control plan requirements need not be unnecessarily complicated by including provisions that are duplicative of other requirements of the rules. As OSM has previously stated, these impacts are more appropriately considered in the context of the permitting requirements and performance standards for protection of the hydrologic balance (see 47 FR 16605, April 16, 1982).

One commenter also expressed concern about the potential impacts of underground mining on property rights in the West. OSM has not changed the rule in response to the comment. OSM does not have authority to require protection of water rights that may be impacted by underground mining. If an individual's water rights acquired under State law are affected by underground mining, the appropriate avenue for relief is through State water laws. Although OSM is concerned with protecting the hydrologic balance, OSM does not intend to regulate water rights through the subsidence control plan. Adoption of the revised rules in a State regulatory program will not alter the State's water-law regime.

One commenter suggested that Subchapter D of 30 CFR Part 211 be referenced in the preamble to ensure public awareness of the responsibilities of the Minerals Management Service. OSM accepts the comment. If underground mining is to be conducted on Federal lands containing federally leased coal, the operator must also comply with the rules in Part 211.

OSM received numerous comments with respect to the information that must be contained in the subsidence control plan. One commenter suggested that the informational requirements of the previous rule be retained. Several other commenters asserted that some of the general information and all of the detailed subsidence control plan information is totally unnecessary, particularly when the operator has the right to cause subsidence or is using a mining technique which will result in planned subsidence or no subsidence. Two commenters remarked that the rules should recognize that different types and levels of information are appropriate for the two kinds of areas: One where subsidence is planned and another where it is unplanned. One of the commenters recommended that only the general plan should be required where maximum mine stability is to be provided, whereas a detailed plan should be required for areas where planned subsidence is used. Other commenters suggested that different levels of information be required for both planned and unplanned subsidence and that the survey requirement be included in the detailed plan. Another commenter suggested that detailed information should be provided in the subsidence control plan both for areas of planned subsidence and for areas where subsidence is not planned, since both could have significant impacts.

All of the comments received on the proposed rule have been considered in the development of the subsidence control plan requirements of the final rule. As previously indicated, OSM is rejecting those comments that suggested that no subsidence control plan be required for areas where planned subsidence will be used. The subsidence control plan requirements will apply to all types of underground mining. Section 784.20(d) does, however, recognize that operations where planned subsidence is used do not necessarily use subsidence control measures designed to prevent or minimize subsidence. Rather, such mining operations are designed to allow subsidence as mining progresses. For this reason, the requirement to provide information on subsidence control measures does not apply to areas where planned subsidence is to be used.

One commenter contended that OSM's preamble discussion in the proposal provided no qualification for not requiring information at an equal level of detail for longwall and for room-and-pillar retreat-mining operations. The final rule does not distinguish between longwall and room-and-pillar mining. Rather, it makes a distinction between operations which will use planned subsidence, and those which will use measures to prevent or minimize subsidence. Both longwall and room-and-pillar mining have been given equal consideration during the rulemaking. If a room-and-pillar retreat-mining operation will result in planned subsidence, as in the longwall mining method, the information required will be that applicable to all operations using planned subsidence.

Section 784.20(a)

Paragraph (a) of the final rule requires a description of the method of coal removal, such as longwall mining, room-and-pillar removal, hydraulic mining, or other extraction methods, including the size, sequence, and timing for the development of underground workings. This section includes the requirements of proposed Paragraph (a)(2), with the addition of the size, sequence, and timing requirements. This latter information is needed to provide an overall areal and temporal perspective on the operation. No comments related to proposed § 784.20(a)(2) were received.

Section 784.20(b)

Paragraph (b) of the final rule requires the subsidence control plan to contain a map of the underground workings which describes the location and extent of areas in which planned-subsidence mining methods will be used, and which include all areas in which measures will be taken to prevent or minimize subsidence or subsidence-related damage. This paragraph combines the requirements of proposed Paragraphs (a)(3) and (b)(1) into one provision. It does not distinguish between a general and a detailed subsidence control plan.

Section 784.20(c)

Paragraph (c) of the final rule requires a description of the physical conditions, such as depth of cover, seam thickness, and lithology, which affect the likelihood or extent of subsidence and subsidence-related damage. This section includes the requirements of proposed Paragraph (b)(2), with minor editorial changes.

One commenter remarked that more information, such as calculation of the strength of the floor, roof, and coal seam, should be added to the description required by proposed Paragraph (b)(2). This comment is rejected. The state of the art in subsidence analysis is imprecise and will vary depending upon site-specific conditions and past mining experience under similar circumstances. For this reason, the final rule does not attempt to provide an extensive listing of detailed informational requirements to be included in the subsidence control plan. Rather, final § 784.20(c) requires information relating to the basic physical characteristics of the mine which affect the likelihood or extent of subsidence and subsidence-related damage. The final rule, however, recognizes that under certain conditions additional information may be necessary to enable the regulatory authority to assess the likelihood that the operation will be able to comply with the performance standards relating to subsidence. For this reason, a new Paragraph (g) has been added to the final rule to enable the regulatory authority to require the submission of additional information as necessary to ensure compliance with the performance standards of § 817.121 for subsidence control.

Section 784.20(d)

Paragraph (d) of the final rule requires, except for those areas where planned subsidence is projected to be used, a detailed description of the subsidence control measures that will be taken to prevent or minimize subsidence or subsidence-related damage, including but not limited to: (i) backstowing or backfilling of voids; (ii) leaving support pillars of coal; (iii) leaving areas in which no coal removal is planned; (iv) taking measures on the surface to prevent material damage or lessening of the value or reasonably foreseeable use of the surface; and (v) monitoring to determine the commencement and degree of subsidence so that other appropriate measures can be taken to prevent or reduce material damage. For areas where no coal removal is planned, the description must include a description of the overlying area to be protected by leaving the coal in place. Areas where the different subsidence control measures will be used must be shown on the map required under Paragraph (b) of the final rule. This section includes the requirements of proposed paragraph (b)(3) and contains many of the requirements of previous § 784.20(b).

One commenter suggested that the words "subsidence and" be deleted from proposed § 784.20(b)(3) for the reason that the concern should be only to prevent or minimize subsidence damage, not subsidence. This suggestion is rejected. The final rule recognizes two types of mining: Mining operations that propose to use planned subsidence, and those operations that propose to use mining techniques to prevent or minimize subsidence and subsidence-related damage. For those operations that plan to comply with the performance standards by preventing or minimizing subsidence, it is important for the regulatory authority to understand what measures will be used to accomplish that goal.

One commenter requested that proposed § 784.20(b)(3) be reworded, relocated, or eliminated. He contended that the detailed plan should be limited to planned subsidence and that to require information on mining techniques used to prevent or minimize subsidence in a detailed plan is not practical. OSM disagrees with the commenter. An important aspect of meeting the performance standards for subsidence control is to use measures consistent with known technology in order to prevent subsidence causing material damage to the extent technologically and economically feasible. In order for the regulatory authority to ensure compliance with this requirement, it must have knowledge of the measures the operator proposes to use to prevent or minimize subsidence and subsidence-related damage.

Another commenter remarked that the list of possible measures that might be taken to prevent or minimize subsidence-related damage which appeared in the previous rule as examples should not be eliminated. Examples of technologies that may be used generally are more appropriately addressed in documents such as handbooks rather than in rules. However, in this case some additional guidance to the operator and the States may be appropriate and OSM has decided to accept the commenter's suggestion. Final § 784.20(d) includes examples from previous § 784.20(b)(2) and (3) of measures that may be taken to control subsidence or subsidence-related damage.

Section 784.20(e)

Paragraph (e) of the final rule requires a description of the anticipated effects of planned subsidence, if any. This paragraph continues the requirement of previous § 784.20(b)(1). Proposed paragraph (b)(4), which would have required a projection of the vertical and areal extent of subsidence for both planned and unplanned subsidence, has not been adopted.

Several commenters objected to the provision requiring a prediction of the extent of subsidence where the operator is not using planned subsidence. One commenter disagreed with OSM's focus on "expected subsidence" in proposed § 784.20(b)(4) and (5). Some other commenters indicated that no distinction should be made between "expected" and "unexpected" subsidence. One commenter suggested that the portion of proposed § 784.20(b)(4) requiring a description of areas in which no subsidence is expected be deleted.

In response to these comments, OSM has decided not to adopt proposed § 784.20(b)(4). Rather, the final rule continues to apply the standard of the previous rule which requires a description of the anticipated effects of planned subsidence, if any. It does not require a prediction of expected subsidence or subsidence that may result from mining methods that do not use planned subsidence. OSM recognizes the speculative nature, based on existing techniques, of predicting subsidence in areas where planned subsidence is not used. For such situations the final rule does not require such a prediction, but rather returns to the concept of the previous rule, which emphasizes consideration of the measures proposed to be taken to prevent or minimize subsidence.

One commenter pointed out the difficulty in predicting subsidence and suggested that guidelines for subsidence prediction and control be developed and disseminated. Another commenter suggested that the requirement in proposed § 784.20(b)(4) for supporting analyses be amplified with references. Another commenter asserted that the proposed rule should be deleted because there are no sound predictive models for subsidence.

Literature on subsidence was discussed in the preamble to the previous rule and has not been repeated here. OSM has not yet developed a guidance manual for subsidence prediction, but it may conduct or

sponsor research on this subject in the future. OSM recognizes the limited availability in this country of predictive models for subsidence. However, the state of the art in subsidence prediction for areas of planned subsidence has reached the stage where it is reasonable to require the operator to provide an estimation of the anticipated effects of planned subsidence.

Another commenter suggested that the requirements be clarified to indicate that subsidence should be "determined by the application of prudent mine engineering principles." OSM believes that no rule change is necessary in response to this comment. It is implicit that all areas, whether they are areas of planned subsidence or areas where subsidence is not planned, should be evaluated by the application of prudent mine-engineering principles.

One commenter asserted that the information required in proposed § 784.20(b)(6) for room-and-pillar mining was excessive and burdensome and, therefore, suggested that this section be eliminated. Another commenter contended that the requirement in proposed § 784.20(b)(6) was improperly located within the detailed plan because if a mine operator is planning a room-and-pillar mine without some sort of near total-extraction retreat or secondary-recovery plan, planned subsidence will not occur.

The final rule does not require the information specified in proposed § 784.20(b)(6) to be submitted in a subsidence control plan. Basic information, such as whether an operator proposes to use support pillars as a subsidence control technique, must be specified in the plan, together with a description of the areas where such measures will be used. Additional information may be required by the regulatory authority. However, the detailed description of the size, configuration, and approximate location of pillars and entries, extraction ratios, and other information applicable to room-and-pillar mining may not be known at the time the permit application is submitted. Such information will not be completely developed until mining begins. Thus, the final rule requires an operator to submit sufficient information as part of the subsidence control plan to allow the regulatory authority and the public to assess whether a permit should be issued. As an additional measure of environmental protection, after a permit is issued and before an area is mined, an operator will have to submit more detailed information to confirm for the regulatory authority that the operator is following the subsidence control plan and is performing the detailed planning necessary to conform with the performance standards. Thus, the informational requirements of proposed § 784.20(b)(6) are set forth in new final § 817.121(g) rather than in these permitting rules.

Section 784.20(f)

Paragraph (f) of the final rules requires a description of the measures to be taken, in accordance with § 817.121(c), to mitigate or remedy any material damage or diminution in value or reasonably foreseeable use of the land surface due to subsidence. This paragraph includes the requirements of proposed paragraph (b)(5). One commenter recommended the deletion of the phrase "that may occur due to expected subsidence" in the proposed rule. This comment has been accepted, and the final rule deletes the language referring to "expected subsidence." Final § 784.20(f) tracks final § 817.121(c) and clarifies that the mitigative or remedial measures apply only to material damage to (1) the land or (2) structures or facilities to the extent required under State law.

One commenter suggested that the examples of mitigative measures that may be used and which are contained in previous § 784.20(c) should be retained. This comment has not been accepted. The mitigative measures that are required are in final § 817.121(c). Therefore, there is no need to repeat that information in § 784.20.

Another commenter recommended that the language of proposed § 784.20(b)(5) be replaced with "a statement by the operator that he will mitigate or remedy any material damage or diminution in value or foreseeable use that may occur due to unexpected subsidence" and contended that this will allow the operator to treat surface disturbance on a case-by-case basis.

OSM has rejected this comment and is requiring the operator to provide a description of the proposed measures in the subsidence control plan. However, the performance standards as adopted in final § 817.121 allow the operator ample opportunity to determine the method of treating the surface disturbance on a case-by-case basis. Revision of the language, as suggested, is therefore not necessary.

Section 784.20(g)

Paragraph (g) of the final rule requires other information, specified by the regulatory authority, as necessary to demonstrate that the operation will be conducted in accordance with the performance standards of § 817.121 for subsidence control. This section has been included to ensure that the regulatory authority has the flexibility to require the subsidence control plan to consider site-specific circumstances as necessary to ensure compliance with the applicable performance standards.

One commenter requested that the requirements of previous § 784.20(d), which required a description of measures to be taken to determine the degree of damage caused by subsidence, be retained. This commenter suggested that the requirement should be explicit in the rule so it can be readily understood by operators, regulatory authorities, local officials, and concerned public. This comment has not been accepted. It is not necessary to impose this additional requirement in the subsidence control plan. It may be to the operator's advantage to conduct presubsidence surveys or monitoring to avoid unnecessary liability or complications with the surface owners. However, the Act does not require the operator to conduct such surveys or monitoring. Further, to the extent that such measures are applicable to other aspects of the subsidence control plan, they can be included as an element of the plan (for example, under paragraph (d)(v) of the final rule).

One commenter suggested that a provision be added in proposed § 784.20(b) to ensure that confidential information so marked will not be made public. OSM recognizes that certain information submitted by the permit applicant may be held confidential. Confidential information is protected under Sections 507(b)(17) and 508(a)(12) of the Act which are implemented in other parts of the regulations. It is not necessary to add additional requirements to protect the confidentiality of information submitted with the subsidence control plan.

One commenter was concerned that the subsidence caused by auger mining was not addressed in the proposed subsidence control rule. This issue has been addressed in Part 819, the final rules for auger mining (48 FR 19314, April 28, 1983).

One commenter asserted that OSM still has not addressed the liability associated with an underground mine located above another which is mining under a structure where material damage occurs.

Material damage caused from multiple-seam underground mining by the same or by different operators at the same or different times is a case-specific and complicated matter. The information required under the subsidence control plan in the final rule gives the operator an opportunity to

describe the mining techniques that will be used and measures that will be taken to prevent or minimize subsidence and subsidence-related damage. This information, together with other required information, will enable the regulatory authority on a case-by-case basis to be made aware of other active or abandoned mines and evaluate the situation before the permit is issued. If subsidence causes material damage to a structure or facility, the operator, under final § 817.121(c), may be liable if liability is imposed under State law. Responsibility to restore the land itself depends upon the actual cause of the damage. OSM will not address the matter in more specific terms.

B. Subsidence Control Requirements—Sections 817.121 and 817.122

Section 817.121 provides performance standards for subsidence control. It implements Sections 516(b)(1) and 516(c) of the Act and also reflects the provision of Section 516(b)(10) for surface impacts not otherwise specified in Section 516(b) to apply the requirements of Section 515 with modifications to recognize the distinct differences between surface and underground mining. It is also based in part of Section 507(f) of the Act.

The provision for surface-owner protection in the proposed rule is changed in final § 817.121(c). The proposed paragraph contained little change from previous § 817.124. The underground mine operator would have been given several options to remedy all material damage caused by subsidence. The final rule establishes a distinction between damage to land and damage to structures or facilities. As discussed below, all subsidence-caused material damage to the land is required to be repaired. Operator responsibility for material damage caused to structures or facilities is tied to liability under State law. If the operator has no liability under State law, the material damage need not be repaired and compensation need not be paid.

Section 817.121(a)

Paragraph (a) implements Section 516(b)(1) of the Act. It requires the underground mine operator to adopt measures consistent with known technology to prevent subsidence causing material damage to the extent technologically and economically feasible, to maximize mine stability, and to maintain the value and reasonably foreseeable use of surface lands. As an alternative, the operator may adopt a mining technology which causes planned subsidence to occur in a predictable and controlled manner. The paragraph also provides that nothing in Part 817 is to prohibit the standard method of room-and-pillar mining. The rule is being made final as proposed.

One commenter believed that the phrase "consistent with known technology" should be removed because the phrase "to the extent technologically and economically feasible" adequately covers the technological aspects of what is possible in the area of subsidence control. This commenter also contended that OSM has added extra and superfluous requirements to the paragraph and therefore the rule has become less flexible. This commenter also questioned the term "value" as being extremely nebulous so that it could be construed to pertain to almost anything.

The paragraph was proposed to be revised to make clear that mining methods resulting in planned subsidence were not prohibited. 47 FR 16606, April 16, 1982. The previous rule, although tracking Section 516(b)(1) of the Act, did not contain the exception for mining methods using planned subsidence. With the addition of the provision recognizing the right to use mining methods resulting in planned subsidence, more flexibility is afforded the operator.

The phrase which the commenter suggests deleting is taken from Section 516(b)(1) of the Act. The commenter assumes that measures that are consistent with known technology are ones which are necessarily technologically feasible; in other words, the phrase adds nothing to the rule. The important point is that the regulatory authority cannot require the operator to adopt measures which are beyond the state-of-the-art in subsidence control. The regulatory authority cannot, in effect, require the operator to adopt experimental methods to prevent subsidence. The phrase does add a limitation, but it may be one which is overshadowed by the "technologically and economically feasible" limitation. Since the phrase is taken from the Act, it will not be deleted from the rule.

With respect to the comment that the term "value" is nebulous, the commenter does not suggest any alternative. Again, the term is found in Section 516(b)(1) of the Act. To define the term in the rules could unreasonably restrict the latitude of the regulatory authorities in carrying out their programs. Moreover, Section 101(c) of the Act describes the adverse effects which coal mining can cause, and Section 102(d) provides that the Act is to assure that the environment is protected. Thus, the surface effects of underground mining are regulated in order to assure the maintenance of the value of the land and its reasonably foreseeable uses. For these reasons, no change is made in the paragraph.

Section 817.121(b)

Paragraph (b) requires the underground mine operator to comply with the subsidence control plan approved by the regulatory authority under § 784.20. This provision continues the requirement of previous § 817.121(b). The paragraph recognizes that the subsidence control plan submitted as part of the permit application will contain the standard to which the operator must adhere.

One comment was received which asserted that the plan referred to in the proposed paragraph was ambiguous. The commenter indicated that, since both general and detailed subsidence control plans were proposed to be added to the rules, in § 784.20 (a) and (b) (47 FR 16606–16609), it was unclear to which subsidence plan reference was made. The final rule does not adopt the proposed two-tiered subsidence control plan. For this reason, the possible ambiguity to which the commenter referred has been eliminated and no change is deemed necessary. Although approval of the more detailed information submitted under § 817.121(g) is not required prior to an area being mined, that information will describe how the plan is being implemented.

Section 817.121(c)

Paragraph (c) establishes the operator's responsibility for material damage caused by subsidence. The statutory authority for its provisions are Sections 516 (b)(1) and (b)(10), 515 (b)(2) and (b)(3), and 507(f) of the Act.

A revision to § 817.121(c) has been made as a result of the comments received and in light of the February 1, 1983, order of the U.S. Court of Appeals for the District of Columbia Circuit in *In re: Permanent Surface Mining Regulation Litigation*, No. 80–1810. In remanding the case to the U.S. District Court, the Court of Appeals directed the Secretary of the Interior to consider the issues and arguments in that appeal as part of the administrative record on the proposed rules. The validity of the surface-owner protection provision, § 817.124 of the previous rules, was an issue in that case and must be considered as part of this rulemaking.

A basic liability distinction is recognized by the two paragraphs of final § 817.121(c): (1) Liability for subsidence-caused damage to land is provided for under the Act, and therefore the underground mine operator has a duty to restore all land which is

materially damaged; and (2) liability for damage to surface and subsurface structures and facilities under Section 507(f) of the Act is tied to liability under State law. Within these differences, the options open to the operator under the previous and proposed rules have been restructured for clarity, but generally are encompassed under the final rule. Material damage to land must be remedied and the affected land restored. However, material damage to structures and facilities need be remedied or money damages paid only if the operator is liable under State law. The applicable remedies will continue to include rehabilitation, restoration, or replacement of damaged structures or facilities. Compensation may continue to be accomplished by the purchase, prior to mining, of a noncancellable premium-prepaid insurance policy.

The previous subsidence control rules did not provide for a situation where the operator has purchased a structure overlying the underground workings, where the operator has purchased the right to cause subsidence under a structure, or, as in the State of Pennsylvania, where State legislation has established subsidence responsibilities for different classes of structures. The previous rules did not allow the operator the alternative of not repairing damaged structures where he or she had no legal liability under State law. To more closely follow the provisions of Sections 507(f), 515, and 516 of the Act, the rule is changed to accommodate situations in which under State law the operator is not liable for subsidence damage to structures. However, the duty to restore land materially damaged by subsidence will apply irrespective of the operator's liability under State law for damage to structures and facilities.

A number of comments addressed general features of proposed § 817.124(c). One commenter concurred with the statement in the preamble of the proposed rule (47 FR 16606–16607) that the operator is required to remedy subsidence-caused material damage regardless of whether a subsidence control plan has been submitted and approved. Although § 817.121(b) requires the underground mine operator to comply with the subsidence control plan, paragraph (c) establishes responsibilities independent of the submission and approval of a plan. No change in the rule is necessary as a result of the comment.

Another commenter expressed the concern that the proposed paragraph did not require the correction of material damage caused to subsurface features, such as a subsurface drainage or irrigation system. The commenter also advocated a change in the requirement that remedial work be undertaken promptly. The commenter's contention was that subsidence may occur over an extended period of time. Taking remedial action as soon as subsidence starts may prove futile if it continues over a prolonged period.

OSM does not agree with the first part of the comment. As previously indicated, Section 701(28) of the Act only applies to surface impacts incident to underground mines. Manmade features such as irrigation or drainage systems, either surface or subsurface, however, will be subject to the provisions of § 817.121(c)(2) since they necessarily relate directly to a surface activity.

OSM has accepted the second part of the comment and removed the provision that required prompt action by the operator. If prompt or immediate remedial action is called for, such as jacking up a building or providing additional temporary support for the walls or foundation of a structure, the regulatory authority can require the operator to take the necessary temporary measures until it is determined that the full extent of damage has occurred. When that determination is made, the operator can then either undertake permanent restoration work on the structures or facilities or pay money damages to the owner for the diminution in value. No additional language is considered necessary to provide for the regulatory authority's discretion to require that permanent remedial measures be deferred until the full extent of the subsidence has occurred.

Several commenters contended that OSM does not have the authority to require operators to compensate surface owners for surface damage and that compensation for surface owners should be governed by State law or, according to one commenter, be left to common law.

Some commenters stated that under proposed § 817.121(c) the operator's liability was unknown and open-ended. One commenter indicated that this rule would constitute an unlawful taking of property. According to several other commenters, it would also impair contracts between operators and surface owners.

One commenter suggested that the language of this rule be revised to require the operator to restore the land surface to the extent technologically and economically feasible and leave the correction of surface-structure damage to applicable State laws. One commenter from Pennsylvania suggested that it may even be appropriate to grant Pennsylvania a "State window" on subsidence rules, under 30 CFR 731.13.

The duty to restore the land arises from sections 515(b)(2), 516(b)(1), and 516(b)(10) of the Act. Under Section 516(b)(10), the performance standards of Section 515 are made applicable with respect to surface impacts not specified in Section 516(b). Section 516(b)(1) deals with the prevention of subsidence causing material damage, not remedial measures. The provision does not address the issue of the operator's liability once subsidence has caused material damage. Therefore, provisions of Section 515 are made applicable to the extent they pertain to remedial measures. Section 515(b)(2) of the Act requires an operator to restore affected *land* to a condition capable of supporting its premining uses, or higher or better uses. Although the proviso to Section 516(b)(10) of the Act directs the Secretary to make such modifications as are necessary to accommodate the distinct differences between surface and underground mining, there are no such differences which would necessitate not applying the restoration standards to lands materially damaged by subsidence. The district court in *In re: Permanent Surface Mining Regulation Litigation*, memorandum opinion filed February 26, 1980, 14 Envir. Rep. Cas. 1083, upheld the surface-owner protection provision and its restoration provision in previous § 817.124, on the grounds that it was supported by Section 515(b)(2) of the Act. Section 515(b)(2) only establishes a duty to restore the land which OSM views as extending only to the land in its unimproved or natural state. Thus, where both land and structures are materially damaged and where it would be easier for the operator to pay money damages to the surface owner, if there is liability under State law, rather than undertake any repair to the structure, the operator is nevertheless responsible for restoring the land. To the extent that restoration of the land causes further damage to structures and facilities, operator liability for that further damage will be determined under Section 507(f) of the Act in accordance with State law.

The authority of OSM to require an operator to compensate an owner for material damage to structures or facilities resulting from subsidence or to repair of such material damage derives from Section 507(f) of the Act. This authority was upheld by the district court in *In re: Permanent Surface Mining Regulation Litigation, supra*, and

was one of the issues on appeal that must now be considered. Section 507(f) of the Act requires liability insurance for personal injury and property damage in an amount adequate to compensate any persons damaged as a result of surface coal mining and reclamation operations who are entitled to compensation under the applicable provisions of State law. Although the previous rule did not limit the compensation requirement to situations where liability exists under State law, a more precise reading of the Act requires the imposition of such a constraint in this final rule. This rule continues the previous provision requiring operator responsibility for material damage to structures or facilities to the extent an owner is entitled to compensation under State law.

This change in § 817.121(c) lessens the concern that the contract in which the operator may have obtained the right to subside the surface under a structure will be impaired. One commenter pointed out the possible constitutional infirmity of State laws, which are a necessary consequence of a State obtaining primary regulatory responsibility, impairing the contract entered into between the purchaser or owner of the coal and the surface owner in which the surface owner may have waived the right to subjacent support. This issue will be avoided to the extent a waiver of surface support is recognized under State law because it will be given effect with respect to structures and facilities under § 817.121(c)(2). To the extent that such a waiver includes damage to the land, it will not be recognized. Section 817.121(c)(1) requires restoration of the land surface in all instances of material damage. No unconstitutional impairment of a contract is worked by the requirement for restoration of the land. The constitutionality of the Act has been unheld, although the issue raised in this comment was not involved. *Hodel v. Va. Surface Mining and Reclam. Ass'n,* 452 U.S. 264 (1981) and *Hodel v. Indiana,* 452 U.S. 314 (1981). Because the Act is a valid exercise of the power to regulate interstate commerce, the contention is incorrect that a contractual right not to restore materially damaged land would be impermissibly impaired.

One commenter, representing the bituminous coal mining industry in Pennsylvania, argued that the legislative scheme established in that State, the Bituminous Mine Subsidence and Land Conservation Act of 1966 (Purdens), 52 Pa. Stat. Ann., Section 1406 *et seq.,* which establishes classes of protected structures, Section 4, should be given deference. The change in this paragraph allows the Pennsylvania legislature's choice to protect certain classes of structures to stand. Thus, in Pennsylvania an occupied dwelling which is materially damaged either will have to be repaired by the operator or the owner will have to be compensated for the diminution in value, as the Bituminous Mine Subsidence Act now provides, if the dwelling was in existence when that act was passed into law in 1966. However, in other States which have not enacted special subsidence legislation, the uncodified State law will determine whether the operator is liable to a surface owner. Generally, the surface owner is entitled to a right of subjacent support. Thus, any damage to the surface owner's property would give rise to a claim against the mine operator. Liability of the operator where the owner of the surface facility may have conveyed the right to support or may have waived it will also be left to determination under State law.

One State requested that the rule be republished as a proposed rule if it is to be modified. While the final rule does represent a modification of the proposal, all changes are within the scope of the proposal. They have been made as the result of comments, in light of the remand order of the Court of Appeals and on the basis of OSM's reading of the Act. Therefore, the requested further comment period is rejected.

Section 817.121(d)

Section 817.121(d) establishes a class of structures and features to which greater protection is owed because of their public character or important nature. For these features, it is particularly important that damage be prevented before it occurs and not that damage can be corrected afterwards. Specifically, § 817.121(d) provides for the protection of public buildings and facilities; churches, schools, and hospitals; and impoundments with a storage capacity of 20 acre-feet or more or bodies of water with a volume of 20 acre-feet or more. It requires the underground mine operator to demonstrate to the regulatory authority that mining activities underneath or adjacent to such areas will not cause material damage or reduce the reasonably foreseeable use of those features or facilities. If the operator cannot so demonstrate, underground mining is prohibited in those areas. It also provides discretion to the regulatory authority to protect such features or facilities and any aquifer or body of water that serves as a significant water source for any public water supply system from material damage by limiting the percentage of coal extracted under or adjacent thereto.

Paragraph (d) is founded on the authority in Sections 516(b)(1), (b)(7), (b)(8), (b)(9), and (c) of the Act among others. Section 516(b)(1) requires the adoption of measures to prevent subsidence and Section 516(c) recognizes a separate class of structures and areas for which greater protection is necessary. The district court in *In re: Permanent Surface Mining Regulation Litigation, supra,* upheld previous § 817.126, which is similar to final § 817.121(d). 14 Envir. Rep. Cas. at 1109. In that case, industry's opposition to the provision was that there was no statutory authority for the prohibition feature of the section. However, the court upheld the rule, citing Section 516(b)(1) as general authority and Section 516(b)(9) as authority for the inclusion of streams, bodies of water, and aquifers. The validity of previous § 817.126 was appealed and must be considered in this rulemaking in accordance with the previously referenced remand order of the U.S. Court of Appeals.

It is OSM's view that final § 817.121(d) has a statutory basis for the reasons cited in OSM's brief to the U.S. Court of Appeals in the earlier case. However, on the basis of the comments on the proposed rule, several changes are made in the final rule. Section 817.121(d)(1), which provides protection for public buildings and facilities, tracks previous § 817.126(c). Paragraph (d)(2) as proposed would have provided special protection for private facilities generally used by the public, such as churches, schools, and hospitals. To reduce uncertainty in application of this requirement which could have been interpreted more broadly than was intended, the final rule simply provides special protection for *all* churches, schools, and hospitals. This portion of the rule is broader than its predecessor, § 817.126(c), which applied only to public buildings.

Section 817.121(d) (3) and (4), as proposed, would have required a showing of no material damage for bodies of water, including streams, impoundments, and aquifers. This is changed in the final rule to require a showing of no material damage only for mining under or adjacent to impoundments with a storage capacity of 20 acre-feet or more or bodies of water with a volume of 20 acre-feet or more. The second sentence of the proposed paragraph, which would have authorized the regulatory authority to prohibit or limit the amount of coal

extracted from under the facilities listed in the first sentence, is changed in the final rule to extend the authorization to limit coal extraction to aquifers or bodies of water that serve as a significant source for any public water supply system. Thus, the protection afforded aquifers and bodies of water, except for the specified impoundments or bodies of water, is now found in the second sentence of the paragraph. The explicit authority to prohibit mining has been removed because authority to limit the extent of coal extraction provides the necessary protection. The showing required for mining under perennial streams in proposed paragraph (d)(3) is removed in the final rule. The special protection afforded perennial streams is now limited to the power of the regulatory authority to suspend operations under paragraph (f) where an imminent danger is presented. This additional protection for streams is also unnecessary in light of the other rules implementing hydrologic-balance protection under Sections 510(b)(3) and 516(b)(9) of the Act.

Some commenters contended that proposed paragraph (d) cannot be founded on Sections 516(b)(1) and 516(c) of the Act and is in conflict with the Act. Several commenters asserted that OSM lacks authority to create areas where mining is prohibited for the purpose of subsidence control. Also, a number of commenters objected to OSM's attempt to create areas where mining may be prohibited for the purpose of subsidence control and contended that the proposed paragraph was unreasonable, impossible, and unworkable. One commenter stated that the prohibition of mining in certain areas infringes upon the right of private ownership of property and suggested that this paragraph be deleted.

OSM disagrees. Section 817.121(d) does have a statutory basis, as noted above. The rule does not prohibit mining, it merely requires an advance showing or other measures to ensure that the potential for subsidence will be minimized and that material damage will not occur.

Section 817.121(e)

Proposed paragraph (e) would have required the operator to remedy any subsidence-caused material damage and authorized the regulatory authority to suspend operations in order to modify the subsidence control plan when damage occurs. It is based on the statutory authority of Sections 516 (b) and (c).

The paragraph is modified in the final rule on the basis of the comments received and the intent not to repeat the requirements of § 817.121(c). Rather than directing that remedial measures be undertaken once damage has occurred and specifically stating that steps be taken to prevent further damage, the final rule authorizes the regulatory authority to suspend mining under or adjacent to the features and facilities protected under paragraph (d) until the subsidence control plan is modified to prevent further material damage. Because the operator has to comply with his or her subsidence control plan, by implication the necessary steps will be taken.

One commenter suggested that "in the area of mining" be added immediately after "If such damage occurs, the regulatory authority may suspend further mining." The suggestion was made to clarify that the suspension of mining is only for the specific area where subsidence is causing material damage.

On the basis of this comment, the phrase "under or adjacent to such features or facilities" is added to the sentence after the provision for the suspension of operations. Thus, the regulatory authority may not suspend mining operations unless they are under or adjacent to the featues and facilities listed in paragraph (d).

Another commenter contended that proposed § 817.121(e) was beyond the statutory authority and is impractical. The paragraph is modified to remove the directive to undertake remedial measures once material damage affects the features and facilities listed in paragraph (d). The operator's responsibility for remedial measures is found in paragraph (c) and need not be repeated. The final rule is now tied to modification of the plan. It imposes the realistic obligation of plan modification. There is a need to modify the plan because it was based on a determination that mining under or adjacent to the specially protected features and facilities would not cause material damage.

Several commenters stated that the provisions of this paragraph present several legal and practical problems because the operator could be subject to summary suspension of mining until his or her subsidence control plan is modified.

A suspension of mining is justified by the need to prevent further material damage to important surface features. The approval of a permit, including the subsidence control plan, is premised upon a finding that no material damage will occur to the specified features or facilities. If such damage has occurred, then that finding is no longer correct. Modification of the subsidence control plan is thus necessary for the permit to remain valid. In these situations, the practical problems of the operator are outweighed by the need to protect the particular facilities.

Section 817.121(f)

Paragraph (f) requires the regulatory authority to suspend operations when an imminent danger is presented to inhabitants of urbanized areas, cities, towns, and communities and areas adjacent to industrial or commercial buildings, major impoundments, or perennial streams. It directly implements Section 516(c) of the Act.

No comments on the paragraph were received. It is promulgated as proposed.

Section 817.121(g)

Proposed § 817.121(g) would have required the operator to submit a detailed subsidence control plan to provide the regulatory authority with information to evaluate the operator's estimate of the extent of expected subsidence and to determine whether the operator's plan is in compliance with the performance standards. As indicated above, OSM received numerous comments objecting to the detailed subsidence control plan.

The final rule deletes the requirement for a detailed subsidence control plan. Rather, it incorporates many of the aspects of the detailed plan in the requirement for a single subsidence control plan to be submitted with the permit application. As discussed earlier in this preamble, other aspects of the detailed subsidence control plan applicable to the evaluation of compliance with the performance standards have been included in the performance standard requirements of final § 817.121(g). Under this section, an operator is required to demonstrate compliance with the performance standards by submission of a detailed plan of the underground workings under a schedule approved by the regulatory authority. The detailed plan must include maps and descriptions, as appropriate, of significant features of the underground mine, including the size, configuration, and approximate location of pillars and entries, extraction ratios, measures taken to prevent or minimize subsidence and related damage, areas of full extraction, and other information required by the regulatory authority.

The final rule reflects a recognition of the difficulty in inspecting underground workings from the surface. It is important that the regulatory authority be provided information on the underground activities by the operator so that compliance with the

performance standards can be evaluated and documentation provided of compliance with the technology-based requirements of the subsidence control plan. This revised requirement also recognizes that the plan for underground mining necessarily progresses on the basis of the best information existing at any point as the mining proceeds. Information gathered underground on roof- and floor-rock conditions, safety hazards, and other features of the underground mine necessarily require a high degree of flexibility in development of the detailed plan for mining underground. Typically, this plan is revised on a near-daily basis as mining proceeds. The final rule recognizes this situation.

On the other hand, the subsidence control plan, submitted with the permit application, provides information on the underground areas where specific types of control technologies will be used, but does not require extensive information on the details of the underground workings. Submittal of such information can properly be delayed until the details of the mining operation are known more precisely. Thus, the final rule requires the submission of such information as a performance standard requirement while still providing the regulatory authority with the information necessary to evaluate a permit application, to monitor the impacts of mining on the surface, and to ensure compliance with the other performance standards.

The final rule also clearly provides that, upon request of the operator, information provided with the detailed plan may be held as confidential in accordance with the requirements of 30 CFR 773.13(d). The reference to § 773.13(d) is based on the expected revision to that section published in Volume III of OSM's "Final Environmental Impact Statement OSM–EIS–1: Supplement." If that provision is not revised, a conforming technical amendment to this rule will be issued.

Section 817.122

Final § 817.122 provides for notice to persons who may be affected by subsidence. The statutory authority for the provision is found in Sections 513 and 516 of the Act. The proposed rule would have required notification to surface owners and occupants above the "area of expected subsidence" at least 6 months prior to mining. Due to comments received, the final rule is changed. A provision is added allowing for regulatory authority approval of less than 6 months advance notice. The term "area of expected subsidence" is not adopted. The final rule continues to apply the requirement of the previous rule that owners and occupants above "underground workings" be provided notice.

Some commenters argued that there is no need to inform surface owners of the possibility that subsidence will occur in situations where the operator will be adopting measures to prevent subsidence. OSM has not accepted this recommended change. The notice informs owners and occupants that subsidence "could" occur, not that it will occur.

Many commenters opposed the use of the term "area of expected subsidence" because the technology used to predict subsidence is not suficiently developed for reasonable reliance. One commenter questioned if the phrase "area of expected subsidence" is used, then what would be the requirement for public notice for the area of unexpected subsidence. One commenter expressed concern about the term "expected subsidence" for fear that it would be subject to different interpretation and suggested that the term "planned subsidence" be used instead. This commenter also contended that this section should not apply to mine operators who plan to use methods approved by the regulatory authority to support the surface.

The phrase "area of expected subsidence" is not being adopted in this final rule and also is not being adopted in the final definition of "affected area" as was proposed. The notice requirement adopted will enable the operator to determine with certainty those persons who must receive notice, yet will be broad enough to inform potentially affected persons. The notice is to enable surface owners to take steps to protect their property.

Some commenters questioned OSM's authority on this section, and many commenters contended that public notice is unnecessary, burdensome and, in some circumstances, impossible. Some of these commenters advocated that the permit approval process would provide the public with sufficient information and notice. Also, they asserted that the operator's common-law duty to obtain subsidence rights or not to cause subsidence will assume that all surface owners are either notified or protected.

The notice requirement has been retained as a performance standard in the rules. Notice is considered appropriate because of the material damage that subsidence can cause. As mentioned above, the permit approval process is recognized as affording a degree of notice, but because of the seriousness of the damage that subsidence can cause, a direct notice is considered necessary to actually inform surface owners.

One commenter believed that all occupants above the underground workings should be notified. Another commenter indicated that this section would not apply to his State (Montana) because the mining activity would not be permitted until all owners of property over the area to be mined have signed over control of the property to the operator.

Previous § 817.122 required notice to all persons residing on or owning property above the underground workings and adjacent areas. The final rule limits the notice requirement to the area above the underground workings. The term "adjacent areas" is not included because surface owners in potentially affected areas will be aware of mining when surface protection measures are taken in the vicinity.

One commenter suggested that the public notice should be a two-tiered approach, with notice to all the owners above the underground workings and related offsite areas. The first notice would include general information; and the second notice, which would be sent 6 months prior to mining, would include the information in the first notice and other more detailed information. This commenter also suggested that the reference to the subsidence control plan should include both the general and detailed plans. This commenter further expressed the concern that the public notice system does not take into account that an operator may change the mining and/or subsidence control plan well after the notice has been sent.

The rules already provide sufficient notice to surface owners and occupants. The operator must notify the public of the filing of a permit application by placing advertisements in local newspapers. Persons who may be affected by the operation have the opportunity to review the subsidence control plan and to object at that time. The public notice provided for in § 817.122 is a direct one to individuals and is required to be given in advance of mining. The provision for general and detailed subsidence control plans in the proposed rule has not been adopted. Any significant revision of the subsidence control plan would constitute a permit revision and thus would be subject to public notice and opportunity to comment.

C. Concurrent surface and underground mining

Section 515(b)(12) of the Act sets the minimum interval between surface and underground mines at 500 feet unless a lesser interval is approved jointly by the agencies responsible for surface mining regulation and the health and safety of underground miners. Section 515(b)(16) of the Act provides for variance procedures to delay contemporaneous reclamation when surface and underground operations are to be conducted concurrently or sequentially. In 30 CFR Chapter VII, rules implementing these statutory provisions occur in companion sections in the permitting requirements under Part 785 and in the performance standards under Parts 816 and 817. Previously, special performance standards were included under Part 818, which is removed by this final rule.

Section 785.18

The final rule maintains most of the provisions and language that were contained in the proposed rule, except that the words "or persons" are added after the words "any person" in final § 785.18(a). This avoids the implication that combined surface and underground mining activities are necessarily conducted by the same company. Final § 785.18 contains permitting provisions for variances for delay in contemporaneous reclamation in combined surface and underground mining activities. Proposed § 785.18 was amended from the previous rule by revising paragraph (a), removing paragraph (b), redesignating paragraphs (c), (d), and (e) as paragraphs (b), (c), and (d), respectively, and revising the redesignated paragraphs (b)(4), (b)(7), (c)(6), (c)(7), and (c)(9) (ii) and (iii). All of those changes have been adopted in final § 785.18.

One commenter remarked that proposed § 785.18 implied that a variance for delay in contemporaneous reclamation for combined surface and underground activities can only be granted at the time of initial application for the surface permit. This commenter suggested that the rule should allow for a variance to be granted at any point in the mining where the operator may reach a decision to combine surface and underground mining to optimize the recovery of the coal resource to the extent that the request is timely and does not unnecessarily delay reclamation prior to approval of the underground operation.

If the operator reaches a decision after the initial application for the permit is filed to utilize a combination of surface and underground mining activities, the operator can file an application for a variance in conjunction with the application for permit revision or a separate permit for underground mining activities. A permit revision or new application can be filed at any time. Consequently, no change in the proposed rule need be made as the result of this comment.

Another commenter suggested that in proposed § 785.18(a), "(persons)" be added after the word "person" to avoid the assumption that combined surface and underground mining are to be used by the same company. OSM agrees, and the suggestion has been accepted and is incorporated in final § 785.18(a).

Section 816.79

As authorized by Section 515(b)(12) of the Act, final § 816.79 requires a 500-foot separation in all directions between surface mining activities and underground mine workings. Variances from this distance require special approval. One change from the proposed rule has been made to final § 816.79(b), as described below.

One commenter remarked that proposed § 816.79 caused considerable confusion as to its meaning, because it has been the commenter's experience that the Mine Safety and Health Administration (MSHA) does not care to approve surface coal mining operations when only an abandoned underground mine is involved.

A second commenter requested clarification of the requirement in proposed § 816.106(e) for approval of auger holes in accordance with § 816.79. Having experienced difficulty in attempting to get MSHA approval for augering near an abandoned underground mine, the commenter asserted that MSHA wanted to be involved in the approval process only where augering near an active underground mine could affect the miners' safety. To eliminate the confusion existing in many States, this commenter recommended that § 816.79 be revised to provide for two distinct approval methods, one for active mines including MSHA approval and another for abandoned mines eliminating the need for MSHA approval.

Another commenter also asserted that it is extremely difficult to obtain the assistance of mine safety agency personnel in arriving at joint approval of plans for surface mining near underground workings. The reasons indicated by this commenter are that mine safety agencies (1) have limited resources for such "off-budget" activities as those joint approvals, (2) are under no legal mandate to perform the joint investigations and approvals, and (3) are reluctant to take the extra responsibility that could accrue in the event an incident could lead to court action against the agency. This commenter therefore concluded that proposed § 816.79 imposes an unnecessary hardship upon the operator, who has no control over the actions of the mine safety agency or agencies.

OSM recognizes that operators may have problems when dealing with joint approval by more than one agency on certain operations. Joint approval for combined surface and underground operations, however, is specifically required by Section 515(b)(12) of the Act. OSM has, however, reconsidered the requirements of Section 515(b)(12) and has decided to revise the final rule in response to the comments. Section 515(b)(12)(A) requires joint approval only for "specific underground activities" by the regulatory authority and the agency concerned with the "health and safety of underground miners." For abandoned underground mines, there are no "specific underground activities." Therefore, OSM is accepting the recommendation to require joint approval only when surface mining within 500 feet of "active" underground mines. Approval of the regulatory authority will still be required under this section for both active and abandoned underground mines to show that the proposed activities will result in improved resource recovery, abatement of water pollution, or elimination of hazards to the health and safety of the public. In addition, if an abandoned underground mine becomes active, joint approval will then be required.

One commenter remarked that proposed § 816.79(a) appears to be consistent with the law and difficult to criticize. This commenter, however, indicated that the proposed rule may be redundant with MSHA's regulation at 30 CFR 77.1000 which requires the operator to establish and follow a ground-control plan which must be approved by MSHA prior to any mining activities. This commenter consequently concluded that proposed § 816.79(a) could be eliminated with no effect upon existing rules or the health and safety of coal miners and that the requirement of the Act would still be met.

This suggestion was not accepted. Section 515(b)(12) of the Act specifically requires a joint decision on the close proximity of surface and active underground mining operations.

One commenter asserted that proposed § 816.79 does not recognize the fact the District Mining Supervisors of the Minerals Management Service also

exercises approval authority for any sequence of mining operations conducted on Federal lands.

Compliance with other Federal, State, and local regulations for mining activities is assumed to be understood by mine operators. Proposed and final § 785.18(c)(3) also address this point.

Two commenters opposed the total elimination of previous Part 818. They contended that its elimination would remove a number of important standards not found elsewhere in the rules, including (1) several important criteria for determining when and where a variance can be granted, (2) the requirement for a 500-foot coal barrier between surface and underground mining in a single seam, and (3) the requirement for sufficient vertical distance between surface and underground mines. One of the commenters further asserted that the protection provided the public health and safety has not been as adequately addressed in proposed § 816.79 as it was in previous Part 818.

In response to the above comments, OSM notes that (1) an application for variances for delay in contemporaneous reclamation must identify specific surface areas for which a variance is sought, as required in proposed and final § 785.18(b)(3); and (2) a permit incorporating a variance may not be issued unless the regulatory authority finds that the permit contains a detailed schedule for compliance with applicable provisions, as indicated in proposed and final § 785.18(c)(9)(iii). Consequently, OSM has, in fact, addressed the criteria for determining where and when a variance can be granted. As to the comments on the elimination of the requirement on the 500-foot coal barrier between surface and underground mines in a single seam and the requirement of sufficient vertical distance, OSM believes that the language of "no closer than 500 feet to any point" as specified in proposed and final § 816.79 adequately addresses these criteria. In the preamble to previous § 816.79, OSM specified that the measurement must be a 500-foot spherical radius; that is, 500 feet in separation in all directions between surface and underground operations. 44 FR 15208–15209, March 13, 1979. OSM still maintains this interpretation of Section 515(b)(12) of the Act. Finally, it is OSM's belief that the health and safety of the public has been adequately covered in proposed and final § 816.79 and that the health and safety of mine workers has been adequately addressed in MSHA's rules, such as 30 CFR 77.1000. On the basis of the above discussion, it is concluded that the elimination of previous Part 818 is justified.

Sections 816.100 and 817.100

Final §§ 816.100 and 817.100 implement the requirements of the Act, Section 515(b)(16), that all reclamation efforts must proceed in an environmentally sound manner and as contemporaneously as practicable with the mining operations. The proposed and final rules also make it clear that variances from the contemporaneous reclamation requirements are permissible under Section 515(b(16) of the Act and § 785.18 of the rules. In final §§ 816.100 and 817.100, OSM has added a sentence to allow the regulatory authority to establish timing and distance schedules that define contemporaneous reclamation. This is done in response to comments on proposed § 816.101 which address backfilling and grading requirements.

The proposed backfilling and grading rules removed the timing and distance requirements in previous § 816.101(a) for rough backfilling and grading of contour, open pit, and area surface mining operations. The change was proposed since a detailed timetable for each step in the reclamation plan is required by 30 CFR 780.18(b)(1), and the specific design criteria would more properly be included in a technical handbook (47 FR 26762, June 21, 1982).

Most State regulatory authorities supported the deletion of the timing and distance requirements for backfilling and grading since it grants additional flexibility to them. However, they requested authorization to specify these requirements for their State programs. They believed some criteria are necessary to eliminate constant disputes between the regulatory authority and the operator on what constitutes contemporaneous reclamation. Another State wanted flexibility to set requirements which are needed to maintain contemporaneous and quality reclamation. One State believed that national guidance is appropriate with respect to time periods and suggested setting the times based on mining method and technology. The suggested time periods for backfilling and grading various types of mining operations would fall within the scope of contemporaneous reclamation. They also indicated that any standard should have an "escape" clause. The escape clause would allow the regulatory authority to approve different time periods if the mine conditions or other site-specific conditions made it impossible to meet the established standards.

One commenter believed that the rationale given in the preamble to the proposed rules for deleting the time and distance requirements was insufficient. He felt that the timetable in the previous rule was well explained and should not be changed, because one of the chief purposes of the Act is to establish minimum national standards that all operators have to meet. The commenter also stated that specific requirements are necessary as enforcement measures, because under the proposed rules the inspector would be unable to detect violations without review of the permit and that parameters must be established within which compliance can be measures.

Under these final rules, the standards established by the regulatory authority should be as effective as those in the previous rules, which allowed the regulatory authority to grant additional time for backfilling and grading when a need was demonstrated by the operator. Now the regulatory authority can establish a time table, one which is more in keeping with conditions within the State, and can probably reduce the number of waiver requests received from operators.

OSM believes that different State time frames for backfilling will not affect interstate competition, as stated by one commenter. The cost to backfill an area would likely be the same whether it is accomplished early or late in the mining process.

III. Procedural Matters

Executive Order 12291 and the Regulatory Flexibility Act

Executive Order 12291

The Department of the Interior (DOI) has examined these rules according to the criteria of Executive Order 12291 (February 17, 1981). OSM has determined that these are not major rules and do not require a regulatory impact analysis because they will impose only minor costs on the coal industry and coal consumers.

Regulatory Flexibility Act

The DOI has also determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C 601 *et seq.*, that these rules will not have a significant economic impact on a substantial number of small entities. These final rules will allow small coal operators increased flexibility in meeting performance standards and should especially ease the regulatory burden on small coal operators in Appalachia.

National Environmental Policy Act

OSM has analyzed the impact of these final rules in its "Final Environmental Impact Statement OSM–EIS–1: Supplement" (FEIS) according to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). The FEIS is available at OSM's Administrative Record in Room 5315, 1100 L Street, NW., Washington, D.C. or by mail request to Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department of the Interior, Washington, D.C. 20240. This preamble serves as the record of decision under NEPA. These final rules differ from the draft final rules published in Volume III of the FEIS in the following respects:

(1) Section 784.20 has a number of clarifications and editorial changes, including the removal of a sentence in § 784.20(d)(5) of the draft final rules requiring inclusion in the map of underground workings of the areas where subsidence control measures will be taken. This requirement has been included in final § 784.24(b). Another such change is a slight rewording of §784.20(c). These changes do not affect the FEIS analysis.

(2) Final § 784.20(f) differs from the corresponding provision described in Volume III of the FEIS in recognizing the distinction in operator responsibility established in § 817.121(c) between subsidence-related material damage to land and such damage caused to structures or facilities. The effect of this change would fall within the discussion of § 817.121(c) in the FEIS.

(3) Final § 817.121(c)(2) differs from the corresponding provision in Volume III of the FEIS by stating specifically that repair of damage includes rehabilitation, restoration, and replacement and that compensation may be accomplished by the purchase of a prepaid noncancellable insurance policy. These features were contained in previous § 817.124. Their retention in final § 817.121(c) thus lessens the adverse impacts of draft final § 817.121(c) as discussed in the FEIS.

(4) Final § 817.121(d)(3) applies to impoundments with a storage capacity of 20 acre-feet or more or bodies of water with a volume of 20 acre-feet or more, rather than just to dams impounding such bodies of water as described in the FEIS. This requirement is similar to the proposed § 817.121(d) contained in Alternative C of the FEIS and was contained in previous § 817.126(a) encompassed by Alternative B. The removal of the specific proposed reference to perennial streams is of minor environmental effect because material damage to the hydrologic balance should be considered under § 817.41. Final § 817.121(d) broadens the authority of the regulatory authority to prevent subsidence causing material damage from that in draft final § 817.121(d) of the FEIS by extending it to all of the features or facilities covered by § 817.121 (d)(1), (d)(2), and (d)(3), rather than just applying to certain aquifers or bodies of water. This final rule will have lesser impacts than the corresponding provision in the FEIS.

(5) The word "further" has been added to final § 817.121(e). This clarifies the intent of the provision, but does not change its effect.

(6) Final § 817.122 allows notice to surface owners within 6 months of mining only if approval is obtained from the regulatory authority. Draft final § 817.122 in the FEIS allowed such notice as soon as practicable before mining, without regulatory authority approval. This change will have no environmental effect.

Thus, to the extent that these final rules differ from the preferred alternative published in Volume III of the FEIS, they fall within the impacts and analysis discussed therein.

Federal Paperwork Reduction Act

The information collection requirements in final §§ 784.20 and 785.18 have been approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507 and assigned clearance numbers 1029–0039 and 1029–0040. OSM has codified the OMB approvals under final §§ 784.10 and 785.10 (47 FR 33683, August 4, 1982).

The information required will be used by the regulatory authority in monitoring and inspecting surface and underground mining activities to insure that they are conducted in a manner which preserves and enhances environmental and other values of the Act. This information required by these rules is mandatory.

Agency Approval

Section 516(a) of the Act requires that, with regard to rules directed toward the surface effects of underground mining, OSM must obtain written concurrence from the head of the department which administers the Federal Mine Safety and Health Act of 1977, the successor to the Federal Coal Mine Health and Safety Act of 1969. OSM has obtained the written concurrence of the Assistant Secretary for Mine Safety and Health, U.S. Department of Labor.

List of Subjects

30 CFR Part 784

Coal mining, Reporting and recordkeeping requirements, Underground mining.

30 CFR Part 785

Coal mining, Reporting and recordkeeping requirements, Surface mining, Underground mining.

30 CFR Part 816

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

30 CFR Parts 817 and 818

Coal mining, Environmental protection, Reporting requirements, Underground mining.

Accordingly, Parts 784, 785, 816, 817, and 818 of Title 30, Chapter VII, Subchapters G and K of the Code of Federal Regulations are amended as set forth herein.

Dated: April 15, 1983.

William P. Pendley,

Acting Assistant Secretary, Energy and Minerals.

PART 784—UNDERGROUND MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR RECLAMATION AND OPERATION PLAN

1. Section 784.20 is revised to read as follows:

§ 784.20 Subsidence control plan.

The permit application shall include a survey which shall show whether structures or renewable resource lands exist within the proposed permit area and adjacent area and whether subsidence, if it occurred, could cause material damage or diminution of reasonably foreseeable use of such structures or renewable resource lands. If the survey shows that no such structures or renewable resource lands exist, or no such material damage or diminution could be caused in the event of mine subsidence, and if the regulatory authority agrees with such conclusion, no further information need be provided in the application under this section. In the event the survey shows that such structures or renewable resource lands exist, or that subsidence could cause material damage or diminution of value or foreseeable use of the land, or if the regulatory authority determines that such damage or diminution could occur, the application shall include a subsidence control plan which shall contain the following information:

(a) A description of the method of coal removal, such as longwall mining, room-

and-pillar removal, hydraulic mining, or other extraction methods, including the size, sequence, and timing for the development of underground workings.

(b) A map of underground workings which describes the location and extent of areas in which planned-subsidence mining methods will be used and which includes all areas where the measures described in paragraph (d) of this section will be taken to prevent or minimize subsidence and subsidence-related damage.

(c) A description of the physical conditions, such as depth of cover, seam thickness, and lithology, which affect the likelihood or extent of subsidence and subsidence-related damage.

(d) Except for those areas where planned subsidence is projected to be used, a detailed description of the subsidence control measures that will be taken to prevent or minimize subsidence and subsidence-related damage, including, but not limited to—

(1) Backstowing or backfilling of voids;

(2) Leaving support pillars of coal;

(3) Leaving areas in which no coal is removed, including a description of the overlying area to be protected by leaving the coal in place;

(4) Taking measures on the surface to prevent material damage or lessening of the value or reasonably foreseeable use of the surface; and

(5) Monitoring to determine the commencement and degree of subsidence so that other appropriate measures can be taken to prevent or reduce material damage.

(e) A description of the anticipated effects of planned subsidence, if any.

(f) A description of the measures to be taken in accordance with § 817.121(c) of this chapter to mitigate or remedy any subsidence-related material damage to, or diminution in value or reasonably foreseeable use of—

(1) The land, or

(2) Structures or facilities to the extent required under State law.

(g) Other information specified by the regulatory authority as necessary to demonstrate that the operation will be conducted in accordance with the performance standards of § 817.121 of this chapter for subsidence control.

PART 785—REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

2. Section 785.18 is revised to read as follows:

§ 785.18 Variances for delay in contemporaneous reclamation requirement in combined surface and underground mining activities.

(a) *Scope.* This section shall apply to any person or persons conducting or intending to conduct combined surface and underground mining activities where a variance is requested from the contemporaneous reclamation requirements of § 816.100 of this chapter.

(b) *Application contents for variances.* Any person desiring a variance under this section shall file with the regulatory authority complete applications for both the surface mining activities and underground mining activities which are to be combined. The reclamation and operation plans for these permits shall contain appropriate narratives, maps, and plans, which—

(1) Show why the proposed underground mining activities are necessary or desirable to assure maximum practical recovery of the coal;

(2) Show how multiple future disturbances of surface lands or waters will be avoided;

(3) Identify the specific surface areas for which a variance is sought and the sections of the Act, this chapter, and the regulatory program from which a variance is being sought;

(4) Show how the activities will comply with § 816.79 of this chapter and other applicable requirements of the regulatory program;

(5) Show why the variance sought is necessary for the implementation of the proposed underground mining activities;

(6) Provide an assessment of the adverse environmental consequences and damages, if any, that will result if the reclamation of surface mining activities is delayed; and

(7) Show how offsite storage of spoil will be conducted to comply with the requirements of the Act, §§ 816.71–816.74 of this chapter, and the regulatory program.

(c) *Issuance of permit.* A permit incorporating a variance under this section may be issued by the regulatory authority if it first finds, in writing, upon the basis of a complete application filed in accordance with this section, that—

(1) The applicant has presented, as part of the permit application, specific, feasible plans for the proposed underground mining activities;

(2) The proposed underground mining activities are necessary or desirable to assure maximum practical recovery of the mineral resource and will avoid multiple future disturbances of surface land or waters;

(3) The applicant has satisfactorily demonstrated that the applications for the surface mining activities and underground mining activities conform to the requirements of the regulatory program and that all other permits necessary for the underground mining activities have been issued by the appropriate authority;

(4) The surface area of surface mining activities proposed for the variance has been shown by the applicant to be necessary for implementing the proposed underground mining activities;

(5) No substantial adverse environmental damage, either onsite or offsite, will result from the delay in completion of reclamation otherwise required by Section 515(b)(16) of the Act, Part 816 of this chapter, and the regulatory program;

(6) The operations will, insofar as a variance is authorized, be conducted in compliance with the requirements of § 816.79 of this chapter and the regulatory program;

(7) Provisions for offsite storage of spoil will comply with the requirements of Section 515(b)(22) of the Act, §§ 816.71–816.74 of this chapter, and the regulatory program;

(8) Liability under the performance bond required to be filed by the applicant with the regulatory authority pursuant to Subchapter J of this chapter and the regulatory program will be for the duration of the underground mining activities and until all requirements of Subchapter J and the regulatory program have been complied with; and

(9) The permit for the surface mining activities contains specific conditions—

(i) Delineating the particular surface areas for which a variance is authorized;

(ii) Identifying the applicable provisions of Section 515(b) of the Act, Part 816 of this chapter, and the regulatory program; and

(iii) Providing a detailed schedule for compliance with the provisions of this section.

(d) *Review of permits containing variances.* Variances granted by permits issued under this section shall be reviewed by the regulatory authority no later than 3 years from the dates of issuance of the permit and any permit renewals.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

3. Section 816.79 is revised as follows:

§ 816.79 Protection of underground mining.

No surface mining activities shall be conducted closer than 500 feet to any point of either an active or abandoned underground mine, except to the extent that—

(a) The activities result in improved resource recovery, abatement of water pollution, or elimination of hazards to the health and safety of the public; and

(b) The nature, timing, and sequence of the activities that propose to mine closer than 500 feet to an active underground mine are jointly approved by the regulatory authority, the Mine Safety and Health Administration, and the State agency, if any, responsible for the safety of underground mine workers.

4. Section 816.100 is revised to read as follows:

§ 816.100 Contemporaneous reclamation.

Reclamation efforts, including but not limited to backfilling, grading, topsoil replacement, and revegetation, on all land that is disturbed by surface mining activities shall occur as contemporaneously as practicable with mining operations, except when such mining operations are conducted in accordance with a variance for concurrent surface and underground mining activities issued under § 785.18 of this chapter. The regulatory authority may establish schedules that define contemporaneous reclamation.

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

5. Section 817.100 is revised to read as follows:

§ 817.100 Contemporaneous reclamation.

Reclamation efforts, including but not limited to backfilling, grading, topsoil replacement, and revegetation, on all areas affected by surface impacts incident to an underground coal mine shall occur as contemporaneously as practicable with mining operations, except when such mining operations are conducted in accordance with a variance for concurrent surface and underground mining activities issued under § 785.18 of this chapter. The regulatory authority may establish schedules that define contemporaneous reclamation.

6. Section 817.121 is revised to read as follows:

§ 817.121 Subsidence control.

(a) The operator shall either adopt measures consistent with known technology which prevent subsidence from causing material damage to the extent technologically and economically feasible, maximize mine stability, and maintain the value and reasonably foreseeable use of surface lands; or adopt mining technology which provides for planned subsidence in a predictable and controlled manner. Nothing in this part shall be construed to prohibit the standard method of room-and-pillar mining.

(b) The operator shall comply with all provisions of the approved subsidence control plan prepared pursuant to § 784.20 of this chapter.

(c) The operator shall—

(1) Correct any material damage resulting from subsidence caused to surface lands, to the extent technologically and economically feasible, by restoring the land to a condition capable of maintaining the value and reasonably foreseeable uses which it was capable of supporting before subsidence; and

(2) To the extent required under State law, either correct material damage resulting from subsidence caused to any structures or facilities by repairing the damage or compensate the owner of such structures or facilities in the full amount of the diminution in value resulting from the subsidence. Repair of damage includes rehabilitation, restoration, or replacement or damaged structures or facilities. Compensation may be accomplished by the purchase prior to mining of a noncancellable premium-prepaid insurance policy.

(d) Underground mining activities shall not be conducted beneath or adjacent to (1) public buildings and facilities; (2) churches, schools, and hospitals; or (3) impoundments with a storage capacity of 20 acre-feet or more or bodies of water with a volume of 20 acre-feet or more, unless the subsidence control plan demonstrates that subsidence will not cause material damage to, or reduce the reasonably foreseeable use of, such features or facilities. If the regulatory authority determines that it is necessary in order to minimize the potential for material damage to the features or facilities described above or to any aquifer or body of water that serves as a significant water source for any public water supply system, it may limit the percentage of coal extracted under or adjacent thereto.

(e) If subsidence causes material damage to any of the features or facilities covered by paragraph (d) of this section, the regulatory authority may suspend mining under or adjacent to such features or facilities until the subsidence control plan is modified to ensure prevention of further material damage to such features or facilities.

(f) The regulatory authority shall suspend underground mining activities under urbanized areas, cities, towns, and communities, and adjacent to industrial or commercial buildings, major impoundments, or perennial streams, if imminent danger is found to inhabitants of the urbanized areas, cities, towns, or communities.

(g) Within a schedule approved by the regulatory authority, the operator shall submit a detailed plan of the underground workings. The detailed plan shall include maps and descriptions, as appropriate, of significant features of the underground mine, including the size, configuration, and approximate location of pillars and entries, extraction ratios, measure taken to prevent or minimize subsidence and related damage, areas of full extraction, and other information required by the regulatory authority. Upon request of the operator, information submitted with the detailed plan may be held as confidential, in accordance with the requirements of § 773.13(d) of this chapter.

7. Section 817.122 is revised to read as follow:

§ 817.122 Subsidence control: Public notice.

At least 6 months prior to mining, or within that period if approved by the regulatory authority, the underground mine operator shall mail a notification to all owners and occupants of surface property and structures above the underground workings. The notification shall include, at a minimum, identification of specific areas in which mining will take place, dates that specific areas will be undermined, and the location or locations where the operator's subsidence control plan may be examined.

§§ 817.124 and 817.126 [Removed]

8. Sections 817.124 and 817.126 are removed.

PART 818—SPECIAL PERMANENT PROGRAM PERFORMANCE STANDARDS—CONCURRENT SURFACE AND UNDERGROUND MINING [REMOVED]

9. Part 818 is removed.

Authority: 30 U.S.C. 1201 *et seq.*

FEDERAL REGISTER PAGES AND DATES, JUNE

24311-24652.....1

CFR PARTS AFFECTED DURING JUNE

At the end of each month, the Office of the Federal Register publishes separately a list of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA

TABLE OF EFFECTIVE DATES AND TIME PERIODS—JUNE 1983

This table is for determining dates in documents which give advance notice of compliance, impose time limits on public response, or announce meetings.

Agencies using this table in planning publication of their documents must allow sufficient time for printing production.

In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or a holiday, the next Federal business day is used. (see 1 CFR 18.17)

A new table will be published in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
June 1	June 16	July 1	July 18	August 1	August 30
June 2	June 17	July 5	July 18	August 1	August 31
June 3	June 20	July 5	July 18	August 2	September 1

CFR CHECKLIST; 1982/83 ISSUANCES

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1982/83. New units issued during the month are announced on the back cover of the daily **Federal Register** as they become available.

For a checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $615 domestic, $153.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 107
Thursday, June 2, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 916

[Nectarine Reg. 14, Amdt. 3]

Nectarines Grown in California; Amendment of Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule revises the grade and size regulation currently in effect for nectarines grown in California by establishing minimum size requirements for 2 new varieties (Ambrosia and Sherri Red), and by deleting such requirements for 3 currently regulated varieties (Mayred, Arm Queen, and Kent Grand). Such action is designed to promote orderly marketing in the interest of producers and consumers.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California nectarine crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under the marketing agreement, as amended, and Order No. 916, as amended (7 CFR Part 916), regulating the handling of nectarines grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based on information submitted by the Nectarine Administrative Committee established under this marketing order, and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

Shipments of California nectarines are currently regulated by grade and size under § 916.356 Nectarine Regulation 14, as amended. This final rule would further amend this regulation by establishing minimum size requirements (84 count in a No. 22D standard lug box, or 75 nectarines in a 16-pound sample) for the Ambrosia and Sherri Red varieties because they are now produced in commercially significant quantities, and by removing minimum size requirements for the Mayred, Arm Queen, and Kent Grand varieties as they are no longer produced in significant quantities. The committee unanimously recommended this action at its meeting of May 5, 1983, when it met to consider supply and market conditions and other factors affecting the need for and type of regulation suitable for the 1983 season California crop. This action is in accordance with the committee's practice of regulating a particular variety of nectarines by size when 10,000 or more packages are shipped during the prior season, and removing such requirements for any variety when such shipments fall below 5,000 packages. The committee recommends minimum size requirements for the various varieties of nectarines, because fruit below a certain minimum size, depending on the variety, lacks consumer and trade acceptance, and if it is left on the trees longer it may increase in size and improve in quality and maturity. The committee also unanimously adopted and has submitted to the Secretary a marketing policy for the 1983 season California nectarine crop including an analysis of supply and demand factors having a bearing on the marketing of the crop. The committee estimates 1983 season California nectarine shipments at 16,523,000 packages compared with shipments of 14,273,000 packages in 1982.

The Nectarine Regulation 14 was issued July 16, 1981, on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. This amended regulation is to remain in effect indefinitely. The committee will continue to meet prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for California nectarines. Prior to making any such recommendations, the committee would submit to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department will review committee recommendations and information submitted by the committee, and other available information, and determine whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

The amended regulatory requirements are necessary to prevent the shipment of nectarines not meeting the specified requirements, and are designed to provide ample supplies of good quality fruit in the interest of producers and consumers pursuant to the declared policy of the Act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this final rule is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on amendment of the size requirements at an open meeting, at which the committee, without opposition, recommended revision of the requirements as specified in this final rule. This final rule in some instances relieves restrictions on the handling of nectarines, and handlers have been apprised of such provisions and the effective date.

Marketing agreements and orders, Nectarines, California.

PART 916—[AMENDED]

Therefore, § 916.356 (7 CFR Part 916; 47 FR 23913; 35751) is amended by revising the introductory text of paragraph (a); by removing paragraphs (a)(2), (a)(2)(i), and (a)(2)(ii), by redesignating current paragraph (a)(3) as (a)(2), current (a)(4) as (a)(3), and current (a)(5) as (a)(4); and by revising redesignated (a)(3) (introductory text), and (a)(4) to read as follows:

§ 916.356 Nectarines regulation 14.

(a) On and after (June 2, 1983), no handler shall handle:

* * * * *

(2) Any package or container of Aurelio Grand, Mayfair, Maybelle, or Royal Delight variety nectarines unless:

* * *

(3) Any package or container of Apache, Armking, Crimson Gold, Early Star, Gee Red, June Belle, June Grand, May Grand, Red June, Spring Grand, Sunfre, or Zee Gold variety nectarines unless: * * *

(4) Any package or container of Ambrosia, Autumn Delight, Autumn Grand, Bob Grand, Clinton-Strawberry, Early Sun Grand, Ed's Red, Fairlane, Fantasia, Firebrite, Flamekist, Flavortop, Flavortop I, Gold King, Granderli, Hi-Red, Independence, Late Le Grand, Le Grand, Moon Grand, Niagara Grand, Red Diamond, Red Free, Red Grand, Regal Grand, Richards Grand, Royal Giant, Ruby Grand, September Grand, Tasty Free, Tom Grand, Honey Gold, Larry's Grand, Son Red, Spring Red, Late Tina Red, Red Jim, Summer Beaut, Sparkling Red, Star Grand, Summer Grand, Sun Grand or Sherri Red variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 84 nectarines in the lug box; or

(ii) Such nectarines in any container when packed other than specified in paragraph (a)(4) of this section are of a size that a 16-pound sample, representative of the nectarines in the package or container, contains not more than 75 nectarines.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 23652; Amdt. No. 95-311]

Air Traffic and General Operating Rules; IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjuction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, or contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 95

Aircraft, Airspace.

Adoption of the Amendment

PART 95—[AMENDED]

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 G.m.t. June 9, 1983.

(Secs. 307 and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on May 25, 1983.

John M. Howard,

Manager, Aircraft Programs Division.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release No. 34-19815]

Delegation of Authority to Director of Division of Market Regulation

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its rules governing the delegation of authority to permit the Director of the Division of Market Regulation to exempt registered national securities exchanges from the periodic filing requirements imposed by Rule 6a–2 under the Securities Exchange Act of 1934 (the "Act") with respect to certain exchange affiliates and subsidiaries.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: Alden Adkins, Esq., Division of Market Regulation (202) 272–2418.

SUPPLEMENTARY INFORMATION: The Commission has today announced the amendment, effective immediately, to Rule 6a–2 and related Forms 1 and 1–A under the Act (17 CFR 249.1 and 17 CFR 249.1a), the forms for application for registration as a national securities exchange and for periodic amendments thereto. Among the amendments adopted is a change to Rule 6a–2 that gives the Commission the authority to exempt national securities exchanges from filing certain exchange affiliate and subsidiary information.

The Commission also today announced the amendment of its rules governing the delegation of authority to the Director of the Division of Market Regulation (17 CFR 200.30–3) with respect to the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*, as amended). The new amendment authorizes the Director of the Division of Market Regulation to grant the exemptions now provided for in Rule 6a–2. The Commission finds, in accordance with the Administrative Procedure Act ("APA") [5 U.S.C. 553(b)(3)(B)] that this amendment relates solely to agency organization, procedure and practice and that notice and procedure under the APA are not necessary. This action, taken pursuant to 15 U.S.C. 78d–1, as amended, becomes effective immediately upon publication in the **Federal Register.**

List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of Information, Privacy, Securities.

Text of Amendment

The Securities and Exchange Commission pursuant to the Act, and particularly Sections 2, 12 and 23 (15 U.S.C. 78b, 78*l*, and 78n), thereof, and the Delegation of Functions Act, 15 U.S.C. 78d–1, hereby adopts an amendment to § 200.30–3(a).

PART 200—ORGANIZATION, CONDUCT AND ETHICS, AND INFORMATION AND REQUESTS

The Commission hereby amends § 200.30–3, 17 CFR Chapter II by adding paragraph (a)(41) to read as follows:

§ 200.30–3 Delegation of authority to Director of Division of Market Regulation.

* * * * *

(a) * * *

(41) Pursuant to Rule 6a–2(c) (§ 240.6a–2 of this chapter) to exempt registered national securities exchanges from the filing requirements imposed by Rule 6a–2 with respect to certain affiliates and subsidiaries of the exchange.

* * * * *

Dated: May 26, 1983.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

17 CFR Parts 240 and 249

[Release No. 34-19814; File No. S7-937]

Registration as a National Securities Exchange; Revision of Rule 6a–2, Forms 1 and 1–A Under the Securities Exchange Act of 1934

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted amendments to the form for applications for, or exemption from, registration as a national securities exchange, and the form for amendments to and/or supplementation of such registration or exemption statements. The amendments are designed principally to eliminate obsolete and duplicative filing requirements and generally to bring these forms into conformity with the Securities Exchange Act of 1934, as amended in 1975. The Commission also has adopted amendments to its rule requiring national securities exchanges to file annual amendments or exemption statements to their registration. The rule amendments are necessitated by the changes to the form on which data pursuant to Rule 6a–2 is filed with the Commission.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: Alden Adkins (202) 272–2418, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission today adopted amendments to Rule 6a–2 [17 CFR Part 240]; and Forms 1 [17 CFR 249.1] and 1–A [17 CFR 249.1a] under the Securities Exchange Act of 1934 (the "Act"). These amendments relate to proposals that were published for comment in June 1982.[1] The comments received on the proposals were generally favorable. Several changes have been made in the proposals in response to comments. This release focuses primarily on the changes made from the proposals and the basis for such revisions. Readers are directed to the text of the amendments and to the proposing release for further information concerning the amendments.

I. Background

Section 5 (15 U.S.C. 78e) of the Act generally prohibits securities transactions on an exchange unless the exchange is registered with the Commission pursuant to Section 6 of the Act (15 U.S.C. 78f) or is specifically exempted from registration by the Commission. Section 6 sets forth the conditions for exchange registration, in a form prescribed by the Commission, that contains the rules of the exchange and any other information and documents deemed necessary or appropriate by the Commission.[2]

Pursuant to Section 6, the Commission adopted Rule 6a–1 (17 CFR 240.6a–1) and Rule 6a–2 (17 CFR 240.6a–2).[3] Rule 6a–1 generally requires an applicant for registration as a national securities exchange, or for exemption from registration, to file an application with the Commission on Form 1 together with accompanying exhibits.[4] Rule 6a–2

[1] Securities Exchange Act Release No. 34–18843, June 25, 1982 (the "Proposing Release") 47 FR 28239 (July 6, 1982).

[2] Pursuant to Section 6(b) of the Act, the Commission may not grant registration unless it makes the findings contained therein.

[3] Securities Exchange Act Release No. 4383 (January 1, 1950), 14 FR 7759 (December 28, 1949).

[4] Rule 6a–1 also requires an exchange, promptly after discovering that any information in its statement or any exhibit or amendment thereto was inaccurate when filed, to file with the Commission an amendment (on Form 1–A) correcting such inaccuracy.

generally requires each registered or exempted exchange to update its statement by filing an annual amendment on Form 1–A, setting forth any changes in the information contained in the statement or in specified exhibits which have not been reported previously in an amendment.

Forms 1 and 1–A were last amended on January 1, 1950, simultaneously with the adoption of Rules 6a–1 and 6a–2. Since that time, the enactment of the Securities Act Amendments of 1975 ("1975 Amendments")[5] has altered significantly the regulatory scheme applicable to national securities exchanges, and technological advances have greatly changed the manner in which securities exchanges operate. In addition, as a result of its experience in administering Rules 6a–1 and 6a–2 and reviewing Forms 1 and 1–A, the Commission found that certain of the information currently required by the forms either duplicates information that is otherwise available to the Commission or imposes collection and reporting burdens on exchanges that outweigh the value of the information provided. The Commission, therefore, proposed amendments that would update the rules and forms and eliminate any unnecessary and unjustified requirements. The Commission believes that the regulations adopted today will reduce the burdens associated with both the preparation by exchange officials and the review by Commission staff of Forms 1 and 1–A.

II. Overview of Comments

The Commission reveived five comment letters concerning these proposed amendments; all five were sent by national securities exchanges.[6] Several of the comment letters commended the Commission efforts to reduce the exchanges' registration and reporting burdens. In addition, the commentators all suggested ways in which they believed the proposals should be changed. The specific comments and suggestions focused primarily on two areas: (1) the annual financial statements required to be submitted under Exhibits E and F to Form 1: and (2) the proposal to require the exchanges to submit complete copies of their own and their affiliates' rules each year. Rule 6a–2 and Forms 1 and 1–A have been changed in response to these comments. These comments are discussed in detail below.

III. Discussion

(1) Annual Financial Statements: Exhibits E and F

As proposed, the exchanges would have been required to submit separate audited annual financial statements for the exchange (proposed Exhibit E) and each of its affiliates and subsidiaries (proposed Exhibit F). Currently the exchanges are required to submit separate annual financial statements for the exchange (current Exhibit E), and each of its affiliates and subsidiaries (current Exhibit F), but they need not be audited. The commentators uniformly opposed the proposed requirement that the separate financial statements of exchange affiliates and subsidiaries be audited,[7] suggesting that the additional cost of compliance with such a requirement would outweigh any benefit to the Commission in increased oversight capability.[8] In addition, one commentator noted that separate financial statements for affiliates such as SIAC are submitted to the Commission pursuant to other sections of the Act and so should not have to be submitted by the exchange under Form 1–A.[9]

The Commission continues to believe that an auditing requirement is justified and indeed necessary in order for the Commission to carry out its oversight of the exchanges. The Commission also continues to believe that separate financial statements for the exchange and each of its affiliates and subsidaries are necessary to the Commission's oversight of the exchanges. However, it agrees with the commenters that the cost of providing separate audited statements for the exchange and each of its affiliates and subsidiaries may be substantial.

The Commission, therefore, is modifying Exhibits E and F to allow the exchanges to submit audited consolidated financial statements (Exhibit E)[10] and unconsolidated financial statements for the exchange and its affiliates and subsidiaries (Exhibit F).[11] The Commission believes that these modifications allow the Commission to receive the materials necessary to its oversight function without imposing upon the exchanges any unreasonable additional costs.[12]

In response to the suggestion that some affiliates are already required to submit financial statements under another Commission rule, the Commission is excepting from Exhibit F any affiliate that files with the Commission under another Commission rule an annual financial statement meeting the requirement of Exhibit F.[13]

---

[5] Pub. L. No. 94–29 (June 4, 1975).

[6] Letters were received from the American Stock Exchange, Inc. (Amex); the Boston Stock Exchange, Inc. (BSE); the Midwest Stock Exchange, Inc. (MSE); the New York Stock Exchange, Inc. (NYSE); and the Pacific Stock Exchange, Inc. (PSE). Copies of the letters of comment are available for public inspection and copying at the Commission's Public Reference Room (*See* File No. S7–937).

[7] One exchange also stated that disclosure of the separate financial statements of the exchange would cause it competitive injury and that it will seek confidential treatment for such financial statements if the Commission continues to require their submission. *See* letter dated October 25, 1982, from J. Craig Long, MSE, to George Fitzsimmons, SEC (the "MSE letter"). The Commission will, of course, consider any request for confidential treatment of documents required under Rule 6a–2 when and if such requests are actually made; it feels, however, that, while there conceivably could be rare occasions when confidential treatment is appropriate for particular exchange documents filed under Rule 6a–2 in any particular year, a grant of confidential treatment to an entire class of exchange documents required by Rule 6a–2 is neither appropriate nor necessary.

[8] The PSE estimated that it would incur an additional cost of $20,000/year in complying with this requirement, and NYSE estimated that its incremental costs associated with this requirement would be in excess of $50,000. See letter dated September 9, 1982, from Karen A. Wendell, PSE, to George A. Fitzsimmons, SEC ("PSE letter"); and letter dated September 13, 1982, from James E. Buck, NYSE, to George Fitzsimmons, SEC ("NYSE letter").

[9] *See* the NYSE letter.

[10] The financial statements required under Exhibit E are the same as those described in the proposal, *i.e.*, they must be for the latest fiscal year, prepared in accordance with generally accepted accounting principles, and covered by a report prepared by an independent public accountant.

If an exchange has no affiliates it must file an audited financial statement under Exhibit E but need not file anything in response to Exhibit F.

[11] The financial statements required under Exhibit F need not be prepared in accordance with generally accepted accounting principles or be covered by a report prepared by an independent public accountant. Such financial statements must, at a minimum, consist of a balance sheet and an income statement, and must include such footnotes and other disclosures as are necessary to avoid rendering the statements misleading.

The exchanges should note that the Exhibit describes the minimum requirements for financial statements submitted thereunder; the exchanges may submit financial statements that exceed these requirements (*e.g.*, because they already prepare such financial statements).

[12] All the exchanges that have affiliates or subsidiaries already prepare audited consolidated financial statements and all but one of the other exchanges already prepare audited financial statements. The one exchange that did not prepare an audited consolidated financial statement was the Spokane Stock Exchange (SSE), which, having no affiliates or subsidiaries, submitted an unaudited financial statement for the exchange alone.

Thus, the only new costs required by Exhibit E, as adopted, is the cost to SSE of having its financial statements audited. SSE did not comment on the proposal. The Commission believes that such additional costs are small and far outweighed by the benefits offered by audited consolidated financial reporting.

Exhibit F, as adopted, represents a consolidation of existing Exhibits E and F, with certain affiliates excepted for exempted (see below). Thus, no new burden is imposed by Exhibit F, as adopted. Indeed, with these new exceptions, the exchanges' reporting burden with respect to their affiliates' financial condition has been substantially reduced.

[13] *See* text of Exhibit F as adopted. Rule 17a–22 under the Act, 17 CFR 240.17a–22, requires any

Rule 6a–2 also has been modified for this exception; specifically, a new last sentence has been added to renumbered paragraph (a)(2) of Rule 6a–2 to prescribe the reporting in annual amendments of any change (or no change) in the status of an excepted affiliate.

(2) Submission of the Constitution, By-Laws and Rules of the Exchange and Its Affiliates

In the proposing release the Commission proposed amending Rule 6a–2 to require the exchange to submit complete Exhibits A(1), A(2) and A(3) annually to the Commission.[14] Since several of the exchanges periodically have published updated versions of their rules, it was felt that this would impose a minimal burden on the exchanges. Four of the five commentators, however, objected to this requirement.[15]

The Commission agrees that the annual submission of the information required by Exhibits A(1), A(2) and A(3) is unnecessary, especially in view of the fact that 19(b) of the Act requires the exchanges to submit all proposed rule changes to the Commission. The Commission, therefore, is amending Rule 6a–2 to require the submission of complete Exhibits A(1), A(2) and A(3) once every three years.[16]

(3) Exemptive Authority With Respect to Certain Affiliates

One commentator suggested that exchanges with common affiliates be permitted to designate one exchange from among them to file with the Commission any information concerning such affiliates required by Rule 6a–2.[17] In addition, one commentor suggested that exchanges should not be required to submit financial statements for "essentially inactive" subsidiaries.[18] In response to these comments, the Commission has added new paragraph (c) to Rule 6a–2 to give the Commission exemptive authority so that only one exchange would have to comply with the periodic filing requirements of Rule 6a–2 with respect to any common affiliate of two or more exchanges (6a–2(c)(1)),[19] and to exempt an exchange from making periodic filings with respect to any "inactive subsidiary" (6a–2(c)(2).[20] In addition, the Commission is adopting in a separate release amendments to its rules to delegate to the Director of the Division of Market Regulation the authority to grant such exemptions.[21]

(4) Item 9 of the Registration Statement (Form 1)

The only other specific suggestion made in response to the Proposing Release was that the categories of floor members listed in Item 9 should be defined. This commentator also suggested that the instructions should clarify how to count individuals who may be engaged in more than one of the categories of floor activity.[22]

The purpose of Item 9 is to obtain annually an idea of the general composition of the exchange's floor member community. While it might be desirable to define each category, the Commission believes that it is not necessary or appropriate to do so for purposes of this form, particularly given the substantial likelihood that the nature of the activities of the various categories of members will change over time. We believe that any interpretive questions the exchanges may have can best be resolved informally and flexibly through discussions with the Commission staff as the need arises.

In response to MSE's second suggestion, the Commission has added to the footnote to Item 9 an explanation of when a member is considered to be "engaged primarily" in an activity or function; this explanation makes clear that ordinarily no member will be counted under two different categories under Item 9.

(5) Summary of Other Revisions

Except as discussed above, the Commission is adopting the amendments to Forms 1 and 1–A as proposed in the Proposing Release. These amendments are: (i) deletion from Form 1 of current Items 5, 10–15, 17–18, and 20, all of which are designed to elicit information about the exchange that generally is included in the rules of the exchange; (ii) an amendment to renumbered Item 7 that requires that the exchange provide the information requested with respect to any affiliate or subsidiary that ceased to be associated with the exchange during the previous year; (iii) amendments to renumbered Item 8 to reflect changes in the types of functions performed by exchange members as well as the development of new categories of membership; (iv) deletion of current Item 19, which seeks information that is reported elsewhere; (v) deletion of Items 21 and 22, which solicit agreements by the exchange/registrant that have been rendered obsolete by the 1975 Amendments; (vi) amendments to Exhibit B to Form 1 to delete paragraph (2), which has been

---

registered clearing agency to file with the Commission materials it sends to participants. Any clearing agency whose rules require it to send annual financial statements to its participants is, thus, required to file such statements with the Commission, and is, therefore, excepted from Exhibit F under this provision. There are currently seven such registered clearing agencies (Pacific Securities Depository Trust Company (PSDTC), Pacific Clearing Corporation (PCC), Midwest Securities Trust Corporation (MSTC), Midwest Clearing Corporation (MCC), Depository Trust Company (DTC), National Securities Clearing Corporation (NSCC) and Philadelphia Depository Trust Company (PDTC)). In addition, three other exchange affiliated clearing agencies (Boston Stock Exchange Clearing Corporation (BSECC), Stock Clearing Corporation of Philadelphia (SCCP) and Options Clearing Corporation (OCC)) will soon adopt rules requiring them to send financial statements to their participants pursuant to the standards for full clearing agency registration. *See* Securities Exchange Act Release No. 16900 (June 17, 1980) 45 FR 41920 (June 23, 1980). OCC is already required to submit annual financial statements to the Commission; as issuer of exchange-traded options, it is required to annually amend its registration statement for these options.

The Commission, notes, however, that registered securities information processors ("SIPs") are not currently required to submit annual financial statements to the Commission, and so would not qualify for this exception. Three of the four registered SIPs, however (Securities Information Automation Corporation (SIAC), Consolidated Tape Association (CTA) and Options Price Reporting Association (OPRA)) are common affiliates, so that some of their parent exchanges may by exempted under the exemptive authority discussed below.

[14] Exhibit A(1) covers submission of the constitution, charter, by-laws and rules ("rules") of the exchange; Exhibit A(2) covers written rulings, settled practices and interpretations of the Governing Board or other committee of the exchange with respect to the rules; and Exhibit A(3) covers the rules of affiliates and subsidiaries of the exchange.

[15] *See* letters of Amex, BSE, MSE and NYSE.

[16] *See* Rule 6a–2(b) as adopted. In conjunction with this change, the word "Annual" in the title to Rule 6a–2 is being replaced by the word "Periodic." In addition, the subparagraphs in Rule 6a–2 have been renumbered and relettered.

[17] *See* letter, dated September 3, 1982, from Richard O. Scribner, Executive Vice President, Amex, to George Fitzsimmons, Secretary, SEC.

[18] *See* NYSE letter.

[19] The periodic reporting requirements respecting exchange affiliates are found in Exhibits A(3) (Chapter, By-Laws and Rules), F(financial statements), and H (officers and directors).

According to the most recently filed Forms 1–A, there are seven exchange affiliates that might qualify for this exemption: OCC, DTC, NSCC, SIAC, CTA, CQA and OPRA. The first three are required to file financial statements under another Commission rule and so are otherwise excepted from Exhibit F, *See* note 13, above.

[20] While "inactive subsidiary" is not defined for purposes of this provision, the Commission expects to consider a subsidiary to be inactive only if it has little or no income and liabilities and, thus, does not have the potential to have an impact on the financial condition of the exchange. Unlike the exception for affiliates and subsidiaries that are required by another Commission rule to submit annual financial statements, the exemptions for inactive subsidiaries will not be available to exchanges submitting the complete registration statements on this year's Form 1–A. This is because an exchange would have to submit information equivalent to that which would be eliminated by the exemption in order to show that a subsidiary is inactive.

[21] Securities Exchange Act Release No. 19815 (May 26, 1983).

[22] *See* the MSE letter.

made redundant by the 1975 Amendments; to consolidate paragraphs (3) and (4) into a new paragraph (2); and to delete paragraph (5), which was rendered obsolete by the 1975 Amendments; (vii) amendments to Exhibit G to require information about any officers, governors or committee members of the exchange who resigned or were terminated during the covered year; (viii) amendment to Exhibit J to delete paragraph (4), which requires that the exchange provide a list of the partners, officers or directors of each member firm of the exchange; (ix) adoption of a new Exhibit M, to require information about securities admitted to trading on the exchange subject to an exemption from registration under Section 12(a) of the Act; (x) amendments to instruction numbers 3 and 4 of Form 1, and numbers 2 and 4 of Form 1–A, to require the use of 8½ by 11 inch paper; and (xi) adoption of a footnote to Exhibits B, C and D to require tables of contents for these exhibits.

IV. 1983 Submissions

In the Proposing Release, the Commission stated that it intended to request, pursuant to Rule 6a–1(d), that each exchange file as its 1983 Form 1–A annual amendment a complete new registration statement and all exhibits that are prescribed to be filed in connection therewith. For the reasons stated in the proposing release, the Commission is now making this request.[23]

V. Regulatory Flexibility Act Status

The Chairman of the Commission has certified that the proposed amendments to Forms 1 and 1–A and Rule 6a–2 would not have a significant economic impact on a substantial number of small entities. No comments were received on this aspect of the proposal.

VI. Statutory Authority and Findings

The Commission hereby adopts proposed amendments with the modifications described above to Forms 1 and 1–A and to Rule 6a–2 pursuant to its authority under the Securities Exchange Act of 1934 [15 U.S.C. 78a et seq., as amended by Pub. L. No. 94–29 (June 4, 1975)], and particularly Sections 3, 5, 6, 17, 19 and 23 thereof [15 U.S.C. 78, 78e, 78f, 78g, 78s and 78w]. The Commission finds that these amendments are intended to bring the Forms and rule into conformity with the Act, as revised by the 1975 Amendments, to update their contents to better represent the current trading environment, and to eliminate obsolete and duplicative requirements. As required by Section 23(a) of the Act, the Commission has considered the impact that these rulemaking actions would have on competition and has concluded that they would impose no significant burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Pursuant to Rule 6a–1(d) the Commission finds that, because of the adoption of these amendments, the number of amendments to be filed in the registered national securities exchanges' annual amendments to their registration statements will be so great that the purpose of clarity will be promoted by the filing of a complete new registration statement, and all exhibits prescribed to be filed therewith, by each exchange as its 1983 Form 1–A.

VII. Text of Amendments

Accordingly, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. By revising § 240.6a–2 to read:

§ 240.6a–2 Periodic amendments to registration statements or exemption statements of exchanges.

(a) Unless exempted pursuant to paragraph (c) of this section, on or before June 30 of each year, each exchange registered as a national securities exchange or exempted from such registration shall file an annual amendment setting forth:

(1) All changes, and the effective dates thereof, which have been effected in any of the information contained or incorporated in the statement, or in Exhibits B, C and D, and which have not previously been reported in an annual amendment. Such amendment shall bring the statement and Exhibits B, C and D up to date as of the latest practicable date within one month of the date on which the amendment is filed. In the event that no changes have occurred in any of this material during the period covered by the amendment, a statement to that effect shall be set forth in the amendment.

(2) Complete Exhibits E and F as of the end of the latest fiscal year of the exchange, or, in the case of the unconsolidated financial statements of an affiliate or subsidiary required under Exhibit F, as of the end of the latest fiscal year of such affiliate. In the event that no change has occurred in the status of an affiliate or subsidiary listed in a previous Exhibit F as one that is required by another Commission rule to file annual financial statements equivalent to those described in Exhibit F, a statement to that effect shall be included.

(3) Complete exhibits G, H, I, J, K, L and M. The information contained in these exhibits shall be up to date as of the latest practicable date within 3 months of the date on which the annual amendment is filed.

(b) Unless exempted pursuant to paragraph (c) of this rule, on or before June 30, 1983, and every three years thereafter each exchange registered as a national securities exchange shall file complete Exhibits A(1), A(2), and A(3) to its registration statement. The information contained in these exhibits shall be up to date as of the latest practicable date within three months of the date on which these exhibits are filed.

(c) The Commission may exempt a national securities exchange from making the periodic amendments required by this rule for any affiliate or subsidiary listed in response to Item 7 of the exchange's registration statement, as amended, that either (1) is listed in response to Item 7 of the registration statement, as amended, of one or more other national securities exchanges; or (2) was an inactive subsidiary throughout the subsidiary's latest fiscal year. The Commission may grant such exemptions upon such terms and conditions as it deems are necessary and appropriate for the protection of investors and the public interest, provided, however, that at least one national securities exchange shall be

[23] One commentor suggested that this requirement will be "somewhat burdensome." *See* NYSE letter. The Commission does not believe that this will impose a significant burden on the exchanges. Each exchange would, in preparing its 1983 annual amendments, be required to submit certain exhibits in full anyway (Exhibits A(1), A(2), A(3), and E–M). In addition, the exchanges would be required to review the other exhibits and the body of the registration statement to see if there have been any changes to the information contained in those items and exhibits that have to be reported under Rule 6a–2(a)(1). Thus, preparing an entirely new form will not require the exchanges to seek out or generate any information or material they already would not have to seek out in the process of completing their annual amendments. Finally, the exchanges will be required to amend, and submit as amended on this year's Form 1–A, almost every item and exhibit to Form 1–A because of the changes being adopted today. Thus, the requirement of preparing and submitting only for 1983 an entirely new registration statement, with exhibits, imposes at most a minor clerical burden on the exchanges. This burden is outweighed by the Commission's interest in having available a complete registration statement against which future exchange submissions of revised Form 1–A may be compared.

required to make the periodic amendments required by this rule for an affiliate or subsidiary described in (c)(1) of this section.

PART 249—FORM, SECURITIES EXCHANGE ACT OF 1934

§ 249.1 [Amended]

2. By revising Form 1 in § 249.1 to read as follows:

(Form 1 does not appear in the Code of Federal Regulations)

Securities and Exchange Commission

Washington, D.C.

Form 1

Application for Registration or Exemption From Registration as a National Securities Exchange

On the basis of the attached statement and exhibits, the undersigned hereby applies for registration* exemption from registration* as a national securities exchange, pursuant to Section 6 of the Securities Exchange Act of 1934 and the rules and regulations thereunder.

Exchange _____
By Name Title _____
Date _____
(SEAL)
Attest: Name Title _____

Instructions for Form 1 and Accompanying Statements and Exhibits

1. Form 1 and the accompanying statement and exhibits shall be filed in duplicate, each of which shall be signed and attested by duly authorized officials of the exchange.

2. An exchange may use the printed Form 1 and statement. If the space provided in the statement for an answer to any item is insufficient, the answer may be typed on a separate insert page or pages which shall be incorporated into the statement by reference thereto in the space provided for the item.

3. If the exchange does not use the printed Form 1 and statement it shall type or print a complete Form 1 and statement containing both the items in each and the answers thereto. Form 1 and the accompanying statement and exhibits shall be typed or printed on good quality 8½ × 11 inch white paper and shall have a margin of at least 1½ inches on the left.

4. If the information called for by any exhibit is available in printed form, the printed material may be used provided it does not exceed 8½ × 11 inches in size.

5. If any item of the statement is inapplicable, a statement to that effect shall be made following the item. If any exhibit called for is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit.

6. All answers to items of the statement shall be stated as briefly as completeness will permit, and may be expanded upon or qualified by reference to applicable pages, articles, sections or paragraphs of any exhibit.

*Strike out inapplicable words.

STATEMENT

Securities and Exchange Commission

Washington, D.C.

Statement to be Filed in Connection With an Application for Registration or Exemption from Registration as a National Securities Exchange under the Securities Exchange Act of 1934.

Organization

1. State the exact name of the exchange:
2. State the address and telephone number of the exchange:
3. (a) State the form of organization of the exchange: (e.g., association, corporation, etc.)
(b) State the date of organization in present form. If originally organized in another form also give date and form of original organization:
(c) Name the state and provide reference to any statute thereof under which the exchange is organized:
(d) State the name of each exchange which has been merged into, absorbed by, or consolidated with the subject exchange since September 1, 1934, giving the date when each merger, absorption, or consolidation occurred:
4. State the date upon which the fiscal year of the exchange ends:
5. State the name and address of counsel for the exchange:
6. State the name and address of the person hereby authorized to receive service of process and notices on behalf of the exchange:
7. For each organization which during the previous year has been affiliated with or subsidiary to the exchange, either directly or indirectly, through security ownership, joint membership or otherwise, provide the following information:
(a) Name and address of the organization:
(b) Form of organization: (e.g., association, corporation, etc.)
(c) Name of state and reference to any statute thereof under which organized:
(d) Date of organization in present form:
(e) Brief description of the nature and extent of affiliation:
(f) Brief description of its business or functions:
(g) Name of any of the organizations identified above which ceased to be associated with the exchange during the previous year, and a brief statement of the reasons for the termination of the association:
8. State the classes of membership (*e.g.*, full membership, associate membership, physical access membership, electronic access membership, etc.) and indicate the number of members in each category.
9. State as nearly as practicable the number of persons who are (a) engaged primarily in the followng activities or functions on or through the facilities of the exchange: [1]
(1) Floor brokers:
(2) Specialists:
(3) odd lot dealers:
(4) other market makers:
(5) proprietary traders (on the exchange floor):
(6) inactive or other function:
(b) State the estimated average total number of members in attendance at security trading sessions:

Exhibits

Exhibits to be filed in connection with (i) an Application for Registration or Exemption from Registration as a National Securities Exchange pursuant to Section 6 of the Securities Exchange Act of 1934 and Rule 6a–1 thereunder, or (ii) a Periodic Amendment pursuant to Rule 6a–2. [2]

Exhibit A(1)—A copy of the constitution, articles of incorporation or association with all amendments thereto, and of existing by-laws or rules or instruments corresponding thereto, whatever the name, of the exchange.

Exhibit A(2)—A copy of all written rulings, settled practices having the effect of rules, and interpretations of the Governing Board or other committee of the exchange in respect of any of the provisions of the constitution, by-laws, rules or trading practices of the exchange, which are not included in the material submitted under Exhibit A(1).

Exhibit A(3)—A copy of the constitution, articles of incorporation or association with all amendments thereto, and of existing by-laws or rules or instruments corresponding thereto, whatever the name, of each affiliate and subsidiary listed in answer to Item 7 of the Statement.

Exhibit B—A complete set of all forms [3] pertaining to:

(1) Application for membership [4] in the exchange.

(2) Application for approval as a person associated with a member [5] of the exchange.

(3) Matters similar to any of the foregoing.

Exhibit C—A complete set of all forms of financial statements, reports or questionnaires required of members, relating to such matters as members' financial responsibility or minimum capital requirements.

Exhibit D—A complete set of documents, comprising the exchange's listing applications, including the agreements required to be executed in connection therewith, and a schedule of listing fees.

Exhibit E—For the latest fiscal year of the exchange, audited consolidated financial statements which (1) are prepared in

[1] A person shall be considered to be "engaged primarily" in an activity or function for purposes of this item when that activity or function is the one in which that person is principally engaged. Where more than one type of person engages in any of the six types of activities or functions enumerated in this item, identify each such type (*e.g.*, proprietary trader, Registered Competitive Trader and Registered Competitive Market Maker) and state the number of members in each.

[2] If any exhibit called for is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit.

[3] Provide separate tables of contents listing (by title and/or number) the forms included in Exhibits B, C, and D.

[4] The terms "member" and "membership" are used interchangeably; unless the context otherwise requires "member" has the same meaning as that provided in Section 3(a)(3)(A) of the Act.

[5] The term "person associated with a member" has the same meaning as that provided in Section 3(a)(18) of the Act.

accordance with generally accepted accounting principles, and (2) are covered by a report prepared by an independent public accountant.[6]

Exhibit F—For the latest fiscal year, unconsolidated financial statements of the exchange and each of its affiliates and subsidiaries listed in Item 7 of the statement, and any amendments thereto, which financial statements, at a minimum, shall consist of a balance sheet and an income statement with such footnotes and other disclosures as are necessary to avoid rendering the financial statements misleading; provided, however, that if any such affiliate or subsidiary is required by another Commission rule to submit annual financial statements equivalent to those described herein, a statement to that effect, with a citation to such other Commission rule, may be included in lieu of the financial statements required hereunder.

Exhibit G—A list of the present officers, governors, members of all standing committees,[7] or persons performing functions similar to any of the foregoing, whatever their title or technical status may be, of the exchange, who presently hold or have held their offices or positions during the previous year, indicating for each:

(1) Name.
(2) Title.
(3) Dates of commencement and termination of term of office or position.
(4) Length of time each has held the same office or position.
(5) Type of business in which each is primarily engaged (*e.g.*, floor broker, specialist, odd-lot dealer, etc.)

Exhibit H—A list of the present officers, directors, members of all standing committees or persons performing functions similar to any of the foregoing, whatever their title or technical status may be, of each affiliate and subsidiary listed in answer to Item 7 of the Statement, indicating for each:

(1) Name.
(2) Title.

Exhibit I—A list as of latest practicable date[8] alphabetically arranged of all individual members of the exchange indicating for each:[9]

(1) Name.
(2) Date of election to membership.
(3) Name of firm with which he is associated and his relationship thereto (*e.g.*, partner, officer, director, employee).
(4) Business address.

Exhibit J—A list as of latest practicable date alphabetically arranged of all member organizations of the exchange indicating for each:

(1) Name.
(2) Form of organization (*e.g.*, sole proprietorship, partnership, corporation, etc.).
(3) Principal place of business and telephone number.
(4) The individual(s) whose membership it uses.

Exhibit K—A schedule of securities listed on the exchange indicating for each:

(1) Name of issuer.
(2) Description of security.

Exhibit L—A schedule of securities admitted to unlisted trading privileges on the exchange showing for each:

(1) Name of issuer.
(2) Description of security.

Exhibit M—A schedule of unregistered securities admitted to trading on the exchange which are exempt from registration under Section 12(a) of the Act, indicating for each:

(1) Name of issuer.
(2) Description of security.
(3) Specific statutory exemption claimed (*e.g.*, Rule 12a–6).

§ 249.1a [Amended]

3. By revising Form 1–A in § 249.1a to read as follows:

(Form 1–A does not appear in the Code of Federal Regulations)

Securities and Exchange Commission

Washington, D.C.

Form 1–A

Amendment to an Application for Registration or Exemption From Registration as a National Securities Exchange

Amendment No. ———

Designate the type of amendment as follows: Periodic Amendment (Rule 6a–2) period covered ———— to ———— [ ]

Other Amendment (Rule 6a–1 (c) to (d) [ ]

The undersigned exchange hereby submits the attached material as amendment to its application for registration* exemption from registration* as a national securities exchange in respect of the items and/or exhibits listed below:

Exchange ————————
By Name Title ————————
Date ————————
(Seal)
Attest Name Title ————————

Instructions for Form 1–A

1. Amendments on Form 1–A and the material attached thereto shall be filed in duplicate, each of which shall be signed and attested by duly authorized officials of the exchange. Each Form 1–A shall be dated and numbered in the order of filing. The type of amendment, whether annual or other, shall be specified in the space provided on the Form.

2. An exchange may use the printed Form 1–A. If it does not use the printed Form 1–A it shall type or print a complete Form 1–A on good quality 8½ x 11 inch white paper and shall have a margin of at least 1½ inches on the left. All material filed with such form shall comply with the same requirements.

3. If the information called for by any exhibit is available in printed form, the printed material may be used provided it does not exceed 8½ x 11 inches in size.

4. Any number of items or exhibits being amended may be listed on one Form 1–A.

By the Commission.

Dated: May 26, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

---

[6] If an exchange has no consolidated subsidiaries, it shall file audited financial statements under Exhibit E for the exchange alone, and need not file a separate unaudited financial statement for the exchange under Exhibit F.

[7] For Exhibits G and H, group members of each standing committee together.

[8] For Exhibits I, J, K, L and M, indicate the date as of which each list or schedule is prepared.

[9] For Exhibits I and J, if more than one class of membership is provided for by the constitution and rules of the exchange, either (1) list separately accordingly to class; or (2) indicate the class of membership applicable.

* Strike out inapplicable words.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 601

Amendment of the Statement of Procedural Rules To Provide for a Consolidated Appeals Conference With Respect to Certain Windfall Profit Tax Issues

AGENCY: Internal Revenue Service, Treasury.

ACTION: Amendment of the Statement of Procedural Rules.

SUMMARY: This document contains amendments to the Statement of Procedural Rules (26 CFR Part 601) which allow the Internal Revenue Service to provide consolidated Appeals conferences with respect to certain windfall profit tax issues. This amendment is necessary because the Internal Revenue Service does not have the resources to provide the number of separate conferences that might be requested, especially in cases where hundreds of producers own interests in the same property or lease.

DATES: These amendments to the Statement of Procedural Rules are effective June 2, 1983, and apply to all crude oil removed (or deemed removed) from premises after February 29, 1980.

FOR FURTHER INFORMATION CONTACT: Donald W. Stevenson of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T (202–566–3297, not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On December 3, 1982, proposed amendments to the Statement of Procedural Rules (26 CFR Part 601) were published in the **Federal Register** (47 FR 54459). These amendments were proposed to allow the Internal Revenue Service to provide a single consolidated Appeals conference to resolve administratively certain windfall profit tax issues arising in connection with the examination of an oil and gas property or lease. Several comments were received suggesting changes to these proposed amendments. A public hearing on the proposed amendments was held on January 18, 1983. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this document.

Explanation of Provisions

The Crude Oil Windfall Profit Tax Act of 1980 imposes an excise tax on domestically produced taxable crude oil. The producer of the oil is liable for the windfall profit tax. The prior procedural rules did not provide a mechanism by which the Service could require all producers owning an interest in a property or lease to join in a single administrative proceeding. Thus, under the prior procedures, each producer could request and would be entitled to a separate Appeals conference. The Internal Revenue Service does not have the resources to provide the number of separate conferences that might be requested, especially in cases where hundreds of producers own interests in the same property or lease.

The Statement of Procedural Rules is amended, therefore, to allow the Service to provide a single consolidated Appeals conference to determine all "oil items" arising in connection with a property or lease. Generally, "oil items" are items taken into account in computing the windfall profit tax which can be more readily determined at the property, rather than producer, level. These new procedural rules apply only when the Service determines that a consolidated procedure is necessary for the effective administration of that tax. With respect to a particular property, the Service may conduct separate Appeals conferences with certain producers and a consolidated Appeals conference with the others. The determination by the Appeals office after a consolidated Appeals conference will be the final administrative determination with respect to all "oil items" arising in connection with the property or lease under examination for all producers except those for whom the Service determines that separate proceedings are appropriate.

Under the new rules a producer generally will be notified of any adjustment proposed by the examiner that may affect the producer's tax liability by way of a special letter designated as a "60-day letter." This letter will explain the reason(s) for the adjustment(s), invite the producer to submit written comments or additional information which may not have been considered by the examiner, and identify the location where the Appeals conference will be held if one is requested. No producer will be permitted to attend the conference unless the producer files a written statement of the producer's intent to attend the Appeals conference.

The amendments to the Statement of Procedural Rules will not affect the producer's administrative appeal rights with respect to "producer items," that is, items more readily determined at the producer level such as exemptions and independent producer status. Producers who participate in a consolidated Appeals conference with respect to "oil items" are still entitled to a separate Appeals conference to resolve issues related to "producer items."

Summary of Changes and Public Comments

Permissibility of New Procedures

One comment questioned the authority for the proposed amendment, especially in light of new Code section 6232, which provides for consolidated windfall profit tax proceedings in the case of partnerships. The Statement of Procedural Rules is issued under the authority contained in 5 U.S.C. 301 and 552. New Code section 6232 provides for consolidated administrative and *judicial* proceedings in the case of *partnerships*. The amendment to the Statement of Procedural Rules relates only to *administrative* proceedings and applies to *all producers*, whether members of the same partnership or not.

Several comments suggested that the proposed amendment might be prohibited by Code section 6103, relating to confidentiality and disclosure of returns and return information. Section 6103(h)(4) provides for disclosure of a return or return information in an administrative proceeding pertaining to tax administration when the taxpayer is a party to the proceeding.

Definition of Oil Items

Several commenters on the proposed amendment criticized the definition of "oil items" as overly broad because the determination of some "oil items" might depend upon different factual findings for different producers. For example, the removal price and the severance tax adjustment for oil taken in-kind by one producer may differ from the removal price and severance tax adjustment for oil that the other producers authorized the operator to sell on their behalf. Except for the modification discussed below, the definition of "oil items" is adopted as proposed. In most cases these items are more readily determined at the property, rather than the producer, level. Because the rules adopted permit the Service to provide separate Appeals conferences to certain producers even though a consolidated conference is being conducted for other producers with interests in the same property, the Service will have the flexibility to deal separately with producers in special circumstances where that seems appropriate.

One commenter states that the applicability of the exemption for front-end oil to oil produced from a particular property should not be an oil item because one producer may have released crude oil from that property from price controls to recoup expenditures on a qualified tertiary project while another producer may not have released any crude oil from price controls. The rule adopted excludes this item from the list of "oil items" in response to this comment. The rule adopted, however, provides that "oil items" include the factors taken into account in determining whether production from a particular property qualifies a producer for the exemption.

Schedule of Producers

The proposed amendments required the operator to furnish the Service with a schedule of all producers holding interests in the property. Commenters pointed out that in most cases the operator will not have this information. To determine the ultimate producer of the oil, the operator may have to trace through the records of other entities. Those other entities may refuse to disclose this information. The amendments, as modified, require the operator to furnish the Service with a schedule of producers as reasonably complete as possible.

60-Day Letter

The proposed amendments provided that the Service would notify all identified producers of any proposed adjustments by way of a special 30-day letter. The producer generally had 30 days to notify the Service that the producer intended to participate in the conference and to submit a protest. The

proposed amendments also required a person who received a 30-day letter but was not liable for payment of the windfall profit tax (for example, a partnership) to furnish the letter to the ultimate taxpayer within 5 days of receipt of the letter.

One commenter stated that 30 days may not be sufficient time to allow a person who received the 30-day letter indirectly from the Service to respond to the letter even if the original recipient acts in an expeditious manner. Another commenter pointed out that where multiple notifications must be passed from one person to another down through the chain of ownership interest, the time required to notify all producers may exceed the 30-day limit.

Commenters stated that 5 days may be insufficient to permit the person who receives a 30-day letter with respect to oil for which that person is not the producer to determine all the other persons to whom a copy of the 30-day letter must be furnished.

Under the amendments, as modified, the producer has 60 days to notify the Service that the producer intends to participate in the consolidated conference and to submit a protest. Any person who receives a 60-day letter with respect to oil of which another person is the producer and who is not authorized or empowered to act on behalf of or represent that other person shall, within 10 days of the receipt of the 60-day letter, furnish to that other person a copy of the 60-day letter, including the proposed adjustments and such other information (for example, ownership percentage) as that other person may need in order to understand the application of the 60-day letter.

Miscellaneous Changes

The amendment being adopted makes several minor modifications to the proposed amendment. The minor modifications that are in response to comments are discussed below. The other modifications merely clarify certain provisions of the proposed amendment and do not require explanation in this preamble.

The proposed amendment provided that the internal revenue district office with jurisdiction over the place where the property or lease was located would conduct the examination of the operator's books. The amendment being adopted provides that that responsibility lies with the district office with jurisdiction over the place where the operator maintains its books.

The proposed amendment provided that the letter sent to producers with the examination report would note whether the operator agreed with the proposed adjustments. The amendment being adopted omits this provision. Omission of this provision, however, does not bar the Service from including this information in the letter if it would be appropriate. The list of items to be included in the letter is not intended to be exclusive.

The amendment being adopted also makes clear that a producer is required to file a protest only if the proposed adjustment for the producer exceeds $2,500 for a single taxable period.

Drafting Information

The principal author of these amendments to the Statement of Procedural Rules is Donald W. Stevenson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service participated in developing the regulation, both on matters of substance and style.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Because this rule is a general statement of rules of Internal Revenue procedure and practice, no regulatory analysis is required.

List of Subjects In 26 CFR Part 601

Administrative practice and procedure, Aged, Alcohol and alcoholic beverages, Arms and munitions, Cigars and cigarettes, Claims, Freedom of Information, Oil items, Producer items, Taxes.

Adoption of Amendments to the Statement of Procedural Rules

Accordingly, the Statement of Procedural Rules (26 CFR Part 601) is amended as follows:

PART 601—[AMENDED]

Paragraph 1. Section 601.105 is amended by adding the following new paragraph (l):

§ 601.105 Examination of returns and claims for refund, credit or abatement; determination of correct tax liability.

* * * * *

(l) *Special procedures for crude oil windfall profit tax cases.* For special procedures relating to crude oil windfall profit tax cases, see § 601.405.

Par. 2. Section 601.106 is amended by adding the following new paragraph (i):

§ 601.106 Appeals functions.

* * * * *

(i) *Special procedures for crude oil windfall profit tax cases.* For special procedures relating to crude oil windfall profit tax cases, see § 601.405.

Par. 3. There is added immediately after § 601.404 the following new § 601.405:

§ 601.405 Windfall profit tax.

(a) *General*—(1) *Applicability.* The administrative procedures set forth in this section shall apply only with respect to oil items arising under the crude oil windfall profit tax imposed by section 4986 and only when the Internal Revenue Service determines that these procedures are necessary to administer the windfall profit tax effectively. With respect to a particular property, the Service may offer separate Appeals conferences to some of the producers and offer a consolidated Appeals conference to the remaining producers. Among the reasons for which a separate conference may be considered would be the need to protect proprietary information. A separate conference may be granted to a producer with respect to all issues or selected issues only, with the remaining issues to be resolved in the consolidated proceeding. In the case of a producer to whom the Service offers a separate Appeals conference, the provisions of this section shall be applicable only to the extent appropriate.

(2) *Definitions.* For purposes of this section—

(i) *Oil item.* The term "oil item" means any item necessarily taken into account in making the following determinations with respect to the crude oil removed from a property or lease during a taxable period:

(A) The tier or tiers of the crude oil;

(B) The quantity of crude oil in each tier;

(C) The adjusted base price and removal price;

(D) The severance tax adjustment;

(E) The Trans-Alaska Pipeline System tariff;

(F) For purposes of section 4994(c)—

(*1*) Whether a property is a qualified property,

(*2*) Whether a project is a front-end tertiary project, and

(*3*) Whether expenses with respect to the project are allowed expenses;

(G) The determination of whether the oil qualifies as exempt Alaskan oil;

(H) The determination of when removal from the premises occurs and what constitutes the property; and

(I) The percentage interest of each producer in the oil prior to its removal from

(ii) *Producer item.* The term "producer item" means an item taken into account in determining the producer's liability for the crude oil windfall profit tax other than an oil item.

(3) *Description of tax.* The crude oil windfall profit tax is a temporary excise tax imposed on domestically produced taxable crude oil removed from the premises during a taxable period.

(4) *Applicable regulations.* Information concerning the scope of the tax, the forms used, the requirements for withholding and depositing the tax, and the functioning of the Service with respect thereto is contained in the applicable regulations. Copies of all necessary forms, and instructions as to their preparation and filing, may be obtained from any forms distribution center of the Internal Revenue Service.

(b) *Examination-procedures*—(1) *General.* Examination of a producer's windfall profit tax liability (or claim for credit or refund of overpayments of windfall profit tax based on an oil item) will generally begin with the examination of the books and records of the operator of the property or the lease in which the producer has an interest. Thus, the examination of a producer's liability or claim for credit or refund based on an oil item will generally be kept open until the examination and all other administrative proceedings relating to the oil items arising in connection with the property or lease are completed.

(2) *Examination of the property or lease*—(i) *Office conducting examination.* The Examination Division of the district office in the internal revenue district in which the operator of the property or lease maintains its books and records will generally conduct the examination.

(ii) *Schedule of producers.* The operator shall furnish the examining agent with a schedule, as reasonably complete as possible, of producers owning interests in the property or lease showing their names, taxpayer identification numbers, mailing addresses, and ownership percentages. The operator satisfies the requirement of providing a schedule of producers as reasonably complete as possible by identifying all producers that can be identified from the operator's books and records or from other sources through reasonable effort on the operator's part. If the operator later discovers at any time that the information furnished to the examiner is incomplete or incorrect, the operator shall furnish such revised or additional information as may be necessary.

(iii) *Examination report.* At the conclusion of the examination of the books and records of the operator, the examiner will prepare a complete examination report fully explaining all proposed adjustments, if any.

(3) *Sixty-day letter*—(i) *Distribution of 60-day letter.* A copy of the relevant portions of the examination report under cover of a special transmittal letter (60-day letter) will be sent to each person identified as having an interest in the property or lease and with respect to whom adjustments are to be proposed. Any person (as defined in section 7701(a)(1)) who receives a 60-day letter with respect to oil of which another person is the producer and who is not authorized or empowered to act on behalf of or represent that other person shall, within 10 days of the receipt of the 60-day letter, furnish to that other person a copy of the 60-day letter, including the proposed adjustments and such other information (for example, ownership percentage) as that other person may need in order to understand the application of the 60-day letter. Any person forwarding a 60-day letter shall notify the Internal Revenue Service of the name, taxpayer identification number, mailing address, type of interest owned, and ownership percentage of the person to whom the letter is forwarded. This information shall be furnished to the Internal Revenue Service at the return address shown on the 60-day letter

(ii) *Content of 60-day letter.* The 60-day letter shall—

(A) Set out the proposed adjustments for the producer and the reasons for the adjustments.

(B) Invite the producer to submit written comments or additional information which may not have been considered by the examiner.

(C) State that administrative review of the proposed adjustments will be granted only to the extent provided in the letter.

(D) Identify the general location where the consolidated Appeals conference will be held, if any producer requests one, and explain that the producer will be given later notice of the specific location and time of the conference if the producer notifies the Service of the producer's intention to attend the conference.

(E) Explain that the producer will not be permitted to participate in the consolidated Appeals conference unless the producer, within 60-days after the mailing of the 60-day letter, submits a written statement that the producer intends to attend the consolidated Appeals conference. In addition, a producer intending to attend the consolidated Appeals conference must, within 60 days after the mailing of the 60-day letter, file a written protest setting forth the facts, law, and arguments upon which the producer relies in protesting the proposed adjustment for a taxable period if the proposed adjustment for the producer for that period exceeds $2,500.00. No written protest is required if the proposed adjustment for a taxable period is $2,500.00 or less.

(F) State that the producer will receive a later notice of the final administrative determination with respect to oil items.

(c) *Appeals procedures.* If a timely protest, a request for conference or written comments are received, they will be forwarded along with the examiner's findings and the schedule of property or lease owners to the appropriate Appeals office. No action will be taken with respect to producers who do not respond to the 60-day letter until the Appeals office completes its consideration of the case. Only one consolidated Appeals conference will be held to determine all oil item adjustments arising in connection with the property or lease unless the Internal Revenue Service determines that more than one consolidated Appeals conference is necessary. This conference will be scheduled by the appropriate Appeals office as soon as possible after the end of the 60-day period. Except in extraordinary circumstances, such as fraud discovered after the Appeals office has made its determination, the determination of the Appeals office will be the final administrative determination with respect to all oil items arising from the property or lease during the taxable year regardless of whether all oil items were contested at the conference.

(d) *Austin Service Center procedures.* Upon receipt of the findings of the examiner (in cases where no Appeals conference was requested or written comments submitted) or the determination of the Appeals office, the Austin Service Center will compute the potential additional tax liability with respect to that property or lease for each producer and inform the producer of the potential additional tax and of any offer of settlement that Appeals has found satisfactory. The Austin Service Center also will explain that no further administrative review will be granted with respect to any oil item arising in connection with the property or lease under examination. The producer will be asked to—

(1) Sign a waiver of restrictions on the assessment and collection of any deficiency with respect to the property or lease in question and pay any additional tax due at that time, or

(2) Inform the Austin Service Center of any producer items that the producer wishes to place in issue.

Examination of producer items will be conducted in accordance with procedures provided in § 601.105. The producer may seek administrative review of the examiner's findings with respect to a producer item in accordance with procedures provided in § 601.106.

(e) *Cross reference.* For procedures regarding technical advice during examination and Appeals, see §§ 601.105(b)(5) and 601.106(f)(9).

This amendment to the Statement of Procedural Rules is issued under the authority contained in 5 U.S.C. 301 and 552 (80 Stat. 379 and 383) and in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 21 and 212

[T.D. ATF-133; Ref: Notices 364 and 365]

Formulas for Denatured Alcohol and Rum

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This final rule amends and recodifies the regulations regarding formulas for denatured alcohol and rum. The recodification is part of a general plan to reorganize all regulations administered by the Bureau of Alcohol, Tobacco and Firearms (ATF). In addition, numerous changes are made to these regulations. Public comment on the changes has been solicited through notices of proposed rulemaking. All significant changes from the regulations as proposed in those notices are summarized under "Supplementary Information."

EFFECTIVE DATE: July 5, 1983. The Director of the Federal Register approves the incorporation by reference of certain publications in 27 CFR 21.109 and 21.131 effective July 5, 1983.

FOR FURTHER INFORMATION CONTACT: Steve C. Simon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, D.C. 20044-0385; (202) 566-7626.

SUPPLEMENTARY INFORMATION:

Public Participation

Interested persons who wished to participate in the making of these rules were invited by Notice 364 (46 FR 9644, January 29, 1981) to submit written comments or suggestions.

In response, a number of comments were received. Some of these pertained to other ATF regulations and were not suitable for inclusion in the new Part 21, which deals primarily with denatured alcohol *formulas* (rather than production or use of denatured alcohol). Two comments advocated more extensive use of the metric system, and another proposed substitution of "percent alcohol" for "proof"; however, such changes are not considered necessary or advisable at this time.

Several comments pointed out technical corrections which were felt to be necessary; for the most part, these technical suggestions have been adopted. One comment suggested deletion of specially denatured alcohol (S.D.A.) Formula No. 17 as well as data on weights and specific gravities of formulas made with 192 proof alcohol, for reasons of lack of use. As a general principle, we feel it is best not to make such changes without prior specific notice (and opportunity for public comment); therefore, these items are not deleted at this time, though it is possible they may be proposed for deletion in a future notice. The same commenter also requested reduction of the amount of sucrose octaacetate required in S.D.A. Formula No. 40-A. However, the present denaturant level is in agreement with the use of Bitrex and brucine and is at the minimum. On the other hand, a very good point was raised by this commenter regarding the proposed new requirement for denaturers to submit applications for substitute denaturants in S.D.A. Formula No. 38-B: "The denaturer typically has no, or at best only limited indirect knowledge of how a specific SDA 38B is further formulated by the user or how it is to be used. The denaturer does not review the user's forms 1479-A, nor would he necessarily be qualified to do this to affirm a previously authorized denaturant is not suitable or available." As a result of this comment, the proposed new requirement has been reexamined. We have decided to revert to the procedure outlined in Rev. Proc. 65-3, whereby the user submits the application, under both § 21.56 (S.D.A. 29) and § 21.65 (S.D.A. 38-B). (Denaturers may submit an application under § 21.91 for substitute denaturants in any formula.)

A final comment requested that certain new use codes be authorized. As a result, Use Code 210 has been added under S.D.A. Formula No. 27, and Use Codes 210 and 249 have been added under S.D.A. Formula No. 33. Other changes proposed by Notice 364, not the subject of any public comments, are being adopted as proposed. Such changes deal with: ingredients, conditions governing use, use codes, denaturant specifications, authority delegations, formula revisions, a form number change, and denatured spirits for export.

Other Changes

This document also incorporates the amendments proposed in Notice 365 (46 FR 9969, January 30, 1981), relating to a new S.D.A. Formula No. 3-C. Some small modifications reflect the comments received. These modifications are: (1) Specifications for isopropyl alcohol are included in Subpart E, for consistency with ATF's policy on other common solvents (e.g. methyl alcohol, chloroform). (2) Use Code 043 is added and Use Code 810 is subdivided, thus giving Formula No. 3-C identical use codes with Formula No. 3-A. The distinction in authorized usage between these two formulas is clarified in a new paragraph § 21.37(c) ("Conditions governing use").

This document also reflects the changes made to 27 CFR Part 212 by Treasury Decision ATF-92, relating to incorporation by reference (46 FR 46910, September 23, 1981). With respect to the new denaturants authorized by the present document, the applicable ASTM distillation method for toluene is specified in § 21.131, and the phrase "applicable ASTM method" is deleted from § 21.117(f) (methyl *n*-butyl ketone) and § 21.111(a) (heptane).

Discussion with officials in the U.S. Department of Agriculture and the Food and Drug Administration revealed that the only S.D.A. formulas now acceptable as diluents in meat branding inks are S.D.A. Formula Nos. 3-A, 3-C, and 23-A; Formula No. 32 is no longer acceptable. This document reflects these restrictions.

Other minor changes are made for the sake of clarity: in particular, paragraph designations are added in Subpart E.

Executive Order 12291

It has been determined that these regulations are not a "major rule" within the meaning of Executive Order 12291, 46 FR 13193 (1981), because they will not have an annual effect on the economy of

$100 million or more; they will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and they will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this rule, because the changes made by it will not have a significant economic impact on a substantial number of small entities. The changes being made are not major and are not expected to have any significant impact on the businesses of most permittees operating under the new Part 21. These regulations are not expected to have significant secondary or incidental effects on a substantial number of small entities, nor will they cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Drafting Information

The principal drafter of this document was Steve C. Simon of the Research and Regulations Branch.

List of Subjects in 27 CFR Part 21

Alcohol and alcoholic beverages, Authority delegations, Chemicals, Gasohol.

Issuance

These regulations are issued under the authority contained in 26 U.S.C. 5242 and 7805 (72 Stat. 1369 and 68A Stat. 917, as amended).

In consideration of the above, the following changes are made to Title 27 of the Code of Federal Regulations:

PART 212—[REMOVED]

Paragraph 1. Part 212 is removed.

Paragraph 2. Part 21 is added to read as follows:

PART 21—FORMULAS FOR DENATURED ALCOHOL AND RUM

Subpart A—General Provisions

Sec.
21.1 Scope of Regulations.
21.2 Forms prescribed.
21.3 Stocks of discontinued formulas.
21.4 Related regulations.

21.111 Heptane.
21.112 Isopropyl alcohol.
21.113 Kerosene.
21.114 Kerosene (deodorized).
21.115 Methyl alcohol.
21.116 Methyl isobutyl ketone.
21.117 Methyl *n*-butyl ketone.
21.118 Nicotine solution.
21.119 Nitropropane, mixed isomers of.
21.120 Phenyl mercuric benzoate.
21.121 Pyridine bases.
21.122 Pyronate.
21.123 Quassin.
21.124 Rubber hydrocarbon solvent.
21.125 Safrole.
21.126 Shellac (refined).
21.127 Sodium (metallic).
21.128 Spearmint oil, terpeneless.
21.129 Spike lavender oil, natural.
21.130 Sucrose octaacetate.
21.131 Toluene.
21.132 Vinegar.

Subpart F—Uses of Specially Denatured Alcohol and Specially Denatured Rum

Sec.
21.141 List of products and processes using specially denatured alcohol and rum, and formulas authorized therefor.

Subpart G—Denaturants Authorized for Denatured Spirits

21.151 List of denaturants authorized for denatured spirits.

Subpart H—Weights and Specific Gravities of Specially Denatured Alcohol

21.161 Weights and specific gravities of specially denatured alcohol.

Authority: Title II, sec. 201, Pub. L. 85–859, 72 Stat. 1369; sec. 7805, 68A Stat. 917 (26 U.S.C. 5242, 7805) unless otherwise noted.

Subpart A—General Provisions

§ 21.1 Scope of regulations.

The regulations in this part relate to the formulation of completely denatured alcohol, specially denatured alcohol, and specially denatured rum; to the specifications for denaturants; and to the uses of denatured spirits.

§ 21.2 Forms prescribed.

(a) *General.* The Director is authorized to prescribe all forms required by this part. All of the information called for in each form shall be furnished as indicated by the headings on the form and the instructions on or pertaining to the form. In addition, information called for in each form shall be furnished as required by this part.

(b) *List of forms.* "Public Use Forms" (ATF Publication 1322.1) is a numerical listing of forms issued or used by the Bureau of Alcohol, Tobacco and Firearms. This publication is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(c) *Requests for forms.* Requests for forms should be mailed to the ATF Distribution Center, 3800 South Four Mile Run Drive, Arlington, Virginia 22206.

§ 21.3 Stocks of discontinued formulas.

Denaturers, or specially denatured spirits dealers or users, having on hand stocks of denaturants or formulas of specially denatured spirits no longer authorized by this part may—

(a) Continue to supply or use those stocks in accordance with existing permits until the stocks are exhausted;

(b) Use up those stocks in any manufacturing process approved by the Chief, Chemical Branch, pursuant to an application filed with him on ATF Form 5150.19, Formula for Articles made with Specially Denatured Alcohol and Rum;

(c) On approval of an application, filed with the regional regulatory administrator and approved by him, destroy those stocks under whatever supervision the regional regulatory administrator requires; or

(d) Otherwise dispose of those stocks in a manner satisfactory to the Director, pursuant to approval of an application (to be filed with the regional regulatory administrator for transmittal to the Director).

§ 21.4 Related regulations.

The procedural and substantive requirements relative to the production of denatured alcohol and specially denatured rum are prescribed in Part 19 of this chapter, and those relative to the distribution and use of denatured alcohol and specially denatured rum are prescribed in Part 211 of this chapter.

§ 21.5 Denatured spirits for export.

Spirits may be denatured in accordance with formulas prescribed by the government of a foreign country to which the denatured spirits will be exported. However, the denaturer must first apply for and obtain written permission from the Director. The application shall be submitted to the Director and shall contain the following information:

(a) A complete list of ingredients for the spirits to be denatured.

(b) The exact amount of each ingredient to be used in denaturing the spirits.

(c) A copy (accompanied by an English translation as necessary) of the law or regulations of the foreign country to which the denatured spirits will be exported, specifying the denatured spirits formulation prescribed by that country.

§ 21.6 Incorporations by reference.

(a) "The United States Pharmacopoeia (Twentieth Revision, Official from July, 1980) and the National Formulary (Fifteenth Edition, Official from July 1, 1980)" published together as "The USP and NF Compendia," are incorporated by reference in this part. This incorporation by reference was approved by the Director of the Federal Register. The publication may be inspected at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C., and is available from the United States Pharmacopoeia Convention, Inc., 12601 Twinbrook Parkway, Rockville, Maryland 20852.

(b) Material from Parts 23, 25, and 29 of the 1980 Annual Book of ASTM Standards is incorporated by reference in this part. This incorporation by reference was approved by the Director of the Federal Register. These publications may be inspected at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C., and are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103.

(c) Material from the "Official Methods of Analysis of the Association of Official Analytical Chemists (13th Edition 1980)" (AOAC) is incorporated by reference in this part. This incorporation by reference was approved by the Director of the Federal Register. This publication may be inspected at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C., and is available from the Association of Official Analytical Chemists, 11 North 19th Street, Suite 210, Arlington, Virginia 22209.

(Pub. L. 89-554, 80 Stat. 383 as amended (5 U.S.C. 552(a)))

Subpart B—Definitions

§ 21.11 Meaning of terms.

When used in this part and in forms prescribed under this part, unless the context otherwise requires, terms have the meanings given in this section. Words in the plural form include the singular, and vice versa, and words indicating the masculine gender include the feminine. The terms "includes" and "including" do not exclude things not mentioned which are in the same general class.

Alcohol. The spirits known as ethyl alcohol, ethanol, or spirits of wine, from whatever source or by whatever process produced. The term does not include such spirits as whisky, brandy, rum, gin, or vodka.

Chief, Chemical Branch. The Chief, Chemical Branch, Scientific Services Division, Bureau of Alcohol, Tobacco and Firearms, 1401 Research Boulevard, Rockville, MD 20850.

CFR. The Code of Federal Regulations.

C.D.A. Completly denatured alcohol.

Completely denatured alcohol. The spirits known as alcohol, as defined in this section, denatured pursuant to completely denatured alcohol formulas prescribed in Subpart C of this part.

Denaturant. A material authorized by this part to be added to spirits in order to make those spirits unfit for beverage or internal human medicinal use.

Denatured spirits. Alcohol or rum to which denaturants have been added as provided in this part.

Director. The Director, Bureau of Alcohol, Tobacco and Fireams, the Department of the Treasury, Washington, D.C. 20226.

Essential oil. Any of the volatile odoriferous natural oils found in plants, which impart to such plants odor, and often other characteristic properties; also, imitations of such natural oils, as well as aromatic substances, and synthetic oils, which possess the denaturing characteristics of such natural oils.

Gallon. The liquid measure equivalent to the volume of 231 cubic inches.

Manufacturer or user. A person who holds an industrial use permit to use specially denatured alcohol or specially denatured rum, or to recover completely or specially denatured alcohol, specially denatured rum, or articles manufactured with denatured spirits, or a distilled spirits plant proprietor holding an operating permit to denature spirits.

N.F. The National Formulary. The lastest edition is intended unless otherwise specified. The designations "U.S.P." and "N.F." are considered interchangeable when preparations are transferred from one publication to the other. (For incorporation by reference, see § 21.6(a).)

Proof. The ethyl alcohol content of a liquid at 60 degrees Fahrenheit, stated as twice the percent of ethyl alcohol by volume.

Regional regulatory administrator. The principal ATF regional official responsible for administering regulations in this part.

Rum. Any spirits produced from sugar cane products and distilled at less than

190 proof in such manner that the spirits possess the taste, aroma, and characteristics generally attributed to rum.

S.D.A. Specially denatured alcohol.

Specially denatured alcohol. Those spirits known as alcohol, as defined in this section, denatured pursuant to the specially denatured alcohol formulas authorized under Subpart D of this part.

Specially denatured rum. Those spirits known as rum, as defined in this section, denatured pursuant to the specially denatured rum formula authorized under Subpart D of this part.

Spirits or distilled spirits. Alcohol or rum as defined in this part.

U.S.C. The United States Code.

U.S.P. The United States Pharmacopoeia. The latest edition is intended unless otherwise specified. The designations "U.S.P." and "N.F." are considered interchangeable when preparations are transferred from one publication to the other. (For incorporation by reference, see § 21.6(a).)

Subpart C—Completely Denatured Alcohol Formulas

§ 21.21 General.

(a) Alcohol shall be completely denatured only in accordance with formulas prescribed in this subpart (or in accordance with § 21.5).

(b) Denaturers may be authorized to add a small quantity of an odorant, rust inhibitor, or dye to completely denatured alcohol. Any such addition shall be made only on approval by the Chief, Chemical Branch. Request for such approval shall be submitted to the Chief, Chemical Branch.

(c) Odorants or perfume materials may be added to denaturants authorized for completely denatured alcohol in amounts not greater than 1 part to 250, by weight. However, such addition shall not decrease the denaturing value nor change the chemical or physical constants beyond the limits of the specifications for these denaturants as prescribed in Subpart E, except as to odor. Proprietors of distilled spirits plants using denaturants to which such odorants or perfume materials have been added shall inform the Chief, Chemical Branch, in writing, of the names and properties of the odorants or perfume materials so used.

§ 21.22 Formula No. 18.

To every 100 gallons of ethyl alcohol of not less than 160 proof add:

2.50 gallons of either methyl isobutyl ketone, mixed isomers of nitropropane, or methyl *n*-butyl ketone;

0.125 gallon of pyronate or a similar compound;

0.50 gallon acetaldol (beta-hydroxybutyraldehyde); and

1.00 gallon of either kerosene, deodorized kerosene, gasoline, unleaded gasoline, rubber hydrocarbon solvent, or heptane.

§ 21.23 Formula No. 19.

To every 100 gallons of ethyl alcohol of not less than 160 proof add:

4.0 gallons of either methyl isobutyl ketone, mixed isomers of nitropropane, or methyl *n*-butyl ketone; and

1.0 gallon of either kerosene, deodorized kerosene, gasoline, unleaded gasoline, rubber hydrocarbon solvent, or heptane.

§ 21.24 Formula No. 20

(a) *Formula.* To every 100 gallons of ethyl alcohol of not less than 195 proof add:

A total of 2.0 gallons of either unleaded gasoline, rubber hydrocarbon solvent, kerosene, or deodorized kerosene; or any combination of these.

(b) *Authorized use.* Restricted to fuel use, comparable to specially denatured alcohol "Use Code No." 611, 612, 613, 620, and 630.

Subpart D—Specially Denatured Spirits Formulas and Authorized Uses

§ 21.31 General.

(a) *Formulas for specially denatured spirits.* Alcohol and rum shall be specially denatured only in accordance with formulas prescribed in this subpart (or in accordance with § 21.5).

(b) *Proof of spirits for denaturation.* Alcohol of not less than 185 proof shall be used in the manufacture of all formulas of specially denatured alcohol, unless otherwise specifically stated or unless otherwise authorized by the Director. Rum for denaturation shall be of not less than 150 proof and may be denatured only in accordance with Formula No. 4.

(c) *Use of Denatured Spirits.* Users and manufacturers holding approved Forms 5150.19 (formerly 1479–A) covering use in processes or manufacture of products no longer authorized for a particular formula may continue that use. Pursuant to written application and subject to the provisions of 26 U.S.C. Chapter 51, Part 211 of this chapter, and this part, the Chief, Chemical Branch, may authorize the use of any formula of specially denatured alcohol or specially denatured rum for uses not specifically authorized in this part. The code number before each item under "authorized uses" shall be used in reporting the use of specially denatured alcohol or specially denatured rum.

§ 21.32 Formula No. 1.

(a) *Formula.* To every 100 gallons of alcohol add:

Four gallons of methyl alcohol and either ⅛ avoirdupois ounce of denatonium benzoate, N.F., (BITREX); 1 gallon of methyl isobutyl ketone; 1 gallon of mixed isomers of nitropropane; or 1 gallon of methyl *n*-butyl ketone.

(b) *Authorized uses.* (1) As a solvent:

011. Cellulose coatings.
012. Synthetic resin coatings.
013. Shellac coatings.
014. Other natural resin coatings.
016. Other coatings.
021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
032. Transparent sheeting.
033. Explosives.
034. Cellulose intermediates and industrial collodions.
035. Soldering flux.
036. Adhesives and binders.
041. Proprietary solvents (standard formulations).
042. Solvents and thinners (other than proprietary solvents or special industrial solvents).
043. Special industrial solvents (restricted sale).
051. Polishes.
052. Inks (not including meat branding inks).
053. Stains (wood, etc.).
141. Shampoos.
142. Soap and bath preparations.
311. Cellulose compounds (dehydration).
312. Sodium hydrosulfite (dehydration).
315. Other dehydration products.
320. Petroleum products.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
351. Processing dyes and intermediates.
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
354. Processing rosin.
355. Processing rubber (latex).
358. Processing other chemicals.
359. Processing miscellaneous products.
410. Disinfectants, insecticides, fungicides, and other biocides.
420. Embalming fluids and related products
430. Sterilizing and preserving solutions.
440. Industrial detergents and soaps.
450. Cleaning solutions (including household detergents).
481. Photoengraving and rotogravure dyes and solutions.
482. Other dye solutions.
485. Miscellaneous solutions (including duplicating fluids).

(2) As a raw material:

521. Ethyl acetate.

522. Ethyl chloride.
523. Other ethyl esters.
530. Ethylamines.
540. Dyes and intermediates.
551. Acetaldehyde.
552. Other aldehydes.
561. Ethyl ether.
562. Other ethers.
571. Ethylene dibromide.
572. Ethylene gas.
573. Xanthates.
574. Fulminate of mercury and other detonators.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) As a fuel:

611. Automobile and supplementary fuels.
612. Airplane and supplementary fuels.
613. Rocket and jet fuels.
620. Proprietary heating fuels.
630. Other fuel uses.

(4) As a fluid:

710. Scientific instruments.
720. Brake fluids.
730. Cutting oil.
740. Refrigerating uses.
750. Other fluid uses.
760. Proprietary anti-freeze.

(5) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).
900. Specialized uses (unclassified).

§ 21.33 Formula No. 2-B.

(a) *Formula.* To every 100 gallons of alcohol add:

One-half gallon of benzene, ½ gallon of rubber hydrocarbon solvent, or ½ gallon of toluene.

(b) *Authorized uses*—(1) As a solvent:

021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
032. Transparent sheeting.
033. Explosives.
311. Cellulose compounds (dehydration).
312. Sodium hydrosulfite (dehydration).
315. Other dehydration products.
320. Petroleum products.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
349. Miscellaneous drug processing (including manufacture of pills).
351. Processing dyes and intermediates.
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
358. Processing other chemicals.
359. Processing miscellaneous products.

(2) As a raw material:

521. Ethyl acetate.
522. Ethyl chloride.
523. Other ethyl esters.
524. Sodium ethylate, anhydrous.
530. Ethylamines.
540. Dyes and intermediates.
551. Acetaldehyde.
552. Other aldehydes.
561. Ethyl ether.
562. Other ethers.
571. Ethylene dibromide.
572. Ethylene gas.
573. Xanthates.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* This formula shall be used in a closed and continuous system unless otherwise authorized by the Chief, Chemical Branch.

§ 21.34 Formula No. 2-C.

(a) *Formula.* To every 100 gallons of alcohol add:

Thirty-three pounds or more of metallic sodium and either ½ gallon of benzene, ½ gallon of toluene, or ½ gallon of rubber hydrocarbon solvent.

(b) *Authorized uses.* (1) As a solvent:

344. Processing medicinal chemicals (including alkaloids).
358. Processing other chemicals.
359. Processing miscellaneous products.

(2) As a raw material:

523. Miscellaneous ethyl esters.
530. Ethylamines.
540. Dyes and intermediates.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* This formula shall be used in a closed and continuous system unless otherwise authorized by the Chief, Chemical Branch.

§ 21.35 Formula No. 3-A.

(a) *Formula.* To every 100 gallons of alcohol add:

Five gallons of methyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

011. Cellulose coatings.
012. Synthetic resin coatings.
016. Other coatings.
021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
032. Transparent sheeting.
033. Explosives.
034. Cellulose intermediates and industrial collodions.
035. Soldering flux.
036. Adhesives and binders.
043. Special industrial solvents (restricted sale).
051. Polishes.
052. Inks (including meat branding inks).
053. Stains (wood, etc.).
141. Shampoos.
142. Soap and bath preparations.
311. Cellulose compounds (dehydration).
312. Sodium hydrosulfite (dehydration).
315. Other dehydration products.
320. Petroleum products.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
351. Processing dyes and intermediates.
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
354. Processing rosin.
355. Processing rubber (latex).
358. Processing other chemicals.
359. Processing miscellaneous products.
410. Disinfectants, insecticides, fungicides, and other biocides.
420. Embalming fluids and related products.
430. Sterilizing and preserving solutions.
440. Industrial detergents and soaps.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.
481. Photoengraving and rotogravure dyes and solutions.
482. Other dye solutions.
485. Miscellaneous solutions (including duplicating fluids).

(2) As a raw material:

530. Ethylamines.
540. Dyes and intermediates.
575. Drugs and medicinal chemicals.
576. Organo-silicone products.
579. Other chemicals.
590. Synthetic resins.

(3) As a fuel:

611. Automobile and supplementary fuels.
612. Airplane and supplementary fuels.
613. Rocket and jet fuels.
620. Proprietary heating fuels.
630. Other fuel uses.

(4) As a fluid:

710. Scientific instruments.
720. Brake fluids.
730. Cutting oils.
740. Refrigerating uses.
750. Other fluid uses.

(5) Miscellaneous uses:

810. General laboratory and experimental use (own use only).
811. Laboratory reagents for sale.
812. Product development and pilot plant uses (own use only).
900. Specialized uses (unclassified).

§ 21.36 Formula No. 3-B.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of pine tar, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
141. Shampoos.
142. Soap and bath preparations.
410. Disinfectants, insecticides, fungicides, and other biocides.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.37 Formula No. 3-C.

(a) *Formula.* To every 100 gallons of alcohol add:

Five gallons of isopropyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

011. Cellulose coatings.
012. Synthetic resin coatings.
016. Other coatings.
021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
032. Transparent sheeting.
033. Explosives.
034. Cellulose intermediates and industrial collodions.
035. Soldering flux.
036. Adhesives and binders.
043. Special industrial solvents (restricted sale).
051. Polishes.
052. Inks (including meat branding inks).
053. Stains (wood, etc.).
141. Shampoos.
142. Soaps and bath preparations.
311. Cellulose compounds (dehydration).
312. Sodium hydrosulfite (dehydration).
315. Other dehydration products.
320. Petroleum products.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
351. Processing dyes and intermediates.
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
354. Processing rosin.
355. Processing rubber (latex).
358. Processing other chemicals.
359. Processing miscellaneous products.
410. Disinfectants, insecticides, fungicides, and other biocides.
420. Embalming fluids and related products.
430. Sterilizing and preserving solutions.
440. Industrial detergents and soaps.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.
481. Photoengraving and rotogravure dyes and solutions.
482. Other dye solutions.
485. Miscellaneous solutions (including duplicating fluids).

(2) As a raw material:

530. Ethylamines.
540. Dyes and intermediates.
575. Drugs and medicinal chemicals.
576. Organo-silicone products.
579. Other chemicals.
590. Synthetic resins.

(3) As a fuel:

611. Automobile and supplementary fuels.
612. Airplane and supplementary fuels.
613. Rocket and jet fuels.
620. Proprietary heating fuels.
630. Other fuel uses.

(4) As a fluid:

710. Scientific instruments.
720. Brake fluids.
730. Cutting oils.
740. Refrigerating uses.
750. Other fluid uses.

(5) Miscellaneous uses:

810. General laboratory and experimental use (own use only).
811. Laboratory reagents for sale.
812. Product development and pilot plant uses (own use only).
900. Specialized uses (unclassified).

(c) *Conditions governing use.* This formula shall not be used in manufacturing special industrial solvents under § 211.180 of this chapter, or reagent alcohol under § 211.199 of this chapter.

§ 21.38 Formula No. 4.

(a) *Formula.* To every 100 gallons of alcohol, or to every 100 gallons of rum of not less than 150 proof, add:

One gallon of the following solution: Five gallons of an aqueous solution containing 40 percent nicotine; 3.6 avoirdupois ounces of methylene blue, U.S.P.; and water sufficient to make 100 gallons.

(b) *Authorized uses.* (1) As a solvent:

460. Tobacco sprays and flavors.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.39 Formula No. 6-B.

(a) *Formula.* To every 100 gallons of alcohol add:

One-half gallon of pyridine bases.

(b) *Authorized uses.* (1) As a raw material:

523. Miscellaneous ethyl esters.
574. Fulminate of mercury and other detonators.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.40 Formula No. 12-A.

(a) *Formula.* To every 100 gallons of alcohol add:

Five gallons of benzene, or 5 gallons of toluene.

(b) *Authorized uses.* (1) as a solvent:

021. Cellulose plastics.
022. Non-cellulose plastics, including resins
036. Adhesives and binders.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
351. Processing dyes and intermediates.
352. Processing perfume materials and fixatives.
354. Processing rosin.
358. Processing other chemicals.
359. Processing miscellaneous products.
430. Sterilizing and preserving solutions.

(2) As a raw material:

523. Miscellaneous ethyl esters.
530. Ethylamines.
540. Dyes and intermediates.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.41 Formula No. 13-A.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten gallons of ethyl ether.

(b) *Authorized uses.* (1) As a solvent:

015. Candy glazes.
021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
032. Transparent sheeting.
034. Cellulose intermediates and industrial collodions.
052. Inks (not including meat branding inks).
241. Collodion, U.S.P.
331. Processing pectin.
332. Processing other food products.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
358. Processing other chemicals.
359. Processing miscellaneous products.
430. Sterilizing and preserving solutions.
481. Photoengraving and rotogravure solutions and dyes.

(2) As a raw material:

523. Miscellaneous ethyl esters.
561. Ethyl ether.
562. Other ethers.
575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.42 Formula No. 17.

(a) *Formula.* To every 100 gallons of alcohol add:

Five-hundredths (0.05) gallon (6.4 fluid ounces) of bone oil (Dipple's oil).

(b) *Authorized uses.* (1) As a solvent:

344. Processing medicinal chemicals (including alkaloids).
358. Processing other chemicals.
359. Processing miscellaneous products.

(2) As a raw material:

575. Drugs and medicinal chemicals.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.43 Formula No. 18.

(a) *Formula.* To every 100 gallons of alcohol of not less than 160 proof add:

One hundred gallons of vinegar of not less than 90-grain strength or 150 gallons of vinegar of not less than 60-grain strength.

(b) *Authorized uses.* (1) As a raw material:

511. Vinegar.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.44 Formula No. 19.

(a) *Formula.* To every 100 gallons of alcohol add:

One hundred gallons of ethyl ether.

(b) *Authorized uses.* (1) As a solvent:

031. Photographic film and emulsions.
034. Cellulose intermediates and industrial collodions.
241. Collodion, U.S.P.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.45 Formula No. 20.

(a) *Formula.* To every 100 gallons of alcohol add:

Five gallons of chloroform.

(b) *Authorized uses.* (1) As a raw material:

579. Miscellaneous chemicals (chloroform).

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.46 Formula No. 22.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten gallons of formaldehyde solution, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

420. Embalming fluids and related products.
430. Sterilizing and preserving solutions.
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.47 Formula No. 23-A.

(a) *Formula.* To every 100 gallons of alcohol add:

Eight gallons of acetone, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

011. Cellulose coatings.
012. Synthetic resin coatings.
013. Shellac coatings.
014. Other natural resin coatings.
015. Candy glazes.
016. Other coatings.
032. Transparent sheeting.
034. Cellulose intermediates and industrial collodions.
035. Soldering flux.
036. Adhesives and binders.
042. Solvents and thinners (other than proprietary solvents or special industrial solvents).
052. Inks (including meat branding inks).
053. Stains (wood, etc.).
111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Body deodorants and deodorant creams.
141. Shampoos.
142. Soaps and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
244. Antiseptic solutions, U.S.P. or N.F.
249. Miscellaneous external pharmaceuticals, U.S.P. or N.F.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
358. Processing other chemicals.
359. Processing miscellaneous products.
410. Disinfectants, insecticides, fungicides, and other biocides.
420. Embalming fluids and related products.
430. Sterilizing and preserving solutions.
440. Industrial detergents and soaps.
450. Cleaning solutions (including household detergents).
482. Miscellaneous dye solutions.
485. Miscellaneous solutions.

(2) As a fluid:

740. Refrigerating uses.
750. Miscellaneous fluid uses.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.48 Formula No. 23-F.

(a) *Formula.* To every 100 gallons of alcohol add:

Three pounds of salicylic acid, U.S.P., 1 pound of resorcinol (resorcin), U.S.P., and 1 gallon of bergamot oil, N.F. XI. or bay oil (myrcia oil), N.F. XI.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
210. External pharmaceuticals, not U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.49 Formula No. 23-H.

(a) *Formula.* To every 100 gallons of alcohol add:

Eight gallons of acetone, U.S.P., and 1.5 gallons of methyl isobutyl ketone.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
113. Lotions and creams (hand, face, and body).
210. External pharmaceuticals, not U.S.P. or N.F.
220. Rubbing alcohols.
410. Disinfectants, insectides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.50 Formula No. 25.

(a) *Formula.* To every 100 gallons of alcohol add:

Twenty pounds of iodine, U.S.P., and 15 pounds of either potassium iodide, U.S.P., or sodium iodide, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

230. Tinctures of iodine.
249. Miscellaneous external pharmaceuticals, U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.51 Formula No. 25-A.

(a) *Formula.* To every 100 gallons of alcohol add:

A solution composed of 20 pounds of iodine, U.S.P.; 15 pounds of either potassium iodide, U.S.P., or sodium iodide, U.S.P.; and 15 pounds of water.

(b) *Authorized uses.* (1) As a solvent:

230. Tinctures of iodine.
249. Miscellaneous external pharmaceuticals, U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.52 Formula No. 27.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of rosemary oil, N.F. XII, and 30 pounds of camphor, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

210. External pharmaceuticals, not U.S.P. or N.F.
243. Liniments, U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.53 Formula No. 27-A.

(a) *Formula.* To every 100 gallons of alcohol add:

Thirty-five pounds of camphor, U.S.P., and 1 gallon of clove oil, N.F.

(b) *Authorized uses.* (1) As a solvent:

210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.54 Formula No. 27-B.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of lavender oil, N.F., and 100 pounds of green soap, U.S.P.

Note.—The requirements of this formula may be met by adding 1 gallon of lavender oil, N.F., and 66.5 pounds of U.S.P. quality soap concentrate containing 25 percent water to 100 gallons of alcohol and, after mixing, by adding thereto 33.5 pounds of water and again mixing.

(b) *Authorized uses.* (1) As a solvent:

141. Shampoos.
210. External pharmaceuticals, not U.S.P. or N.F.
243. Liniments, U.S.P. or N.F.
410. Disinfectants insecticides, fungicides, and other biocides.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.55 Formula No. 28-A.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon or any combination totaling 1 gallon of either gasoline, unleaded gasoline, heptane, or rubber hydrocarbon solvent.

(b) *Authorized uses.* (1) As a fuel:

611. Automobile and supplementary fuels.
612. Airplane and supplementary fuels.
613. Rocket and jet fuels.
620. Proprietary heating fuels.
630. Other fuel uses.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.56 Formula No. 29.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of 100 percent acetaldehyde or 5 gallons of an alcohol solution of acetaldehyde containing not less than 20 percent acetaldehyde, or 1 gallon of ethyl acetate having an ester content of 100 percent, or, where approved by the Chief, Chemical Branch, as to material and quantity, not less than 6.8 pounds if solid, or 1 gallon if liquid, of any chemical. When material other than acetaldehyde or ethyl acetate is proposed to be used, the user shall submit an application for such use to the Chief, Chemical Branch. The application shall include specifications, assay methods, and an 8-ounce sample of the substitute material for analysis.

(b) *Authorized uses.* (1) As a raw material:

511. Vinegar.
512. Acetic acid.
521. Ethyl acetate.
522. Ethyl chloride.
523. Other ethyl esters.
530. Ethylamines.
540. Dyes and intermediates.
551. Acetaldehyde.
552. Other aldehydes.
561. Ethyl ether.
562. Other ethers.
571. Ethylene dibromide.
572. Ethylene gas.
573. Xanthates.
575. Drugs and medicinal chemicals.
579. Other chemicals.
580. Synthetic rubber.
590. Synthetic resins.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* This formula is restricted to processes in which the alcohol loses its identity by being converted into other chemicals.

§ 21.57 Formula No. 30.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten gallons of methyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

011. Cellulose coatings.
012. Synthetic resin coatings.
021. Cellulose plastics.
022. Non-cellulose plastics, including resins.
031. Photographic film and emulsions.
035. Soldering flux.
036. Adhesives and binders.
042. Solvents and thinners (other than proprietary solvents or special industrial solvents).
051. Polishes.
052. Inks (not including meat branding inks).
053. Stains.
142. Soap and bath preparations.
331. Processing pectin.
332. Processing other food products.
341. Processing crude drugs.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
345. Processing blood and blood products.
349. Miscellaneous drug processing (including manufacture of pills).
352. Processing perfume materials and fixatives.
353. Processing photographic chemicals.
358. Processing other chemicals.
359. Processing miscellaneous products.
410. Disinfectants, insecticides, fungicides, and other biocides.
430. Sterilizing and preserving solutions.
440. Industrial detergents and soaps.
450. Cleaning solutions (including household detergents).
481. Photoengraving and rotogravure solutions and dyes.
482. Other dye solutions.
485. Miscellaneous solutions (including duplicating fluids).

(2) As a raw material:

575. Drugs and medicinal chemicals.
576. Organo-silicone products.
579. Other chemicals.
590. Synthetic resins.

(3) As a fluid in:

740. Refrigerating uses.
750. Other fluid uses:

(4) Miscellaneous uses:

810. General laboratory and experimental use (own use only).
811. Laboratory reagents for sale.
812. Product development and pilot plant uses (own use only).

§ 21.58 Formula No. 31-A.

(a) *Formula.* To every 100 gallons of alcohol add:

One hundred pounds of glycerin (glycerol), U.S.P., and 20 pounds of hard soap, N.F. XI.

(b) *Authorized uses.* (1) As a solvent:

113. Lotions and creams (hands, face, and body).
131. Tooth paste and tooth powder.
141. Shampoos.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.59 Formula No. 32.

(a) *Formula.* To every 100 gallons of alcohol add:

Five gallons of ethyl ether.

(b) *Authorized uses.* (1) As a solvent:

031. Photographic film and emulsions.
034. Cellulose intermediates and industrial collodions.
052. Inks (not including meat branding inks).
241. Collodion, U.S.P.
311. Ethyl cellulose compounds (dehydration).
332. Processing miscellaneous food products.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.

344. Processing medicinal chemicals (including alkaloids).
430. Sterilizing and preserving solutions.
481. Photoengraving and rotogravure solutions and dyes.

(2) As a raw material:

522. Ethyl chloride.
523. Other ethyl esters.
561. Ethyl ether.
562. Other ethers.
571. Ethylene dibromide.
572. Ethylene gas.
575. Drugs and medicinal chemicals.
579. Other chemicals.
580. Synthetic rubber.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.60 Formula No. 33.

(a) *Formula.* To every 100 gallons of alcohol add:

Thirty pounds of gentian violet or gentian violet, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

052. Inks (not including meat branding inks).
210. External pharmaceuticals, not U.S.P. or N.F.
249. Miscellaneous external pharmaceuticals, U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* Meat branding inks made with Formula No. 33 do not meet U.S. Department of Agriculture meat inspection specifications for use in Federally inspected establishments. Specially denatured alcohol Formulas No. 3–A, 3–C, and 23–A are authorized for this purpose.

§ 21.61 Formula No. 35.

(a) *Formula.* To every 100 gallons of alcohol add:

29.75 gallons of ethyl acetate having an ester content of 100 percent by weight or the equivalent thereof not to exceed 35 gallons of ethyl acetate with an ester content of not less than 85 percent by weight.

(b) *Authorized uses.* (1) As a solvent:

015. Candy glazes.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.62 Formula No. 35–A.

(a) *Formula.* To every 100 gallons of alcohol add:

4.25 gallons of ethyl acetate having an ester content of 100 percent by weight or the equivalent thereof not to exceed 5 gallons of ethyl acetate with an ester content of not less than 85 percent by weight.

(b) *Authorized uses.* (1) As a solvent:

015. Candy glazes.
331. Processing pectin.
332. Processing other food products.
342. Processing glandular products, vitamins, hormones, and yeasts.
343. Processing antibiotics and vaccines.
344. Processing medicinal chemicals (including alkaloids).
349. Miscellaneous drug processing (including manufacture of pills).
358. Processing miscellaneous chemicals.
359. Processing miscellaneous products.

(2) As a raw material:

511. Vinegar.
512. Acetic acid.
521. Ethyl acetate.
523. Other ethyl esters.
580. Synthetic resins.
910. Animal feed supplements.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.63 Formula No. 36.

(a) *Formula.* To every 100 gallons of alcohol add:

Three gallons of ammonia, aqueous, 27 to 30 percent by weight; 3 gallons of strong ammonia solution, N.F.; 17.5 pounds of caustic soda, liquid grade, containing 50 percent sodium hydroxide by weight; or 12.0 pounds of caustic soda, liquid grade, containing 73 percent sodium hydroxide by weight.

(b) *Authorized uses.* (1) As a solvent:

141. Shampoos.
142. Soap and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
450. Cleaning solutions (including household detergents).

(2) As a raw material:

530. Ethylamines.
540. Dyes and intermediates.
579. Other chemicals.

(3) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.64 Formula No. 37.

(a) *Formula.* To every 100 gallons of alcohol add:

Forty-five fluid onces of eucalyptol, N.F. XII, 30 avoirdupois ounces of thymol, N.F., and 20 avoirdupois ounces of menthol, U.S.P

(a) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
131. Dentifrices.
132. Mouth washes.
210. External pharmaceuticals, not U.S.P. or N.F.
244. Antispetic solutions, U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
430. Sterilizing and preserving solutions.
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.65 Formula No. 38–B.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten pounds of any one, or a total of 10 pounds of two or more, of the oils and substances listed below:

Anethole, N.F.
Anise oil, N.F.
Bay oil (myrcia oil), N.F. XI.
Benzaldehyde, N.F.
Bergamot oil, N.F. XI.
Bitter almond oil, N.F. X.
Camphor, U.S.P.
Cedar leaf oil, U.S.P. XIII.
Chlorothymol, N.F. XII.
Cinnamic aldehyde, N.F. IX.
Cinnamon oil, N.F.
Citronella oil, natural.
Clove oil, N.F.
Coal tar, U.S.P.
Eucalyptol, N.F. XII.
Eucalyptus oil, N.F.
Eugenol, U.S.P.
Guaiacol, N.F. X.
Lavender oil, N.F.
Menthol, U.S.P.
Methyl salicylate, N.F.
Mustard oil, volatile (allyl isothiocyanate), U.S.P. XII.
Peppermint oil, N.F
Phenol, U.S.P.
Phenyl salicylate (salol), N.F. XI.
Pine oil, N.F. XII.
Pine needle oil, dwarf, N.F
Rosemary oil, N.F. XII.
Safrole.
Sassafras oil, N.F. XI.
Spearmint oil, N.F.
Spearmint oil, terpeneless.
Spike lavender oil, natural.
Storax, U.S.P.
Thyme oil, N.F. XII.
Thymol, N.F.
Tolu balsam, U.S.P.
Turpentine oil, N.F. XI.

If it is shown that none of the above single denaturants or combinations can be used in the manufacture of a particular product, the user may submit an application to the Chief, Chemical Branch, requesting permission to use another essential oil or substance having denaturing properties satisfactory to the Chief, Chemical Branch. In such a case the user shall furnish the Chief, Chemical Branch, with specifications, assay methods, the name and address of the manufacturer, and an 8-ounce sample of the denaturant for analysis.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes
131. Dentifrices.

132. Mouth washes.
141. Shampoos.
142. Soap and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
243. Liniments, U.S.P. or N.F.
244. Antiseptic solutions, U.S.P. or N.F.
249. Miscellaneous external pharmaceuticals, U.S.P. or N.F.
349. Miscellaneous drug processing (including manufacture of pills).
410. Disinfectants, insecticides, fungicides, and other biocides.
430. Sterlizing and preserving solutions.
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.66 Formula No. 38–C.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten pounds of menthol, U.S.P., and 1.25 gallons of formaldehyde solution, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

131. Dentifrices.
132. Mouth washes.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.67 Formula No. 38–D.

(a) *Formula.* To every 100 gallons of alcohol add:

Two and one-half pounds of menthol, U.S.P., and 2.5 gallons of formaldehyde solution, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

131. Dentifrices.
132. Mouth washes.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.68 Formula No. 38–F.

(a) *Formula.* To every 100 gallons of alcohol add:

(1) Six pounds of either boric acid, N.F., or Polysorbate 80, N.F.; 1⅓ pounds of thymol, N.F.; 1⅓ pounds of chlorothymol, N.F. XII; and 1⅓ pounds of menthol, U.S.P.; or

(2) A total of at least 3 pounds of any two or more denaturing materials listed under Formula No. 38–B, plus sufficient boric acid, N.F., or Polysorbate 80, N.F., to total 10 pounds of denaturant; or

(3) Seven pounds of zinc chloride, U.S.P., 2.6 fluid ounces of hydrochloric acid, N.F., and a total of 3 pounds of any two or more of the denaturing materials listed under Formula No. 38–B.

(b) *Authorized uses.* (1) As a solvent:

132. Mouth washes.
210. External pharmaceuticals, not U.S.P. or N.F.
244. Antiseptic solutions, U.S.P. or N.F.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.69 Formula No. 39.

(a) *Formula.* To every 100 gallons of alcohol add:

Nine pounds of sodium salicylate, U.S.P., or salicylic acid, U.S.P.; 1.25 gallons of fluid extract of quassia, N.F. VII; and ⅛ gallon of *tert*-butyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
121. Perfume and perfume tinctures.
122. Toilet waters and colognes.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.70 Formula No. 39–A.

(a) *Formula.* To every 100 gallons of alcohol add:

Sixty avoirdupois ounces of any one of the following alkaloids or salts together with ⅛ gallon of *tert*-butyl alcohol:
Quinine, N.F. X.
Quinine bisulfate, N.F. XI.
Quinine dihydrochloride, N.F. XI.
Cinchonidine.
Cinchonidine sulfate, N.F. IX.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
122. Toilet waters and colognes.
141. Shampoos.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.71 Formula No. 39–B.

(a) *Formula.* To every 100 gallons of alcohol add:

Two and one-half gallons of diethyl phthalate and ⅛ gallon of *tert*-butyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
141. Shampoos.
142. Soap and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.72 Formula No. 39–C.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of diethyl phthalate.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
142. Soaps and bath preparations.
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.73 Formula No. 39–D.

(a) *Formula.* To every 100 gallons of alcohol add:

One gallon of bay oil (myrcia oil), N.F. XI, and either 50 avoirdupois ounces of quinine sulfate, U.S.P., 50 avoirdupois ounces of sodium salicylate, U.S.P.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.74 Formula No. 40.

(a) *Formula.* To every 100 gallons of alcohol add ⅛ gallon of *tert*-butyl alcohol, and:

One and one-half avoirdupois ounces of either (1) brucine alkaloid, (2) brucine sulfate, N.F. IX, (3) quassin, or (4) any combination of two or of three of those denaturants.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
141. Shampoos.
142. Soaps and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.75 Formula No. 40–A.

(a) *Formula.* To every 100 gallons of alcohol add:

One pound of sucrose octaacetate and ⅛ gallon of *tert*-butyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
141. Shampoos.
142. Soaps and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.76 Formula No. 40-B.

(a) *Formula.* To every 100 gallons of alcohol add:

One-sixteenth avoirdupois ounce of denatonium benzoate, N.F. (BITREX), and ⅛ gallon of *tert*-butyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body).
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
141. Shampoos.
142. Soaps and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

21.77 Formula No. 40-C.

(a) *Formula.* To every 100 gallons of alcohol add:

Three gallons of *tert*-butyl alcohol.

(b) *Authorized uses.* (1) As a solvent:

111. Hair and scalp preparations.
112. Bay rum.
113. Lotions and creams (hand, face, and body).
114. Deodorants (body)..
121. Perfumes and perfume tinctures.
122. Toilet waters and colognes.
141. Shampoos.
142. Soaps and bath preparations.
210. External pharmaceuticals, not U.S.P. or N.F.
410. Disinfectants, insecticides, fungicides, and other biocides.
450. Cleaning solutions (including household detergents).
470. Theater sprays, incense, and room deodorants.
485. Miscellaneous solutions.

(2) Miscellaneous uses.

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* This formula shall be used only in the manufacture of products which will be packaged in pressurized containers in which the liquid contents are in intimate contact with the propellant and from which the contents are not easily removable in liquid form.

§ 21.78 Formula No. 42.

(a) *Formula.* To every 100 gallons of alcohol add:

(1) Eighty grams of potassium iodide, U.S.P., and 109 grams of red mercuric iodide, N.F. XI; or

(2) Ninety-five grams of thimerosal, U.S.P.; or

(3) Seventy-six grams of any of the following: phenyl mercuric nitrate, N.F.; phenyl mercuric chloride, N.F. IX; or phenyl mercuric benzoate.

(b) *Authorized uses.* (1) As a solvent:

430. Sterilizing and preserving solutions.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.79 Formula No. 44.

(a) *Formula.* To every 100 gallons of alcohol add:

Ten gallons of *n*-butyl alcohol

(b) *Authorized uses.* (1) As a solvent:

430. Sterilizing and preserving solutions.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

§ 21.80 Formula No. 45.

(a) *Formula.* To every 100 gallons of alcohol add:

Three hundred pounds of refined white or orange shellac.

(b) *Authorized uses.* (1) As a solvent:

015. Candy glazes.

(2) Miscellaneous uses:

812 Product development and pilot plant uses (own use only).

§ 21.81 Formula No. 46.

(a) *Formula.* To every 100 gallons of alcohol add:

Twenty-five fluid ounces of phenol, U.S.P., and 4 fluid ounces of methyl salicylate, N.F.

(b) *Authorized uses.* (1) As a solvent:

220. An antiseptic, sterilizing, and bathing solution having restricted use.

(2) Miscellaneous uses:

812. Product development and pilot plant uses (own use only).

(c) *Conditions governing use.* This formula may be used only by institutions and organizations which are of a semipublic character and engaged in charitable work.

Subpart E—Specifications for Denaturants

§ 21.91 General.

Denaturants prescribed in this part shall comply with the specifications set forth in this subpart. However, in order to meet requirements of national defense of for other valid reasons, the Director may, pursuant to written application filed by the denaturer, authorize variations from such specifications or authorize the use of substitute denaturants if such variation or substitution will not jeopardize the revenue. Each such application shall identify the applicant by name, address, and permit number; state the number of each formula of specially denatured alcohol involved; explain why the use of the substitute denaturant, or the variation from specifications, as the case may be, is necessary; and include, as applicable, either the identity of the approved denaturant for which substitution is desired and the identity of the substitute denaturant (including the name of the manufacturer) or the identity of the prescribed specifications and the proposed variation from those specifications. The application shall be accompanied by an 8-ounce sample of the proposed denaturing material for analysis.

§ 21.92 Denaturants listed as U.S.P. or N.F.

Denaturing materials and products listed in this part as "U.S.P." or "N.F." shall meet the specifications set forth in the current United States Pharmacopoeia or National Formulary, or the latest volume of these publications in which the denaturants appeared as official preparations.

§ 21.93 Acetaldehyde.

(a) *Aldehyde content (as acetaldehyde).* Not less than 95.0 percent by weight.

(b) *Color.* Colorless.

(c) *Odor.* Characteristic pungent, fruity odor.

(d) *Specific gravity at 15.56°/15.56° C.* Not less than 0.7800.

§ 21.94 Acetaldol.

(a) *Purity.* Not less than 90 percent by weight acetaldol as determined by the following method:

Dissolve 15 grams of the acetaldol in distilled water and dilute to 1 liter in a volumetric flask. Transfer 5 ml of this solution to a 250 ml glass-stoppered flask containing 25 ml distilled water. Add 25 ml of a freshly prepared 1 percent sodium bisulfite solution. Prepare a blank omitting the acetaldol solution. Place the flasks in a dark place away from excessive heat or cold and allow to stand six hours. Remove flasks and titrate free bisulfite with 0.1 N iodine solution using starch indicator.

Percent acetaldol by weight=(ml blank−ml test)×200×0.44/weight of sample

Titrations in excess of 100 percent may be obtained if the sample contains appreciable amounts of acetaldehyde.

(b) *Specific gravity at 20° C.* 1.098 to 1.105.

§ 21.95 Ammonia, aqueous.

(a) *Alkalinity.* Strongly alkaline to litmus.

(b) *Ammonia content.* 27 to 30 percent by weight. Accurately weigh a glass-stoppered flask containing 25 ml of water, add about 2 ml of the sample, stopper, and weigh again. Add methyl red indicator, and titrate with 1 N sulfuric acid. Each ml of 1 N sulfuric acid is equivalent to 17.03 mg of NH_3

(c) *Color.* Colorless liquid.

(d) *Non-volatile residue.* 2 mg maximum. Dilute a portion of the sample with 1½ times its volume of distilled water. Evaporate 10 ml of this product to dryness in a tared platinum or porcelain dish. Dry residue at 105° C. for 1 hour, cool and weigh.

(e) *Odor.* Characteristic (exceedingly pungent).

(f) *Specific gravity at 20°/4° C.* 0.8920 to 0.9010.

§21.96 Benzene.

(a) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 29, page 573, Standard No. D 836–77; for incorporation by reference, see § 21.6(b).) When 100 ml of benzene are distilled by this method, not more than 1 ml should distill below 77° C., and not less than 95 ml below 85° C.

(b) *Odor.* Characteristic odor.

(c) *Specific gravity at 15.6°/15.6° C.* 0.875 to 0.886.

(d) *Water solubility.* When 10 ml of benzene are shaken with an equal volume of water in a glass-stoppered bottle, graduated to 0.1 ml, and allowed to stand 5 minutes to separate, the upper layer of liquid shall measure not less than 9.5 ml.

§ 21.97 Bone oil (Dippie's oil).

(a) *Color.* The color shall be a deep brown.

(b) *Distillation range.* When 100 ml are distilled in the manner described for pyridine bases, not more than 5.0 ml should distill below 90° C.

(c) *Pyrrol reaction.* Prepare a 1.0 percent solution of bone oil in 95 percent alcohol. Prepare a second solution containing 0.025 percent bone oil by diluting 2.50 ml of the first solution to 100 ml with 95 percent alcohol. Dip a splinter of pine, previously moistened with concentrated hydrochloric acid, into 10 ml of the 0.025 percent bone oil solution. After a few minutes the splinter should show a distinct red coloration.

(d) *Reaction with mercuric chloride.* Add 5 ml of the 1.0 percent bone oil solution above to 5 ml of a 2 percent alcoholic solution of mercuric chloride. A turbidity is formed at once which separates into a flocculent precipitate on standing several minutes. Add 5.0 ml of the 0.025 percent bone oil solution to 5.0 ml of a 2.0 percent alcoholic solution of mercuric chloride. A faint turbidity appears after several minutes.

§ 21.98 Brucine alkaloid.

(a) *Identification test.* Add a few drops of concentrated nitric acid to about 10 mg of brucine alkaloid. A vivid red color is produced. Dilute the red solution with a few drops of water and add a few drops of freshly made dilute stannous chloride solution. A reddish purple (violet) color is produced.

(b) *Melting point.* 178°±1° C. Dry the alkaloid in an oven for one hour at 100° C., increase the temperature to 110° and dry to a constant weight before taking melting point.

Note.—Brucine alkaloid tetrahydrate melts at 105° C. while the anhydrous form melts at 178° C.

(c) *Strychnine test.* Brucine alkaloid shall be free of strychnine when tested by the method listed under Brucine Sulfate, N.F. IX.

Note.—If the brucine contains as much as 0.05 percent strychnine, a clear distinctive violet color, characteristic of strychnine, will be obtained.

(d) *Sulfate test.* No white precipitate is formed that is not dissolved by hydrochloric acid when several drops of a 1 N barium chloride solution are added to 10 ml of a solution of the alkaloid.

§ 21.99 n-Butyl alcohol.

(a) *Acidity (as acetic acid).* 0.03 percent by weight maximum.

(b) *Color.* Colorless.

(c) *Dryness at 20° C.* Miscible without turbidity with 10 volumes of 60° Bé. gasoline.

(d) *Odor.* Characteristic odor.

(e) *Specific gravity at 20°/20° C.* 0.810 to 0.815.

§ 21.100 tert-Butyl alcohol.

(a) *Acidity (as acetic acid).* 0.003 percent by weight maximum.

(b) *Color.* Colorless.

(c) *Distillation range.* When 100 ml of tertiary butyl alcohol are distilled, none should distill below 78° C. and none above 85° C. More than 95 percent should distill between 81°–83° C.

(d) *Dryness at 20° C.* Miscible without turbidity with 19 volumes of 60° Bé. gasoline.

(e) *Freezing point (first needle).* Above 20° C.

(f) *Identification test.* Place five drops of a solution containing approximately 0.1 percent tertiary butyl alcohol in ethyl alcohol in a test tube. Add 2 ml of Denige's reagent (dissolve 5 grams of red mercuric oxide in 20 ml of concentrated sulfuric acid; add this solution to 80 ml of distilled water, and filter when cool). Heat the mixture just to the boiling point and remove from the flame. A yellow precipitate forms within a few seconds.

(g) *Nonvolatile matter.* Less than 0.005 percent by weight.

(h) *Odor.* Characteristic odor.

(i) *Residual odor after evaporation.* None.

(j) *Specific gravity at 25°/25° C.* 0.780 to 0.786.

§ 21.101 Caustic soda, liquid.

(a) The liquid caustic soda may consist of either 50 percent or 73 percent by weight sodium hydroxide in aqueous solution. The amount of caustic soda used shall be such that each 100 gallons of alcohol will contain not less than 8.76 pounds of sodium hyroxide, anhydrous basis.

(b) *Color.* A 2 percent solution of the sodium hydroxide in water shall be water-white.

(c) *Assay.* The sodium hydroxide content of the caustic soda solution shall be determined by the following procedure:

Accurately weigh 2 grams of liquid caustic soda into a 100 ml volumetric flask, dissolve, and dilute to the mark with distilled water at room temperature. Transfer a 25 ml aliquot of the solution to a titration flask, add 10 ml of 1 percent barium chloride solution, 0.2 ml of 1 percent phenolphthalein indicator, and 50 ml of distilled water. Titrate with 0.25 N hydrochloric acid to the disappearance of the pink color. Not less than 25 ml of the hydrochloric acid shall be required to neutralize the sample of diluted 50 percent caustic soda, and not less than 36.5 ml of the hydrochloric acid shall be required to neutralize the sample of diluted 73 percent caustic soda.

One ml of 0.25 N hydrochloric acid equals 0.01 gram of sodium hydroxide (anhydrous).

§ 21.102 Chloroform.

(a) *Odor.* Characteristic odor.

(b) *Specific gravity at 25°/25° C.* Not less than 1.400.

§ 21.103 Cinchonidine.

(a) *Melting point.* 208° to 210° C.

(b) *Color.* White powder.

(c) *Taste.* Bitter.

(d) *Test.* A solution of cinchonidine in dilute sulfuric acid shall not have more than a faint blue fluorescence (to distinguish from quinine and quinoidine).

§ 21.104 Citronella oil, natural.

(a) *Java type:*

(1) *Alcohol content (as Geraniol).* Not less than 85 percent by weight.

(2) *Aldehyde content (as Citronellal).* Not less than 30 percent by weight.

(3) *Refractive index at 20° C.* 1.4660 to 1.4745.

(4) *Specific gravity at 25°/25° C.* 0.875 to 0.893.

(5) *Odor.* Characteristic odor.

(b) *Ceylon type:*

(1) *Alcohol content (as Geraniol).* Not less than 55 percent by weight.

(2) *Aldehyde content (as Citronellal).* Not less than 7 percent by weight.

(3) *Refractive index at 20° C.* 1.4790 to 1.4850.

(4) *Specific gravity at 25°/25° C.* 0.891 to 0.904.

(5) *Odor.* Characteristic odor.

§ 21.105 Diethyl phthalate.

(a) *Refractive index at 25° C.* 1.497 to 1.502.

(b) *Color.* Colorless.

(c) *Odor.* Practically odorless.

(d) *Solubility.* Soluble in 20 parts of 60 percent alcohol.

(e) *Specific gravity at 25°/25° C.* 1.115 to 1.118.

(f) *Ester content (as diethyl phthalate).* Not less than 99 percent by weight.

Note.—The sample taken for ester determination should be approximately 0.8 gram. The number of ml of 0.5 N potassium hydroxide used in saponification multiplied by 0.05555 indicates the number of grams of ester in the sample taken for assay.

§ 21.106 Ethyl acetate.

(a) *85 percent ester:*

(1) *Acidity (as acetic acid).* Not more than 0.015 percent by weight.

(2) *Color.* Colorless.

(3) *Odor.* Characteristic odor.

(4) *Ester content.* Not less than 85 percent by weight.

(5) *Specific gravity at 20°/20° C.* Not less than 0.882.

(6) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 29, page 70, Standard No. D 302–58 (1975); for incorporation by reference, see § 21.6(b).) When 100 ml of ethyl acetate are distilled by this method, none shall distill below 70° C., not more than 10 ml shall distill below 72° C., and none above 80° C.

(b) *100 percent ester:*

(1) *Acidity (as acetic acid).* Not more than 0.010 percent by weight.

(2) *Color.* Colorless.

(3) *Odor.* Characteristic odor.

(4) *Ester content.* Not less than 99 percent by weight.

(5) *Specific gravity at 20°/20° C.* Not less than 0.899.

(6) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 29, page 433, Standard No. D 3127–77; for incorporation by reference, see § 21.6(b).) When 100 ml of ethyl acetate are distilled by this method, not more than 2 ml shall distill below 75° C., and none above 80° C. (760 mm).

§ 21.107 Ethyl ether.

(a) *Odor.* Characteristic odor.

(b) *Specific gravity at 15.56°/15.56° C.* Not more than 0.728.

§ 21.108 Gasoline.

(a) *Distillation range.* When 100 ml of gasoline are distilled, none shall distill below 90° F. Not more than 5 ml shall be collected below 140° F., and not less than 50 ml shall distill below 230° F.

(b) *Odor.* Characteristic odor.

§ 21.109 Gasoline, unleaded.

Conforms to specifications as established by the American Society for Testing and Materials (ASTM) in the 1980 Annual Book of ASTM Standards, Part 23, page 229, Standard No. D 439–79. Any of the "seasonal and geographical" volatility classes for unleaded gasoline are considered suitable as a denaturant. (For incorporation by reference, see § 21.6(b).)

§ 21.110 Gentian violet.

(a) Gentian violet (methyl violet, methylrosaniline chloride) occurs as a dark green powder or crystals having metallic luster.

(b) *Arsenic content.* Not more than 15 ppm. (as As_2O_3) as determined by the applicable U.S.P. method.

(c) *Identification test.* Sprinkle about 1 mg of sample on 1 ml of sulfuric acid; it dissolves in the acid with an orange or brown-red color. When this solution is diluted cautiously with water, the color changes to brown, then to green, and finally to blue.

(d) *Insoluble matter.* Not to exceed 0.25 percent when tested by the following method:

Transfer 1.0 gram of sample to a 150 ml beaker containing 50 ml of alcohol. Stir to complete solution and filter through a weighed Whatman No. 4 filter paper. Wash residue with small amounts of alcohol totaling about 50 ml. Dry paper in oven for 30 minutes at 80° C. and weigh. Calculate insoluble material.

§ 21.111 Heptane.

(a) *Distillation range.* No distillate should come over below 200° F. and none above 211° F.

(b) *Odor.* Characteristic odor.

§ 21.112 Isopropyl alcohol.

Specific gravity at 15.56°/15.56° C. 0.810 maximum.

§ 21.113 Kerosene.

(a) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 25, page 395, Standard No. D 3699–78 for burner fuel; see Part 23, page 849, Standard Nos. D 1655–80a for aviation turbine fuels and D 86–78 for distillation of petroleum products; for incorporation by reference, see § 21.6(b).) No distillate should come over below 340° F. and none above 570° F.

(b) *Flash point.* 115° F. minimum.

(c) *Odor.* Characteristic odor.

§ 21.114 Kerosene (deodorized).

(a) *Distillation range.* No distillate should come over below 340° F. and none above 570° F.

(b) *Flash point.* 155° F. minimum.

§ 21.115 Methyl alcohol.

Specific gravity at 15.56°/15.56° C. 0.810 maximum.

§ 21.116 Methyl isobutyl ketone.

(a) *Acidity (as acetic acid).* 0.02 percent by weight, maximum.

(b) *Color.* Colorless.

(c) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 29, page 147, Standard No. D 1153–77; for incorporation by reference, see § 21.6(b).) No distillate should come over below 111° C. and none above 117° C.

(d) *Odor.* Characteristic odor.

(e) *Specific gravity at 20°/20° C.* 0.799 to 0.804.

§ 21.117 Methyl n-butyl ketone.

(a) *Acidity (as acetic acid).* 0.02 percent by weight, maximum.

(b) *Color.* Colorless.

(c) *Odor.* Characteristic odor.

(d) *Refractive index at 20° C.* 1.396 to 1.404.

(e) *Specific gravity at 20°/20° C.* 0.800 to 0.835.

(f) *Distillation range.* No distillate should come over below 123° C. and none above 129° C.

§ 21.118 Nicotine solution.

(a) *Composition.* Five gallons of an aqueous solution containing 40 percent nicotine; 3.6 avoirdupois ounces of methylene blue, U.S.P.; water sufficient to make 100 gallons.

(b) *Color.* One ml of the nicotine solution (previously agitated in the presence of air) is measured into 100 ml of water and thoroughly mixed. Fifty ml of this colored solution is compared, using Nessler tubes, with 50 ml of a standard color solution containing 5 grams of $CuSO_4 \cdot 5H_2O$, C.P. in 100 ml of water. The color intensity of the solution tested should be equal to or greater than that of the standard solution.

(c) *Nicotine content.* The above solution must contain not less than 1.88 percent of nicotine determined by the following process: 20 ml of the solution are measured into a 500 ml Kjeldahl flask provided with a suitable bulb tube, 50 ml of 0.1 N NaOH added and the mixture distilled in a current of steam until the distillate is no longer alkaline (about 500 ml). The distillate is then titrated with 0.1 N H_2SO_4 using rosolic acid or methyl red as indicator. Not less than 23.2 ml should be required for neutralization.

§ 21.119 Nitropropane, mixed isomers of.

(a) *Nitropropane content.* A minimum of 94 percent by weight.

(b) *Total nitroparaffin content.* A minimum of 99 percent by weight.

(c) *Distillation range.* 119° to 113° C.

(d) *Specific gravity at 20°/20° C.* 0.992 to 1.003.

§ 21.120 Phenyl mercuric benzoate.

(a) *Assay (as phenyl mercuric benzoate).* Not less than 99.0 percent by weight.

(b) *Melting point.* Not less than 94° C.

§ 21.121 Pyridine bases.

(a) *Alkalinity.* One ml of pyridine bases dissolved in 10 ml of water is titrated with 1 N H_2SO_4 until a drop of the mixture placed upon Congo paper shows a distinct blue border, which soon disappears. A minimum of 9.5 ml of the acid must be required for the end point. (Congo paper: filter paper treated with 0.1 percent aqueous solution of Congo red and dried.)

(b) *Distillation range.* One hundred ml of the denaturant are distilled in the following manner: The sample is placed in a short-necked glass flask of about 200 ml capacity which is rested on an asbestos plate having a circular opening of 30 mm in diameter. The neck of this flask is fitted with a fractionating tube 12 mm in diameter and 170 mm long and having a bulb just 1 cm below the side tube which is connected with a Liebig condenser having a water jacket not less than 400 mm in length. A standardized thermometer is placed in the fractionating tube so that the mercury bulb is suspended in the center of the fractionating bulb. Heat is applied slowly and in such manner that 5 ml of distillate is collected per minute in a graduated cylinder. At least 50 ml must distill at or below 140° C. and at least 90 ml below 160° C.

(c) *Reactions.* Dissolve 1 ml of pyridine bases in 100 ml of water.

(1) Ten ml of this solution are treated with 5 ml of 5 percent aqueous solution of anhydrous fused $CaCl_2$ and the mixture vigorously shaken. An abundant crystalline separation should occur within 10 minutes.

(2) Ten ml of the pyridine solution mixed with 50 ml of Nessler's reagent must give a white precipitate.

(d) *Water content.* Twenty ml of pyridine bases are shaken with 20 ml of a caustic soda solution having a specific gravity of 1.40 (15.56°/15.56° C.) and the mixture allowed to stand until completely separated into two layers. The amount of pyridine base layer should be 18.5 ml, minimum.

§ 21.122 Pyronate.

Pyronate is a product of the destructive distillation of hardwood meeting the following requirements:

(a) *Acidity (as acetic acid).* Not more than 0.1 percent by weight, determined as follows:

Add 5.0 ml sample to 100 ml distilled water in an Erlenmeyer flask and titrate with 0.1 N NaOH to a bromthymol blue endpoint.

(b) *Color.* The color shall be no darker than the color produced by 2.0 grams of potassium dichromate in 1 liter of water. The comparision shall be made in 4-ounce oil sample bottles viewed crosswise.

(c) *Distillation range.* When 100 ml are distilled not more than 5 ml shall distill below 70° C., not less than 50 ml below 160° C., and not less than 90 ml below 205° C.

Note.—Any material submitted as pyronate must agree in color, odor, taste and denaturing value with a standard sample furnished by the Bureau of Alcohol, Tobacco and Firearms to chemists authorized to examine samples of denaturants.

§ 21.123 Quassin.

(a) Quassin is the bitter principle of quassia wood (occurring as a mixture of two isomeric forms). It shall be a good commercial grade of purified amorphous quassin, standardized as to bitterness.

(b) *Bitterness.* An aqueous solution of quassin shall be distinctly bitter at a 1 to 250,000 dilution. To test: Dissolve 0.1 gram of quassin in 100 ml of 95 percent alcohol, then dilute 4 ml of the solution to 1,000 ml with distilled water, mix well and taste.

(c) *Identification test.* Dissolve about 0.5 gram of quassin in 10 ml of 95 percent alcohol and filter. To 5 ml of the filtrate, add 5 ml of concentrated hydrochloric acid and 1 mg of phloroglucinol and mix well. A red color develops.

(d) *Optical assay.* When 1 gram of quassin (in solution in a small amount of 95 percent alcohol) is dissolved in 10,000 ml of water, the absorbance of the solution in a 1 cm cell at a wavelength of 258 millimicrons shall not be less than 0.400.

(e) *Solubility.* When 0.5 gram of quassin is added to 25 ml of 190 proof alcohol, it shall dissolve completely.

§ 21.124 Rubber hydrocarbon solvent.

(a) Rubber hydrocarbon solvent is a petroleum derivative.

(b) *Distillation range.* When 10 percent of the sample has been distilled into a graduated receiver, the themometer shall not read more than 170° F. nor less than 90° F. When 90 percent has been recovered in the receiver the thermometer shall not read more than 250° F.

§ 21.125 Safrole.

(a) *Congealing point.* 10.0° to 11.2° C.

(b) *Refractive index at 20° C.* 1.5368 to 1.5385.

(c) *Specific gravity at 15°/15° C.* 1.100 to 1.107.

(d) *Odor.* Characteristic odor.

§ 21.126 Shellac (refined).

(a) *Arsenic content.* Not more than 1.4 parts per million as determined by the Gutzeit Method (AOAC method 25.020; for incorporation by reference, see § 21.6(c)).

(b) *Color.* White or orange.

(c) *Rosin content.* None when tested by the following method: Add 20 ml of absolute alcohol or glacial acetic acid (m. p. 13° to 15° C.) to 2 grams of the shellac and thoroughly dissolve. Add 100 ml of petroleum ether and mix thoroughly. Add approximately 2 liters of water and separate a portion of the ether layer (at least 50 ml) and filter if cloudy. Evaporate the petroleum ether and test as follows: Solution A—5 ml of phenol dissolved in 10 ml of carbon tetrachloride. Solution B—1 ml of

bromine dissolved in 4 ml of carbon tetrachloride. To the residue obtained above add 2 ml of Solution A and transfer the mixture to a porcelain spot plate, filling one cavity. Immediately fill an adjacent cavity with solution B. Cover the plate with a watch glass and observe any color formation in Solution A. A decided purple or deep indigo blue color is an indication of the presence of rosin.

§ 21.127 Sodium (metallic).

(a) *Color.* Silvery-white (metallic luster) when freshly cut.

(b) *Identification test.* Clean a platinum wire by dipping it in concentrated hydrochloric acid and holding it over a Bunsen burner until the flame is no longer colored. Moisten the wire loop with hydrochloric acid and dip it into the sample. Hold the wire in the Bunsen flame and note the color. Sodium produces a golden yellow flame; not observed when viewed through a cobalt glass.

(c) *Purity.* Technical grade or better.

§ 21.128 Spearmint oil, terpeneless.

(a) *Carvone content.* Not less than 85 percent by weight.

(b) *Refractive index at 20° C.* 1.4930 to 1.4980.

(c) *Specific gravity at 25°/25° C.* 0.949 to 0.956.

(d) *Odor.* Characteristic odor.

§ 21.129 Spike lavender oil, natural.

(a) *Alcohol content (as borneol).* Not less than 30 percent by weight.

(b) *Esters (as bornyl acetate).* Not less than 1.5 percent by weight.

(c) *Refractive index at 20° C.* 1.4630 to 1.4680.

(d) *Specific gravity at 25°/25° C.* 0.893 to 0.909.

(e) *Odor* Characteristic odor.

§ 21.130 Sucrose octaacetate.

(a) Sucrose octaacetate is an organic acetylation product occurring as a white or cream-colored powder having an intensely bitter taste.

(b) *Free acid (as acetic acid).* Maximum percentage 0.15 by weight when determined by the following procedure: Dissolve 1.0 gram of sample in 50 ml of neutralized ethyl alcohol (or S.D.A. No. 3–A, No. 3–C, or No. 30) and titrate with 0.1 N sodium hydroxide using phenolphthalein indicator.

Percent acid as acetic acid = ml NaOH used × 0.6/ weight of sample

(c) *Insoluble matter.* 0.30 percent by weight maximum.

(d) *Melting point.* Not less than 78.0° C.

(e) *Purity.* Sucrose octaacetate 98 percent minimum by weight when determined by the following procedure: Transfer a weighed 1.50 grams sample to a 500 ml Erlenmeyer flask containing 100 ml of neutral ethyl alcohol (or S.D.A. No. 3–A, No. 3–C, or No. 30) and exactly 50.0 ml of 0.5 N sodium hydroxide. Reflux for 1 hour on a steam bath, cool and titrate the excess sodium hydroxide with 0.5 N sulfuric acid using phenolphthalein indicator.

Percent sucrose octaacetate = (ml NaOH − ml H_2SO_4) × 4.2412/weight of sample

§ 21.131 Toluene.

(a) *Distillation range.* (For applicable ASTM method, see 1980 Annual Book of ASTM Standards, Part 29, page 569, Standard No. D 362–75 for industrial grade toluene; for incorporation by reference, see § 21.6(b).) When 100 ml of toluene are distilled by this method, not more than 1 ml should distill below 109° C., and not less than 99 ml below 112° C.

(b) *Boiling point.* 110.6° ± 1° C.

(c) *Odor.* Characteristic odor.

(d) *Specific gravity at 15.56°/15.56° C.* 0.869 to 0.873.

§ 21.132 Vinegar.

(a) *Vinegar, 90-grain:*

Acidity (as acetic acid). 9.0 percent by weight, minimum.

(b) *Vinegar, 60-grain:*

Acidity (as acetic acid). 6.0 percent by weight, minimum.

Subpart F—Uses of Specially Denatured Alcohol and Specially Denatured Rum

§ 21.141 List of products and processes using specially denatured alcohol and rum, and formulas authorized therefor.

This section lists, alphabetically by product or process, formulas of specially denatured alcohol authorized for use in those products or processes, and lists the code numbers assigned thereto. Specially denatured rum, as well as specially denatured alcohol, may be used in tobacco sprays and flavors, Code No. 460, under Formula No. 4.

USES OF SPECIALLY DENATURED ALCOHOL [1]

Product or process	Code No.	Formulas authorized
Acetaldehyde	551	1, 2–B, 29.
Acetic acid	512	29, 35–A.
Adhesives and binders	836	1, 3–A, 3–C, 12–A, 23–A, 30.
Aldehydes, miscellaneous	552	1, 2–B, 29.
Alkaloids (processing)	344	1, 2–B, 2–C, 3–A, 3–C, 12–A, 13–A, 17, 23–A, 30, 32, 35–A.
Animal feed supplements	910	35–A.
Antibiotics (processing)	343	1, 2–B, 3–A, 3–C, 12–A, 13–A, 23–A, 30, 32, 35–A.
Antifreeze, proprietary	760	1.
Antiseptic, bathing solution (restricted)	220	16.
Antiseptic solutions, U.S.P. or N.F.	244	23–A, 37, 38–B, 38–F.
Bath preparations	142	1, 3–A, 3–B, 3–C, 23–A, 30, 36, 38–B, 39–B, 39–C, 40, 40–A, 40–B, 40–C.
Bay rum	112	23–A, 37, 38–B, 39, 39–B, 39–D, 40, 40–A, 40–B, 40–C.
Biocides, miscellaneous	410	1, 3–A, 3–B, 3–C, 23–A, 23–H, 27–A, 27–B, 30, 37, 38–B, 39–B, 40, 40–A, 40–B, 40–C.
Blood and blood products (processing)	345	1, 3–A, 3–C, 12–A, 13–A, 23–A, 30.
Brake fluids	720	1, 3–A, 3–C.
Candy glazes	015	13–A, 23–A, 35, 35–A, 45.
Cellulose coatings	011	1, 3–A, 3–C, 23–A, 30.
Cellulose compounds (dehydration)	311	1, 2–B, 3–A, 3–C, 32.
Cellulose intermediates	034	1, 3–A, 3–C, 13–A, 19, 23–A, 32.
Chemicals (miscellaneous)	570	1, 2–B, 2–C, 3–A, 3–C, 6–B, 12–A, 13–A, 17, 20, 29, 30, 32, 36.
Cleaning solutions	450	1, 3–A, 3–C, 23–A, 23–H, 30, 36, 39–B, 40, 40–A, 40–B, 40–C.
Coatings, miscellaneous	018	1, 3–A, 3–C, 23–A.
Collodions, industrial	004	1, 3–A, 3–C, 13–A, 19, 23–A, 32.
Collodion, U.S.P.	241	13–A, 19, 32.
Colognes	122	38–B, 39, 39–A, 39–B, 39–C, 40, 40–A, 40–B, 40–C.
Crude drugs (processing)	341	1, 2–B, 3–A, 3–C, 23–A, 30.
Cutting oils	730	1, 3–A, 3–C.
Dehydration products, miscellaneous	315	1, 2–B, 3–A, 3–C.
Dentifrices	131	31–A, 37, 38–B, 38–C, 38–D.
Deodorants (body)	114	23–A, 38–B, 39–B, 39–C, 40, 40–A, 40–B, 40–C.
Detergents, household	450	1, 3–A, 3–C, 23–A, 23–H, 30, 36, 39–B, 40, 40–A 40–B, 40–C.
Detergents, industrial	440	1, 3–A, 3–C, 23–A, 30.
Detonators	574	1, 6–B.
Disinfectants	410	1, 3–A, 3–B, 3–C, 23–A, 23–H, 27–A, 27–B, 30, 37, 38–B, 39–B, 40, 40 A, 40–B, 40–C.
Drugs and medicinal chemicals	575	1, 2–B, 2–C, 3–A, 3–C, 6–B, 12–A, 13–A, 17, 29, 30, 32.
Drugs, miscellaneous (processing)	349	1, 2–B, 3–A, 3–C, 13–A, 23–A, 30, 35–A, 38–B.
Duplicating fluids	485	1, 3–A, 3–C, 30.
Dyes and intermediates	540	1, 2–B, 2–C, 3–A, 3–C, 12–A, 29, 36.
Dyes and intermediates (processing)	351	1, 2–B, 3–A, 3–C, 12–A.
Dye solutions, miscellaneous	482	1, 3–A, 3–C, 23–A, 30.
Embalming fluids, etc	420	1, 3–A, 3–C, 22, 23–A.
Esters, ethyl (miscellaneous)	523	1, 2–B, 2–C, 6–B, 12–A, 13–A, 29, 32, 35–A.
Ether, ethyl	561	1, 2–B, 13–A, 29, 32.
Ethers, miscellaneous	562	1, 2–B, 13–A, 29, 32.
Ethyl acetate	521	1, 2–B, 29, 35–A.
Ethylamines	530	1, 2–B, 2–C, 3–A, 3–C, 12–A, 29, 36.
Ethyl chloride	522	1, 2–B, 29, 32.
Ethylene dibromide	571	1, 2–B, 29, 32.
Ethylene gas	572	1, 2–B, 29, 32.
Explosives	023	1, 2–B, 3–A, 3–C.
External pharmaceuticals, not U.S.P. or N.F.	210	23–A, 23–F, 23–H, 27, 27–A, 27–B, 33, 36, 37, 38–B, 38–F, 39–B, 40, 40–A, 40–B, 40–C.
External pharmaceuticals, miscellaneous, U.S.P. or N.F.	348	23–A, 25, 25–A, 33, 38–B.
Fluid uses, miscellaneous	760	1, 3–A, 3–C, 23–A, 30.
Food products, miscellaneous (processing)	332	1, 2–B, 3–A, 3–C, 13–A, 23–A, 30, 32, 35–A.

USES OF SPECIALLY DENATURED ALCOHOL [1]—Continued

Product or process	Code No.	Formulas authorized
Fuel uses, miscellaneous.	630	1, 3-A, 3-C, 28-A.
Fuels, airplane and supplementary.	612	1, 3-A, 3-C, 28-A.
Fuels, automobile and supplementary.	611	1, 3-A, 3-C, 28-A.
Fuels, proprietary heating.	620	1, 3-A, 3-C, 28-A.
Fuels, rocket and jet	613	1, 3-A, 3-C, 28-A.
Fungicides	410	1, 3-A, 3-B, 3-C, 23-A, 23-H, 27-A, 27-B, 30, 37, 38-B, 39-B, 40, 40-A, 40-B, 40-C.
Granular products (processing).	342	1, 2-B, 3-A, 3-C, 12-A, 13-A, 23-A, 30, 32, 35-A.
Hair and scalp preparations.	111	3-B, 23-A, 23-F, 23-H, 37, 38-B, 39, 39-A, 39-B, 39-C, 39-D, 40, 40-A, 40-B, 40-C.
Hormones (processing)	342	1, 2-B, 3-A, 3-C, 12-A, 13-A, 23-A, 30, 32, 35-A.
Incense	470	3-A, 3-C, 22, 37, 38-B, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Inks	052	1, 3-A, 3-C, 13-A, 23-A, 30, 32, 33.
Insecticides	410	1, 3-A, 3-B, 3-C, 23-A, 23-H, 27-A, 27-B, 30, 37, 38-B, 39-B, 40, 40-A, 40-B, 40-C.
Iodine solutions (including U.S.P. and N.F. tinctures).	230	25, 25-A.
Laboratory reagents (for sale).	611	3-A, 3-C, 30.
Laboratory uses, general (own use only).	610	3-A, 3-C, 30.
Lacquer thinners	042	1, 23-A.
Liniments, U.S.P. or N.F.	243	27, 27-B, 38-B.
Lotions and creams (body, face, and hand).	113	23-A, 23-H, 31-A, 37, 38-B, 39, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Medicinal chemicals (processing).	344	1, 2-B, 2-C, 3-A, 3-C, 12-A, 13-A, 17, 23-A, 30, 32, 35-A.
Miscellaneous chemicals (processing).	358	1, 2-B, 2-C, 3-A, 3-C, 12-A, 13-A, 17, 23-A, 30, 35-A.
Miscellaneous products (processing).	359	1, 2-B, 2-C, 3-A, 3-C, 12-A, 13-A, 17, 23-A, 30, 35-A.
Mouth washes	132	37, 38-B, 39-C, 39-D, 38-F.
Organo-silicone products.	576	2-B, 3-A, 3-C, 30.
Pectin (processing)	331	1, 2-B, 3-A, 3-C, 13-A, 23-A, 30, 35-A.
Perfume materials (processing).	352	1, 2-B, 3-A, 3-C, 12-A, 13-A, 30.
Perfumes and perfume tinctures.	121	38-B, 39, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Petroleum products	320	1, 2-B, 3-A, 3-C.
Photoengraving dyes and solutions.	481	1, 3-A, 3-C, 13-A, 30, 32.
Photographic chemicals (processing).	353	1, 2-B, 3-A, 3-C, 13-A, 30.
Photographic film and emulsions.	031	1, 2-B, 3-A, 3-C, 13-A, 19, 30, 32.
Pill and tablet manufacture.	349	1, 2-B, 3-A, 3-C, 13-A, 23-A, 30, 35-A, 38-B.
Plastics, cellulose	021	1, 2-B, 3-A, 3-C, 12-A, 13-A, 30.
Plastics, non-cellulose (including resins).	022	1, 2-B, 3-A, 3-C, 12-A, 13-A, 30.
Polishes	051	1, 3-A, 3-C, 30.
Preserving solutions	430	1, 3-A, 3-C, 12-A, 13-A, 22, 23-A, 30, 32, 37, 38-B, 42, 44.

USES OF SPECIALLY DENATURED ALCOHOL [1]—Continued

Product or process	Code No.	Formulas authorized
Product development and pilot plant (own use only).	812	All formulas.
Proprietary solvents (standard formulas).	041	1.
Refrigerating uses	740	1, 3-A, 3-C, 23-A, 30.
Resin coatings, natural	014	1, 23-A.
Resin coatings, synthetic.	012	1, 3-A, 3-C, 23-A, 30.
Resins, synthetic	580	3-A, 3-C, 29, 30, 35-A.
Room deodorants	470	3-A, 3-C, 22, 37, 38-B, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Rosin (processing)	354	1, 3-A, 3-C, 12-A.
Rotogravure dyes and solutions.	481	1, 3-A, 3-C, 13-A, 30, 32.
Rubber (latex) (processing).	355	1, 3-A, 3-C.
Rubber, synthetic	580	29, 32.
Rubbing alcohol	220	23-H.
Scientific instruments	710	1, 3-A, 3-C.
Shampoos	141	1, 3-A, 3-B, 3-C, 23-A, 27-B, 31-A, 36, 38-B, 39-A, 39-B, 40, 40-A, 40-B, 40-C.
Shellac coatings	013	1, 23-A.
Soaps, industrial	440	1, 3-A, 3-C, 23-A, 30.
Soaps, toilet	142	1, 3-A, 3-C, 23-A, 30, 38, 38-B, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Sodium ethylate, anhydrous (restricted).	524	3-B.
Sodium hydrosulfite (dehydration).	312	1, 3-B, 3-A, 3-C.
Soldering flux	035	1, 3-A, 3-C, 23-A, 30.
Solutions, miscellaneous.	485	1, 3-A, 3-C, 23-A, 30, 40-C.
Solvents and thinners (other than proprietary solvents or special industrial solvents).	042	1, 23-A, 30.
Solvents, special industrial (restricted sales).	045	1, 3-A, 3-C.
Stains (wood)	053	1, 3-A, 3-C, 23-A, 30.
Sterilizing solutions	450	1, 3-A, 3-C, 12-A, 13-A, 22, 23-A, 30, 32, 37, 38-B, 42, 44.
Theater sprays	470	3-A, 3-C, 22, 37, 38-B, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Tobacco sprays and flavors.	460	4.
Toilet waters	122	38-B, 39, 39-A, 39-B, 39-C, 40, 40-A, 40-B, 40-C.
Transparent sheetings	032	1, 2-B, 3-A, 3-C, 13-A, 23-A.
Unclassified uses [2]	999	1, 3-A, 3-C.
Vaccine (processing)	349	1, 2-B, 3-A, 3-C, 12-A, 13-A, 23-A, 30, 32, 35-A.
Vinegar	511	18, 29, 35-A.
Vitamins (processing)	342	1, 2-B, 3-A, 3-C, 12-A, 13-A, 23-A, 30, 32, 35-A.
Xanthates	573	1, 2-B, 29.
Yeast (processing)	342	1, 2-B, 3-A, 3-C, 12-A, 13-A, 23-A, 30, 32, 35-A.

[1] Other products or processes may be authorized by the Chief, Chemical Branch, under § 21.31(c).

[2] Persons desiring other formulas for this use should indicate the fact in the space provided for this purpose on ATF Form 5150.19.

Subpart G—Denaturants Authorized for Denatured Spirits

§ 21.151 List of denaturants authorized for denatured spirits.

Following is an alphabetical listing of denaturants authorized for use in denatured spirits:

DENATURANTS AUTHORIZED FOR COMPLETELY DENATURED ALCOHOL (D.C.A.), SPECIALLY DENATURED ALCOHOL (S.D.A., AND SPECIALLY DENATURED RUM (S.D.R.)

Acetaldehyde	S.D.A. 29.
Acetone, U.S.P	S.D.A. 23-A, 23-H.
Acetaldol	C.D.A. 18.
Almond oil, bitter, N.F.X	S.D.A. 36-B.
Ammonia, aqueous	S.D.A. 36.
Ammonia solution, strong, N.F	S.D.A. 36.
Anethole, N.F	S.D.A. 38-B.
Anise oil, N.F	S.D.A. 38-B.
Bay oil (myrcia oil), N.F.XI	S.D.A. 23-F, 36-B, 39-D.
Benzaldehyde, N.F	S.D.A. 36-B.
Benzene	S.D.A. 2-B, 2-C, 12-A.
Bergamot oil, N.F.XI	S.D.A. 23-F, 36-B.
Bone oil (Dipple's oil)	S.D.A. 17.
Boric acid, N.F	S.D.A. 38-F.
Brucine alkaloid	S.D.A. 40.
Brucine sulfate, N.F.IX	S.D.A. 40.
n-Butyl alcohol	S.D.A. 44.
tert-Butyl alcohol	S.D.A. 38, 39-A, 39-B, 40, 40-A, 40-B, 40-C.
Camphor, U.S.P	S.D.A. 27, 27-A, 38-B.
Caustic soda, liquid	S.D.A. 36.
Cedar leaf oil, U.S.P.XIII	S.D.A. 38-B.
Chloroform	S.D.A. 30.
Chlorothymol, N.F.XII	S.D.A. 38-B, 38-F.
Cinchonidine	S.D.A. 39-A.
Cinchonidine sulfate, N.F.IX	S.D.A. 39-A.
Cinnamic aldehyde (cinnamaldehyde), N.F.IX.	S.D.A. 38-B.
Cinnamon oil, N.F	S.D.A. 38-B.
Citronella oil, natural	S.D.A. 36-B.
Clove oil, N.F	S.D.A. 27-A, 38-B.
Coal tar, U.S.P	S.D.A. 38-B.
Denatonium benzoate, N.F. (BITREX).	S.D.A. 1, 40-B.
Diethyl phthalate	S.D.A. 38-B, 38-C.
Ethyl acetate	S.D.A. 29, 35, 35-A.
Ethyl ether	S.D.A. 13-A, 19, 32.
Eucalyptol, N.F.XII	S.D.A. 37, 38-B.
Eucalyptus oil, N.F	S.D.A. 38-B.
Eugenol, U.S.P	S.D.A. 38-B.
Formaldehyde solution, U.S.P	S.D.A. 22, 38-C, 38-D.
Gasoline	C.D.A. 18, 19; S.D.A. 28-A.
Gasoline, unleaded	C.D.A. 18, 19, 20; S.D.A 28-A.
Gentian violet	S.D.A. 33.
Gentian violet, U.S.P	S.D.A. 33.
Glycerin (Glycerol), U.S.P	S.D.A. 31-A.
Green soap, U.S.P	S.D.A. 27-B.
Guaiacol, N.F.X	S.D.A. 38-B.
Heptane	C.D.A. 18, 19; S.D.A. 28-A.
Hydrochloric acid, N.F	S.D.A. 38-F.
Iodine, U.S.P	S.D.A. 25, 25-A.
Isopropyl alcohol	S.D.A. 3-C.
Kerosene	C.D.A. 18, 19, 20.
Kerosene (deodorized)	C.D.A. 18, 19, 20.
Lavender oil, N.F	S.D.A. 27-B, 38-B.
Menthol, U.S.P	S.D.A. 37, 38-B, 38-C, 38-D, 38-F.
Mercuric iodide, red, N.F.XI	S.D.A. 43.
Methyl alcohol	S.D.A. 1, 3-A, 30.
Methylene blue, U.S.P	S.D.A. 4; S.D.R. 4.
Methyl isobutyl ketone	C.D.A. 18, 19; S.D.A. 1, 23-H.
Methyl *n*-butyl ketone	C.D.A. 18, 19; S.D.A. 1.
Methyl salicylate, N.F	S.D.A. 38-B, 46.
Mustard oil, volatile (allyl isothiocyanate), U.S.P.XII.	S.D.A. 38-B.
Nicotine solution	S.D.A. 4; S.D.R. 4.
Nitropropane, mixed isomers of	C.D.A. 18, 19; S.D.A. 1.
Peppermint oil, N.F	S.D.A. 38-B.

DENATURANTS AUTHORIZED FOR COMPLETELY DENATURED ALCOHOL (D.C.A.), SPECIALLY DENATURED ALCOHOL (S.D.A., AND SPECIALLY DENATURED RUM (S.D.R.)—Continued

Phenol, U.S.P	S.D.A. 35-B, 45.
Phenyl mercuric benzoate	S.D.A. 42.
Phenyl mercuric chloride, N.F.IX	S.D.A. 42.
Phenyl mercuric nitrate, N.F	S.D.A. 42.
Phenyl salicylate (salol), N.F.XI	S.D.A. 39-B.
Pine needle oil, dwarf, N.F	S.D.A. 39-B.
Pine oil, N.F.	S.D.A. 36-B.
Pine tar, U.S.P	S.D.A. 3-B.
Polysorbate 80, N.F	S.D.A. 39-F.
Potassium iodide, U.S.P	S.D.A. 25, 25-A, 42.
Pyridine bases	S.D.A. 6-B.
Pyronate	C.D.A. 18.
Quassia, fluid extract, N.F.VII	S.D.A. 39.
Quassin	S.D.A. 40.
Quinine, N.F.X	S.D.A. 39-A.
Quinine bisulfate, N.F.XI	S.D.A. 39-A, 39-D.
Quinine dihydrochloride, N.F.XI	S.D.A. 39-A.
Quinine sulfate, U.S.P	S.D.A. 39-D.
Resorcinol (Resorcin), U.S.P	S.D.A. 23-F.
Rosemary oil, N.F. XII	S.D.A. 27, 36-B.
Rubber hydrocarbon solvent	C.D.A. 18, 19, 20; S.D.A. 2-B, 2-C, 28-A.
Safrole	S.D.A. 35-B.
Salicylic acid, U.S.P	S.D.A. 23-F, 39.
Sassafras oil, N.F.XI	S.D.A. 36-B.
Shellac (refined)	S.D.A. 45.
Soap, hard, N.F.XI	S.D.A. 31-A.
Sodium iodide, U.S.P	S.D.A. 25, 25-A.
Sodium, metallic	S.D.A. 2-C.
Sodium salicylate, U.S.P	S.D.A. 39, 39-D.
Spearmint oil, N.F	S.D.A. 38-B.
Spearmint oil, terpeneless	S.D.A. 38-E.
Spike lavender oil, natural	S.D.A. 36-B.
Storax, U.S.P	S.D.A. 36-B.
Sucrose octaacetate	S.D.A. 40-A.
Thimerosal, U.S.P	S.D.A. 42.
Thyme oil, N.F.XII	S.D.A. 36-B.
Thymol, N.F	S.D.A. 37, 38-B, 38-F.
Tolu balsam, U.S.P	S.D.A. 35-B.
Toluene	S.D.A. 2-B, 2-C, 12-A.
Turpentine oil, N.F.XI	S.D.A. 35-B.
Vinegar	S.D.A. 18.
Zinc chloride, U.S.P	S.D.A. 38-F.

Subpart H—Weights and Specific Gravities of Specially Denatured Alcohol

§ 21.161 Weights and specific gravities of specially denatured alcohol.

The weight of one gallon of each formula of specially denatured alcohol at 15.56° C. (60° F.) is as listed in this section. The specific gravity of each formula of specially denatured alcohol at 15.56° C./15.56° C. (60° F./60° F.) in air is as listed in this section. (Weight of 1 gallon of water at 15.56° C. (60° F.) is 8.32823 pounds in air.)

WEIGHTS AND SPECIFIC GRAVITIES OF SPECIALLY DENATURED ALCOHOL [1]

[Slight deviations from this table may occur due to variations in specific gravities of authorized denaturants. Values for 190 proof determined experimentally in air. Other values calculated from these gravities.]

S.D.A. Formula No.	Finished formula (gals)	190 proof		192 proof		200 proof	
		Wt./gal. in air (lbs)	Sp. gr. in air	Wt./gal. in air (lbs)	Sp. gr. in air	Wt./gal. in air (lbs)	Sp. gr. in air

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL 2368-6]

Approval and Promulgation of Implementation Plans; Massachusetts; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction

SUMMARY: This document corrects an incorrect date citation in the rulemaking contained in a final approval of Polaroid's sulfur-in-fuel revision published on December 1, 1982 (47 FR 54073).

FOR FURTHER INFORMATION CONTACT: Cynthia Greene, (617) 223-5130.

SUPPLEMENTARY INFORMATION: The following correction is made in FR Document 82-32745 (A-1-FRL 2145-1) appearing on page 54073 in the issue of December 1, 1982.

Subparagraph (c)(52) appearing in column three on page 54073 should have read as follows:

Section 52.1120, paragraph (c)(52) is correctly added as follows:

§ 52.1120 Identification of plan.

* * * * *

(c) * * *

(52) A revision submitted on September 28, 1982 by the Commissioner of the Massachusetts Department of Environmental Quality Engineering allowing the burning of higher sulfur content fuel oil at the Polaroid Corporation for a period of up to 30 months commencing on December 1, 1982.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Dated: May 13, 1983.

Lester A. Sutton,

Regional Administrator, Region I.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; 0,0-Diethyl S-[2-(Ethylthio Ethyl] Phosphorodithioate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the insecticide *0,0*-diethyl *S*-[2(ethylthio)ethyl] phosphorodithioate and its cholinesterase-inhibiting metabolites, calculated as demeton, in or on the raw agricultural commodity asparagus. The regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: Effective on June 2, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Registration Division (TS-767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the **Federal Register** of April 13, 1983 (48 FR 15932), which announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2730 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of California, Idaho, Oregon and Washington.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the insecticide *0,0*-diethyl *S*-[2(ethylthio)ethyl] phosphorodithioate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodity asparagus at 0.1 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and disussed in the proposed rulemaking. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance will protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: May 25, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.183 is revised to read as follows:

§ 180.183 0,0-Diethyl S-[2-(ethylthio)ethyl] phosphorodithioate; tolerances for residues.

Tolerances are established for the combined residues of the insecticide *0,0*-diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate and its cholinesterase-inhibiting metabolites, calculated as demeton, in or on the following raw agricultural commodities:

Commodities	Parts per million

BILLING CODE 4910-59-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 81-11; Notice 3]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of this notice is to amend Federal Motor Vehicle Safety Standard No. 108 to allow an optional headlighting system that could improve the fuel economy performance of automobiles. The amendment follows a notice of proposed rulemaking published on January 17, 1983 (48 FR 1992).

The amendment is based upon a petition from, and is primarily directed towards a type of headlamp system developed by, Ford Motor Company. Ford wishes to offer on certain 1984 model cars a semi-sealed headlamp with a standardized replaceable bulb, which it states would conform to a proposed set of environmental performance requirements similar to those adopted by this notice.

DATE: The amendments made by this notice are effective on July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Jere Medlin, Office of Vehicle Safety Standards, NHTSA, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-2720)

SUPPLEMENTARY INFORMATION: This notice completes rulemaking initiated by the agency's publication of a notice of proposed rulemaking (NPRM) on new headlighting systems on January 17, 1983 (48 FR 1992). That proposal was issued following the grant of a petition for rulemaking submitted on August 28, 1981, by Ford Motor Company.

Ford Petition

The Ford petition sought an amendment to Standard No. 108 to permit the use of a non-fully sealed headlamp. To ensure the proper performance of the new headlamp, Ford requested the application to it of certain sealed beam headlamp performance requirements and of certain environmental tests.

Ford's new headlamp consisted of two discrete components: a plastic lens bonded to a plastic reflector, and a replaceable light source capsule of standardized design that is inserted through an opening in the rear of the reflector, and sealed by an "O-ring" seal on the capsule. Although contoured, the headlamp is mechanically aimable with an adapter to the current aiming equipment. Ford argued that the possibility of reflector contamination is minimized because of the lens/reflector bond and the seal at the base of the light source.

Ford stated that its replaceable bulb lamp was developed to assure a high reliability of positioning of the filament after repeated replacements of the bulb in different lamp bodies, and to ensure tight sealing of the capsule into the reflector. Ford asserted that it had rejected the European H-4 design with its multi-piece stamped construction as unacceptably complex.

A single piece plastic molding is the foundation of Ford's new bulb design. Ford Claimed that electrical socket molding technology has established that extremely fine dimensional control (± .004 inch) is consistently achievable even at elevated temperatures.

The Ford-type lamp has a bayonet mounting, selected because it provided positive "one way only" insertion of the bulb into the reflector assembly separate from the locking action of the retaining device. Twist lock designs currently used for signal lamp functions do not provide the precise and consistent filament positioning necessary for a headlamp assembly.

Control surfaces are established between the socket and mounting hole to provide (1) axial location, (2) surface to surface contact for in-out positioning of filament and (3) a controlled pin location for accurate filament position.

The method chosen for positioning and securing the bulb in the plastic molded base utilizes current technology such that either optical or dimensional filament control techniques are applicable. The bulb capsule can be inserted into a "master parabola" and illuminated, and the bulb can then be adjusted in the capsule using photo cells for optimum filament positioning. An alternative procedure would orient the filament relying strictly on dimensional location using an optical comparator.

Ford said in its petition that it believes a sealed, unvented assembly is desirable to avoid the problem of corrosion. The agency's concern about the headlamp system in use in Europe has been corrosion developing on the inside and outside surfaces of lamp reflectors after a relatively short time in service. Painted steel reflectors were most commonly used in Europe, and the lamp assemblies were typically vented to the atmosphere through a controlled path. With the sealed capsule design, replacement of the bulb may be achieved in a manner which Ford thinks protects the optic surfaces within the lamp as would be the case in sealed beam units. Ford intends to fabricate the reflector from corrosion-resistant material.

A single silicone O-ring provides the seal for the bulb. Ford tests have allegedly shown that the pressure build-up inside the sealed headlamp cavity due to the operating temperatures of the lamp is approximately 20 psi. Due to the close tolerances of the mating parts and the use of a low durometer "O" ring seal which permits sealing across surface irregularities, an internal pressure of 100 psi can be contained within the lamp

body. The efficacy of "O" ring seals to contain static pressure is well known.

Notice of Proposed Rulemaking

In the NPRM, NHTSA proposed three regulatory options that would allow for the use of new headlighting systems. Each of these systems would have involved the use of two separate components, the lens and reflector unit and a replaceable bulb unit. Options which were presented were—

(1) A Ford-type semi-sealed contoured lamp that has a standardized replaceable light source and that is designed to meet detailed photometric, dimensional and environmental performance requirements.

(2) A fully sealed lens reflector unit that could be contoured, that has a standardized replaceable light source, and that is required to meet standards similar to those in Option 1.

(3) A mechanically aimable unit that has a standardized replaceable light source and that is designed to meet minimum photometric requirements. The unit was not to be subject to detailed dimensional or environmental requirements as in the other options. The success of this option was to depend primarily on the product liability system and on use of the agency's defects authority to control unsatisfactory lamps.

Summary of Comments and Decision

NHTSA received extensive comments on the proposal from vehicle and lighting manufacturers and the general public. Most commenters favored the concept of new headlighting systems, although some commenters expressed no preference among the options. Those who commented on the options tended to favor Option 1, the subject of the Ford petition. Some commenters thought that option was too design restrictive, permitting a headlamp suitable only for one particular size of a two headlamp system and perhaps for only one manufacturer initially. The second choice was Option 3. However, both these options were also opposed by many commenters. Option 2, the sealed system with the replaceable bulb, occasioned few comments, but most of those were negative.

The agency has decided that Option 1 is the most feasible of the three proposed headlighting concepts and is adopting it with several modifications based on the comments. Since the Ford headlamp represents a new lighting technology, the agency believes that it is particularly appropriate to apply the detailed requirements of Option 1 to promote the lamp's safe performance.

With respect to Option 2, no specific proposals were presented to the agency for production of a contoured, sealed lens-reflector unit with a replaceable bulb. Also, while many of the motor vehicle equipment and vehicle manufacturers commenting on the NPRM favored Option 1, only one favored Option 2. Accordingly, the agency rejected Option 2.

The agency did not adopt Option 3 for several reasons. That option would require photometric conformance at the time the headlamp was manufactured and nothing more. No tests like those in Option 1 would be prescribed to ensure durability of the photometric performance over the life of the lamp. Assurance of continued performance would be provided almost solely by competitive forces of the marketplace, and NHTSA's defects authority. However, that authority is generally exercised only after safety problems have manifested themselves on the road. The agency believes that a higher quality of lamp is more likely to result if equipment is required to be built to certain specified levels of safety rather than left to the manufacturer's estimates of potential product liability and of the likelihood of the agency's discovery of defects and exercising its defects authority.

With the decision to adopt option 1, the principal issue became the efficacy of the performance tests in ensuring that the headlamps will perform adequately in real world conditions. NHTSA believes that the tests as adopted would accomplish that goal.

Discussion of Comments

Designed to conform. Some commenters understood the proposal as requiring that the new headlamps conform with the applicable requirements instead of simply being designed to conform with those requirements. The commenters who addressed this issue uniformly urged that the latter approach be adopted as it already has been for all other items of lighting equipment under the standard. As the agency indicated in its recent amendment to Standard No. 108 to permit a new size of headlamps requested by Chrysler Corporation, the agency will address this issue in a separate rulemaking proceeding.

Sequential testing of single lamp. Under NHTSA's proposal, a single lamp would have been tested sequentially under all of the standard's performance requirements. Most commenters did not favor sequential testing. Opponents objected to it on several grounds. From a practical standpoint, the time required for sequential testing of a single headlamp would be from 6 to 10 weeks. Further, laboratories would find it difficult to make efficient use of equipment since one facility must be held idle awaiting a lamp to finish another stop in the test. The agency notes that non-sequential testing would facilitate the agency's accurately judging a headlamp's level of performance under a particular environmental test. Failures could be more easily isolated and related to a particular test with non-sequential testing. For these reasons, NHTSA has decided to eliminate a requirement for sequential testing and to specify that a separate lamp be used for each test, except that the same lamp must be used for the temperature cycle and internal heat tests, for the reasons discussed below.

In addition to retaining certain sealed beam headlamp performance requirements, the amendment includes a series of environmental tests to assure adequate performance. The tests adopted are:

(1) Photometry.
(2) Abrasion.
(3) Vibration.
(4) Chemical Resistance.
(5) Corrosion.
(6) Dust.
(7) Temperature Cycle and Internal Heat.
(8) Humidity.
(9) Impact.

Photometry. A headlamp that has not been subjected to any of the environmental tests is required to meet certain SAE photometry requirements: S4.6 Photometry of SAE J575 "Test for Motor Vehicle Lighting Devices and Components," June 80; S3.1 Test Voltage and S3.5 Photometric Design Requirements, including Figure 3 and Table 1 of SAE J579c, December 78, SAE J580 "Sealed Beam Headlamp Assembly," August 77.

After a headlamp has been exposed to any of the following environmental hazards, abrasion, chemical resistance, humidity, dust, and temperature cycle/internal heat, it must continue to meet the photometric test prescribed by SAE Standard J579c. That test is currently a requirement of Standard No. 108 for existing headlamp systems.

Abrasion. Based on fleet field test results, the abrasion tests on plastic headlamps appear to be particularly critical. Accordingly, a proposed NHTSA procedure and an alternative Ford procedure were included to generate comment on this critical test phase. NHTSA proposed a test by which abrasion resistance would be judged by the effect of sand falling on a headlamp lens.

The abrasion test was to be required only if a proposed headlamp had a plastic lens. This was consistent with the agency's abrasion concerns, and with the current absence of any abrasion requirements applicable to existing glass surfaced lamp systems. At the end of the abrasion test, photometric output was to be measured to assure continuing compliance with SAE J579c, December 78.

Some commenters stated that the falling sand method of testing represents the manner in which abrasion actually occurs on headlamp lenses in use, and that the test has some "heritage" in an established ASTM procedure. However, opposing comments suggested that the reproducibility of a sand drop test is so poor that the results from different test laboratories could not be compared. NHTSA is concerned that a performance requirement based on that method of testing would not be readily enforceable.

Ford proposed a test in which steel wool would be rubbed against the lens for 11 cycles. It argued that the results of its test correlated more closely to the manner in which abrasion actually occurs than do the results of the falling sand test. Ford's data showed similar linear correlations between vehicle age and on-the-road development of headlamp haze due to abrasion and between the number of steel wool test cycles and the haze on headlamps tested under that test. There was no similarity in the correlation involving real world experience and that between the results of the falling sand test and the haze on headlamps resulting from that test. Most haze resulting from the falling sand test occurred during the first minute of testing.

Accordingly, the agency has adopted Ford's proposed test rubbing steel wool against the lens for 11 cycles, but not Ford's proposed abbreviated photometric checks following this test. Glass lensed units are exempt from the tests for abrasion and impact.

Vibration. At the conclusion of the proposed vibration test, there was not to be any evidence of loose or broken parts in the lamp, and the lamp was to continue to meet the photometric requirements. Since the proposed vibration test differed from the one currently specified in Standard No. 108 for other items of lighting equipment, the agency heeded requests not to have two different vibration tests requiring different test equipment. Therefore, the agency has amended the rule to specify the use of the vibration test specified by SAE J575e, the test currently applied to other items of lighting equipment. Similarly, as that vibration test allows filament fracture, the agency has determined that it is not appropriate to require photometric conformance following the vibration test.

Chemical resistance test. The proposed chemical resistance test involved total immersion of the entire test lamp in fluids for a period of five minutes, storage for 48 hours and then an examination for deterioration both in the lamp assembly and the photometric performance of the lamp. The proposed test fluids were gasoline, tar remover, motor oil, brake fluid, power steering fluid, windshield washer fluid, and antifreeze.

Most of those who commented on the chemical resistance test were opposed to the proposal that headlamps be totally immersed for a period of time in separate fluids. Opposition was based on the argument that this does not reflect actual conditions in service where a headlamp may come in contact with one of the listed fluids while being cleaned with a cloth having a variety of chemicals on it. Commenters also opposed use of gasoline and brake fluid as test fluids, the former primarily on the grounds of the effect likely upon a headlamp whose lens has already been subjected to the abrasion test, and the latter on the grounds that brake fluid, because of its corrosive nature, is not likely to be present on a cloth used in cleaning headlamps.

After due consideration of these comments, the agency has decided that total immersion of the lamp unit is not necessary since the purpose of the chemical resistance test is to ensure that the lens is not susceptible to damage by the listed fluids. Accordingly, the agency has modified the test to require that a headlamp be exposed to the fluids not by immersion, but by the more realistic procedures of being wiped with a cloth that has been immersed in one of the test fluids.

NHTSA has retained gasoline as a test fluid as it is a fluid very likely to be present on a wiping rag. The objection to using gasoline because of the headlamp's previous testing under the abrasion test is moot since the agency has deleted the provision for sequential testing of a single headlamp for compliance with all environmental tests. In view of the known corrosive effect of brake fluid on vehicle finishes, that agency believes that it is less likely that headlamps will be exposed to brake fluids than any of the other listed fluids. That effect and the warnings about brake fluid on containers of that fluid make it likely that mechanics will be particularly careful about not using brake fluid contaminated rags near any external vehicle surface. Therefore, the agency is not including it in the list of test fluids.

In concert with its elimination of sequential testing under the environmental tests, the agency is also eliminating the requirement that a single headlamp be exposed to each of the listed fluids. The agency believes that exposing a particular headlamp to only a single fluid will facilitate determining the performance capabilities of a headlamp when exposed to that fluid.

Corrosion test. The corrosion test that was proposed involved subjecting the test lamp to a salt spray test in accordance with ASTM B117–73 "Method of Salt Spray (Fog) Testing" for a period of 240 hours, consisting of ten successive 24-hour intervals. During each interval, the headlamp was to be exposed for 23 hours to the salt spray and then allowed to dry for an hour. At the end of the test period, compliance with the photometric requirements was to be determined. Further, the proposal provided that there could not be any evidence of internal or external corrosion more than an eighth of an inch from sharp edges, or any corrosion, on the terminals or elsewhere, which would involve loss of function.

Many commenters were concerned with the stringency of the test and the criteria. One commenter noted that the proposed test would not achieve the objective of ensuring reflectors with good corrosion resistance because the test does not take into account a situation in which a bulb may be removed for an extended period of time.

NHTSA is satisfied that the requirements are reasonable but believes that the test should be adjusted to reflect the possibility of bulb removal for an extended period of time or under highly humid conditions. Accordingly, the corrosion test adopted requires removal of the bulb for each one-hour period in which the salt spray is deactivated. This should introduce a salt atmosphere on the inside of the lamp. However, as this may create excessive salt deposits on the lens, not easily removed, there is no requirement to measure photometric requirements after the test period. The strictures against corrosion, of course, remain.

Dust test. There was general agreement on maintaining the dust test as proposed, in which fine powdered dust is diffused through a test box for a period of 5 hours. Accordingly, that test is adopted without change.

Temperature cycle, thermal shock, and internal heat tests. The principal changes made in the test procedures as adopted concern the temperature cycle, thermal shock, and internal heat tests.

As proposed, a temperature cycle test was required from −40°F to 176°F for 10 complete cycles. The headlamp was not to show any evidence of specific adverse effects.

In the proposed thermal shock test, the headlamp was to be energized on its highest wattage filament for 45 minutes, then plunged into ice water (32°F) for five minutes. The headlamp was to be required to show no evidence of fractures, delamination or entry of water in liquid form after this test.

As proposed, the internal heat test provided that the lens was to be coated with simulated road dirt consisting of Zaccharini dust and water, to reduce light transmission to 25% of the original. No lens distortion was to be permitted at the end of such test.

The main issue associated with the related tests regarding temperature cycle, thermal shock and internal heat is the relationship between the tests and the expected performance under actual operating conditions. Two basic aspects of performance are addressed by these tests. One is the integrity of the construction of the lamp. This is typically tested by cycling a lamp between a hot and a cold temperature. The second aspect is the permanence of the shape and the size of the lens, reflector, and filament under high temperature conditions. Any changes in this geometry should be noticeable from the lens distortion measurements and photometric tests conducted after exposure to such conditions.

As for the first aspect, most commenters who addressed the temperature range in the temperature cycle test indicated that the integrity of lamp construction can be tested adequately with a smaller temperature cycle range than the −40°F to +176°F range that was proposed. Accordingly, the agency adopted a narrower range of −30°F to +120°F. As for the second aspect, a minimal amount of lens warpage, .118 inch, is allowed in the final rule since it is not practicable to insist that plastic lenses remain absolutely warpage free. That small amount of distortion should not pose any safety problem since the lamp must still meet photometric conformance requirements. Finally, in a change from the proposal, the rule allows any means including Zaccharini dust to reduce light transmittance to 25 ± 2% of the output originally measured.

Headlamps will still be subjected to sufficiently high temperatures to ensure adequate performance. NHTSA understands that plastic materials currently used in headlamps can begin to lose strength in high ambient temperatures when the lens is very dirty. The internal heat test will, it is believed, generate temperatures seen in this condition.

The agency has decided to delete the proposed thermal shock test. That test is redundant, particularly because the agency has decided also that the temperature cycle and internal heat tests should be linked so as to require a single headlamp to demonstrate compliance with both of them. The temperature cycle test will not only test headlamps at extreme temperatures likely to be encountered in the real world, but also to subject them to a substantial change in temperature in a several hour period. Even with the narrower range adopted in this notice, headlamps will be required to maintain their performance when subjected to a much greater temperature change than headlamps will experience in the real world.

Humidity test. For the humidity test, the agency proposed that the headlamp was to be operated in a controlled environment of 100°F and humidity from 80 to 100% and was not to show any evidence of moisture, fogging, or delamination, after a period of 240 hours during which the headlamp is turned on and off. Although some commenters believed that some moisture should be allowed as a result of the test, NHTSA has decided that headlamps should be constructed so that no moisture can collect. However, the agency believes that a lesser period of time is sufficient to demonstrate compliance and the humidity test has been adopted with a period of 120 hours.

Impact test. The agency proposed an impact test which would require a plastic lens to withstand a single impact by a steel ball bearing 1.76 oz. (50 grams) in weight and dropped from a distance of 15.75 inches (40 cm.) above the lens. This test has been adopted as proposed.

Out-of-focus and bulb deflection tests. Two tests, an out-of-focus test and a bulb deflection test, were proposed to ensure the proper placement of the bulb filament. The out-of-focus test, not part of the Ford petition, was similar to that currently required of motorcycle headlamps which incorporate a replaceable bulb. The bulb deflection test was proposed by both NHTSA and Ford to simulate the effect of rough handling which could affect the bulb filament alignment, such as might occur during insertion of a replacement bulb. The agency believes that it is redundant to have two tests to ensure proper filament placement. That placement is a function of a bulb fit and filament position. The latter is assured by the narrow tolerances in the required bulb specifications and the former by the bulb deflection test. Accordingly, the agency has decided not to adopt an out-of-focus test.

Provision of bulb with new vehicle. NHTSA also proposed that manufacturers be required to provide a replacement bulb with every vehicle equipped with the new headlighting system. Several commenters opposed this requirement as unnecessary. This proposal is adopted but restricted to those motor vehicles manufactured during the first year in which the new amendments are effective. The establishment of that fixed period is premised on introduction of the new Ford-type headlamps near the beginning of that period. Based on that premise, the agency anticipates that replacement bulds should be readily available through normal distribution channels at the end of the one year period. If the agency's premise proves false or distribution problems otherwise arise, the agency will consider extending this period.

Testing of replacement headlamps. Each lens-reflector unit manufactured as replacement equipment would also have to meet the performance requirements of replaceable bulb headlamps when a standardized replacement light source is inserted. This requirement is adopted as proposed.

Adapter for aiming device. Because most existing mechanical aimers are not designed for headlamps with contoured lenses, the agency proposed to require that an adapter to facilitate aiming be furnished with each vehicle manufactured during the first model year in which replaceable bulb headlamps are included as standard equipment The adapter specified has been designed by Ford for this purpose. After that time, an adjustable adapter, also designed by Ford, should be available for mechanical aimers such that all contoured lenses could be aimed by reference to the pad aiming dimensions. Some commenters argued that the agency should not require mechanical aiming and thus should not adopt the requirement concerning adapters. The agency believes that requiring mechanical aiming is appropriate since most aimers used in this country are mechanical. The adapter requirement has been adopted for motor vehicles manufactured between July 1, 1983, and June 30, 1984, and equipped with the new headlamps. As in the case of the period established for provision of a replacement bulb with new vehicles, the agency will monitor the production of headlamps under the option adopted by this notice and

consider making any necessary adjustments in the end date of the period.

Distortion of plastic lenses. Because Ford intends to construct its lamps of plastic, lens distortion appeared to be another important issue. Elevated headlamp operating temperatures caused by dirt on the lens could exceed the thermal limit of some plastics and result in distortion. NHTSA's proposal and amendment distinguish between lamps of plastic and glass, not prohibiting use of the one or requiring the other. However, a headlamp using plastics would have to be certified as meeting the currently required tests for plastics of SAE J576c, including a heat test and the 3-year outdoor exposure test (now most generally conducted as a simulated equivalent).

Other issues. Two additional issues of major concern to a number of commenters were the suggestion that Option 1 was excessively design restrictive and the belief that greater consideration needed to be given to the use of the H4 bulb in the interest of international harmonization.

Standard No. 108 already contains many provisions substantially affecting design because of the necessity to standardize lighting equipment for the purpose of ensuring the ready availability of replacement lights. In recognition of the complexity of the proposed design dimensions of the standardized replacement light source, NHTSA has eliminated some of the proposed specifications. In order to allow manufacturers complete freedom in the exterior design of the lamp, however, the light source must be standardized to avoid proliferation. The H4 bulb was not included in the NPRM because NHTSA concluded that the bulb presented in the Ford petition was superior in design. The close fit of the bulb capsule and reflector socket (to prevent misaim from an out-of-position filament) and the O-ring seal were specially important in the agency's view. While the final rule does not harmonize light source, it will produce cost savings by allowing manufacturers to employ the same front end sheet metal for all markets.

One manufacturer expressed concern that NHTSA's allowance of the Option 1 system would mean that the agency would not consider petitions for the adoption of additional headlighting systems. The agency does not agree that new lighting concepts will be foreclosed from consideration. Each new concept will be judged on its merits.

Impact Analyses

NHTSA has considered this rule and has determined that it is not major within the meaning of Executive Order 12291, "Federal Regulation" or significant under Department of Transportation regulatory policies and procedures, as its adoption does not require any person to change current practices under the standard. A regulatory evaluation has been prepared and placed in the docket. (A free copy of this document can be obtained from the Docket Section.) The rule will not impose any additional requirements but will permit manufacturer greater flexibility in the design of headlighting systems and adjacent exterior vehicle surfaces. Use of this flexibility will allow improvements in safety, aerodynamic efficiency and fuel economy. The extent of such improvement is dependent on the extent to which manufacturers take advantage of the new headlamp designs permitted by the option.

Safety benefits. The agency has determined that use of the replacement bulb headlamp has the potential to provide several safety benefits as well as increase fuel economy through reducing aerodynamic drag and vehicle weight. One such potential benefit is that the aerodynamic shape of the lens may aid in keeping the lens cleaner and thus the light output higher. Further, the easy replacement of the bulb may result in faster replacement of burned out headlamps.

Energy saving benefits. Based on testing by Ford, it appears that use of the replaceable bulb headlamp would make possible a 2 percent reduction in aerodynamic drag. The slight weight reduction that could be achieved through use of plastics and the reduced aerodynamic drag would produce an average savings of 26 gallons over the life of a vehicle. Together, these quantifiable benefits could provide savings of $4.00 per vehicle per year.

Costs. The safety benefits could, of course, be offset if in those instances in which fractures do occur, the economic costs of replacement were prohibitive. Concerns regarding this possibility were raised by some commenters. However, that agency's analysis does not indicate that the replacement costs would be prohibitive. The average installed cost for replacing today's halogen sealed beam unit is approximately $20. The same figure for a replaceable bulb lamp complete with bulb would be about $55 according to information provided by Ford. Corning, however, estimates that the cost could be as high as $80.

The agency estimates that the initial consumer cost is $19 per car or $2 per year. The average annual incremental replacement cost to the vehicle owner is believed to range between $1 and $3 per lamp depending on the amount of stone damage experienced by the lamp. Therefore, the incremental annual consumer cost is believed to range from a cost of $3 to $5 per car per year. Considering the benefit of $4, the net Consumer cost is estimated to range from a saving of $1 to a cost of $1 per car per year.

NHTSA has concluded that this rule will not have a significant impact on the human environment. The lamps that will be manufactured pursuant to the rule are expected to be lighter, thus slightly reducing the overall material content of the automobile. This would have a small positive effect on the environment. No adverse impact on safety is anticipated, although as noted above the greater resistance of plastic facing to fracture in on-road use could produce incremental safety benefits by reducing the number of occasions in which fractures result in loss of illumination.

The agency has also considered the impacts of this rule under the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles and headlamps, those affected by the rule, are generally not small businesses within the meaning of the Regulatory Flexibility Act. Further, these manufacturers would be affected only to the extent that they elected to take advantage of the new headlighting option that is established by the rule. The number of different components in the inventories of headlamp distributors will increase, but not to the extent that any significant problem will be created. Finally, small organizations and governmental jurisdictions would be affected only to the extent that they choose to buy vehicles equipped with the new headlamps. The organizations and jurisdictions making that choice would not be significantly affected by the price of the new headlamps.

Because motor vehicle manufacturers must make timely decisions with respect to product plans for the 1984-model year, it is hereby found that an effective date earlier than 180 days after issuance of the rule is in the public interest. The rule is effective July 1, 1983.

The engineer and lawyer primarily responsible for this rule are Jere Medlin and Taylor Vinson, respectively.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

§ 571.108 [Amended]

In consideration of the foregoing, 49 CFR 571.108, Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, is amended as follows:

1. Section S3 Definitions is amended by adding the following definitions so that all definitions in that section are in alphabetical order:

"Headlamp test fixture" means a device designed to support a replaceable bulb headlamp in the test position specified in the laboratory tests in S4.1.1.36(d), and whose mounting hardware and components are those necessary to operate the headlamp as installed in a motor vehicle.

"Replaceable bulb headlamp" means a headlamp comprising a bonded lens and reflector assembly, and a standardized replaceable light source.

"Seasoning" means a process of energizing the filament of a headlamp, at design voltage, for a period of time equal to 1 percent of average rated laboratory life.

"Standardized replaceable light source" means an assembly of a headlamp bulb, base, and terminals, as described in Figure 1.

2. New Sections S4.1.1.36, S4.1.1.37, S4.1.1.38, S4.1.1.39 and S4.1.1.40 are added to read as follows:

S4.1.1.36 Instead of being equipped with a headlighting system specified in Table I or Table III, a passenger car, multipurpose passenger vehicle, truck, or bus manufactured on or after July 1, 1983, may be equipped with two replaceable bulb headlamps which are designed to conform to the following requirements.

(a)(1) Each replaceable bulb headlamp shall include components which are designed to conform to the applicable specifications of paragraph S4.1.1.38 and Figure 3—*Specifications For The Standardized Replaceable Light Source*, including filament location, base and socket dimensions, electrical connector dimensions, and maximum design wattage.

(2) The exterior face of each replaceable bulb headlamp lens shall have three pads which meet the requirements of Figure 4, *Dimensional Specifications for Location of Aiming Pads on Replaceable Bulb Headlamp Units*, and which form an aiming plane for mechanically adjusting and inspecting headlamp aim. The exterior lens face shall have molded into it the specific settings applicable to the headlamp as designed to be installed in the vehicle, for each of the two adjustable legs of the aiming device locating plate; e.g., "11H 17V" requires the horizontal aiming pad leg to be set in position 11, and the vertical aiming pad leg to be set in position 17.

(b) Each replaceable bulb headlight shall meet the following sections of the specified SAE Standards and Recommended Practices:

(1) Section 4.6—Photometry of SAE J575 "Tests for Motor Vehicle Lighting Devices and Components" June 80.

(2) Section 3.1—Test Voltage, and Section 3.5—Photometric Design Requirements including Figure 3 and Table 1 of SAE J579c "Sealed Beam Headlamp Units for Motor Vehicles" December 1978, except that the aiming plane on the lens shall be at horizontal and vertical distances to the photometer axis as inscribed on the lens of a replaceable bulb headlamp.

(3) Section 5—General Requirements, Section 6—Design Requirements and Tests (to the extent listed below), Section 6.1—Aiming Adjustment Test, Section 6.2—Inward Force Test, and Section 6.4—Connector Tests of SAE J580 "Sealed Beam Headlamp Assembly" August 1979.

(c) A headlamp with a glass lens need not meet the abrasion resistance test specified in S6.2, nor the impact test specified in S6.11.

(d) When tested according to any of the procedures indicated in subparagraphs (1) through (8), a replaceable bulb headlamp shall meet the appropriate requirement:

(1) After an abrasion test conducted in accordance with S6.2, the headlamp shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(2) After a vibration test conducted in accordance with S6.3, there shall be no evidence of loose or broken parts visible without magnification, except that the filament need not be unbroken.

(3) After a chemical resistance test involving exposure to any of the fluids listed in S6.4, there shall be no surface deterioration, coating delamination, fractures, deterioration of bonding materials, color bleeding or color pick-up visible without magnification, and the headlamp shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(4) After a corrosion test conducted in accordance with S6.5, there shall be no evidence of external or internal corrosion or rust visible without magnification. Loss of adhesion of any applied coating shall not occur more than .125 inch (3.2 mm) from any sharp edge on the inside or outside. Corrosion may occur on terminals provided there is no voltage drop greater than 3 percent from that measured before the test when measured per paragraph 6.4 of SAE J580 August 1979.

(5) After a dust test conducted in accordance with S6.6, the headlamp shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(6) The headlamp shall first meet the requirements of paragraph (d)(6)(A) and then those of paragraph (d)(6)(B).

(A) After a temperature cycle test conducted in accordance with S6.7.1, the headlamp shall show no evidence of delamination, fractures, entry of moisture or deterioration of bonding material, color bleeding, warpage or deformation visible without magnification, or lens warpage greater than .118 inch (3 mm) when measured perpendicular to the aiming plane at the point of intersection of the mechanical axis with the exterior surface of the lens, and it shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(B) After an internal heat test conducted in accordance with S6.7.2, there shall be no lens warpage greater than .118 inch (3 mm) when measured perpendicular to the aiming plane at the point of intersection of the mechanical axis with the exterior surface of the lens, and it shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(7) After a humidity test conducted in accordance with S6.8, the inside of the headlamp shall show no evidence of delamination or moisture, fogging or condensation visible without magnification, and the headlamp shall meet the photometric requirements of SAE J579c, "Sealed Beam Headlamp Units for Motor Vehicles" December 1978.

(8) After an impact test on a headlamp with a plastic lens conducted in accordance with S6.11, there shall not be any fracture of the adhesion of lens coating or delamination of materials visible without magnification, and the lens shall not be broken, cracked, or chipped.

S4.1.1.37 Each lens-reflector unit manufactured as replacement equipment for a replaceable bulb headlamp system shall conform to the requirements of

S4.1.1.36 when a standardized replaceable light source is inserted in it.

S4.1.1.38 Each standardized replaceable light source shall conform to the following requirements:

(a) A silicone O-ring shall be provided.

(b) The bulb portion of the standardized replaceable light source shall meet the requirements in paragraphs (b)(1) through (b)(6) of this section.

(1) The general specifications of the bulb shall be:

	Low beam	High beam
Watts @12.8 V	45	65
Lumens (without black cap) @12.8 V	[1] 1067±7½	[1] 1736±7½
Average Life @14.0 V	[2] 320	[2] 150

[1] Percent.
[2] Hours.

(2) The bulb filaments shall be subject to seasoning prior to wattage and lumens measurement.

(3) Wattage and lumens measurements shall be made with the direct current test voltage regulated within one quarter of one percent.

(4) Except for reference dimensions, and unless otherwise specified, a general tolerance of ±0.004 in. (0.10 mm) shall apply to all linear dimensions and ±1°.00′ shall apply to all angular dimensions.

(5) Bulb, lead wires and/or terminals shall be installed in the base so as to provide an airtight seal.

(6) After a bulb deflection test conducted in accordance with S7, the permanent deflection of the glass envelope of each standardized replaceable light source shall not exceed .005 inch (.13 mm) in the direction of the applied force in the base.

S4.1.1.39 Each motor vehicle manufactured on or after July 1, 1983, and before July 1, 1984, which is equipped with a replaceable bulb headlamp system shall also be provided with a spare standardized replaceable light source as original equipment for such vehicle.

S4.1.1.40 The lens of each replaceable bulb headlamp that conforms with this standard, and the side of the base of each standardized replaceable light source shall be marked with the symbol "DOT" or "D O T" which shall constitute a certification that the headlamp or light source conforms to all applicable Federal motor vehicle safety standards.

3. New Sections S6, S7, and S8 are added to read:

S6 *Tests and procedures for replaceable bulb headlamps.* When tested according to the procedures below, each replaceable bulb headlamp shall meet the requirements of S4.1.1.36 (b) and (d).

S6.1 *Photometry.* A headlamp shall be tested according to Section S3.5, Photometric Design Requirements of SAE Standard J579c "Sealed Beam Headlamp Units for Motor Vehicles" December 1978, after the tests specified in S6.2, S6.4, S6.6, S6.7(a), S6.7(b) and S6.8.

S6.2 *Abrasion.* (a) A headlamp shall be mounted in the abrasion test fixture in the manner indicated in Figure 5 with the lens facing upward.

(b) An abrading pad meeting the requirements in paragraphs (c)(1) through (c)(4) of this section shall be cycled back and forth (1 cycle) for 11 cycles at 4 ± 0.8 in. (10 cm ± 2 cm) per second over at least 80 percent of the lens surface, including all the area between the upper and lower aiming pads, but not including lens covers and edges.

(c)(1) The abrading pad shall be not less than 1.0 ± .04 in. (2.5 cm ± .1 cm) wide, constructed of 0000 steel wool, and rubber cemented to a rigid base shaped to the same vertical contour of the lens. The "grain" of the pad shall be perpendicular to the direction of motion.

(2) The abrading pad support shall be equal in size to the pad and the center of the support surface shall be within ±.08 in. (±2 mm) of the lens surface.

(3) The density of the abrading pad shall be such that when the pad is mounted to its support and is resting unweighted on the lens, the base of the pad shall be no closer than .125 in. (3.2 mm) to the lens at its closest point.

(4) When mounted on its support and resting on the lens of the test headlamp, the abrading pad shall then be weighted such that a pad pressure of 2.0 ± .15 psi (14 ± 1 KPa) exists at the center and perpendicular to the face of the lens.

(d) A pivot shall be used if it is required to follow the contour of the lens.

(e) Unused steel wool shall be used for each test.

S6.3. *Vibration.* A vibration test shall be conducted according to the procedures in SAE Standard J575e, "Tests for Motor Vehicle Lighting Devices and Components" August 1970, and those set forth in paragraphs (a) through (c) of this section.

(a) The table on the adapter plate is of sufficient size to contain completely the test fixture base with no overhang.

(b) The direction of vibration is the vertical axis of the headlamp as mounted on the vehicle.

(c) The filament is cold (not energized).

S6.4. *Chemical resistance.* (a) The entire exterior lens surface of the fixtured headlamp and top surface of the lens-reflector joint shall be wiped once to the left and once to the right with a 6-inch square soft cotton cloth (with pressure equally applied) which has been saturated once in a container with 2 ounces of one of the test fluids listed in paragraph (b) of this section. The lamp shall be wiped within 5 seconds after removal of the cloth of the test fluid.

(b) The test fluids are:

(1) gasoline—unleaded 89 octane

$$\frac{(R+M)}{2}$$

or above used per OSHA Std. 29 CFR 1910–106—Handing Storage and Use of Flammable Combustible Liquids.

(2) tar remover (petroleum base with Xylene).

(3) power steering fluid.

(4) windshield washer fluid consisting of 1.5% monethinalamine with the remainder 50% concentrations of methanol/distilled water by volume.

(5) antifreeze (50% concentration of ethylene glycol/distilled water by volume).

(c) After the headlamp has been wiped with the test fluid, it shall be stored in designed operating attitude for 48 hours at a temperature of 73°F± 7° (23°C± 4°) and a relative humidity of 30 ± 10 percent. At the end of the 48 hour period, the headlamp shall be wiped clean with a soft dry cotton cloth and visually inspected.

S6.5. *Corrosion.* The headlamp, unfixtured and in its designed operating attitude with all drain holes, breathing devices or other designed openings in their normal operating positions, shall be subjected to a salt spray (fog) test in accordance with ASTM B117–73, "Method of Salt Spray (FOG) Testing," for a period of a 240 hours, consisting of ten successive 24-hour intervals. During each interval, the headlamp shall be exposed for 23 hours to the salt spray, which shall not be activated for the 24th hour. The bulb shall be removed during the one hour of salt spray deactivation

and reinserted for the start of the next test cycle.

S6.6. *Dust.* The headlamp, mounted on a test fixture, with all drain holes, breathing devices or other designed openings in their normal operating positions, shall be positioned within a cubical box, with inside measurements of 35.4 in. (900 mm) on each side or larger if required for adequate wall clearance, i.e., a distance of at least 5.9 in. (150 mm) between the headlamp and any wall of the box. The box shall contain 9.9 lb. (4.5 kg) of fine powdered cement which conforms to the ASTM C150–77 specification for Portland Cement. Every 15 minutes, the cement shall be agitated by compressed air or fan blower(s) by projecting blasts of air for a two-second period in a downward direction so that the cement is diffused as uniformly as possible throughout the entire box. This test shall be continued for five hours after which the exterior surfaces of the headlamp shall be wiped clean.

S6.7 *Temperature and internal heat tests.*

S6.7.1 *Temperature cycle.* A headlamp, mounted on a headlamp test fixture, shall be exposed to 10 complete consecutive thermal cycles having the thermal cycle profile shown in Figure 6. During the hot cycle, the highest wattage filament in the headlamp shall be energized at design voltage commencing at point "A" of Figure 6 and de-energized at point "B". Separate or single test chambers may be used to generate the temperature environment described by the thermal cycle profile. All drain holes, breathing devices or other designed openings of the headlamp shall be in their normal operating positions.

S6.7.2 *Internal heat.*

(a) After its lens surface has been cleaned, the photometric output on upper beam of a headlamp that has been tested according to S6.7.1 is measured.

(b) The lens surface of the headlamp that would normally be exposed to road dirt shall be sprayed uniformly with any appropriate mixture of dust and water or other material to reduce the photometric output at the test point H-V of the lamp to 25% ± 2% of the output originally measured in the high beam photometric test under paragraph (b) of S4.1.1.36. Such reduction shall be determined under the same conditions under which the original measurement was made.

(c) After the determination has been made that the photometric output of the lamp has been reduced as specified in S6.7.2, the lamp and its mounting hardware shall be mounted in an environmental test chamber in the manner similar to that indicated in Figure 7 "Dirt-Ambient Test Setup." The headlamp shall be soaked for one hour at a temperature of 95°F (35°C) and then be energized for one hour in a still air condition, allowing the temperature to rise from 95°F (35°C).

(d) The lamp shall be returned to the room ambient temperature, 73 ± 7°F (23 ± 4°C) and relative humidity of 30 ± 10%. The lens shall then be cleaned. Photometric output of the lamp on high beam shall be determined according to S6.1.

S6.8 *Humidity.* The headlamp, mounted on a test fixture, shall be placed in a controlled environment consisting of a temperature of 100°F ± 9° (38°C ± 5°) with a relative humidity of 90% ± 10%. All drain holes, breathing devices, and other designed openings shall be in their normal operating positions. The headlamp shall be subjected to 20 consecutive 6-hour test cycles. In each cycle, it shall be energized at design voltage on the highest wattage filament contained in the device for 1 hour and then de-energized for 5 hours. After completion of the last cycle, the lamp shall be soaked for 1 hour at 73°F (20°C) and a relative humidity of 30% ± 10% before it is removed for photometric testing. The headlamp shall be tested for photometrics at 10 ± 1 minutes following completion of the humidity test.

S6.9 *Impact.* The headlamp shall be rigidly mounted in a headlamp test fixture on the seating lugs with the mechanical axis (bulb socket axis) vertical, and the lens upward. The seating plane of the test fixture shall consist of oakwood 0.5 inch (13 mm) thick. One impact shall be delivered to the center of the lens on the mechanical axis using a steel ball bearing with a diameter of .9055 in. (23 mm) weighing 1.76 oz. (50 grams), dropped freely from a distance of 15.75 in. (40 cm) from the bottom of the ball to the surface of the lens, at the intersection of the ball trajectory and the mechanical axis of the headlamp.

S7 *Deflection test for replaceable bulb.* Each replaceable bulb shall meet the requirements of S4.1.1.38(b)(6) when tested in the following manner. With the bulb rigidly mounted in a fixture in a manner indicated in Figure 8, apply a force of 4.0 ± 0.1 lb. (17.8 ± 4N) perpendicular to the longitudinal axis of the glass envelope and perpendicular to, and in a line intersecting, the lateral axis of the low beam filament. The force shall be applied to the outside surface of the glass envelope using a rod with a hard rubber tip with a minimum spherical radius of .039 in. (1 mm).

S8 *Aiming device locating plate for replaceable bulb headlamps.* Each motor vehicle manufactured on or after July 1, 1983, and before July 1, 1984, which is equipped with a replaceable bulb headlamp system shall be furnished with a Headlamp Aiming Device Locating Plate, conforming to:

(a) The general requirements of SAE J602, October 1980 "Headlamp Aiming Device for Mechanically Aimable Sealed Beam Headlamp Units", and Figure 9, except that the general and specific references in that standard to sealed beam headlamp units shall be read as applicable to replaceable bulb headlamps, and references in that standard to dimensions for headlamp aiming device locating plates shall be read in reference to the dimensions specified in this section.

(b)(1) If a suction cup is used to retain a mechanical aiming device to the headlamp unit, the overall diameter of the suction cup shall not exceed 2.8 in. (71 mm). The suction cup assembly shall be capable of securing the aiming device to a smooth lens surface angled up to 30 degrees universally from a transverse plane perpendicular to the H–V axis of the lamp.

(2) The aiming pad seating surface on the locating plate shall be free of burrs, projections, holes or impressions.

(3) There shall be no projections, tangs, or lugs on the locating plate that would prevent the seating surfaces locating with the aiming pads on the headlamp lens surface.

(4) Each of the two adjustable legs shall be capable of being extended, and locked in position, in increments of .10 in. (2.54 mm) with each increment measured from the '0' seating plane (perpendicular to the H–V axis of the lamp) with a maximum tolerance of ± .01 in. (± 0.25 mm). The incremental positions extending out from the '0' seating plane shall be identified by whole numbers, i.e., '0', '1', '2', '3', through a minimum of '37' for the vertical adjustable leg and minimum of '20' for the horizontal adjustable leg.

4. New Figures 3 through 9 are added as follows:

(Secs. 103, 114, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1403, 1407)); delegation of authority at 49 CFR 1.50)

Issued on May 20, 1983

Raymond A. Peck, Jr.,
Administrator.

BILLING CODE 4910-59-C

49 CFR Part 571

[Docket No. 74-14; Notice 30]

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of this notice is to delay for two years the effective date of the comfort and convenience requirements for seat belts in Safety Standard No. 208 *Occupant Crash Protection*. These requirements were issued January 8, 1981, to promote the installation of more comfortable and convenient belts by specifying additional performance requirements for both manual and automatic belts installed in motor vehicles with a Gross Vehicle Weight Rating (GVWR) of 10,000 pounds or less. The requirements were originally scheduled to become effective September 1, 1982, but in partial response to petitions for reconsideration, and in light of the agency's rescission of the automatic restraint requirements of Standard No. 208, were delayed for one year to September 1, 1983.

The agency has now concluded that a further delay is necessary because of concerns that have arisen within the agency regarding the efficacy and level of stringency of certain of the requirements, and because of the unsettled state of future plans for seat belt designs. The two-year delay set forth in this notice will give the agency sufficient time to complete its review of performance characteristics of restraint design that would lead to enhanced comfort and convenience for users, and to resolve the many questions that have developed regarding particular provisions.

DATES: Any petitions for reconsideration of this rule must be received within 30 days after the date of publication of this notice. The new effective date for the seat belt comfort and convenience requirements is September 1, 1985.

ADDRESS: Any petitions for reconsideration should refer to the docket number and notice number of this notice and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590. Docket hours are from 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert Nelson, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-2992).

SUPPLEMENTARY INFORMATION: On January 8, 1981, Safety Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208), was amended to specify additional performance requirements to enhance the comfort and convenience of both manual and automatic safety belts installed in vehicles with a GVWR of 10,000 pounds or less (46 FR 2064). Type 2 manual belts (combination lap and shoulder belts) installed in front outboard seating positions in passenger cars were excepted from these additional requirements because it was then assumed that these belts would be phased out of production in passenger cars as the automatic restraint requirements of Standard No. 208 became effective. However, the agency rescinded the automatic restraint requirements on October 29, 1981 (46 FR 53419). This rescission altered basic assumptions that had been made when the comfort and convenience requirements were first issued. Likewise, it altered the belt designs which manufacturers would be installing in future cars.

In partial response to petitions for reconsideration that were received concerning the comfort and convenience requirements, the agency delayed the effective date of the requirements for one year because of the changed circumstances surrounding the rescission of the automatic restraint requirement (47 FR 7254). The agency noted that it was difficult to respond to the substantive issues raised in the petitions for reconsideration, at that time, because many of the issues are no longer pertinent and because many of the rationales discussed by the agency when the requirements were first established must be re-evaluated.

During the agency's review of the comfort and convenience requirements following the one-year delay, questions arose concerning the efficacy and appropriate level of stringency of certain of the requirements. It became evident that the agency needed additional time to re-evaluate the comfort and convenience requirements in their entirety. Thus, on November 15, 1982, the agency proposed an additional two-year delay, to September 1, 1985 (47 FR 51432).

As noted in the proposal, agency experts have identified concerns about various countervailing safety consequences that could develop depending on the final form of the requirements. For example, tension-relieving devices on belt systems can reduce belt pressure and increase comfort, but there is a concern that the increased belt slack due to misuse could reduce belt effectiveness. The proposal pointed out that the agency must have time to complete its evaluation and resolution of these and other similar conflicting considerations.

Eleven comments were received in response to the proposed two-year delay, and only one of these objected to the proposal. The State of Idaho Transportation Department strongly recommended against a further delay on the basis that this would hinder current national and State level education efforts to encourage the voluntary use of seat belts. All of the vehicle manufacturers which commented vigorously supported the proposed delay, as did the American Seat Belt Council. Three manufacturers, however, urged the agency to delay the requirements indefinitely, rather than to September 1, 1985. These manufacturers agreed that the agency needs additional time to re-evaluate the comfort and convenience requirements in their entirety, but they are concerned that the two-year period proposed would then leave no lead time for manufacturers prior to the effective date. One manufacturer stated, "A new effective date should not be specified before the final requirements are established."

The agency understands the manufacturers' concerns regarding lead time. There were many issues raised in the petitions for reconsideration to which the agency has not yet responded (e.g., objectivity of the requirements, test repeatability, conflicts with the requirements of other safety standards). However, the agency believes that a specific effective date, September 1, 1985, is preferable to an indefinite delay since it gives all parties, including the agency, a time frame within which to work. The agency will, of course, evaluate whether there is adequate lead time for manufacturers after all the issues have been resolved in this rulemaking, and modify the effective date accordingly if that is necessary.

In spite of the concerns raised by the Idaho Department of Transportation, the agency has concluded that a two-year delay in the effective date of the comfort and convenience requirements is necessary. As noted in the proposal, the issues involved in this proceeding have been clouded in uncertainty since the regulation was first adopted.

Safety belt designs are currently in a state of flux. Therefore, it is not certain exactly what type of restraints will be on the road in the foreseeable future. For this reason, the agency has

determined that it would be wise to delay the comfort and convenience requirements, to give the agency sufficient time to re-evaluate the requirements in light of evolving belt systems and avoid imposing possibly unnecessary costs. For example, one commenter to the proposal stated that it had been experimenting with a particular seat belt design for nearly two years and is still uncertain whether the design will consistently meet the somewhat conflicting requirements (in Standard No. 208) for full belt retraction, 0.7 pound chest force limitation and the retractive force requirements of Safety Standard No. 209 (49 CFR 571.209). The agency needs additional time to evaluate these and other similar problems.

Finally, as noted in the proposal, the agency believes that it is impossible at the current time to determine how to achieve or induce effective improvements in the comfort and convenience of belt systems until the occupant crash protection standard can be reviewed in its entirety. The two-year delay will allow the agency time to complete its evaluation of all the current provisions in terms of expected applicability, effectiveness, overall safety consequences and appropriate level of detail.

The agency does not believe that this delay will retard the introduction of new improved belt systems, in terms of comfort and convenience. One vehicle manufacturer which commented on the proposal specifically stated that it "plans to proceed voluntarily with a variety of improvements in seat belt comfort and convenience for 1984 and future models regardless of the proposed delay in effective date." The agency encourages other manufacturers to also voluntarily introduce improved comfort and convenience features in their belt designs during this interim period in which the agency is resolving the issues associated with the Standard No. 208 requirements.

The agency has examined the impacts of this amendment and determined that it is not major within the meaning of Executive Order 12291 or significant according to the Department of Transportation regulatory policies and procedures. The agency has prepared a final regulatory evaluation concerning the amendment, which has been placed in the Docket. (A free copy may be obtained by contacting the Docket Section.) That evaluation shows that the safety impact of the proposed delay will not be significant. The precise magnitude of the impact cannot be quantified because the agency has not been able to successfully address in quantified terms the larger question of the effects of the comfort and convenience requirements. That adverse impact will be minimized as a result of the improved seat belt designs that are currently being introduced by manufacturers on a voluntary basis, partly in response to the dialogue generated by the proposal and adoption of the comfort and convenience requirements. The agency believes that manufacturers will experiment further during the two-year delay with innovative designs aimed at increasing the comfort and convenience of belt systems. This effort will at least partially offset any negative impacts that the delay might otherwise cause. The proposed delay will provide slight cost savings for both manufacturers and consumers.

NHTSA has also considered the impacts of this amendment under the Regulatory Flexibility Act. I hereby certify that amending Standard No. 208 to delay the effective date of the comfort and convenience requirements will not have significant economic impact on a substantial number of small entities for the reasons just discussed. The only small entities that would be affected would be small manufacturers or small organizations or governmental units that purchase vehicles. The effect would not be significant since the cost savings made possible by the delay would be slight.

Finally, NHTSA has analyzed this amendment for purposes of the National Environmental Policy Act. The agency has determined that implementation of this action will not have any significant impact on the quality of the human environment.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 424

Recovery Plan for the Hawaiian Monk Seal

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability.

SUMMARY: The Assistant Administrator for Fisheries has concurred with the approval of the Hawaiian Monk Seal Recovery Plan by the Director, Southwest Region, NMFS. The Plan, which was approved on April 1, 1983, was developed in accordance with Section 4(g) of the Endangered Species Act. The objective of the Plan is to provide a comprehensive research and management program to promote the recovery of the endangerd Hawaiian monk seal. Copies of the Plan may be obtained by writing to the offices listed below.

ADDRESSES: Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731 or Administrator, Western Pacific Program Office, National Marine Fisheries Service, P.O. Box 3830, Honolulu, Hawaii 96812.

SUPPLEMENTARY INFORMATION: The Hawaiian monk seal is one of three species of monk seals. The Caribbean monk seal probably is extinct and the populations of the Mediterranean and Hawaiian monk seals have declined in recent history. The Hawaiian monk seal is confined to the Northwestern Hawaiian Islands. Based on information demonstrating that the Hawaiian monk seal population declined substantially since the late 1950s, the Secretary of Commerce designated the Hawaiian monk seal an endangered species pursuant to Section 4 of the Endangered Species Act of 1973. The final rule listing the Hawaiian monk seal became effective on November 23, 1976 (41 FR 51611).

On April 24, 1980, the Director, Southwest Region, National Marine Fisheries Service appointed a Recovery Team to prepare a comprehensive research and management plan that, when implemented, would promote the recovery of the Hawaiian monk seal. On March 25, 1983, the team submitted the final draft plan and on April 1, 1983, it was approved for implementation. The plan describes an extensive research program designed to identify causes of

instability in the monk seal population at several of the atolls in the Northwestern Hawaiian Islands and to monitor trends in population changes throughout the island chain. The plan also identifies management activities, to be implemented by NMFS, other Federal agencies operating in the Northwestern Hawaiian Islands, and the State of Hawaii, that will provide for the recovery of the Hawaiian monk seal.

The plan is a dynamic document. As research results indicate areas where more specific research is needed or additional management actions might enhance recovery, the plan will be amended to accommodate those tasks. The effectiveness of the plan in promoting recovery of the Hawaiian monk seal population will be monitored and periodically evaluated by the Recovery Team.

50 CFR Part 611

[Docket No. 30511-84]

Foreign Fishing, Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement Amendment 3 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area. The amendment establishes a management system to reduce the incidental catch of salmon, Pacific halibut, king crab, and Tanner crab in the foreign trawl fishery. This action is intended to reduce the incidental catch and unnecessary mortality of these species in foreign groundfish operations while still allowing the foreign fisheries an opportunity to harvest their groundfish allocations.

EFFECTIVE DATE: July 4, 1983.

ADDRESS: Copies of the amendment, the environmental impact statement, and the regulatory impact review/final regulatory flexibility analysis may be obtained by contacting the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, Alaska 99510, 907-274-4563.

FOR FURTHER INFORMATION CONTACT: Susan J. Salveson, 907-586-7230.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP), developed by the North Pacific Fishery Management Council (Council), was implemented on January 1, 1982 (46 FR 63295, December 31, 1981). Nine amendments to the FMP have been adopted by the Council under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act), 16 U.S.C. 1801 *et. seq.*; three of those amendments have been implemented (Amendments 1a, 2, and 4).

Amendment 3 to the FMP establishes prohibited species catch (PSC) limits for salmon, Pacific halibut, king crab, and Tanner crab, which are prohibited species in the foreign groundfish fisheries and are caught incidentally in those operations. The annual PSC established for the above species is apportioned to foreign nations in proportion to each nation's groundfish allocation. When U.S. observer data, or other reported statistics that are considered reliable, indicate that trawl vessels of a particular nation have caught incidentally that nation's specified portion of the PSC for one of the above species, those vessels will be subject to a significant time-area closure in order to reduce or eliminate further taking of these species in the Bering Sea and Aleutian Islands area.

The preamble to the proposed rule (48 FR 10383, March 11, 1983) thoroughly discussed the need and justification of Amendment 3; it also discussed the procedure for apportionment of PSCs to foreign nations, considerations for adjustments of PSCs, exemptions to PSC regulations, and additional incentives to reduce the catch of prohibited species in foreign groundfish fisheries. Public comments on the proposed rule were invited until April 22, 1983. Public comments received have been considered and are responded to below. After considering the comments, the Director of the National Marine Fisheries Service, Alaska Region (Regional Director), has decided to give final approval to Amendment 3 and to implement it with a final rule.

The final rule incorporates the following changes to the proposed regulations. First, the word "will" is changed to "may" in paragraph (e)(2)(ii) in order to respond to Comment 2, below. Second, in paragraph (e)(2)(ii), the term "fishing elements" is replaced by "a selected portion of that nation's fishing fleet", and notification procedures for the imposition of time-area restrictions on trawl vessels of a nation which has caught its current specified portion of a PSC limit are clarified.

Public Comments

1. *Comment:* The procedure used to apportion the salmon PSC among nations does not provide for the distribution of salmon PSC amounts withheld in relation to reserves which are never allocated to the total allowable level of foreign fishing (TALFF). This is an oversight which should be corrected.

Response: The procedure set forth in Amendment 3 to determine each nation's portion of the Salmon PSC does not withhold PSC amounts in relation to groundfish reserves which are allocated to domestic annual harvest. Initial salmon PSC amounts are apportioned to foreign nations using the equation set forth in paragraph (c)(2)(iii)(D)(1)(ii) of the regulations. Subsequent salmon PSC apportionments to nations which accompany inseason groundfish allocations resulting from the allocation of initial unallocated TALFF or reserves will be determined by multiplying the current balance of the total salmon PSC by the ratio of a nation's additional groundfish allocation to the remainder of the initial unallocated TALFF plus the amount of the reserve apportioned to TALFF plus the current reserve balance. Using this procedure and assuming the reserve amount will equal zero at the end of the year, all of the salmon PSC will be apportioned to TALFF.

2. *Comment:* The word "will" should be changed to "may" in § 611.93(e)(2)(ii) of the regulations to clarify that the established PSC limits will apply in the absence of a Secretarial field order modifying such limits, and that such a field order is not required unless the established PSC limits are to be modified.

Response: The suggested change in § 611.93(e)(2)(ii) has been made.

3. *Comment:* The statement in the notice of proposed rulemaking that "The annual inseason supplemental allocations to a nation will be intended as a reward to that nation for its compliance with PSC regulations . . ." is inconsistent with the allocation standards of the Magnuson Act (16 U.S.C. 1801 *et seq.*) and, without additional qualification, is an inaccurate statement of both U.S. fisheries policy and the intent of the U.S. government.

Response: A nation's compliance with PSC regulations is only one of the many factors that are considered by NOAA and the U.S. State Department when making inseason groundfish allocations to foreign nations. Section 201(e)(1)(E) of the Magnuson Act lists the factors that are to be considered when making such allocations to foreign nations. These factors include the extent to which foreign nations have (1) cooperated with the U.S. in the enforcement of U.S. fishing regulations; (2) contributed to or fostered the growth of a sound and economic U.S. fishing industry; (3) transferred harvesting technology which will benefit the U.S. fishing industry; (4) made substantial contributions to fishery research; and (5) any such other matters deemed appropriate. Foreign compliance with PSC regulations and development of harvesting technologies necessary for that compliance are relevant when these factors are considered in the allocation process.

Classification

The Regional Director has determined that the FMP Amendment 3 and this rule are necessary for the conservation and management of the Bering Sea and Aleutian Islands area groundfish fishery and that both are consistent with the Magnuson Act and other applicable law.

The Council prepared a final environmental impact statement for this FMP and filed it with the Environmental Protection Agency on November 20, 1981; it addresses Amendment 3 and is available from the Council at the address set forth above.

The NOAA Administrator determined that this final rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291, because it will not result (1) in an annual effect on the economy of $100 million or more; (2) in a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises on domestic or export markets. This rule will have a significant beneficial economic impact on a substantial number of small entities.

These determinations are based on the regulatory impact review/final regulatory flexibility analysis (RIR/FRFA) available at the address above. The analysis in the RIR/FRFA is the same as that contained in the RIR/initial regulatory flexibility analysis, which was summarized in the preamble to the proposed rule at (48 FR 10383).

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. The State Division of Policy Development and Planning has concurred in this determination.

List of Subjects in 50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting requirements.

Dated: May 27, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

For reasons set out in the preamble, 50 CFR Part 611 is amended as follows:

PART 611—FOREIGN FISHING

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*, unless otherwise noted.

2. In § 611.93, paragraph(c)(2)(ii)(D) is revised and paragraph (e) is added to read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(D) Prohibited species catch (PSC) limits.

(1) Salmon. (i) During any fishing year, that portion of fishing area I lying between 55° N. and 57° N. latitude and 165° W. and 170° W. longitude and all of fishing area II may be closed for the remainder of the periods January 1 through March 31 and October 1 through December 31 to trawl vessels of any nation. This closure will occur when vessels of a nation have intercepted an amount of salmon which exceeds by 10 percent that nation's portion of the salmon prohibited species catch (PSC) established for the current fishing year (Table 2), or when vessels of that nation have intercepted an amount of salmon in any consecutive three-year period which exceeds the sum of that nation's portion of the salmon PSC established for those three years. Any salmon caught incidentally by vessels of that nation in the area which remains open will be applied against its portion of the following year's salmon PSC. Fishing areas I and II are shown in § 611.9, Appendix II, Figure 2.

TABLE 2.—TARGET REDUCTION SCHEDULE OF SALMON PROHIBITED SPECIES CATCHES BASED ON THE AVERAGE 1977–80 FOREIGN TRAWL SALMON INCIDENTAL CATCH

Year	Total salmon[1]
Base numbers:	
1977–80	60,000
Reduced catch levels:	
(1981)	60,000
(1982)	59,400
(1983)	58,925
(1984)	(2)
(1985)	(2)
(1986)	17,473

[1] Total salmon numbers are calulated on the assumption that 93% of incidentally-caught salmon are chinook.
[2] Reserved.

(ii) A nation's initial portion of the salmon PSC for a fishing year will be determined by multiplying the total salmon PSC for that year by the ratio of that nation's initial groundfish allocation to the total initial TALFF plus reserves for groundfish:

Nation's initial salmon PSC equals total salmon PSC multiplied by nation's initial groundfish allocation divided by total initial groundfish TALFF and reserve.

At the beginning of the fishing year, a portion of the salmon PSC will not be distributed to nations, because groundfish reserves will not yet be apportioned and some of the initial TALFF may not yet be allocated. This remaining portion of the salmon PSC will be subsequently distributed to nations in proportion to increases in their groundfish allocations which result from the apportionment of the initial unallocated TALFF and groundfish reserves.

(2) Pacific halibut, king crab, and Tanner crab. (i) When during any fishing year the trawl vessels of a nation have taken incidentally that nation's current portion of the PSC for Pacific halibut, king crab, or Tanner crab, the entire management area will be closed to trawling by vessels of that nation for the remainder of that fishing year or until that nation's groundfish allocation will result in a corresponding increase in its current portion of PSC for Pacific halibut, king crab, and Tanner crab.

(ii) For any year (year i), the PSC_{ij}s for each of these species (species j) are based upon the incidental catch rates (R_{ij}) shown in Table 3:

PSC_{ij} equals R_{ij} multipliled by the total groundfish TALFF. Using this formula, the PSC for Pacific halibut, king crab, and Tanner crab will increase in proportion to increases in the total TALFF which result from the apportionment of groundfish reserves or surplus DAH to TALFF under paragraph (b)(2) of this section.

(*iii*) A nation's current portion of the PSC_{ij}s for Pacific halibut, king crab, and Tanner crab, at any time during the fishing year, is determined by multiplying that nation's current groundfish allocation by R_{ij}:

Nation's PSC_{ij} equals R_{ij} multiplied by a nation's groundfish allocation.

TABLE 3.—INCIDENTAL CATCH RATE REDUCTIONS FOR PACIFIC HALIBUT, KING CRAB, AND TANNER CRAB, BASED ON THE AVERAGE 1977–80 FOREIGN TRAWL GROUNDFISH AND PROHIBITED SPECIES CATCHES

Year	Halibut [1]	King Crab [2]	Tanner Crab [2]
Base Catch Rates			
1977–80	3,182	916,804	16,003,329
Average Base	[3] 1,301,250 R=0.00245	[4] 1,301,250 R=0.70456	[5] 1,301,250 R=12.29843
Rate Reduction Schedule, R and R as percentage of base R (percent)			
(1981)			
(1982)	R=.00220 90%	R=.66933 95%	R=11.6840 95%
(1983)	R=.00196 80%	R=.63410 90%	R=11.0686 90%
(1984)	R=.00171 70%	R=.59887 85%	R=10.4537 85%
(1985)	R=.00147 60%	R=.56365 80%	R=9.8387 80%
(1986)	R=.00122 50%	R=.52842 75%	R=9.2238 75%

[1] Metric tons per metric ton of groundfish.
[2] Number of individuals per metric ton of groundfish.
[3] Base R=0.00245.
[4] Base R=0.70456.
[5] Base R=12.29843.

* * * * *

(e) *Inseason management decisions.*—(1) *Field orders.*—(i) Any field order issued by the Secretary under this section will include the following:

(A) The Secretary's findings required by paragraph (e)(2) of this section;

(B) A description and order of the modification of time and area limitations, based upon the Secretary's findings; and

(C) The effective dates of the modification.

(ii) No field order issued under this section may take effect until:

(A) It has been filed for publication with the **Federal Register**;

(B) The foreign nations concerned and the designated representatives for affected foreign fishing vessels are notified. If practicable, notification shall be given at least 48 hours before the field order is to be effective; and

(C) The public has been offered the opportunity to comment upon the Secretary's proposed findings and order of modification for a period of at least thirty (30) days, unless the Secretary finds that such prior opportunity for public comment would adversely affect the conservation and management of groundfish or unallocated species.

(iii) If the Secretary finds that prior opportunity for public comment on the proposed findings and order of modification would adversely affect the conservation and management of groundfish or unallocated species, he will receive public comments on the field order for thirty (30 days) after its effective date, making available to the public during business hours the aggregate data on which it was based. After considering the comments received, the Secretary will determine whether the field order should be changed.

(iv) Any modification prescribed by a field order issued under this section will remain in effect in accordance with the terms of the field order, or of any subsequent field order which may be issued under this section.

(2) *Prohibited species catch (PSC) limits.*—(i) The PSCs or incidental catch rates for salmon, Pacific halibut, king crab, and Tanner crab established in paragraph (c)(2)(ii)(D) of this section will be reviewed annually by the Secretary, in consultation with the North Pacific Fishery Management Council, in order to respond to changes in relevant circumstances, including the following:

(A) Changes in the stock condition and abundance of prohibited species;

(B) Changes in the stock condition and abundance of target groundfish species, except that such changes will not be considered relevant to the salmon PSC except in the course of a full and complete review of the salmon PSC reduction program to be conducted during 1983;

(C) Changes in the degree of socioeconomic impact of prohibited species catches on the domestic fisheries dependent on those species; and

(D) Changes in the impact of PSCs on the opportunity of foreign fisheries to take their groundfish allocations.

(ii) Based upon the most recent scientific and technical information available, and prior to the beginning of the fishing year, the Secretary may issue a field order under paragraph (e)(1) of this section to adjust the PSC's or incidental catch rates from salmon, Pacific halibut, king crab, and Tanner crab after consultation with the North Pacific Fishery Management Council under paragraph (e)(2)(i) of this section and after he has considered all of the following in descending order of priority and issued relevant findings:

(A) The need to protect prohibited species for biological and other conservation reasons;

(B) The impact of PSC regulations on the domestic fisheries dependent on prohibited species;

(C) The impact of the PSC regulations on development and operation of domestic groundfish fisheries; and

(D) The impact of PSC regulations on the foreign groundfish fisheries.

(iii) The Regional Director will notify a nation when its portion of the PSC for salmon, Pacific halibut, king crab, or Tanner crab, as established under paragraph (c)(2)(iii)(D) of this section, is approached, so that voluntary efforts by vessels of that nation may reduce the incidental catch of these species. When a nation's portion of the PSC for salmon, Pacific halibut, king crab, or Tanner crab, is reached, the Regional Director shall notify the foreign nation and the designated representatives for affected foreign fishing vessels of the resulting time-area restriction under paragraph (c)(2)(iii)(D) of this section. If practicable, such notification will be given at least 48 hours prior to the restriction. After a nation has caught its portion of the PSC for Pacific halibut, king crab or Tanner crab, the Regional Director may by field order allow a selected portion of that nation's fishing fleet to continue fishing under specified conditions until that nation's groundfish allocation is reached, although any additional incidental catch of prohibited species by vessels which have been allowed to continue fishing will be considered when establishing future PSC limits for that nation. The Regional Director will take into account the following considerations when making such allowance and will issue relevant findings.

(A) The risk of biological harm to prohibited species stocks and of socioeconomic harm to authorized prohibited species users posed by continued trawling by the selected elements;

(B) The extent to which the selected elements have avoided incidental prohibited species catches up to that point in the fishing year;

(C) The confidence of the Regional Director in the accuracy of the estimates of prohibited species catch by the selected elements up to that point in the fishing year;

(D) Whether observer coverage of the selected elements is sufficient to assure adherence to the prescribed conditions, and to alert the Regional Director to increases in the elements' prohibited species catch; and

(E) The enforcement record of owners and operators of vessels included in the selected elements, and the confidence of the Regional Director that adherence to prescribed conditions can be assured in light of available enforcement resources.

Proposed Rules

Federal Register
Vol. 48, No. 107
Thursday, June 2, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

United States Standards for Grades of American (Eastern Type) Bunch Grapes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Agricultural Marketing Service (AMS) proposes to amend the voluntary United States Standards for Grades of American (Eastern Type) Bunch Grapes. Industry has requested that the standards be amended to bring them in line with current marketing practices. This proposal would provide more reasonable tolerance limitations for small consumer-size containers; make minor changes in bunch requirements for U.S. No. 1 Table Grapes; and, delete reference to specific varieties with respect to applicable size requirements.

AMS has the responsibility, in cooperation with industry, to maintain the currency of its grade standards.

DATE: Comments must be received on or before August 1, 1983.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments should reference the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Michael V. Morrelli, Fresh Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–2011.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated as a "non-major" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant effects on competition, employment, investments, productivity, innovations, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601), because it reflects current marketing practices.

The voluntary United States Standards for Grades of American (Eastern Type) Bunch Grapes became effective in 1926 and were last revised in 1935.

Venture Vineyards, Inc., Lodi, New York, a large-volume marketer of table grapes for approximately 75 growers, has requested that the standards be amended to bring them in line with current cultural and marketing practices. Since the last revision of the standards there has been a major change in packaging. In past years consumers purchased these grapes in 8-quart and larger size packages for making products such as juice, wine or preserves. Most eastern type grapes shipped to fresh market are now utilized as table grapes. Consequently they are packaged in 1- or 2-quart containers, a more convenient size for the typical family. The current tolerance limitations on individual containers are overly restrictive when applied to small consumer units. This amendment would bring the standards in line with current cultural and marketing practices and make them more useful to the grape industry.

Proposed changes are as follows:

(1) The current container tolerance limitations of 1½ times for a lot tolerance of 10 percent of more and 2 times for a lot tolerance of less than 10 percent would be increased to 3 times the specified lot tolerance for grapes packed in containers of 5 pounds or less. This would provide more reasonable container limitations for small consumer-size units. Inasmuch as this change would apply only to individual container tolerances and would not affect lot tolerances, the quality level for the lot as a whole would be maintained as under the current standards.

(2) The U.S. No. 1 Table Grapes grade currently requires at least 85 percent of the bunches in each container to be fairly compact. Under this proposal containers of 5 pounds or less would be permitted to have 50 percent of the bunches in any container fairly compact, provided that the average for the lot is not less than 85 percent. Bunches could not be excessively small, except that the portions of bunches consisting of not less than three berries could be used to fill open spaces between whole bunches. This would provide more realistic bunch requirements for individual small consumer-size packages.

(3) Delete from the "Size of berries" sections of the U.S. Fancy and the U.S. No. 1 Table Grapes grades the reference to specific varieties and add "unless otherwise specified." The present standards require that the specified varieties and other varieties of similar size must have a minimum berry size of not less than 9/16 of an inch in diameter. This change would allow a minimum berry size, other than that presently required, to be specified in connection with the trade for any variety.

List of Subjects in 7 CFR Part 51

Fresh fruits, vegetables and other products (inspection, certification and standards).

PART 51—[AMENDED]

Accordingly, it is proposed that 7 CFR Part 51 be amended as follows:

1. In § 51.3610, paragraph (b) is revised to read:

§ 51.3610. U.S. Fancy Table Grapes.

* * * * *

(b) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of dried berries, on each bunch shall have a minimum diameter, unless otherwise specified, of 9/16 of an inch.

* * * * *

2. In § 51.3611, paragraphs (a) and (b) are revised to read:

§ 51.3611 U.S. No. 1 Table Grapes.

* * * * *

(a) *Bunches.* At least 85 percent of the bunches in each container are fairly compact; except that for packages which contain 5 pounds or less, at least 50 percent of the bunches in any container are fairly compact, provided that the average for the lot is not less than 85 percent. Bunches shall not be excessively small, except that portions of bunches consisting of not less than three berries may be used to fill open spaces between whole bunches.

(b) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of dried berries, on each bunch shall have a minimum diameter, unless otherwise specified, of 9/16 of an inch.

3. Section 51.3614 is amended by revising the introductory text, paragraph (a) and adding paragraph (b) to read:

§ 51.3614 Application of tolerances.

The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided that the averages for the entire lot are within the tolerances specified for the grade:

(a) Individual packages which contain more than 5 pounds: Shall contain not more than one and one-half times a specified tolerance of 10 percent or more and not more than double a specified tolerance of less than 10 percent.

(b) Individual packages which contain 5 pounds or less: Shall contain not more than three times the specified tolerance.

(Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended (7 U.S.C. 1622, 1624)

Done at Washington, D.C. on May 26, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

7 CFR Part 1207

Potato Research and Promotion Plan; Proposed Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rulemaking.

SUMMARY: This notice invites written comments on proposed expenses for the functioning of the National Potato Promotion Board. It would enable the Board to collect assessments from designated handlers on assessable potatoes and to use the resulting funds for its expenses.

DATE: Comments due by June 16, 1983.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077–S, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written comments shall be submitted and they will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, F&V, AMS, USDA, Washington, D.C. 20250 (202) 447–2615.

SUPPLEMENTARY INFORMATION: Information collection requirements contained in this regulation (7 CFR Part 1207) have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #0581–0093.

This proposed rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities because it would not measurably affect costs for the directly regulated handlers.

The Potato Board is the administrative agency established under the Potato Research and Promotion Plan (7 CFR Part 1207). This program is effective under the Potato Research and Promotion Act (7 U.S.C. 2611–2627).

List of Subjects in 7 CFR Part 1207

Administrative practice and procedure, Advertising, Agricultural research, Potatoes.

PART 1207—POTATO RESEARCH AND PROMOTION PLAN

It is proposed that § 1207.411 (47 FR 32914, July 30, 1982) be removed and § 1207.412 be added as follows:

§ 1207.412 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period beginning July 1, 1983, and ending June 30, 1984, by the National Potato Promotion Board for its maintenance and functioning and for such purposes as the Secretary determines to be appropriate will amount to $2,565,000.

(b) The rate of assessment to be paid by each designated handler in accordance with the provisions of the Plan shall be one cent ($0.01) per hundredweight of assessable potatoes handled by such person during said fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as an operating monetary reserve.

(d) Terms used in this section have the same meaning as when used in the Potato Research and Promotion Plan.

(Approved by OMB under control number 0581–0093)

(Title III of Pub. L. 91–670; 84 Stat. 20401; 7 U.S.C. 2611–2627)

Dated: May 26, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

Correction

In FR Doc. 83–11159 beginning on page 20731 in the issue of Monday, May 9, 1983 make the following corrections:

1. On page 20733, column one, paragraph designated as "(iii)", line two, "charger" should read "charge."

2. On page 20733, column one, paragraph designated as "(iv)", line five, "many" should read "may."

3. On page 20733, column three, **"II"** should appear above paragraph three beginning "It is further ordered that."

4. On page 20734, column one, paragraph designated as "B", "1986" should read "1984."

5. On page 20744, column two, paragraph two, line one, "on" should read "of."

6. On page 20744, column three, line two, **"Contract"** should read **"Contact."**

7. On page 20746, column three, paragraph between "27)" and "29)" should be correctly designated as "28)."

8. On page 20747, column one, under DON'TS, paragraph designated as "3)", "on" should read "or."

9. On page 20747, column one, *SPECIAL GENERAL MOTORS PROVISIONS*, paragraph designated as "1. *Gasoline and diesel engines.*" line five, "balance" should read "balancers."

10. On page 20747, column one, *SPECIAL GENERAL MOTORS PROVISIONS*, paragraph designated as "1. *Gasoline and diesel engines.*" line nine, "housing" should read "housings."

11. On page 20747, column two, **BACKGROUND STATEMENT**, paragraph designated as "2. *Transmissions.*", lines one through thirty-nine and column three, lines one

through twenty-three should be removed.

12. On page 20749, column two, (five stars)* * * * * should appear beneath line thirteen.

13. On page 20749, column two, pararaph designated as "8." should be correctly designated with a bullet (•).

14. On page 20757, column three, *Indexes and Explanatory Information.* line sixteen, "change" should read "charge."

15. On page 20759, column three, paragraph two, line thirteen, "or" should read "on."

BILLING CODE 1505-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34-19811, File No. S7-975]

Exemption for Certain Foreign Government Securities for Purposes of Futures Trading

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is proposing for comment a rule which would designate certain British and Canadian government securities as "exempted securities" under the Securities Exchange Act of 1934 (the "Exchange Act") for purposes only of the Exchange Act's application to the marketing in this country of futures contracts on those securities. The proposed rule would have the effect of removing the designated securities from the class of securities on which futures trading is forbidden by the Commodity Exchange Act ("CEA"). Trading the underlying securities, absent compliance with applicable registration and other requirements, would remain prohibited under the federal securities laws.

DATE: Comments should be submitted by July 5, 1983.

ADDRESSES: Interested persons should submit three copies of their written data, views and arguments to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and should refer to File No. S7-975. All submissions will be available for public inspection at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Kevin Fogarty, Esq., Division of Market Regulation, Securities and Exchange Commission, Washington, D.C. 20549, (202) 272-2416.

SUPPLEMENTARY INFORMATION:

I. Introduction

Under recently enacted amendments to the CEA, [1] the trading of futures contracts on individual securities is prohibited, unless such securities qualify as "exempted securities" under Section 3 of the Securities Act of 1933 ("Securities Act") or 3(a)(12) of the Exchange Act. Since the legislative history of the new amendments indicates that Congress did not intend to forbid the marketing of futures on British government bonds (so-called "gilt-edged" bonds or "gilts") [2] in this country so long as the futures contracts are not settled here and the bonds themselves are not traded here, the Commission is proposing Rule 3a12-8 under the Exchange Act, which would designate such bonds, as well as certain Canadian government securities, as "exempted" securities under Section 3(a)(12) for the purpose of permitting futures trading in this country.

A. The Futures Trading Act of 1982

The Futures Trading Act of 1982 ("Futures Trading Act"), signed by the President on January 11, 1983, contains amendments to the CEA including a new Section 2(a)(1)(B)(v) that provides that

> * * * [n]o person shall offer to enter into, enter into, or confirm the execution of any contract of sale (or option on such contract) for future delivery of any security, or interest therein or based on the value thereof, except an exempted security under Section 3 of the Securities Act of 1983 or Section 3(a)(12) of the Securities Exchange Act of 1934. * * *

The apparent effect of this language would be to prohibit both the offer and the acceptance in this country of any future on any individual security, including the British gilt and Canadian government securities, unless the security qualifies as an "exempted security" under Section 3 of the Securities Act or 3(a)(12) of the Exchange Act. Foreign government bonds generally are not exempted securities under either of these sections. Section 3(a)(12) also provides, however, that the term "exempted security" includes

> * * * such other securities * * * as the Commission may, by such rules and regulations as it deems consistent with the public interest and the protection of investors, either unconditionally or upon specified terms and conditions or for stated periods, exempt from the operation of any one or more provisions of this title which by their terms do not apply to an "exempted security" or to "exempted securities."

Therefore, the Commission may exclude gilt or Canadian bond futures from the proscription in the CEA's new Section 2(a)(1)(B)(v) by declaring, subject to whatever limitations appropriate, that the underlying bond is "exempt from the operation of any one or more provisions of [the Exchange Act] which by their terms do not apply to an 'exempted security' or to 'exempted securities.'"

B. Legislative History of Section 2(a)(1)(B)(v)

The effect of the CEA's new language on foreign government security futures traded on foreign boards of trade was specifically addressed when Congress was considering the Futures Trading Act. Representatives Timothy Wirth and Tom Daschle, both members of House committees which had deliberated on the bill, discussed the question on the House floor, in the context of gilt futures. Mr. Daschle raised the problem, noting his understanding that neither the Securities and Exchange Commission ("SEC") nor the Commodity Futures Trading Commission ("CFTC"), which had jointly proposed the provision in question as part of the SEC/CFTC Jurisdictional Accord, had intended to bar gilt futures trading. Mr. Wirth agreed that the provision had not been intended to bar gilt futures trading, but pointed out that a clarifying amendment would be unnecessary in view of the SEC's intention to take administrative action to allow the sale of these futures contracts in this country. [3] The Commission is proposing this action today consistent with this Congressional intent. While futures on Canadian government bonds and bills were not specifically addressed in the legislative history, there does not appear to be any legal or policy basis for treating them differently from the gilt futures contracts.

II. Discussion

The Commission's present opinion is that the proposed rule would be

---

[1] The Futures Trading Act of 1982, Pub. L. 97-444.

[2] "Gilt-edged" generally refers to a variety of obligations of the British government, British local authorities, British nationalized industries, and Commonwealth central governments and corporations. The references in the legislative history, however, were specifically to the long-term British government bonds on which futures currently trade. While the references hereinafter to "gilts" include only obligations of the British government, the proposed rule includes no limitation as to the term of the debt instrument.

[3] Congressional Record, H. 7492 (daily ed., September 23, 1982). *See also* letter of Chairman John S. R. Shad to Senator David L. Boren, attaching memorandum of June 2, 1982 from SEC General Counsel to Chairman Shad; letter of Chairman Phillip McB. Johnson to Senator Boren (June 3, 1982). The CEA section 2(a)(1)(B)(v) was to be designated section 2(a)(1)(B)(iv) at the time these letters were written.

desirable both to remove any question regarding the applicability of the Exchange Act to futures on the subject foreign securities and to avert the unnecessary application of the statutory ban contained in the CEA to trading futures in these securities.

The Commission does not believe generally that its regulatory responsibilities in administering the federal securities laws would be undermined by the sale in the United States of futures contracts based on the foreign debt instruments in question. Congress has delegated to the CFTC the role of establishing the proper regulation required for futures contracts sold in this country, including foreign futures contracts. Accordingly, the Commission proposes to implement the Congressional intent to exempt gilt futures from the prohibition in Section 2(a)(1)(B)(v) of the CEA. At the same time, the Commission does not believe the basic treatment of foreign debt securities under the federal securities laws should be altered simply because a foreign board of trade intends to trade futures on those securities. Given the turbulence characterizing the current international financial markets, particularly the debt structure of many foreign governments, any lessening of the disclosure and other protections afforded by the federal securities laws with respect to such instruments would appear to be inappropriate.

To accommodate these competing interests, the proposed rule would treat British gilts and Canadian government securities as exempted securities only for the purpose of futures trading on those securities, and subject to certain limitations designed to ensure that futures trading not serve as a way of effectively marketing the underlying securities themselves in the United States.

A. Proposed Limitations

1. *Application to Unregistered Securities.* The rule would define as exempted securities only underlying securities that are not registered in the United States. The prohibition in Section 2(a)(1)(B)(v) was added to the CEA to ensure that trading in futures on individual non-exempt securities did not disrupt the underlying regulated markets for those securities. There appears to be no basis for not applying this prohibition to all securities registered under the Securities Act, including securities issued by foreign governments.[4]

2. *Application to Futures Contracts with No More than One Delivery Month Per Quarter.* As noted above, the Commission does not believe the regulation of foreign government debt securities should change because a foreign board of trade seeks to trade futures on those securities. However, because a futures contract on a foreign government security is a contract to buy or sell that security for future delivery, the Commission believes it is important to ensure that futures trading not serve as a vehicle for effectively marketing the underlying instrument in this country without registration. This arguably could occur if futures contracts generally were made available calling for very near-term deliveries. To address this problem, the Commission has proposed to limit the exemption to foreign futures contracts that do not have more than one delivery month per calendar quarter. This would not result in any restrictions on either the British or Canadian government security futures contracts currently traded, since the Commission understands that these contracts currently provide for the introduction of new delivery months every three months. It would, however, prevent a foreign board of trade from introducing futures on foreign government securities with so close a succession of delivery periods as to provide almost continuous cash market equivalency.[5]

B. Additional Issues

The two limitations discussed above are designed to ensure that the scheme of regulation under the federal securities laws is not disrupted by the proposed exemption. The Commission also seeks comment on whether additional measures are necessary or appropriate in connection with the proposed rule.

1. *Disclosure Requirements.* The fact that a foreign government issue is not registered in the United States may result in the dissemination of substantially less information to the public regarding that security and related futures contracts that is the case for registered securities and derivative products. The Commission invites discussion on whether further safeguards may be advisable to address the risk that the futures contract could be used simply as an expedient to evade the disclosure requirements that would apply to direct trading of the underlying security in the cash market. Accordingly, the Commission solicits comments on whether it should condition its exemption on disclosure of certain information concerning the securities underlying foreign futures contracts and the governments issuing those securities.[6]

The CFTC is authorized under the Futures Trading Act of 1982 to adopt rules proscribing fraud and requiring risk disclosure, among other things, in the trading of foreign futures.[7] The Commission notes that the CFTC has not adopted rules specifically addressed to the trading of futures on foreign government securities. Thus, the Commission also seeks comment on whether its proposed rulemaking should await rulemaking initiatives in this area by the CFTC on be undertaken only in coordination with CFTC efforts.

2. *Eligible Foreign Government Issues.* A final question on which the Commission solicits public comment concerns whether to establish limitations on the governments included in the proposed rule. The proposed rule would permit trading solely in futures contracts based on British and Canadian government securities, since the Commission is not aware of other foreign government securities which are currently the subject of futures trading. Should the securities of additional governments become subjects of futures contracts, it may become necessary to

---

[4] While the securities deliverable under the currently traded LIFFE and TSE contracts do not appear to be registered or distributed in the United States, various debt offerings of the British and Canadian governments are indeed registered and traded here. The proposed rule leaves it to persons marketing the future—or to the exchange trading it—to make sure that no U.S.-registered instrument, nor any instrument covered by U.S.-registered American depositary receipts, is deliverable under the futures contract. Moreover, upon the understanding that the LIFFE's current gilt contracts include no U.S.-registered bonds as deliverable issues, both the SEC and CFTC staffs have taken the position that, while the Commission is in the process of promulgating the exemption, the terms of Section 2(a)(1)(B)(v) should not be enforced against offer or acceptance of gilt futures orders in the United States, conduct Congress expected to be exempted from the CEA.

[5] Section 4(b) of the amended CEA, it should be noted, expressly forbids the CFTC to regulate the terms of foreign futures contracts, although the legislative history speaks of the CTFC "certifying" futures based on foreign securities. H.R. Rep. No. 97-565, Part 1, 97th Cong., 2d Sess. (1982) 85.

[6] For example, the Commission might consider a limitation of for the exemption to issuers currently filing a Form 18K in connection with an issue of securities not the subject of a futures contract. The United Kingdom, but not Canada, currently files and 18K.

[7] Section 204 of the Futures Trading Act refers only to regulation of foreign futures trading "by any person located in the United States . . ." Regulation of such trading by persons located outside the United States is not specifically addressed in the CEA itself but is in 17 CFR 30.02, and antifraud rule. The CEA's new Section 12 also allows the CFTC to permit the application of other federal and state statutes to foreign futures. *See* S. Rep. No. 97-384, 97th Cong. 2d Sess. (1982) at 45-46. There is no indication in the legislative history, however, that the CFTC's regulatory authority was intended in any way to restrict the Commission's authority, under Section 3(a)(12) of the Exchange Act, to impose such terms or conditions on the exemption of a security as it deems necessary or approoriate.

consider amending the rule to include those governments. In this regard, the Commission seeks comment on whether it should elaborate standards for inclusion of such governments before adopting any rule. Standards might be adopted, for example, related to the credit-worthiness of the issuing government or, as suggested above, the extent of material information currently available in the United States concerning that government. The Commission also requests comment on the alternative of limiting the exemption on a pilot basis to the securities of only one foreign government until some practical experience with the effect of the exemption has been acquired. As noted above, however, the Commission has not identified any regulatory basis to distinguish between futures traded on British or Canadian government securities. Therefore, any commentators supporting such an amendment should articulate the regulatory or policy basis upon which such a distinction could rest.

Finally, the Commission notes that the two types of futures contracts that would be eligible for trading in the United States by virtue of proposed exemption are both traded on futures exchanges in the country whose government issues the underlying security. Accordingly, both countries would have a strong interest in ensuring the integrity of the futures market. If a futures market in a third country introduced trading on such securities, this interest might not be present. The Commission therefore solicits comment on whether it should limit the proposed rule to foreign futures contracts traded solely on a board of trade located in the country whose government issues the underlying security.

III. Regulatory Flexibility Act Consideration

The Regulatory Flexibility Act, which became effective on January 1, 1981, imposes new procedural steps applicable to agency rulemaking which has a signficant economic impact on a substantial number of small entities.[8] The Chairman of the Commission has certified pursuant to the Regulatory Flexibility Act that proposed Rule 3a12–8, if adopted, would not have a significant economic impact on a substantial number of small entities, for these reasons: First, the rule, being permissive in nature, imposes no regulatory burden in itself, and merely forestalls a prohibition which would otherwise come into being under the Futures Trading Act of 1982. It therefore imposes no new requirements upon nor eliminates former protections for any entity. Second, because the level of interest presently evident in this country in the futures trading covered by the proposed rule is modest, neither the availability nor unavailability of these futures products is likely to have a significant economic impact on a substantial number of small entities.

Statutory Basis

Proposed Rule 3a12–8 would be adopted under the Act, 15 U.S.C. 78a *et seq.*, particularly Sections 3(a)(12) and 23(a), 15 U.S.C. 78c(a)(12) and 78w(a).

List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

IV. Text of the Proposed Amendment

On this basis of the above discussion and analysis, the Commission is proosing to amend Part 240 of Chapter II of Title 17 of the Code of Federal Regulations by adding Section 240.3a12–8 as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

§ 240.3a12–8 Exemption for designated foreign government securities for purposes of futures trading.

(a) When used in this Rule, the following terms shall have the meaning indicated:

(1) The term "foreign futures contracts" shall mean any contracts for the purchase or sale of a commodity for future delivery, as "future delivery" is defined in 7 U.S.C. 2, which are traded exclusively on or through a board of trade, as defined at 7 U.S.C. 2, that is located outside the United States, its territories and possessions, provided that such board of trade neither trades nor establishes on an instrument described in paragraph(a)(2) hereof any such futures contract which settles more frequently than one month per quarter.

(2) When used in this rule, the term "designated foreign government security" shall mean a security not registered under the Securities Act of 1933 nor the subject of any American depositary receipt so registered, and representing a debt obligation of the government of

(i) The United Kingdom of Great Britain and Northern Ireland; or

(ii) Canada.

(b) Any designated foreign government security shall be deemed an "exempted security" for all provisions of the Act which by their terms do not apply to an "exempted security" or "exempted securities," but only insofar as such provisions may be construed to apply to the offer or sale of foreign futures contracts for the purchase or sale of such designated foreign government securities.

(c) This rule shall not be applicable to any designated foreign government security delivered within the United States or any of its possessions or territories pursuant to a foreign futures contract, or pursuant to any other purchase, or sale or exchange, nor to any such security sold or offered for sale in contemplation of delivery within the United States or any of its possessions or territories.

V. Solicitation of Comments

All interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written comments should submit three copies thereof to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, not later than July 5, 1983. Reference should be made to File No. S7–975. All submissions will be made available for public inspection at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C.

By the Commission.

Dated: May 25, 1983.

George A. Fitzsimmons,

Secretary.

Regulatory Flexibility Act Certification

I, John S.R. Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that the proposed rule 3a12–8 to define certain foreign government securities as exempted securities under the Securities Exchange Act of 1934, for purposes of futures trading only, set forth in Securities Exchange Act Release No. 19811 will not have a significant economic impact on a substantial number of small entities, for

[8] Although Section 601(6) of the Regulatory Flexibility Act, 5 U.S.C. 601(6), defines the term "small entity," the statute permits agencies to formulate their own definitions. The Commission has adopted definitions of the term small entity for purposes of Commission rulemaking in accordance with the Regulatory Flexibility Act. Those definitions, as relevant to this proposed rulemaking, are set forth in Rule 0–10, 17 CFR 240.0–10. *See* Securities Exchange Act Release No. 18452 (January 28, 1982). A broker or dealer under Rule 0–10 generally is a "small business" or "small organization" if it had total capital of less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to 17 CFR 240.17a–5(d), or, if not required to file such a statement, if it had total capital of less than $500,000 on the last business day of the preceding fiscal year (or in the time it has been in business, if shorter). *See* Rule 0–01(c). Boards of trade, registered futures commission merchants, and certain orther futures market participants reporting to or registered with the CFTC are not, according to its interpretation, "small entities." *See* 17 CFR 1.3.

these reasons: first, the rule, being permissive in nature, imposes no regulatory burden in itself, and merely forestalls a prohibition which would otherwise come into being under the Futures Trading Act of 1982. It therefore imposes no new requirements upon nor eliminates former protections for any entity. Second, because the level of interest presently evident in this country in the futures trading covered by the proposed rule is modest, neither the availability or unavailability of these futures products is likely to have a significant economic impact on a substantial number of small entities as that term is defined for futures market participants at 17 CFR 1.3 and for broker-dealers in 17 CFR 240.0-10.

Dated: May 19, 1983

John S.R. Shad,

Chairman.

17 CFR Part 240

[Rel. No. 34-19813; File No. S7-976]

Disclosure Regarding Recourse to the Federal Courts Notwithstanding Arbitration Clauses in Broker-Dealer Customer Agreements

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is publishing for comment a proposed rule that would require broker-dealers using pre-dispute arbitration clauses in customer agreements to disclose that investors are not precluded by such clauses from recourse to the federal courts with respect to claims arising under the federal securities laws. The purpose of the proposed rule is to ensure that investors are aware of the availability of this recourse to the federal courts.

DATE: Comments must be received on or before July 15, 1983.

ADDRESS: All communications on this matter should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Comments should refer to File No. S7-976 and will be available for public inspection and copying in the Commission's Public Reference Room.

FOR FURTHER INFORMATION CONTACT: Robert A. Love, Esq., Division of Market Regulation (202-272-2792).

SUPPLEMENTARY INFORMATION: The Commission today announced that it is proposing to prohibit the use in broker-dealer customer agreements of provisions purporting to bind customers to arbitration of future disputes unless accompanied by adequate disclosure that such clauses are not enforceable with respect to claims arising under the federal securities laws. The Commission's proposal would codify its longstanding view that without such disclosure those clauses are inconsistent with the deceptive practice prohibitions of section 10(b) [15 U.S.C. 78j(b)] and section 15(c) [15 U.S.C. 78*o*(c)] of the Securities and Exchange Act of 1934 ("Act") [15 U.S.C. 78a *et seq.*]. This action is consistent with the Commission's continuing strong endorsement of fairly administered arbitration procedures as the most cost effective means of resolving certain disputes between broker-dealers and their customers.

Discussion

The Commission announced on June 9, 1976 [1] a program for the development of a model and uniform system of dispute grievance procedures for the adjudication of small claims. At that time, the Commission also announced the creation of the Commission's Office of Consumer Affairs [2], which has as its principal mandate the study of the resolution of customer disputes with broker-dealers. Subsequently, that Office proposed to the Commission a comprehensive system for the resolution of such disputes, and the Commission solicited public comment.[3] The Commission determined to defer direct action on the system pending the promised development and implementation of an investor dispute resolution system, including a uniform arbitration code, by the securities industry's self-regulatory organizations ("SROs"), their members and members of the public.[4]

In April, 1977, in response to the Commission's public releases and forums on this subject, the Securities Industry Conference on Arbitration ("SICA") was organized. SICA drafted the Uniform Code of Arbitration ("Code"), which has since been adopted by all ten of its SRO members.[5] In approving SRO adoption of the Code, the Commission found, among other things, that the Code was designed to promote just and equitable principles of trade.

The Commission continues to believe that this is an appropriate subject for industry self-regulation, subject to Commission oversight. Furthermore, the Commission continues to support the use of arbitration as an important means for the resolution of disputes between broker-dealers and their customers. The Code provides an economical alternative to litigation and fair and efficient procedures for the resolution of these disputes. Nevertheless, the Commission is concerned with a widespread industry practice which conflicts with legislative history, a thirty-year line of case law, and Commission releases.

Beginning with the Supreme Court's decision in *Wilko v. Swan*, 346 U.S. 427 (1953), courts have consistently held that broker-dealer agreements purporting to bind customers to arbitrate disputes arising in the future are void and unenforceable as applied to claims arising under federal securities laws. accordingly, investors entering into agreements containing such clauses with broker-dealers for the purchase or sale of securities can be deceived into believing that all their disputes with broker-dealers must be settled by arbitration.

The Commission has already discussed at length, in Securities Exchange Act Release No. 15984 (July 2, 1979) ("Release"), its views concerning these clauses. In that release, the Commission stated that use of arbitration clauses without adequate disclosure is inconsistent with just and equitable principles of trade and may raise serious questions of compliance with the anti-fraud provisions of the federal securities law.[6] The release was

[4] Securities and Exchange Act Release No. 13470 (April 20, 1977), 42 FR 23892 (May 11, 1977).

[5] Those SROs (in order of adoption of the Code) are the New York Stock Exchange, Inc.; Cincinnati Stock Exchange, Inc.; American Stock Exchange, Inc.; Midwest Stock Exchange, Inc.; Municipal Securities Rulemaking Board; Chicago Board Options Exchange, Inc.; Boston Stock Exchange, Inc.; Pacific Stock Exchange, Inc.; National Association of Securities Dealers, Inc.; and Philadelphia Stock Exchange, Inc.

[6] This reasoning by the Commission was not novel. In 1951, the Commission released an opinion by its General Counsel concerning the use of "hedge clauses" by brokers, dealers, investment advisers and others who sought thereby to avoid liability for a representation which they knew, or in the exercise of reasonable care could have discovered, to be false and misleading. The courts had repeatedly struck down such clauses. See Investment Advisers Act Release No. 58 (April 10, 1951). The position expressed in Release No. 58 was as follows:

> All the statutes administered by the Commission provide that any condition, stipulation or provision which binds any person to waive compliance with their requirements shall be void . . . . The question arises, therefore, whether the result, if not the purpose, of such a legend is to create in the mind of the investor a belief that he has given up legal rights and is foreclosed from a remedy which he might otherwise have . . . under the SEC statutes.
>
> In my opinion, the antifraud provisions of the SEC statutes are violated by the employment of any . . .

intended to bring to SRO and industry attention the inadequacy of arbitration clause disclosure in order that defective provisions would be promptly cured.[7]

The Commission has found that there continues to be widespread use of arbitration clauses inconsistent with the views expressed in the Release and relevant case law. Many broker-dealers continue to employ these clauses in their customer agreements and to impede investor recourse to the federal court system by seeking to compel arbitration of causes of action arising under the federal secruities laws based upon such clauses. Therefore, the Commission has determined that it is necessary and appropriate for the protection of investors to propose this rule 15c2–2 [17 CFR 240.15c2–2] under the Act.

Paragraph (a) of the proposed rule embodies the general prohibition that broker-dealers' customer agreements may not contain clauses that purport to bind customers to the arbitration of future disputes arising under the federal securities laws.[8]

Paragraph (b) makes clear that the use of general arbitration clauses in customer agreements is not prohibited by the rule so long as such clauses also clearly disclose that investors are not precluded from recourse to the federal courts with respect to claims arising under the federal securities laws. In this regard, language currently appearing in some broker-dealers' customs agreement forms, such as "unless unenforceable due to state or federal law." or "to the extent consistent with state or federal law" are inadequate with respect to the concerns addressed by the Commission in this release and rule. Such language does not with sufficient clarity and specificity address the issue of recourse to the federal courts for claims arising under the federal securities law and, accordingly, would not satisfy paragraph (b) of the rule.

Under paragraph (c) of the proposed rule, until April 1, 1984, brokers and dealers are permitted to enter into new agreements with customers using existing supplies of preprinted forms that otherwise would violate paragraphs (a) and (b) of the rule, provided that adequate written disclosure accompany such agreements. The Commission finds that this course is appropriate for the protection of investors while at the same time avoiding any unnecessary cost to brokers or dealers in the replacement of existing supplies of customer agreements.

In addition, paragraph (d) provides that broker-dealers may cure outstanding customer agreements which do not comply with paragraphs (a) or (b) by sending to customers prior to January 15, 1984, the disclosure required by paragraph (b) the rule. The rule would not require that such agreements be reexecuted. Paragraph (d) also defines "customer" for the purposes of that paragraph.

Today's action continues the Commission's strong support for the arbitration system established by the Code for the securities industry while reinforcing Congressional determination that public investors should also have available the special protection of the federal courts for resolution of disputes arising under the federal securities laws. Existing law prohibits contractual waiver of that protection.

Regulatory Flexibility Act Certification

Pursuant to 5 U.S.C. 605(b), the Chairman has certified that the proposed rule would not, if promulgated, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to the release.

List of Subjects in 17 CFR Part 240

Reporting requirements, Securities.

Text of Proposed Rule

In accordance with the foregoing, it is proposed to amend Part 240 of Chapter II of Title 17 of the Code of Federal Regulations by adding § 240.15c2–2 to read as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

§ 240.15c2–2 Disclosure regarding recourse to the federal courts notwithstanding arbitration clauses in broker-dealer customer agreements.

(a) It shall be a fraudulent, manipulative or deceptive act or practice for a broker or dealer to enter into an agreement with any customer which purports to bind the customer to the arbitration of future disputes between them arising under the federal securities laws, or to have in effect such an agreement pursuant to which it effects transactions with or for a customer.

(b) Notwithstanding paragraph (a) of this section, it shall not be afraudulent, manipulative or deceptive act or practice for a broker or dealer to have in effect an agreement with any customer pursuant to which it effects transactions with or for that customer, which provides for the arbitration of future disputes between them, or to enter into such an agreement, if that agreement discloses: "Arbitration cannot be compelled with respect to disputes arising under the federal securities laws."

(c) Notwithstanding paragraphs (a) and (b) of this section, until April 1, 1984 a broker or dealer may use existing supplies of customer agreement forms if all such agreements entered into with customers after [effective date] are accompanied by the separate written disclosure prescribed in paragraph (b) of this section.

(d) A broker or dealer shall not be in violation of paragraphs (a) or (b) of this section with respect to an agreement entered into with a customer prior to [effective date] if the customer who has entered into such agreement with the broker or dealer is sent, no later than January 15, 1984, the disclosure prescribed in paragraph (b) of this section. For purposes of this paragraph (d), the term "customer" shall be any person (other than a broker or dealer) for whom the broker or dealer after January 1, 1983 (1) carries a free credit balance, or (2) holds securities for safekeeping, or (3) has effected a securities transaction.

Statutory Authority

The Securities and Exchange Commission, acting pursuant to the Act, and particularly sections 2, 10, 15, 23 and 29 thereof [15 U.S.C. 78b, 78j, 78o, 78w and 78cc], hereby proposes for adoption § 240.15c2–2. The Commission finds that there will be no burden upon competition imposed by the amendments.

By the Commission.

George A. Fitzsimmons,

Secretary.

May 26, 1983.

---

provision which is likely to lead an investor to believe that he has in any way waived any right of action he may have, assuming, of course, that the mails or other jurisdictional elements are involved. I refer to Section 10(b) of the Securities Exchange Act of 1934 and Rule [10b–5] thereunder, Section 15(c)(1) of that Act and Rule [15c1–2] thereunder . . .

[7] The legislative history of the Securities Acts Amendments of 1975 indicates that the Congress, during an extensive review of the federal securities laws, was aware of and intended to preserve the case law developed regarding the effect of arbitration clauses. A Conference Committee Report stated: "It was the clear understanding of the Conferees that this amendment [Section 28(b) of the Securities Exchange Act of 1934] did not change existing law, as articulated in *Wilko v. Swan*, 346 U.S. 427 (1953), concerning the effect of arbitration proceeding provisions in agreements entered into by persons dealing with members and participants of self-regulatory organizations." H.R. Rep. No. 229, 94 Cong., 1st Sess. 111 (1975). *See also* 15B(b)(2) (D).

[8] The Commission notes that the proposed rule is not intended to change existing law with respect to contractual agreements for the resolution by arbitration of international, commercial disputes. *See, e.g., Scherk v. Alberto-Culver Co.*, 417 U.S. 506 (1974).

Securities and Exchange Commission Regulatory Flexibility Act Certification

I, John S. R. Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed rule to require broker-dealers using pre-dispute arbitration clauses in customer agreements to disclose that investors are not precluded by such clauses from recourse to the federal courts with respect to claims arising under the federal securities laws, set forth in Securities Exchange Act of 1934 Release No. 19813, if promulgated, will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that the costs engendered by this rule should be minimal. Although, the rule would require a small change on the customer agreement forms of many broker-dealers, it also allows broker-dealers to continue to use existing supplies of forms for approximately nine months subsequent to the effective date of the rule, if coupled with the necessary disclosure on a separate paper. In that way, the costs of this change should be limited essentially to having printers change two or three lines on the broker-dealers next set of forms. In addition, the cost of including these few sentences of disclosure in a regularly scheduled mailing to existing customers should not significantly effect any broker-dealer.

Dated: May 26, 1983.

John S. R. Shad,

Chairman.

BILLING CODE 8010-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-193]

High-Cost Gas Produced From Tight Formations; Louisiana-10

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendations of the State of Louisiana Office of Conservation that the Mid Cockfield Sand, in St. Landry Parish, Louisiana, be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 11, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 13, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Walter W. Lawson, (202) 357-8556.

SUPPLEMENTARY INFORMATION:

Issued: May 27, 1983.

I. Background

On March 24, 1983, the State of Louisiana Office of Conservation (Louisiana) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Mid Cockfield Sand, underlying parts of the Krotz Springs Field in St. Landry Parish, Louisiana, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determined whether Louisiana's recommendation that the Mid Cockfield Sand be designated a tight formation should be adopted. Louisiana's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Louisiana recommends that the Mid Cockfield Sand, underlying parts of the Krotz Springs Field in St. Landry Parish, Louisiana, be designated as a tight formation. The recommended area includes all or parts of Township 6 South, Range 7 East, Sections 12, 13, 14, and 19 through 24; Township 7 South, Range 7 East, Sections 5 and 6; Township 6 South, Range 6 East, Sections 24, 25, 26, 35 and 36; and Township 7 South, Range 6 East, Section 1.

The Mid Cockfield Sand is a very shalely, glauconitic, calcareous sandstone. It is in the upper part of the Claiborne Group of the Eocene Series which underlies the Jackson Group and overlies the Cook Mountain and Sparta Formations.

In a typical well log for the area, the Gulf Oil Corporation KZS SU KU No. 51 well located in Section 20, Township 6 South, Range 7 East, the Mid Cockfield Sand is defined as that vertical interval found between the electric log depths of 10,670 feet and 10,740 feet, having a thickness of 70 feet. This well is located on the eastern flank of a large domal structure and is the only well currently producing from the Mid Cockfield Sand in the recommended area.

III. Discussion of Recommendation

Louisiana claims in its submission that evidence gathered through information and testimony presented at a public hearing on February 23, 1983, convened by Louisiana on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized product rate, against atmosphere pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Louisiana further asserts that existing requirements of Statewide Order No. 29-B will assure that development of the formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Louisiana that the Mid Cockfield Sand as described and delineated in Lousiana's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North

Capitol Street, N.E., Washington, D.C. 20426, on or before July 11, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–193 (Louisiana–10), and should give reasons, including supporting data, for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 13, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Louisiana's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(179) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(129) through (178) [Reserved].

(179) *Mid Cockfield Sand in Louisiana.* RM79–76 (Louisiana–10)

(i) *Delineation of formation.* The Mid Cockfield Sand is found in the Krotz Springs Field in St. Landry Parish, Louisiana. The area includes all or parts of Township 6 South, Range 7 East, Sections 12, 13, 14, and 19 through 24; Township 7 South, Range 7 East, Sections 5 and 6; Township 6 South, Range 6 East, Sections 24, 25, 26, 35 and 36; and Township 7 South, Range 6 East, Section 1.

(B) *Depth.* The depth to the top of the Mid Cockfield Sand is found at 10,670 feet and the base at 10,740 feet (log depths) on a type log located on the eastern flank of a large domal structure, the Gulf Oil Corporation KZS SU KU No. 51 well located in Section 20, Township 6 South, Range 7 East. On the top of the structure in Section 21, Township 6 South, Range 7 East, the top of the Mid Cockfield Sand is at an approximate log depth of 10,410 feet. Approximate thickness of the sand is 70 feet.

[Docket No. RM79–76–196]

High-Cost Gas Produced From Tight Formations; Texas—9 Addition V

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Travis Peak Formation in Panola and Rusk Counties, Texas, be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 11, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 13, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Walter W. Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

Issued: May 27, 1983.

I. Background

On April 11, 1983, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Travis Peak Formation located in Panola and Rusk Counties, Texas, be designated as a tight formation. The Commission previously adopted recommendations that portions of the Travis Peak Formation in the Sym-Jac, West (Hosston) Field (Order No. 154 issued June 10, 1981, in Docket No. RM79–76 (Texas—9)) and the Bear Grass Area of east Texas (Order No. 180 issued October 8, 1981, in Docket No. RM79–76 (Texas—9 Addition)) be designated as tight formations. There are currently under consideration the following recommendations that additional areas of the Travis Peak Formation be designated as tight formations: all of Texas Railroad Commission Districts 5 and 6 in Docket No. RM79–76 (Texas—9 Addition II), the Melrose, South (Travis Peak) Field in Docket No. RM79–76–171 (Texas—9 Addition III) and the Martinsville (Travis Peak) Field in Docket No. RM79–76–190 (Texas—9 Addition IV), Notices of Proposed Rulemaking issued December 15, 1981, March 14, 1983, and April 28, 1983, respectively. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that an additional area of the Travis Peak be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas' recommended addition to the Travis Peak Formation is located in East Texas in the Pinehill, S.E. (Travis Peak) Field which straddles the Panola-Rusk County line, Texas Railroad Commission District 6. The area, which is 2 miles southeast of the town of Pinehill, Texas, contains approximately 4,000 acres and includes the following surveys: S. Alred A–12 and A–29, H. Biggs A–65, E. Blackburn A–63, I. Collier A–130, J. T. Copeland A–874, G. Fish A–281, R. Flores A–198, A. B. Handley A–303, S. Harris A–300, H. Howeth A–320 and A–389, J. W. Howeth A–381, T. Howeth A–383, W. Howeth A–380, M. Kuykendall A–383, J. Leath A–414 and A–486, C. Lindsey A–387, J. McAdams

A–422 and A–436, C. McCormick A–453, G.B. Reed A–577 and A–579, K. A. Sandlin A–734 J. Story A–801, R. Tippit A–773, B. A. Vansickle A–696 and A–798, R. White A–733, S. Willis A–718, and J. Wilson A–725.

The top of the Travis Peak Formation which dips westward at approximately 50 feet per mile is encountered at depths ranging from 6,900 to 7,000 feet, with the base occurring at 8,100 to 8,200 feet, in the recommended area.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing on August 19, 1982, convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing state and federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Travis Peak Formation as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 925 North Capitol Street, N.E., Washington, D.C. 20426, on or before July 11, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–196 (Texas—9 Addition V), and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 13, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, *Code of Federal Regulations* as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(36)(v) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(36) *Travis Peak Formation in Texas. RM79–76 (Texas—9)*

* * * * *

(v) *Pinehill, S.E. (Travis Peak) Field.*

(A) *Delineation of formation.* The designated portion of the Travis Peak Formation is located 2 miles southeast of the town of Pinehill, in Panola and Rusk Counties in East Texas, Texas Railroad Commission District 6 and includes the following surveys: S. Alred A–12 and A–29, H. Biggs A–65, E. Blackburn A–93, I. Collier A–130, J. T. Copeland A–874, G. Fisk A–281, R. Flores A–198, A. E. Handley A–303, S. Harris A–300, H. Howeth A–320 and A–389, J. W. Howeth A–381, T. Howeth A–383, W. Howeth A–380, M. Kuykendall A–383, J. Leath A–414 and A–486, C. Lindsey A–387, J. McAdams A–422 and A–436, C. McCormick A–453, G.B. Reed A–577 and A–579, K. A. Sandlin A–734, J. Story A–801, R. Tippit A–773, B. A. Vansickle A–696 and A–798, R. White A–733, S. Willis A–718, and J. Wilson A–725.

(B) *Depth.* The depth to the top of the Travis Peak Formation which dips westward at approximately 50 feet per mile ranges from 6,900 to 7,000 feet with the base occurring at 8,100 to 8,200 feet.

[Docket No. RM79–76–189]

High-Cost Gas Produced From Tight Formations; Wyoming—16

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designations as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Wyoming that the Muddy, Lakota, Morrison, and Sundance Formations each be designated a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 11, 1983.

Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 13, 1983.

ADDRESS: Comments and requests for hearing must be filed with Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Victor Zabel, (202) 357–8616.

SUPPLEMENTARY INFORMATION:

Issued: May 27, 1983.

I. Background

On March 10, 1983, the State of Wyoming Oil and Gas Conservation

Commission (Wyoming) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Muddy, Lakota, Morrison, and Sundance Formations located in Natrona County, Wyoming, each be designated a tight formation. Pursuant to § 271.703(c)(4) of the regulations, the Director of the Office of Pipeline and Producer Regulation (Director, OPPR) issues this Notice of Proposed Rulemaking to determine whether Wyoming's recommendation that these formations each be designated a tight formation should be adopted. The United States Department of the Interior, Bureau of Land Management concurs with Wyoming's recommendation. Wyoming's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formations are located in Natrona County, Wyoming, between the cities of Waltman and Powder River. The recommended area in the Bull Frog Unit, which comprises approximately 24,400 acrea on the southeastern flank of the Wind River Basin adjacent to the Casper Arch. The Muddy Formation averages 75 feet in thickness and is found at an average depth of 19,800 feet within the Bull Frog Unit Area. The Lakota Formation averages 60 feet in thickness and is found at an average depth of 20,020 feet. The Morrison Formation averages 200 feet in thickness and is found at an average depth of 20,100 feet. The Sundance Formation averages 330 feet in thickness and is found at an average dept of 20,300 feet.

III. Discussion of Recommendation

This filing is made pursuant to the alternative designation requirements found at § 271.703(c)(2)(ii) of the Commission's regulations, which provide that the Commission may approve a recommendation by a jurisdictional agency to designate as a tight formation any formation which meets the stabilized production rate guideline found in § 271.703(c)(2)(i)(B) and the crude oil production guideline in § 271.703(c)(2)(i)(C), but does not meet the permeability guideline in § 271.703(c)(2)(i)(A), if the jurisdictional agency shows that the formation exhibits low permeability characteristics and that the incentive price is necessary to provide reasonable incentives for production from the formation. Wyoming claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. 1, Order No. 1, Docket No. 236-81 convened by Wyoming on this matter demonstrates that:

(1) The recommended formations exhibit low permeability characteristics, and the price established in section 271.703(a) is necessary to provide reasonable incentives for production of gas from the recommended formation;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formations, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formations is expected to produce more than five (5) barrels of oil per day.

Wyoming further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 *F.R.* 53456, August 12, 1980), notice is hereby given of the proposal submitted by Wyoming that the Muddy, Lakota, Morrison, and Sundance Formations, as described and delineated in Wyoming's recommendation as filed with the Commission, each be designated a tight formation pursuant to § 271.703.

The Director, OPPR, notes that this recommendation raises two significant issues. First, it is a recommendation received under the alternative requirements found in § 271.703(c)(2)(ii). Under this alternative approach, the Commission must decide whether Wyoming has made an adequate showing both that the recommended area exhibits low permeability characteristics and that the tight formation incentive price [1] is necessary to provide reasonable incentives for production of the natural gas from the recommended formation due to the extraordinary costs associated with such production.

The other issue in this case (which is an issue raised for the first time in a tight formation proceeding) is whether the Commission should designate as tight a formation which is located entirely below 15,000 feet. This question is raised since most gas produced from such depths qualifies under NGPA section 107(c)(1) and thus is already price decontrolled pursuant to NGPA section 121. Therefore, the purpose in designating a formation, which is deeper than 15,000 feet, as a tight formation is to permit wells drilled before February 19, 1977, to qualify as "recompletion tight formation gas" under § 271.703(b)(3) of the regulations, since gas from these wells would not qualify for a deregulated price under section 107(c)(1). The only two wells within the recommended area which penetrate the recommended formations were both spudded after February 19, 1977, and therefore could qualify under section 107(c)(1) of the NGPA. The record also shows that some pre-1977 wells were drilled on the surface acreage within the recommended area, but that none of these wells were drilled deeper than 12,350 feet, with most of the wells ranging in depths from 5,000 to 8,000 feet. [2] It appears unlikely that any of these pre-1977 wells will be deepened to the recommended formations because to do so would contravene sound engineering practices. The Director, OPPR, therefore questions the necessity of designating the formations as tight formations, since the gas produced from such formations will already be price-decontrolled.

Wyoming, in its transmittal letter to the Commission, as well as in certain statements in the transcript of the hearing convened by Wyoming in this case, indicated that the purpose of designating the formations as tight formations is to resolve a contractual pricing problem which exists for sales of gas produced from the recommended formations. The Director, OPPR, questions whether this is adequate justification for considering designation of the formations as tight formations, and requests comments on this view.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before July 11, 1983. Each

[1] A Notice of Proposed Rulemaking was issued in Docket No. RM82-32-000 on February 10, 1983, which, if adopted, would set the tight formation gas incentive price at the lesser of an imputed commodity value based on the price of alternative fuels or 200% of the section 103 maximum lawful price.

[2] Gas produced from these wells, if deepened and completed in the recommended formation, could qualify as recompletion tight formation gas if the wells satisfy the requirements of § 271.703(b)(3) of the regulations pertaining to the date of completion of the well into the designated tight formation. These wells, even if completed below 15,000 feet, would not qualify under section 107(c)(1) because the wells were initially spudded prior to February 19, 1977.

person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–189 (Wyoming—16), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 13, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Wyoming's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraphs (d)(172) through (175) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(126) through (171) [Reserved]

(172) *Muddy Formation in Wyoming.* RM79–189 (Wyoming—16).

(i) *Delineation of formation.* The Muddy Formation is located in Natrona County, Wyoming, in Township 36 North, Range 86 West, 6th P.M., Sections 4 through 9, Sections 15 through 22, and Sections 28 through 30; Township 36 North, Range 87 West, 6th P.M., Sections 1 through 3, Sections 11 through 14, NE¼ of Section 23, and N½, N½ S½ of Section 24; Township 37 North, 86 West, 6th P.M., Sections 19, 20, and 28 through 33; Township 37 North, Range 87 West, 6th P.M., Sections 23 through 26, and Sections 35 and 36.

(ii) *Depth.* The vertical limits of the Muddy Formation are defined as the Mowry Shale above, and the Thermopolis Shale below. The average depth to the top of the formation is 19,800 feet.

(173) *Lakota Formation in Wyoming.* RM79–76–189 (Wyoming—16).

(i) *Delineation of formation.* The Lakota Formation is located in Natrona County, Wyoming, in Township 36 North, Range 86 West, 6th P.M., Sections 4 through 9, Sections 15 through 22, and Sections 28 through 30; Township 36 North, Range 87 West, 6th P.M., Sections 1 through 3, Sections 11 through 14, NE¼ of Section 23, and N½, N½ S½ of Section 24; Township 37 North, 86 West, 6th P.M., Sections 19, 20, and 28 through 33; Township 37 North, Range 87 West, 6th P.M., Sections 23 through 26, and Sections 35 and 36.

(ii) *Depth.* The vertical limits of the Lakota Formation are defined as the Thermopolis Shale above, and the Morrison Shale below. The average depth to the top of the formation is 20,020 feet.

(174) *Morrison Formation in Wyoming.* RM79–76–189 (Wyoming—16).

(i) *Delineation of formation.* The Morrison Formation is located in Natrona County, Wyoming, in Township 36 North, Range 86 West, 6th P.M., Sections 4 through 9, Sections 15 through 22, and Sections 28 through 30; Township 36 North, Range 87 West, 6th P.M., Sections 1 through 3, Sections 11 through 14, NE¼ of Section 23, and N½, N½ S½ of Section 24; Township 37 North, 86 West, 6th P.M., Sections 19, 20, and 28 through 33; Township 37 North, Range 87 West, 6th P.M., Sections 23 through 26, and Sections 35 and 36.

(ii) *Depth.* The vertical limits of the Morrison Formation are defined as the Lakota Shale above, and the Sundance Shale below. The average depth to the top of the formation is 20,100 feet.

(175) *Sundance Formation in Wyoming.* RM79–76–189 (Wyoming—16).

(i) *Delineation of formation.* The Sundance Formation is located in Natrona County, Wyoming, in Township 36 North, Range 86 West, 6th P.M., Sections 4 through 9, Sections 15 through 22, and Sections 28 through 30; Township 36 North, Range 87 West, 6th P.M., Sections 1 through 3, Sections 11 through 14, NE¼ of Section 23, and N½, N½ S½ of Section 24; Township 37 North, 86 West, 6th P.M., Sections 19, 20, and 28 through 33; Township 37 North, Range 87 West, 6th P.M., Sections 23 through 26, and Sections 35 and 36.

(ii) *Depth.* The vertical limits of the Sundance Formation are defined as the Morrison Shale above, and the Triassic Shale below. The average depth to the top of the formation is 20,300 feet.

BILLING CODE 6717–01–M

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

25 CFR Part 700

Commissions Operations and Relocation Procedures; Hopi Reservation Evictees

AGENCY: Navajo and Hopi Indian Relocation Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes adoption of rules to implement 25 U.S.C. 640d–14, Pub. L. 96–305, the Navajo and Hopi Indian Relocation Amendments Act of 1980, to provide for the relocation of members of the Navajo Tribe who were evicted from the Hopi Indian Reservation as a consequence of the decision in the case of *United States vs. Kabinto* (456 F. 2d 1087 (1972). This action is necessary because the Commission's existing regulation do not address the unique situation of those families who were evicted from the Hopi Indian Reservation. The intended effect of this action is to establish regulations which will provide certainty in the determination of which families are eligible to receive benefits and the nature of benefits they are to receive and to allow the Commission to move forward to provide benefits to those families impacted by the law.

DATE: Comments must be received by July 5, 1983.

ADDRESS: Comments may be sent to Navajo and Hopi Indian Relocation Commission, P.O. Box KK, Flagstaff, Arizona, 86002.

FOR FURTHER INFORMATION CONTACT: Paul M. Tessler, CFR Liaison Officer, Navajo and Hopi Indian Relocation Commission, P.O. Box KK, Flagstaff, AZ, 86002, Telephone (602) 572–7356, FTS: 765–7350.

The principal author of this proposed rulemaking is E. Susan Crystal, Attorney at Law, of the Navajo and Hopi Indian Relocation Commission.

SUPPLEMENTARY INFORMATION: Section 700.601 of the proposed rule provides for definitions of Hopi reservation evictees and head of household. An evictee is a head of household who was evicted as a consequence of the court decision in *United States v. Kabinto.* This language

is consistent with the language of the Navajo and Hopi Indian Relocation Commission Amendments Act of 1980. The head of household definition requires that a person had to be a head of household as of November 10, 1972. Individuals who were 18 or older and self-supporting as of that date are considered heads of household.

Section 700.603 of the proposed rule provides that heads of household who were physically residing on the Hopi resevation on November 10, 1972 shall be eligible. If the head of household was absent for education, employment, military service or medical treatment, he/she may still be considered eligible if his/her spouse and/or immediate family were physically residing on the Hopi reservation as of November 10, 1972. Proof of physical residence will be determined by inclusion on various lists complied by the Navajo Tribe and the BIA. Since the eviction occurred eleven years ago, it may be difficult to prove residence as of that time. A section has been included to allow an applicant to provide any relevant information to prove physical residence.

The replacement housing payments (§ 700.605) will be consistent with the regulatory scheme provided for those moving off the Hopi Partitioned Lands. If the head of household owns no dwelling, the Commission will purchase or construct a home. If he/she owns or is buying a home, the Commission will pay off the mortage or fix up the home so it meets the Commission's decent, safe and sanitary standards. If the Commission determines that the house can not be brought up to these standards, it has the discretion to acquire a replacement dwelling. If the home is decent, safe and sanitary and owned free and clear, no replacement home will be provided.

Many of the Hopi reservation evictees were provided housing by other federal agencies. The Commission will inspect that home and expend whatever is necessary up to the maximum replacement housing benefit to assure the home meets decent, safe and sanitary standards.

Those individuals who moved from the Hopi reservation to the Hopi partitioned lands and who are eligible to receive benefits under Subpart A–H of these regulation shall not be eligible under this subpart. Appeals and hearings will be handled under Subpart L of the existing regulations.

List of Subjects in 25 CFR Part 700

Administrative practice and procedure, Conflict of interests, Freedom of information, Grant program-Indians, Indians-claims, Privacy, Real property acquisition, Relocation assistance.

PART 700—[AMENDED]

Accordingly, the Commission proposes to issue a new subpart to Part 700 to read as follows:

Subpart P—Hopi Reservation Evictees

Sec.
700.601 Definitions.
700.603 Eligibility.
700.605 Replacement housing payments.
700.607 Dual eligibility.
700.609 Appeals.

Authority: 25 U.S.C. 640d, Pub. L. 93–531, 25 U.S.C. 640d–14, Pub. L. 96–305.

Subpart P—Hopi Reservation Evictees

§ 700.601 Definitions.

(a) Hopi reservation evictees. Hopi reservation evictees are those heads of household of members of the Navajo Tribe who were eyicted from the Hopi Indian Reservation as a consequence of the decision in the case of *United States v. Kabinto* (456 F. 2d 1087) (1972).

(b) Head of household. (1) A household is a group of two or more persons who lived together at a specific location, who formed a unit of permanent and domestic character.

(2) The head of household is the individual who speaks on behalf of the members of the household and who is determined by the Commission to represent the household.

(3) In order to be eligible for benefits under this section, an individual must have been a head of household as of November 10, 1972.

(4) Those individuals who were 18 or older as of November 10, 1972 and who were self-supporting at the time shall be considered head of household.

§ 700.603 Eligibility.

(a) Those heads of household who were members of the Navajo Tribe, physically residing on the Hopi reservation on November 10, 1972 shall be eligible to receive relocation assistance. If the head of household was absent for employment, education, military service, medical treatment or incarceration, he/she shall still be considered eligible if his/her spouse and/or immediate family were physically residing on the Hopi reservation as of November 10, 1972.

(b) Proof of physical residence shall be determined by one of the following criteria:

(1) Inclusion on the list of plaintiffs in *United States v. Kabinto* (456 F. 2d 1087) (1972);

(2) Inclusion on the list prepared by the Bureau of Indian Affairs as a result of having provided services to those heads of household;

(3) Inclusion on a list prepared by the Navajo Tribe in 1977;

(4) Inclusion on a list prepared by the Navajo Legal Aid Service dated April 29, 1970;

(5) Other evidence furnished by the applicant which is sufficient to prove residence on the Hopi reservation on November 10, 1972, as determined by the Commission.

§ 700.605 Replacement housing payments.

(a) Each eligible head of household shall be entitled to receive a decent, safe and sanitary replacement dwelling in the following manner:

(1) If the head of household owns no dwelling, the Commission will make funds available to the head of household as provided in these regulations for the acquisition of a replacement home in one of the following manners:

(i) Purchase of an existing home by the head of household,

(ii) Contracting by the head of household for the construction of a home,

(iii) Participation or purchase by the head of household in a mutual help housing or other home ownership project under the U.S. Housing Act of 1937 (50 Stat. 888, as amended; 42 U.S.C. 1401) or in any other federally assisted housing program.

(2) If the eligible head of household owns or is buying or building a home, the Commission will expend relocation benefits in one of the following manners:

(i) If the home is decent, safe and sanitary, but is encumbered by a mortgage, such mortgage existing as of the effective date of these regulations, the Commission may expend replacement housing benefits up to the maximum then existing benefit to accelerate to the maximum extent possible the achievement by that household of debt-free home ownership.

(ii) If the home is owned free and clear but does not meet Commission decent, safe and sanitary standards; or the home is neither owned free and clear, nor is decent, safe and sanitary, the Commission will, at its discretion either:

(A) Expend replacement home benefits for improvements to assure the home meets the Commission's decent, safe and sanitary standards, or

(B) Expend replacement home benefits for the Acquistion of a replacement dwelling as if the eligible head of household or spouse did not own a home as in paragraph (a) of this section.

(3) If the home is decent, safe and sanitary, and is owned free and clear,

no replacement home benefits will be paid.

§ 700.607 Dual eligibility.

Those individuals who moved from the Hopi reservation to the Hopi partitioned lands and who are eligible to receive benefits under the general regulations, shall not qualify for benefits under this subpart.

§ 700.609 Appeals.

Appeals of eligibility, hearings and administrative review (appeals) will be administered under Subpart L of these regulations.

Ralph Watkins,

Chairman, Navajo-Hopi Indian Relocation Commission.

BILLING CODE 7565-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-277-82]

Addition to Tax for a Substantial Understatement of Liability; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the addition to tax to be imposed in the case of a substantial understatement of tax liability. The Tax Equity and Fiscal Responsibility Act of 1982 provides for the addition to tax. The proposed regulations affect all taxpayers subject to the addition to tax, and provide guidance necessary to comply with the provisions.

DATES: The public hearing will be held on Tuesday, July 12, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Tuesday, June 28, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-277-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Lou Ann Craner of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 6661 of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Tuesday, March 15, 1983 (48 FR 10862).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Tuesday, June 28, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Director, Legislation and Regulations Division.

[LR-188-82]

Personal Service Corporations Proposed Income Tax Regulations; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the reallocation of income, deductions, credits, and exclusions between a personal service corporation and its employee-owners if the corporation was formed or availed of primarily to evade or avoid Federal income taxes.

DATES: The public hearing will be held on Tuesday, July 19, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Tuesday, July 5, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-188-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Lou Ann Craner of the Legislation and Regulations Division, Office of Chief Counsel; Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 269A of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Thursday, March 31, 1983 (48 FR 13438).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Tuesday, July 5, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 468]

Pacheco Pass Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area in California to be known as "Pacheco Pass." This proposal is the result of a petition from Mr. H. G. Zanger, a grape grower in the area. The establishment of viticultural areas and the subsequent use of viticultural area names in wine labeling and advertising will enable industry to label wines more precisely, and will help consumers to better identify the wines they purchase.

DATE: Written comments must be received by July 18, 1983.

ADDRESSES: Send written comments to: Chief, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, D.C. 20044-0385 (Notice No. 468)

Copies of the petition, the proposed regulations, the appropriate maps, and the written comments will be available for public inspection during normal business hours at: ATF Reading Room, Office of Public Affairs and Disclosure, Room 4405, Federal Building, 1200 Pennsylvania Avenue NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Steve Simon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, D.C. 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 provide for the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

Part 9 of 27 CFR provides for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map(s) with the boundaries prominently marked.

Petition

ATF has received a petition from Mr. H. G. Zanger of Pacheco Pass Vineyard, proposing an area near Hollister, California, as a viticultural area to be known as "Pacheco Pass." The area extends for a length of about 5 miles and a width of about 1 mile (3200 acres). It is located at the entrance to Pacheco Pass, by the junction of California Routes 152 ("Pacheco Pass Highway") and 156.

There are about 17 acres of grapes currently planted in the proposed area, and one bonded wine cellar is operating. The petitioner stated that he plans to construct a winery and to plant up to 600 additional acres of grapes on land that he currently owns in the area.

The petitioner claims that the proposed viticultural area is known by the name of Pacheco Pass" and is associated with grape growing for the following reasons:

(a) The name of the area derives from Don Francisco Pacheco, who in 1833 received a large land grant from the Mexican Government. The name of the land grant was "Rancho Pacheco," and the nearby pass over the Diablo Range took the name "Pacheco Pass."

(b) Don Pacheco made use of the area's unique microclimate to plant vineyards for his personal use. (This is recounted in Dr. Alfred Shumate's book, "Francisco Pacheco of Pacheco Pass.")

(c) Later settlers continued this tradition. From 1936 to 1952, there was a 70,000 gallon winery operating within the area. At various times during this century, over 100 acres of land in the area have been planted to grapes. However, due to economic conditions, vine disease, and death of the owners, only one vineyard and one bonded wine cellar remain in operation today.

(d) Since 1976, the designation "Pacheco Pass Vineyard" has appeared on certain wine labels from Casa de Fruta. (Casa de Fruta is the bonded wine cellar in the proposed area, and "Pacheco Pass Vineyard" is the name of Casa de Fruta's 17-acre vineyard in the proposed area.)

The petitioner claims that the proposed viticultural area is distinguished from the surrounding areas for the following reasons:

(1) Pacheco Pass is a cut through the Diablo Range and has an approximate total length of 15 miles. The proposed Pacheco Pass viticultural area occupies only the southwestern one-third of that total length, because the rest is unsuitable for viticulture.

(2) The proposed viticultural area is distinguished on the basis of terrain from the surrounding areas to the east and west. The viticultural area is in a valley and generally has flat or gently sloping terrain; whereas to the east and west lie the rugged hills of the Diablo Range. Those hills are too steep for viticulture and are also distinguishable from the proposed viticultural area on the basis of soil types.

(3) As Pacheco Pass rises in elevation northeast of the proposed viticultural area, the soil changes markedly, becoming very shallow and rocky. Therefore, it is not suitable for any kind of cultivation and is used primarily as rangeland. For this reason, it has not been included within the proposed viticultural area even though it is associated with the name "Pacheco Pass." Furthermore, as the pass continues to rise in elevation, the climate changes, becoming wetter and subject to greater temperature extremes; then the pass narrows to where it is almost fully occupied by Pacheco Pass Highway and the shifting stream bed of Pacheco Creek. At this point (near Pacheco Lake) the pass is steep and forested.

(4) To the south, the proposed viticultural area is distinguished from the surrounding area on the basis of soil and climate. Outside the boundaries of the proposed viticultural area, the land is afflicted with high-perched water

tables and boron salts which affect the quality of water. In contrast, the proposed Pacheco Pass viticultural area is free from these defects, having a very good water table and good quality water from Pacheco Creek. Further, the viticultural area has more rainfall than the Hollister Basin to the south, and it enjoys more moderate temperatures due to the passage of winds through Pacheco Pass en route to the San Joaquin Valley.

Daytime temperature in the San Joaquin Valley may be 30° higher than at the ocean; this difference creates a venturi effect, and the air mass moves from the cool of the ocean to the heat of the interior valley, bringing cool breezes to the Pacheco Pass viticultural area. Pacheco Pass is the only pass south of Interstate Highway 580 (Altamont Pass) and north of San Luis Obispo. Consequently, consistently strong winds near the highest elevation Pacheco Pass have led the State of California to construct an experimental wind turbine there for the generation of electricity.

The boundaries of the proposed viticultural area may be found on two U.S.G.S. maps in the 7.5 minute series: San Felipe Quadrangle and Three Sisters Quadrangle. The boundaries are as described in the proposed § 9.88.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities, because the value of the proposed viticultural area designation is intangible and subject to influence by unrelated factors. Further, the proposal will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291 of Feb. 17, 1981, the Bureau has determined that this proposal is not a major rule since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestice or export markets.

Public Participation—Written Comments

ATF requests comments concerning this proposed viticultural area from all interested persons. Furthermore, while this document proposes possible boundaries for the Pacheco Pass viticultural area, comments concerning other possible boundaries for this viticultural area will be given consideration.

Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

ATF will not recognize any material or comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of the person submitting a comment is not exempt from disclosure.

Any person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her request, in writing, to the Director within the 45-day comment period. The request should include reasons why the commenter feels that a public hearing is necessary. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is Steve Simon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Authority

Accordingly, under the authority in 27 U.S.C. 205, the Director proposes the amendement of 27 CFR Part 9 as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9, Subpart C, is revised to add the title of § 9.88. As revised, the table of sections reads as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.88 Pacheco Pass.

Paragraph 2. Subpart C of 27 CFR Part 9 is amended by adding § 9.88, which reads as follows:

§ 9.88 Pacheco Pass.

(a) *Name.* The name of the viticultural area described in this section is "Pacheco Pass."

(b) *Approved maps.* The appropriate maps for determining the boundaries of Pacheco Pass viticultural area are two U.S.G.S. maps. They are titled;

(1) San Felipe Quadrangle, 7.5 minute series, 1955 (photorevised 1971).

(2) Three Sisters Quadrangle, 7.5 minute series, 1954 (photorevised 1971).

(c) *Boundary*—(1) *General.* The Pacheco Pass viticultural area is located in California. The starting point of the following boundary description is the crossing of Pacheco Creek under California Highway 156, about 4 miles north of Hollister Municipal Airport, in San Benito County, California.

(2) *Boundary Description*—(i) From the starting point northwestward along Pacheco Creek to the intersection with the straight-line extension of Barnheisel Road.

Note: This is an old land grant boundary and appears on the U.S.G.S. map as the western boundary of an orchard.

(ii) From there in a straight line northeastward to the intersection of Barnheisel Road and California Highway 156.

(iii) From there northward along Highway 156 to California Highway 152 ("Pacheco Pass Highway").

(iv) Then northward along Pacheco Pass Highway to the 37° latitude line.

(v) Then eastward along that latitude line to the land line R.5E./R.6E.

(vi) Then southward along that land line, crossing Foothill Road, and continuing southward to a point exactly 2,3000 feet south of Foothill Road.

(vii) From there in a straight line to the starting point.

Approved: May 26, 1983.

W. T. Drake,

Acting Director.

BILLING CODE 4810-31-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 901

Proposed Extension of Study on Alabama's Program Provisions Concerning Disposal of Excess Spoil

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule

SUMMARY: OSM is proposing to extend the trial peroid for a study of provisions for the disposal of excess spoil on abandoned mine sites contained in Alabama's conditionally approved program for the regulation of surface coal mining and reclamation operations and the surface effects of underground mining.

The Alabama program was conditionally approved by the Secretary of the Interior on May 20, 1982 (See 47 FR 22030–58). By that notice, the Secretary announced that a one year trial period would be held in order to evaluate the adequacy of Alabama's plan. The one year period expired on May 20, 1983. Because few permit applications requesting to take advantage of Albama's excess spoil plan were received and because the available site-specific data is insufficient, OSM cannot make a meaningful evaluation of the plan within the one year period. On May 19, 1983, OSM received a request from the Alabama Surface Mining Commission that the trial period be extended for three years (AL–378). OSM proposes to extend the trial period for a lesser period (to August 20, 1984), for the reasons set forth in this notice, and invites public comment on the proposed extension.

This document sets forth the times and locations that copies of the Alabama program, the Secretary's notice of conditional approval, and copies of permit applications requesting approval to implement Alabama's excess spoil provisions on specific sites are available for public inspection. This notice also contains the details about the public comment period during which interested persons may submit written comments on the proposed trial period extension, and information pertinent to the public hearing.

DATE: Written comments relating to the proposed extension not received on or before 4:00 p.m. on July 5, 1983, will not necessarily be considered in OSM's decision on whether the trial period will be extended.

If requested, a public hearing will be held on June 27, 1983, beginning at 10:00 a.m. at the location shown under "ADDRESSES."

ADDRESS: Written comments should be mailed or hand-delivered to: Mr. John T. Davis, Director, Birmingham Field Office, Office of Surface Mining, 228 West Valley Avenue, Room 302, Birmingham, Alabama 35209.

If a public hearing is held, its location will be at: OSM Birmingham Field Office, Office of Surface Mining, 228 West Valley Avenue, Room 302, Birmingham, Alabama 35209; Telephone: (205) 254–0890.

FOR FURTHER INFORMATION CONTACT: Mr. John T. Davis, Director, Birmingham Field Office, Office of Surface Mining, 228 West Valley Avenue, Room 302, Birmingham, Alabama; Telephone: (205) 254–0890

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Alabama program, the Secretary's notice conditionally approving the the Alabama program (together with the Secretary's findings), permit applications received to date requesting to implement Alabama's excess spoil plan on a site-specific basis, and a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays

Office of Surface Mining, Room 5315, 1100 L Street, N.W., Washington, D.C. 20240

Office of Surface Mining, 228 West Valley Avenue, Room 302, Birmingham, Alabama 35209.

Alabama Surface Mining Commission, 100 Third Street, Payne, Alabama 35967.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "Dates" or at locations other than Birmingham, Alabama, will not necessarily be considered and included in the Administrative Record for the final rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business three working days before the date of the hearing. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Individual testimony at the hearing will be limited to 15 minutes. Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions for clarification or to request more specific information from the person testifying. The public hearing will continue on the specified date until all persons who have not been scheduled to comment and wish to do so are heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed in "ADDRESSES" or by contacting the person listed under "FOR FURTHER INFORMATION CONTACT."

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made part of the Administrative Record.

II. Background on the Alabama Program and Excess Spoil Provisions

Information regarding the general background on the Alabama State Program, including the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Alabama program can be found in the May 20, 1982, **Federal Register** at 47 FR 22030–58. In that notice, under Finding 18.1 (47 FR 22038–39), the Secretary approved, with certain restrictions, Alabama's plan to allow the disposal of excess spoil generated by current operations on areas which have been previously disturbed but not adequately reclaimed. The provisions of Alabama's plan were set forth at State rule section 805.11. (That section has now been recorded as 880–X–9b–11 under a generic

recodification scheme. See the section "Other Information" below for details about Alabama's recodification of its rules.) No comparable provision is contained under the Federal rules.

The Secretary's findings on Alabama's provision noted that under the State's plan, the previously disturbed area must be included within the currently permitted bond area, but an additional bond amount would not be required. In an attempt to ensure the reclamation of the entire area in the event an operator defaults on his obligations and abandons the job, the Alabama regulations state that the condition of the entire area will be considered before full bond release is granted. Federal regulations at 30 CFR 800.11(b)(1) require that all operations to be conducted within the permit area during the life of the mine be covered by a performance bond. By that definition, those areas to be used for excess spoil disposal must be included in the performance bond. In his findings, the Secretary expressed concern that the State's plan might spread bond amounts too thin, resulting in less, rather than more, reclamation. However, since the plan has possibilities for increased reclamation activities, the Secretary proposed to allow its implementation on a controlled basis for an appropriate trial period.

A one year trial period was established during which the State was allowed to put its plan into effect under the following conditions:

(1) Prior to approval of any application involving this spoil disposal plan, the State Regulatory Authority must notify the OSM Field Office and submit to that Office a report stating the relevant particulars concerning the request indicating that the State approved:

(2) The OSM Field Office will then review the matter and notify the State within 30 days of its approval or objection;

(3) At the end of one year, the State shall submit to the OSM Field Office a report on the project;

(4) The OSM Filed Office will then review the State report, add data or material as needed and transmit the material to OSM Headquarters;

(5) A decision will then be made concerning the success or failure of the trial.

The Secretary's findings also stated that it was recognized that a one year trial period may not be sufficient to adequately evaluate the initial results and that OSM may extend the trial period as needed until sufficient data for appropriate evaluation is obtained. Alabama agreed to the above restrictions.

III. Reasons for the Proposed Trial Period Extension

The present one year trial period ended on May 20, 1983. In early 1983, seven applications were received which requested to implement Alabama's plan on specific sites. The Alabama Surface Mining Commission forwarded recommendations that OSM approve all seven applications. As of May 1, 1983, OSM has approved six of those applications. Actual on-site implementation of Alabama's plan will not occur in sufficient time prior to May 20, 1983, to provide adequate data for OSM to make a meaningful evaluation.

On May 19, 1983, the Alabama Surface Mining Commission submitted a statement (AL-378) to OSM that no site-specific information on the plan's implementation is available at this time. That statement also included a request that OSM extend the trial period for three years. The State's request did not specify a specific rationale to support a three year extension.

Based on the number of applications approved at this time, OSM estimates that it will be approximately August 20, 1984 (2 and ¼ years after Alabama's primacy took effect) before significant data can be collected on a sufficient number of cases for a meaningful evaluation.

OSM is proposing that the trial period for Alabama's excess spoil plan be exended to August 20, 1984. OSM believes that sufficient information should be available by that time for a meaningful evaluation to be made. At the close of the study period, OSM would compile and evaluate the data and determine whether to allow the State's practice to continue or, in the event of insufficient data, to extend the trial period again.

At this time, OSM requests comments on the proposed extension and, in particular, on the length of any possible extension that may be granted. If an extension is granted, the length of the extension may be different than the period being proposed today. To assist the public, OSM will make available copies of those applications presently on file which would implement the State's provisions on specific sities. These applications are available for review at the OSM Field Office and Office of the State Regulatory Authority Shown above under "Addresses."

IV. Other Information

On November 24, 1982, the Alabama Surface Mining Commission informed OSM that due to the implementation of the Alabama Administrative Procedures Act, the State has renumbered its regulations to coincide with the requirements of the new systems as follows:

RULES OF ALABAMA SURFACE MINING COMMISSION—TABLE OF CONTENTS

Existing Citation	New Citation	Topic
	Chapter 880-X-1. Organization	
	880-X-1A	Organization.
	880-X-1B	Forms.
	Chapter 880-X-2. General

826	880-C-10I	Special Performance Standards—Operations on Steep Slopes.
827	880-X-10J	Special Performance Standards—Coal Processing Plants and Support Facilities Located at or Near the Minesite but not Within the Permit Area of a Mine.
828	880-X-10K	Special Performance Standards—In Situ Processing.
		Chapter 880-X-11. Inspection and Enforcement Provisions
840	880-X-11A	General Requirements for Inspection and Enforcement.
842	880-X-11B	Inspections.
843	880-X-11C	Enforcement.
845	880-X-11D	Civil Penalties.
		Chapter 880-X-12. Training, Examination, and Certification of Blasters
	880-X-12A	Training, Examination and Certification Program for Blasters.

OSM intends to incorporate Alabama's recodification scheme into the approved Alabama program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310-05-M

30 CFR Part 913

Permanent State Regulatory Program of Illinois; Consideration of Modification of Decline

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining (OSM) is considering modifying the deadline for Illinois to meet two conditions of approval of its State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The conditions concern sediment ponds and covering coal seams with water.

DATE: Comments must be received by July 5, 1983, at the address below, no later than 4:30 p.m.

ADDRESS: Written comments must be mailed or hand-delivered to: Office of Surface Mining, Springfield Field Office, No. 4 Old Capitol Plaza, North, Springfield, Illinois 62701.

FOR FURTHER INFORMATION CONTACT: Mr. James Fulton, Field Office Director, Office of Surface Mining, No. 4 Old Capitol Plaza, North, Springfield, Illinois 62701; Telephone: (217) 492-4495.

SUPPLEMENTARY INFORMATION: Under 30 CFR 732.13(j), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The schedule is established in consultation with the State based on the time required for changes to be adopted under State procedures or legislative schedules.

The Illinois program was conditionally approved June 1, 1982 (47 FR 23858). In that document, the Secretary published a schedule for the State to meet each of the five conditions on the State program.

This notice is for the purpose of addressing the State's request for an extension that would establish a new deadline for the State to meet conditions (b) and (c) of 30 CFR 913.11. These conditions were due by June 1, 1983. The State noted, in its May 23, 1983 request, that the Illinois Department of Mines and Minerals (IDMM) had filed a notice of proposed rulemaking in the Illinois Register to amend its permanent program rules to meet the two conditions due June 1, 1983. However, the IDMM received little public comment on the proposed rulemaking. In order to stimulate the fullest public participation in the rulemaking process, the IDMM wishes, by direct mailing to interested persons, to give further notice of the proposed rulemaking. Under Illinois administrative procedures, this process should be complete within six months.

Therefore, the State requested a six-month extension of the June 1, 1983 deadline. As the State noted in its letter, since Illinois agreed to operate its program in conformance with the terms of the conditions until such time as its rules are amended, there will be no substantive difference in the field.

In accordance with the State's request, OSM is proposing that the deadline for the State to meet these conditions be extended until December 1, 1983. OSM requests comments on this proposed extension.

Procedural Matters

1. Compliance with the National Environmental Policy Act: The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need by prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act: On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act: This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Availability of Data Pertaining to Proposed Methodology for Best Conventional Pollutant Control Technology Effluent Limitations Guidelines

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability concerning proposed rules.

SUMMARY: EPA proposed a revised methodology for determining the reasonableness of Best Conventional Pollutant Control Technology (BCT) effluent limitations guidelines on October 29, 1982 (47 FR 49176). The Agency now expects to use new data on publicly owned treatment works (POTWs) in the promulgation of the final methodology and requests comments from the public on its use.

DATE: Comments must be submitted on or before July 5, 1983. Comments should be mailed to Ms. Renee Rico, Attn: Comments on BCT Notice of Availability, Office of Analysis and Evaluation (WH-586), 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Ms. Renee Rico, Office of Analysis and Evaluation (WH-586), 401 M Street, S.W., Washington, D.C. 20460 (202) 382-5386.

SUPPLEMENTARY INFORMATION:

Background

On October 29, 1982, EPA published its proposed methodology to determine the reasonableness of Best Conventional Pollutant Control Technology (BCT) effluent limitations. 47 FR 49176. At the same time, EPA applied the proposed BCT methodology to the following secondary industry and primary industry categories: Dairy Products, Grain Mills, Canned and Preserved Fruits and Vegetables, Canned and Preserved Seafoods, Sugar, Cement Manufacturing, Feedlots, Inorganic Chemicals, Phosphates, Ferroalloy Manufacturing, Glass Manufacturing, Timber Products, Pulp, Paper and Paperboard, and Builder's Paper and Board Mills, Meat Products, Metal Finishing, and Ore Mining and Dressing.

The proposed methodology consists of two parts: A POTW test and an industry cost-effectiveness test. Both tests must be passed for BCT limitations to be set more stringent than Best Practicable Control Technology Currently Available (BPT) limitations. The POTW test compares the cost per pound of conventional pollutants removed by industry in going from BPT to BCT with the incremental cost per pound removed by POTWs in going for secondary treatment to advanced secondary treatment (the POTW benchmark). The incremental costs to industry must be less than the POTW benchmark for more stringent levels of control to pass the POTW test. At proposal the benchmark was $0.27 per pound (1976 dollars). The Industry Cost test compares industry's incremental cost per pound in going from pre-BPT to BPT levels with the incremental costs in going from BPT to BCT. If the ratio of the latter cost divided by the former cost is greater than 1.43 (the industry Benchmark), the more stringent levels of control do not pass this test.

POTW Cost Equations

Each of the benchmarks is based on POTW costs of contruction and operation and levels of pollutant reduction at particular treatment levels. At the time of proposal, EPA used the following report in computing the construction costs of levels of treatment at POTWs: "Construction Costs for Municipal Wastewater Treatment Plants: 1973-1978," EPA 430/5-80-003, May, 1980. EPA used curves in Figure 4.1 of that document.

Since the EPA used the 1980 POTW study, new construction cost curves have been developed for EPA's Office of Water Program Operations. These cost curves will be used as part of the 1984

Needs Survey and are scheduled to be published in August, 1983. (Needs Surveys are conducted biennially by the Agency in order to assess the cost of providing sewage collection and treatment as required by Pub. L. 95–217.) As with the curves in the 1980 POTW cost document, these new curves describe the relationship between construction costs and wastewater flow for POTW treatment technologies ranging from primary treatment through advanced secondary treatment. Since these latest curves reflect the most recent cost data (four years newer), the Agency believes that it is preferable to use these curves to promulgate the final BCT methodology. Table 1 present in equation form the cost curves EPA plans to use in the final methodology. (The cost equations EPA used in proposing the revised methodology on October 29, 1983 appeared in Tables A2 and B2 of Appendices A and B of the October 29, 1982 **Federal Register** notice [47 FR 49196 and 49198].) While the new curves will be used in the same way as those used in the proposed methodology, they may result in changes to the BCT benchmarks and different levels of control for final BCT limitations.

TABLE 1.—CAPITAL COST EQUATIONS

(3d quarter 1982 dollars)

Treatment level	Cost equations[1]	Indexation factor to 1976 dollars
Savings from primary treatment	$1.14 \times 10^6 Q^{0.77}$	0.629
Secondary treatment	$3.29 \times 10^6 Q^{0.72}$	.529
Savings from secondary treatment	$1.82 \times 10^6 Q^{0.86}$	.629
Advanced treatment I [2]	$3.83 \times 10^6 Q^{0.72}$	.629

[1] Q = flow size in millions of gallons per day.
[2] Advance Treatment I is equivalent to Advanced Secondary Treatment.

Comments Invited

The comments received on the use of this data will be considered in the development of the final BCT methodology. Copies of documentation on the new curves may be reviewed at the EPA Headquarters Library, Public Information Reference Unit, 401 M Street, S.W., Washington, D.C. 20460, Rm: 2404, and at EPA Regional Libraries. Copies of the documentation on the new curves may also be obtained by writing or telephoning Ms. Dena Caldwell, Office of Analysis and Evaluation (WH-586) U.S.E.P.A, Washington, D.C. 20460 (202) 382–5397.

Dated: May 25, 1983.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6526]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Connecticut et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

PART 67—[AMENDED]

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Connecticut	Bethel, town, Fairfield County	Limekiln Brook	Downstream corporate limits	*294
			Upstream Walnut Hill Road	*311

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
			Approximately 340 feet downstream of second dam after Walnut Hill Road.	*337
			Upstream Plumtrees Road	*368
			Approximately 3,550 feet downstream Rockwell Road	*402
			Approximately 150 feet upstream of Old Hawleyville Road.	*427
			Upstream corporate limits	*447
		Sympaug Brook	Downstream corporate limits	*360
			Upstream South Street	*372
			Grassy Plain Street/State Route 53	*383

BILLING CODE 6718-03-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Denial of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: This notice denies a petition for rulemaking submitted by the California Department of Transportation asking NHTSA to issue a regulation governing devices to restrain wheelchairs in mass transit vehicles. The agency concludes for the reasons set forth below that these additional safety measures are not needed at this time.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Williams, Crashworthiness Division, National Highway Traffic Safety Administration 400 7th Street, S.W., Washington, D.C. 20590 (202–426–2264)

SUPPLEMENTARY INFORMATION: On November 9, 1982, the California Department of Transportation petitioned the agency to create a safety standard governing tie-downs or restraints for wheelchairs in public transit vehicles. In that petition, they argued that current restraint devices permit wheelchairs to come loose in accidents and, therefore, are not effective in protecting the occupants of those chairs.

The agency has reviewed this subject and does not find it an appropriate area to regulate at this time. Currently, the agency lacks information indicating that wheelchair occupants are being injured by the inadvertant release of existing wheelchair restraint devices. This lack of injury information, while not in itself determinative, must be viewed in light of the relative safety provided by buses. These vehicles because of their substantial size achieve a higher level of safety than other vehicles on the roads. For this reason, the agency has issued only limited safety standards applicable to this vehicle type. Absent the submission of additional information indicating that unjuries are being sustained by wheelchair occupants, NHTSA concludes that given the safety record of buses rulemaking is not justified at this time.

The agency agrees that the issue of safe transportation for the handicapped is important and will continue to monitor accident information involving buses and wheelchair restraints in those buses and will reconsider rulemaking in this area should the information indicate a need for regulatory action.

(Secs. 103, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C.) 1391, 1407); delegation of authority at 49 CFR 1.50)

Issued on May 26, 1983.

Diane K. Steed,

Acting Administrator.

BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 674

[Docket No. 30510–81]

High Seas Salmon Fishery Off Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues a proposed rule to rescind the present prohibition against the use of treble hooks by commercial salmon trollers fishing in the fishery conservation zone off Alaska; comments are requested on this rule and the amendment. This action is necessary to bring Federal and State regulations into conformity and make Federal regulations more easily enforceable. The intended effect of this action is to provide for an orderly fishery and to remove an unnecessary regulatory burden from salmon trollers in Alaska.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service (NMFS), P.O. Box 1668, Juneau, Alaska 99802. A copy of the amendment and environmental assessment may be obtained from Mr. McVey.

FOR FURTHER INFORMATION CONTACT: William L. Robinson (Regional Plan Coordinator, NMFS), 907–586–7229.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan (FMP) for the High Seas Salmon Fishery off the Coast of Alaska East of 175° East Longitude was published in its entirety on June 6, 1979 (44 FR 33250). The FMP has been amended twice. Amendments 1 and 2 were implemented on September 8, 1980 (45 FR 59172) and November 23, 1981 (46 FR 57299), respectively.

The prohibition against the use of treble hooks was established in 1981 for two reasons. First, there was concern that fishermen using arguably more efficient treble hooks might catch and release a greater number of sublegal chinook salmon than those using single hooks, thus increasing the incidence of hook and release mortalities. Second, the prohibition was imposed to avoid conflicting regulations in Federal and State waters and the resulting enforcement difficulties in both areas. In 1981 the North Pacific Fishery Management Council (Council) and the State of Alaska Board of Fisheries (Board) reviewed the results of an Alaska Department of Fish and Game study that compared the hooking efficiency of treble hooks versus single hooks and the relative severity of hooking wounds associated with each hook type. The study was largely inconclusive, but did suggest that treble hooks have slightly greater hooking efficiency than single hooks. It also appeared that the wounds associated with treble hooks were usually less severe than those caused by single hooks. Based on this study, the Council concluded that the greater hooking efficiency of treble hooks might result in a greater catch, handling, and associated mortality of sublegal chinook salmon as they were returned to the water. Consequently, the Council (with the Secretary's approval) and Board banned the use of treble hooks in both Federal and State waters. The Council further concluded that conformity with State regulation was essential to avoid confusion and enforcement conflicts. This prohibition was not incorporated into the FMP itself, but was promulgated concurrently with the regulations implementing Amendment 2 to the FMP.

The Council and Board again reviewed the treble hook issue at the January 1983 joint meeting. No scientific data had been developed demonstrating that prohibiting the use of treble hooks resulted in any measurable biological benefits. The majority of public testimony emphasized that the ban lacked scientific justification and that it imposed an unjustified regulatory burden on those fishermen who traditionally used treble hooks. The Board removed the ban in State waters. Due to the lack of conclusive scientific evidence supporting retention of the ban and the desire for conformity between State and Federal regulations, the Council reversed its previous decision and recommended rescinding the treble hook ban in the fishery conservation zone. Because the treble hook ban was never actually incorporated into the FMP, removal of the ban does not necessitate an FMP amendment but can be accomplished by the rulemaking.

Classification

The Assistant Administrator of Fisheries, NOAA (Assistant Administrator), has determined that implementation of these regulations would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act. An environmental assessment and negative determination of significant environmental impact has been prepared on this proposed action, and filed with the Environmental Protection Agency on April 12, 1983. The environmental assessment may be obtained from the Alaska Regional Director, NMFS, at the address set forth above.

Recision of the prohibition on the use of treble hooks imposes no new regulatory or economic burdens on salmon trollers. On the contrary, this action would remove an unnecessary regulatory burden and allow salmon trollers to choose whichever hook type they prefer. On the basis of the environmental assessment, the Administrator of NOAA has determined that the proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291.

On the same basis, the general Counsel of Commerce certified to the Small Business Administration that this proposed rule would not have a significant economic impact on a substantial number of small entities, and thus does not require preparation of a regulatory flexibility analysis under 5 U.S.C. 603 and 604 of the Regulatory Flexibility Act.

The Assistant Administrator has determined that this proposed rule is consistent to the maximum extent practicable with the Alaska Coastal Management Program as required by § 307(c)(1) of the Coastal Zone Management Act of 1982 and its implementing regulations at 15 CFR Part 930, Subpart C. The proposed rule will not affect any species listed as endangered or threatened under the Endangered Species Act.

This proposed rule does not contain a collection of information requirement, and does not involve any agency in conduction or sponsoring the collection of information.

List of Subjects in 50 CFR Part 674

Administrative practice and procedure, Fish, Fisheries, Fishing, Reporting requirements.

Dated: May 26, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 674—HIGH SEAS SALMON FISHERY OFF ALASKA

For the reasons set out in the preamble, 50 CFR Part 674 is proposed to be amended as follows:

1. The authority citation for Part 674 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§ 674.24 [Amended]

2. Section 674.24 is amended by removing paragraph (a)(4).

Federal Register
Vol. 48, No. 107
Thursday, June 2, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Administration; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Administration of the Administrative Conference of the United States, to be held at 10:00 a.m., Thursday, June 9, 1983 at the Administrative Conference, 2120 L Street, N.W., Suite 500, Washington, D.C. 20037.

The Committee will meet primarily to discuss pending and possible projects on its agenda, including Professor George D. Brown's study on procedures for administering federal block grant programs.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information contact Charles Pou, Jr., Office of the Chairman, Administrative Conference of the United States, 2120 L Street, N.W., Suite 500, Washington, D.C. (Telephone: 202–254–7065) Minutes of the meeting will be available on request.

Richard K. Berg,
General Counsel.

Office of the Secretary

Forms Under Review by Office of Management and Budget

May 27, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, USDA, OIRM, Room 108–W Admin. Bldg. Washington, D.C. 20250, (202) 447–6201.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, ATTN: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 6335–01–M

Vermont Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Vermont Advisory Committee to the Commission will convene at 7:00p and will end at 9:00p, on June 16, 1983, at the Montpelier City Hall, Memorial Room, Main Street, Montpelier, Vermont 05602. The purpose of this meeting is to review the project plan for studying the civil rights implications of Federal block grants in Vermont.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Mr. Philip H. Hoff, 192 College Street, Hoff, Wilson, & Powell, P.C., Burlington, Vermont 05401, (802) 658–4300; or the New England Regional Office, 55 Summer Street, 8th Floor, Boston, Massachusetts 02110, (617) 223–4671.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D. C., May 27, 1983.

John I. Binkley,

Advisory Committee Management Officer.

DEPARTMENT OF COMMERCE

International Trade Administration Preliminary Determinations of Sales at Less Than Fair Value

Certain Carton Closing Staples and Staple Machines From Sweden;

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Determinations of Sales at Less than Fair Value: Certain Carton Closing Staples and Staple Machines from Sweden.

SUMMARY: We have preliminarily determined that certain carton closing staples and staple machines from Sweden are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determinations, and we have directed the U.S. Customs Service to suspend the liquidation of all entries of the subject merchandise which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice and to require a cash deposit or bond for each such entry in an amount equal to the estimated dumping margins as described in the "Suspension of Liquidation" section of this notice.

We have also preliminarily determined that imports of certain carton closing staples from Grytgols Bruks AB should be excluded from these preliminary determinations because we found no sales at less than fair value.

If these investigations proceed normally, we will make final determinations by August 9, 1983.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: G. Leon NcNeill, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 377–1273.

SUPPLEMENTARY INFORMATION:

Preliminary Determinations

We have preliminary determined that there is a reasonable basis to believe or suspect that certain carton closing staples and staple machines from Sweden are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act).

We have also preliminarily determined that imports of certain carton closing staples from Grytgols Bruks AB (Grytgols) should be excluded from these preliminary determinations because we found no sales by Grytgols at less than fair value.

For certain carton closing staples, we have found that the foreign market value exceeded the United States price on 60.86 percent of sales. These margins ranged from 0.00 percent to 47.90 percent. The overall weighted-average margin on all sales compared is 8.71 percent.

For certain carton closing staples machines, we have found that the foreign market value exceeded the United price on over 99.00 percent of sales. These margins ranged from 61.10 percent to 213.70 percent. The overall weighted-average margin on all sales compared is 138.20 percent.

The weighted-average margins for individual companies investigated are given for each product in the "Suspension of Liquidation" section of this notice.

If these investigations proceed normally, we will make final determinations by August 9, 1983.

Case History

On December 17, 1982, we received a petition from counsel for International Staple and Machine Company, Inc. of Butler, Pennsylvania, on behalf of the domestic carton closing staple and staple machine industry. In accordance with the filing requirements of § 353.36 of the Commerce Department Regulations (19 CFR 353.36), the petitioner alleged that certain carton closing staples and staple machines from Sweden are being, or are likely to be, sold in the United States at less than fair value within the meaning of section

731 of the Act, and that these imports are materially injuring, or are threatening to materially injure, a U.S. industry.

After reviewing the petition, we detemined that it contained sufficient grounds upon which to initiate antidumping investigations. We notified the ITC of our actions and initiated such investigations on January 6, 1983 (48 FR 1530). On January 31, 1983, the ITC found that there is a reasonable indication that imports of certain carton closing staples and staple machines are materially injuring, or are threatening to materially injure, a U.S. industry (48 FR 6039).

Questionnaires were presented to Josef Kihlberg Trading AB (Kihlberg) on February 9, 1983, and to Grytgols on February 10, 1983. Responses were received on March 22, 1983 from Grytogols, and on April 12, 1983 from Kihlberg.

Scope of Investigations

The merchandise covered by these investigations is certain carton closing staples in strip form and non-automatic carton closing staple machines. Carton closing staples are made of steel, most often copper coated or galvanized. Non-automatic carton closing staple machines can be divided for the most part into two categories: handheld top staple machines and free standing bottom staple machines. The subject staples and staple machines are currently classifiable under item 646.2000 and item 662.2065, respectively, of the *Tariff Schedules of the United States Annotated (TSUSA)*.

Since Kihlberg and Grytgols are the only known Swedish exporters of certain carton closing staples to the United States, and Kihlberg is the only known Swedish exporter of certain carton closing staple machines to the United States, we limited our investigations to them.

These investigations cover the period from July 1, 1982, to December 31, 1982.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for sales by Kihlberg and Grytgols because merchandise was sold to unrelated purchasers prior to its importation into the United States. For Kihlberg, we calculated purchase price based on the f.o.b., port of exportation, unpacked price to unrelated purchasers in the United States. We made a deduction for the cost of foreign inland freight and added U.S. packing costs. For Grytgols, we calculated purchase price based on the c.i.f., U.S. port, packed price to unrelated purchasers in the United States. We made a deduction for the costs of foreign inland freight, foreign terminal charges, ocean freight and insurance.

Foreign Market Value

In accordance with section 773 of the Act, we calculated foreign market value for Kihlberg and Grytgols based on their home market sales.

For Kihlberg, we calculated home market prices on the basis of ex-factory, unpacked prices. We made deductions, where appropriate, for quantity discounts in accordance with section 353.14 of the Commerce Regulations. In addition, we made deductions, where appropriate, for loyalty discounts. We also made an adjustment for differences in credit terms, and added U.S. packing costs.

Kihlberg claimed we should use sales to third countries as the basis for comparison with sales to the United States because sales in Sweden are to end users, and sales to the United States and to third countries are to distributors. We rejected this claim because there were sufficient sales of such or similar merchandise in the home market to provide a basis for comparison.

Kihlberg also claimed a level of trade adjustment between United States and home market sales based on differences in indirect selling expenses in the two markets. We do not consider this to be a proper basis for a level of trade adjustment, and disallowed the claim because Kihlberg was not able to demonstrate differences in pricing arising out of sales of such or similar merchandise at different levels of trade in the home market, in accordance with § 353.19 of the Commerce Regulations. If Kihlberg submits verifiable information as to differences in level of trade affecting price comparability, we will consider using it in making our final determinations.

For Grytgols, we calculated the home market prices on the basis of ex-factory, packed prices. We allowed a deduction for quantity discounts in accordance with § 353.14 of the Commerce Regulations. We also made an adjustment for differences in credit terms. We made no adjustments for differences in packing costs as these costs are reportd to be the same in both markets.

Grytgols claimed a level of trade adjustment to compensate for the differences in levels of trade existing between the United States market and the home market for sales of certain carton closing staples. Pursuant to § 353.19 of the Commerce Regulations, the deduction was disallowed because Grytgols was not able to demonstrate differences in pricing arising out of sales of such or similar merchandise at different levels of trade in the home market. If Grytgols submits verifiable information as to differences in level of trade affecting price comparability, we will consider using it in making our final determinations.

Supplemental Information Requested

We are requesting Kihlberg to provide us with additional information on technical services expenses, and warranty, guarantee, and servicing costs. We are also requesting Grytgols to provide us with additional information on warranty, guarantee and servicing costs. If the above supplemental information is not received by June 6, 1983, we may resort to using the best information available for our final determinations.

Verification

We will verify all data used in reaching the final determinations in these investigations, as provided in section 776(a) of the Act.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of certain carton closing staples and staple machines from Sweden, with the exception of imports of certain carton closing staples produced and exported by Grytgols. This suspension of liquidation applies to all merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or the posting of a bond for each such entry of the merchandise equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to these investigations exceeds the United States price. This suspension of liquidation will remain in effect until further notice. The weighted-average margins are as follows:

Certain carton closing staples	Weighted-average margin (percent)
Grytgols	[1]0.60
Kihlberg	14.31
All Other Manufacturers/Producers/Exporters	8.71
Kihlberg	136.20
All Other Manufacturers/Producers/Exporters	136.20

[1]Imports of these products from Grytgols are excluded from these preliminary determinations, because we found no sales at less than fair value.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determinations. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to these investigations. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports are materially injuring or are threatening to materially injure a U.S. industry before the later of 120 days after the Department of Commerce makes its preliminary affirmative determinations or 45 days after the Department makes its final affirmative determinations.

Public Comment

In accordance with § 353.47 of the Commerce Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on these preliminary determinations at 10:00 a.m. on June 24, 1983, at the U.S. Department of Commerce, Room 3092, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by June 17, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of publication of this notice, at the above address in at least 10 copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 25, 1983.

BILLING CODE 3510-22-M

Modification to a General Marine Mammal Permit

Notice is hereby given that pursuant to the provisions of § 216.24(b)(4) of the Regulations Governing the Taking and Importing of Marine Mammals and Condition 8 of the Permit, the Category 1 General Permit issued on February 22, 1983 to the VEB Fischfang Rostock of the German Democratic Republic, is hereby modified as detailed below.

1. Condition 2b. is deleted and replaced by:

b. Not more than 25 marine mammals of the Order Cetacea, and 8 marine mammals of Order Pinnipedia, Family Phocidae may be killed or injured.

2. Condition 3 is deleted and replaced by:

3. Marine mammals taken as authorized herein may be taken in the North Atlantic Ocean within the Fishery Conservation Zone of the United States.

These modifications become effective on May 23, 1983.

The General Permit as modified and supporting documentation pertaining to the modifications are available for review in the office of the Assistant Administrator for Fisheries, National Marine Fisheries Service, Room 412, 3300 Whitehaven Street, N.W., Washington, D.C. 20240.

Dated: May 26, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-14781 Filed 6-1-83; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Application for Marine Mammal Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Point Definance Zoo and Aquarium (p284A).

b. Address: 5402 North Shirley, Tacoma, Washington 98407.

2. Type of Permit: Public Display.

3. Name and Number of Animals: Beluga Wale (*Delphinapterus leucas*), 3.

4. Type of Take: to take and import for public display.

5. Location of Activity: Churchill, Manitoba, Canada.

6. Period of Activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or requests for a public hearing on this application should be

submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be approprate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.: and

Regional Director, National Marine Fisheries Service, Northwest Region, 7600 Sand Point Way, N.E., BIN C157000, Seattle, Washington 98115.

Dated: May 27, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

[FR Doc. 83-14779 Filed 6-1-83; 8:45 am]

BILLING CODE 3510-22-M

Office of the Secretary

President's Private Sector Survey on Cost Control

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice of Open Meeting of the Subcommittee of the President's Private Sector Survey on Cost Control (PPSSCC).

SUMMARY: The Subcommittee was established by the Executive Committee of the PPSSCC to: (i) review the recommendations submitted, including task force reports and public comments, and (ii) determine which recommendations should be made to the President and the Departments and Agencies.

TIME AND PLACE: June 13, 1983, beginning at 11 a.m. The meeting will be held at the U.S. Department of Commerce Auditorium, First Floor, Herbert C. Hoover Building, 14th Street and Constitution Avenue NW., Washington, D.C. 20230.

AGENDA:

1. Draft reports from the following Task Forces of the Survey will be discussed by Subcommittee members:
   A. HHS/SSA
   B. Department of Education
   C. Department of the Treasury
   D. Procurement
   E. ADP
   F. Federal Management Systems
2. Comments and recommendations received from public and other interested parties will be discussed by Subcommittee members.

In compliance with Federal Advisory Committee Act and Freedom of Information Act requirements, copies of the draft reports will be available on June 3 at the Department's Central Reference and Records Inspection Facility, Room 6628 Hoover Building, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Please call Ms. Geraldine P. LeBoo on (202) 377-3271 for information concerning fees and procedures for obtaining copies by mail.

SUPPLEMENTARY INFORMATION: The Subcommittee will hold an additional public meeting in June, 1983. The exact date will be noticed in the **Federal Register**. Copies of all materials, including Task Force reports, to be considered at this meeting will be available approximately two weeks prior to the meeting at the Department's Central Reference and Records Inspection Facility, address above.

PUBLIC PARTICIPATION: The June 13 meeting will be open to the public. Seating will be on a first-come, first-served basis, up to the safe capacity of the meeting room. Media representatives are encouraged to call Mr. Malcolm Barr, Director, News Relations, Department of Commerce, 377-4901 to arrange for coverage of the meeting.

The public may file written statements for consideration by the Subcommittee any time before, at, or after the meeting. It is strongly recommended that statements concerning the matters to be considered at each meeting be filed before such meeting to ensure that they are considered by the Subcommittee before adoption of a report. The statements should be filed at the Department of Commerce's Central Reference and Records Inspection Facility, address and phone number as above. Because of the number of recommendations to be discussed, the meeting agenda will not include time for oral statements from public attendees. All public statements received will be available for public review.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Colson, Committee Control Officer for the Executive Committee of the President's Private Sector Survey on Cost Control, telephone (202) 466-4665.

Dated: May 27, 1983.

Marilyn S. McLennan,

Chief, Information Policy and Management Division, Office of the Secretary.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Law-Related Education—Institutional Projects; Funding Priorities and Application Notice for Fiscal Year 1983 Grants

Applications are invited for new projects under the Law-Related Education Program.

These awards will be made under the authority of Section 583 of the Education Consolidation and Improvement Act of 1981 (ECIA), which authorizes the Secretary's Discretionary Program. The awards implement the intent of the Congressional Conference Committee on the second continuing resolution for Fiscal Year 1983 (Pub. L. 97-377) that $1 million be reserved from the Secretary's Discretionary Program to fund law-related education projects similar to those supported under the Law-Related Education Act of 1978, which had been previously revoked, effective September 30, 1982, by ECIA.

Closing date for transmittal of applications: Applications for new awards must be mailed or hand delivered by July 18, 1983.

Program Information

(1) *Scope of law-related education.* Grants will be made to support programs at the elementary and secondary school levels through the development and implementation of model projects designed to institutionalize law-related education. "Institutionalization" is defined as the adaptation and incorporation of existing law-related education program materials and processes as an integral part of ongoing and continuing system-wide activities with regular State and local funding sources. Law-related education is intended to give persons knowledge and skills pertaining to the law, the legal process, and the legal system, and the fundamental principles and values on which these are based. The purpose of law-related education is to enable non-lawyers, including children, youth, and adults, to be more informed citizens.

Law-related education may include a variety of learning approaches in subject areas such as: fundamental legal principles and the values on which they are based; the Bill of Rights and other constitutional law; the role and limits of law in a democratic society both past and present; the Federal, State, and local lawmaking process; the role of law in avoiding and resolving conflicts; development and administration of specific rules of law by Federal, State, or local governments and examination in a general or theoretical way of how rule of governance are developed and administered; the administration of the criminal, civil, and juvenile justice systems; and issues of authority, freedom, enforcement, and punishment.

Law-related education does not include direct training for careers in law. It does not include programs designed exclusively or primarily to provide information to persons preparing for or working in a particular profession on a specific law or set of laws that affect that profession.

(20 U.S.C. 3851; Pub. L. 97-377)

2. *Eligible applicants.* A State educational agency (SEA), local educational agency (LEA), or public or private nonprofit agency, organization, or institution may apply for a grant. However, the secretary encourages private nonprofit organizations to develop their applications in cooperation with State or local educational agencies or other organizations responsible for the administration of schools. An applicant may apply singly or jointly with another eligible applicant, as provided in 34 CFR 75.127 through 75.129 of the Education Department General Administrative Regulations (EDGAR). The Secretary of Education encourages joint applications from consortia of eligible applicants. Applicants may apply only for a project that does not exceed one year in duration.

(20 U.S.C. 3851(a))

3. *Types of projects.* The Secretary intends to fund one nation-wide project and additional projects with State-wide, area-wide (involving several school districts), or school district-wide applicability designed to institutionalize law-related education. Project activities may include technical assistance to help agencies identify and coordinate financial and programmatic support from public and private organizations in the community; planning and implementation of training such as seminars for educators and law-related personnel, e.g., law enforcement officials; and other services necessary to plan, manage, coordinate, and strengthen programs—all directed toward institutionalization of law-related education in the classroom.

It is estimated that a nation-wide project would require $100,000–$150,000, State-wide projects would require about $50,000–$100,000, area-wide projects would require about $25,000–$75,000, and system-wide projects would require approximately $10,000–$50,000. It therefore is estimated that between 10 and 20 projects would be funded, depending in part on the distribution of successful applications among projects of different scope.

It is possible that the Secretary may decide to fund one or more contracts for specific activities in law-related education outside of the grant competition provided for by this notice. This decision would affect the number and size of grant awards under this notice. The funding levels described above are estimates that do not bind the Secretary.

(20 U.S.C. 3851)

4. *Evaluation criteria.* In evaluating applications, the Secretary considers the following:

(a) *Institutionalizing law-related education.* (35 points)

The likely success of the project in helping to institutionalize law-related education programs, as measured by the extent and quality of activities that contribute to—(1) a recognition among public and private agencies and members of the public of law-related education's value as a part of the elementary and secondary school curriculum; (2) an increase in the number of educators and others who are competent in law-related education; (3) the development of effective sources of continuing programmatic and financial support from public and private organizations, including, for example, partnerships among State educational agencies, other public agencies, and private organizations, such as bar associations, law schools, and parent groups, and use of volunteers in law-related education programs; and (4) implementation of law-related education programs in the classroom.

(b) *Quality of project.* (15 points) The following additional criteria bearing on the quality of the project: (1) evidence of applicability to classroom use and age-level of students, of the applicant's materials, programs, or approaches in law-related education; (2) the applicant's and the staff's experience in and knowledge of law-related education; (3) how the project addresses a diversity of learning approaches that are—(i) appropriate to the students to whom the project is directed, (ii) designed to address gains not only in student's knowledge, but also in their

skills, (iii) balanced and based on sound scholarship and do not advocate particular legal or political viewpoints; and (4) the involvement of the appropriate State educational agency or agencies in the planning and conduct of the project.

(c) *Quality of key personnel.* (15 points) The quality of key personnel the applicant plans to use in the project, including—(1) the qualifications of the project director (if one is to be used) and other personnel; (2) the time that these persons will commit to the project; and (3) the extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, handicapped persons, and the elderly.

(d) *Plan of Operation.* (15 points) The quality of the plan of operation for the project. In applying this criterion, the Secretary looks for information that shows—(1) high quality in the design of the project; (2) an effective plan of management that ensures proper and efficient administration of the project; (3) a clear description of how the objectives of the project relate to the purpose of the program; (4) the way the applicant plans to use its resources and personnel to achieve each objective; (5) a clear description of how the applicant will provide equal access and treated for eligible project participants who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, handicapped persons, and the elderly, and (6) if the applicant is an SEA or LEA, how the applicant will provide an opportunity for the participation of persons (administrators, teachers, and students) in private schools.

(e) *Budget and cost effectiveness.* (6 points) The cost effectiveness of the project and the appropriateness of its budget.

(f) *Evaluation plan.* (7 points) The quality of the evaluation plan for the project. (See 34 CFR 75.590—Evaluation by the grantee.) In applying this criterion, the Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(g) *Adequacy of resources.* (5 points) The adequacy of facilities, equipment, and supplies that the applicant plans to use in the project.

5. *Rationale for program focus.* The emphasis on projects designed to institutionalize law-related education was selected for two reasons—

(a) There are highly regarded law-related education programs in many States and school districts throughout the Nation, including programs that have been funded under the Law-Related Education Act and by other sources. However, many school districts do not have effective programs, or any programs at all. It is appropriate to build on the succeses of existing programs, to institutionalize them, and to strengthen their capacity to serve as resources that will help address these unmet needs. The Secretary believes that this is a more effective way to use discretionary funds available for law-related education under Section 583 of ECIA than to provide direct support for additional basic program initiation or development.

(b) For the most part, future Federal financial support for particular law-related education programs will depend on decisions by State educational agencies and local educational agencies as to how to spend funds they administer under other Department of Education programs, particularly the block grant program authorized by Chapter 2 of ECIA. Projects that have system-wide applicability can contribute to more effective use of State and locally-administered Federal funds for law-related education. Projects that include strategies to institutionalize classroom law-related education can address the problem that many local educators are not aware of the potential value of law-related education and how it can be integrated into the curriculum. Therefore, institutionalization projects can promote informed choices by cognizant State and local officials—with the block grant funds or with State and local funds—of whether and how best to support law-related education activities.

6. *Private school personnel.* An SEA or LEA that receives a grant under this notice must provide for the equitable participation of private school persons in the project, in accordance with Section 586 of ECIA.

(20 U.S.C. 3862)

Waiver of Rulemaking

In accordance with Section 431 of the General Education Provisions Act and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Department of Eduction to provide an opportunity for public comment in respone to proposed regulations before issuing the regulations in final form. However, the Secretary of Education has determined that proposed rulemaking would be impracticable and contrary to the public interest for the rules in this notice and is therefore waiving the opportunity for public comment, in accordance with 5 U.S.C. 553(b)(3)(B).

The rules in this notice apply only to a competition for grants that must be awarded in the current fiscal year, which ends September 30, 1983. The awards should be made as far in advance of that date as possible to permit planning by grantees for use of funds during the 1983–84 school year. Funds governed by this notice were appropriated in the continuing resolution enacted December 20, 1982. Prior to that date, the Department expected that discretionary funds would not be used for this purpose. Given the time required to prepare, clear, and publish proposed and final regulations, to invite and review applications, and to negotiate and award grants, there is insufficient time following December 20, 1982 to follow proposed rulemaking procedures and still obligate funds on a timely basis in this fiscal year. Therefore, it is impracticable and contrary to the public interest to follow rulemaking procedures. It should also be noted that the rules in this notice are similar to those that were in effect under the Law-Related Education Act, which were developed with substantial public involvement, consistent with the Conference Committee directive.

(5 U.S.C. 553(b); 20: U.S.C. 1232)

Effective dates: Unless the Congress takes certain adjournments, the funding priorities, criteria, and other rules in this notice are expected to take effect 45 days after publication in the **Federal Register.** If you want to know the effective date of these regulations, call or write the Department of Education contact person.

Available Funds

Approximately $1 million are available for these awards for Fiscal Year 1983. Information on the estimated number and size of awards is described under paragraph 3 of this notice (Types of projects).

Applications Delivered by Mail

An application sent by mail must be addressed to the Department of Education, Application Control Center, Attention: 84.123, Law-Related Education Program, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(a) A legibly dated U.S. Postal Service Postmark.

(b) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(c) A dated shipping label, invoice, or receipt from a commercial carrier.

(d) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark; or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Street, SW., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily except Saturdays, Sundays, and Federal holidays. An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Application Forms

Application forms and program information packages will be ready for mailing on June 3, 1983. The program information packages may be obtained by writing to the Division of Educational Support, Law-Related Education Program, U.S. Department of Education, 400 Maryland Avenue, SW., (Room 1725, Donohoe Building), Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with regulations, instructions, and forms included in the program information package.

The Secretary strongly urges that applicants not submit information that is not requested, However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

Applicable Regulations

The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, and 78, are applicable to this program.

Further information: For further information, contact M. Patricia Goins, Program Officer, Law-Related Education Program, Division of Educational Support, U.S. Department of Education, 400 Maryland Avenue, SW (Room 1725, Donohoe Building), Washington, D.C. 20202. Telephone: (202) 245–8223.

(20 U.S.C. 3851)

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Barrett Paving Materials, Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

[ERA Docket No. 83-CERT-085]

On May 11, 1983, Barrett Paving Materials, Inc. (BARRETT), 4847 Provident Drive, Cincinnati, Ohio 45246, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at three of its facilities in Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, BARRETT indicates that the volume of natural gas for which it requests certification is approximately 46,000 Mcf per year. This volume is estimated to displace the use of approximately 307,000 gallons of No. 2 fuel oil (0.3 percent sulfur) per year at the Pleasant Run and Grand Avenue plants in Cincinnati, Ohio, and at the West Carrollton plant in West Carrollton, Ohio.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

Facility	Estimated volume (Mcf) per year	Estimated oil (No. 2) displacement (gallons) 0.3% sulfur
Pleasant Run, 12075 Hamilton Avenue, Cincinnati, Ohio 45231	18,000	120,000
Grand Avenue, 2201 Grand Avenue, Cincinnati, Ohio 45214	18,000	120,000
West Carrollton, 4710 Soldiers Home-West, Carrollton Road, West Carrollton, Ohio 45449	✓ 10,000	67,000
Total	46,000	307,000

The eligible sellers are Exxon, U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, Owensboro, Kentucky 42301; and Ohio Gas Marketing Corporation, 3393 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and Texas Gas Transmission Corporation, 3800 Frederica Street, Owensboro, Kentucky 42301; and by Cincinnati Gas & Electric Company, P.O. Box 960, Cincinnati, Ohio 45202, and Dayton Power & Light Company, Courthouse Plaza Southwest, Dayton, Ohio 45401, the local distribution companies in Cincinnati and West Carrollton, Ohio.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paul A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such

an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to BARRETT and any person filing comments and will be published in the Federal Register.

Issued in Washington, D.C. on May 25, 1983.

James W. Workman,

Director, Office of Fules Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-076]

Container Corporation of America; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

The Container Corporation of America (CONTAINER), 5500 Wooster Road, Cincinnati, Ohio 45226, filed an application on May 9, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its paperboard manufacturing facility in Cincinnati, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, CONTAINER indicates that the volume of natural gas for which it requests certification is approximately 31.5 million cubic feet per month. This volume is estimated to displace the use of approximately 210,000 gallons of No. 6 fuel oil (less than 1.0 percent sulfur) per month.

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 45302; and Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and Texas Gas Transmission Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301; and the Cincinnati Gas and Electric Company, P.O. Box 960, Cincinnati, Ohio 45202; and The Union Light, Heat & Power Company, P.O. Box 32, Covington, Kentucky 41012, local distribution companies.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Ecomonic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the Federal Register.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to CONTAINER and any person filing comments and will be published in the Federal Register.

Issued in Washington, D.C., on May 24, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-057, etc.]

Dauphin Manor, et al.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

On May 12, 1983, Dauphin Manor (DAUPHIN), 1205 South 28th Street, Harrisburg, Pennsylvania 17111; Sperry New Holland Division of Sperry Corporation (SPERRY), 500 Diller Avenue, New Holland, Pennsylvania 17557; The Milton S. Hershey Medical Center (HERSHEY), P.O. Box 850, Hershey, Pennsylvania 17033; G & M Finishing, Inc. (G&M), R. D. #1, Alexander Street, Ephrata, Pennsylvania 17522; St. Lawrence Carbonizing Co., Inc. (ST. L.), 3600 Park View Road, St. Lawrence, Reading, Pennsylvania 19606; Arbogast & Bastian, Incorporated (A&B), 1-19 Hamilton Street, P.O. Box 478, Allentown, Pennsylvania 18105; Ralston Purina Company (RALSTON), 6509 Brandy Lane, P.O. Box 1190, Mechanicsburg, Pennsylvania 17055; and Lehigh University (L.U.) 404 Adams Street, Bethlehem, Pennsylvania 18015, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at one university, one county home, one hospital, and six manufacturing facilities in Pennsylvania, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the applications on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In their applications, the Applicants indicate the total volume of natural gas for the nine Pennsylvania facilities for which they request certification is approximately 1,355,900 Mcf per year. This volume is estimated to displace the use of approximately 3,740,000 gallons of No. 6 fuel oil (0.2-2.8 percent sulfur), approximately 2,632,252 gallons of No. 2 fuel oil (0.1-1.0 percent sulfur), and approximately 2,884,400 gallons of No. 5 fuel oil (0.2-2.9 percent sulfur) per year.

Estimated gas usage and resulting oil displacement volumes for each applicant and facility are listed below:

ESTIMATED OIL DISPLACEMENT (GALLONS) PER YEAR

ERA Docket No. 83-CERT-	Location	Estimated volume (Mcf) per year	No. 2	Sulfur content	No. 5	Sulfur content	No. 6	Sulfur content
[illegible] (DAUPHIN)	1. Dauphin County Home, Harrisburg, PA	56,400	425,152	0.1				
[illegible] (SPERRY)	1. Mountville Plant, Mountville, PA	50,000	134,200	1.0	220,800	1.0		
	2. New Holland Plant, New Holland, PA	100,000	82,900	1.0	506,100	1.0		
060 (HERSHEY)	1. Medical Center/Hospital, Hershey, PA	245,000	2,000,000	0.1				

ESTIMATED OIL DISPLACEMENT (GALLONS) PER YEAR—Continued

ERA Docket No. 83-CERT-	Location	Estimated volume (Mcf) per year	No. 2	Sulfur content	No. 5	Sulfur content	No. 6	Sulfur content
090 (G&M)	1. Ephrata Facility, Ephrata, PA	110,000					733,000	0.2
091 (ST.L)	1. St. Lawrence Plant, St. Lawrence, PA	36,500			255,500	0.2		
092 (A&B)	1. Allentown Facility, Allentown, PA	225,000					1,500,000	2.0
093 (RALSTON)	1. Mechanicsburg Plant, Mechanicsburg, PA	230,000					1,507,000	2.0
094 (L.U.)	1.Lehigh Facility, Lehigh, PA	310,000			1,808,000	2.8		
Total		1,355,500	2,892,252		2,884,400		9,740,000	

For each application noted above, the eligible seller is Exxon U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning any of these applications to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of any of these applications may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to the Applicant and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 24, 1983.

Merrell Dow Pharmaceuticals, Inc.;

[ERA Docket No. 83-CERT-081] Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Merrell Dow Pharmaceuticals, Inc. (MERRELL DOW), 2110 East Galbraith Road, Cincinnati, Ohio 45215, filed an application on May 9, 1983, with the Economic Regulatory Administration (EPA), and amended it May 18, 1983, for certification of an eligible use of natural gas to dsiplace fuel oil at its pharmaceutical facility in Cincinnati, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, MERRELL DOW indicates that the volume of natural gas for which it requests certification is approximately 125 million cubic feet per year. This volume is estimated to displace the use of approximately 1 million gallons of No. 2 fuel oil (0.20 percent sulfur) per year.

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 45302; and Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and Texas Gas Transmission Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301; and by the Cincinnati Gas and Electric Company, P.O. Box 960, Cincinnati, Ohio 45202, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D. C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interest person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to MERRELL DOW and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 25, 1983.

James W. Workman,

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-1001]

Mt. Savage Refractories Company, Inc.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Mt. Savage Refractories Company, Incorporated (MSRC), P.O. Box 5171 Centre Avenue, Pittsburgh, Pennsylvania 15206, filed an application on May 16, 1983 with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its facility in Mt. Savage, Maryland, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket

Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal Holidays.

In its application, MSRC indicates that the volume of natural gas for which it requests certification is approximately 150,000 Mcf per year. This volume is estimated to displace the use of approximately 1,050,000 gallons of No. 2 fuel oil (1.0 percent sulfur) per year.

The eligible sellers are Burdette Oil and Gas Company, Inc., 2303 Roxalana Road, Dunbar, West Virginia 25064; and J & J Enterprises, Inc., P.O. Box 697, Indiana, Pennsylvania 15701–0697. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston West Virginia 25325; and by Columbia Gas of Maryland, Inc., 107 West Main Street, Uniontown, Pennsylvania 15401, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to MSRC and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on May 25, 1983.

DEPARTMENT OF ENERGY

Brent Exploration, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Brent Exploration, Inc. (Brent), 2060 Energy Center One, 717 Seventeenth Street, Denver, Colorado 80202. This Proposed Remedial Order charges Brent with pricing violations in the amount of $1,542,912.41 connected with the sale of crude oil at prices in excess of those permitted by 10 CFR Part 212, Subpart D during the time period August 1979 through December 1980.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from James A. Martin, Manager, Litigation Support Group, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767–7407. Within fifteen (15) days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th & Pennsylvania Ave., N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Tex., on the 6th day of May 1983.

BILLING CODE 6450–01–M

Granite Petroleum Corporation Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice of a Proposed Remedial Order which was issued to Granite Petroleum Corporation and John E. Woolsey, Jr., 7880 San Felipe, Suite 201, Houston, Texas 77063. This Proposed Remedial Order alleges violations in the pricing of crude oil. The principal amount of the violation of 10 CFR 212.186, 210.62 and 205.202 for the period October 1979 through November 1980 is $705,324.56. The principal amount of the alleged alternative violation of 10 CFR 212.183 for the same period is $288,774.61.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: U.S. Department of Energy, Economic Regulatory Administration, ATTN: Sandra K. Webb, Director, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002.

Within fifteen (15) days of publication of this Notice any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, U.S. Department of Energy, Room 3304, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Houston, Tex., on the 20th day of May 1983.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Kunz Oil Co.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administation hereby gives notice of a Proposed Remedial Order which was issued to Kunz Oil Company of Edina, Minnesota

This Proposed Remedial Order charged Kunz Oil Company with pricing violations in the amount of $143,375.11, plus accrued interest in sales of motor gasoline during the time period of May 1, 1979 through August 31, 1979.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, Missouri 64106–2466. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objections with the Office of Hearings and Appeals, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Kansas City, Mo. on the 20th day of May 1983.

David H. Jackson,

Director, Kansas City Office, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–066]

Sherwin-Williams Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Sherwin-Williams Company (S–W), 501 Murray Road, Cincinnati, Ohio 45217, filed an application on May 9, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its organic chemical plant in Cincinnati, Ohio, pursuant to 10 CFR

Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, S–W indicates that the volume of natural gas for which it requests certification is approximately 60 million cubic feet per year. This volume is estimated to displace the use of approximately 10,800 barrels of No. 2 fuel oil (0.17 percent sulfur) per year.

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; and Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 45302. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and Texas Gas Transmission Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301; and by the Cincinnati Gas and Electric Company, P.O. Box 960, Cincinnati, Ohio 45202; and The Union Light, Heat & Power Company, P.O. Box 32, Covington, Kentucky 41012, local distribution companies.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to S–W and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 26, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Federal Energy Regulatory Commission

[Docket No. ID-2043-000]

Burton C. Arola; Application

May 26, 1983.

The filing individual submits the following:

Take notice that on May 9, 1983, Burton C. Arola filed an application pursuant to Section 35(b) of the Federal Power Act to hold the following positions:

Treasurer—Upper Peninsula Power Company

Secretary and Treasurer—Upper Peninsula Generating Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 10, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-338-002]

Colorado Interstate Gas Co. and Montana-Dakota Utilities Co.; Petition To Amend

May 26, 1983.

Take notice that on April 28, 1983, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, and Montana-Dakota Utilities Co. (MDU), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP82-338-002 a joint petition to amend the order issued in Docket No. CP82-338-000 on November 30, 1982, pursuant to Section 7 (c) of the Natural Gas Act so as to authorize the additions and deletions of delivery points to an exchange agreement between the Petitioners, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that by order issued November 30, 1982, in CP82-338-000, Petitioners were authorized to engage in the reciprocal exchange of natural gas in the Madden Field area of Wyoming pursuant to a gas exchange agreement dated October 27, 1978, as amended. Petitioners further state that the terms of the Madden agreement provide for the delivery of volumes of natural gas to CIG by MDU and to MDU by CIG from various sources of supply which are remote from one party's gathering system but proximate to the other's system thus eliminating the need for additional facilities required to connect such gas directly.

Petitioners assert that the Madden Field is still developing as a producing area with new wells being developed and connected to the gathering systems. Petitioners further assert that on occasion, for various operational or other reasons, wells may be disconnected from the systems. Petitioners, therefore, request authorization for blanket authority for the addition and deletion of delivery points in the Madden area of interest. Petitioners assert they would file annual tariff revisions by January 31 of each year setting forth additions and deletions of delivery points made during the previous calendar year.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to

intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[Docket No. CI79-621-001 et al.]

Elf Aquitaine, Inc. (Successor to Texasgulf Inc.); Application of Succession in Interest From Texasgulf Inc. to Elf Aquitaine, Inc.

May 26, 1983.

Take notice that on March 28, 1983, Elf Aquitaine, Inc., (Elf), of Eleven Hundred Milam Building, Houston, Texas 77002, as successor to Texasgulf, Inc. (Texasgulf), filed an application to amend certain certificates currently held by Texasgulf to show Elf as certificate holder and to redesignate the related rate schedules.

By Conveyance effective March 31, 1983, Texasgulf transferred and assigned to Elf all of its right, title and interest in and to the Texasgulf gas properties. Elf proposes to continue, as successor, all of the Texasgulf's ongoing sales. The various dockets and rate schedules involved are listed in the attached Appendix.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-312-000]

Equitable Gas Co.; Application

May 26, 1983.

Take notice that on May 4, 1983, Equitable Gas Company (Applicant), 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219, filed in Docket No. CP83-312-000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon from its interstate system certain natural gas compression facilities and related building structures and for a certificate of public convenience and necessity authorizing the construction and operation of replacement facilities at its Burnsville compressor station, Braxton County, West Virginia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon its 6,000 horsepower Burnsville compressor station and appurtenant facilities now in operation in the City of Burnsville, Braxton Country, Salt Lick District, West Virginia, due to the old age and outmoded steam engines used in compressing of the natural gas.

Applicant proposes to replace its existing compressor station, at the same location, with a station of modern design and technology having a total of 3,300 installed horsepower at an estimated cost of $7,000,000. Such cost, it is asserted, would be financed from general funds of the company.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. RP83-89-000]

Midwestern Gas Transmission Co.; Tariff Filing

May 26, 1983.

Take notice that on May 24, 1983, Midwestern Gas Transmission Company (Midwestern) tendered for filing First Revised Sheet No. 21 and Original Sheet No. 21A to Original Volume No. 1 of its FERC Gas Tariff to be effective June 1, 1983.

Midwestern states that the revisions make changes in the minimum bill provisions of Midwestern's Southern System Rate Schedule CD–1 pursuant to a settlement between Midwestern and its customers who purchase under Rate Schedule CD–1. Midwestern states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP81-19-002]

Northwest Pipeline Corp.; Amendment

May 26, 1983.

Take notice that on May 5, 1983, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84410, filed in Docket No. CP81–19–002 an amendment to the pending application filed in Docket No. CP81–19–000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect no limit to the annual volumes of natural gas available for sale to Southwest Gas Corporation (Southwest), as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that on October 17, 1980, Applicant filed in Docket No. CP81–19–000 an application for a certificate of public convenience and necessity authorizing the establishment of a new point of delivery for the sale and delivery of natural gas to Southwest. It is asserted that the proposed delivery point would be at an existing point of interconnection between the facilities of Applicant and El Paso Natural Gas Company in the vicinity of Ignacio, Colorado. The proposed sale to Southwest would be made pursuant to Applicant's Rate Schedule ODL–1 and would be made within Southwest's present ODL–1 contract entitlement, it is asserted. Applicant proposed to limit the maximum deliveries of gas at the proposed delivery point to 500,000 therms equivalent per day and 30,000,000 therms equivalent annually.

Applicant proposes in this amendment to the application to limit the volumes of natural gas available for sale to Southwest at the proposed delivery point to a price not to exceed Applicant's system average gas costs. Applicant states that it no longer considers an annual limitation to be appropriate and therefore requests that the annual limitation not be imposed. Applicant further states that it is willing to accept a certificate of public convenience and necessity conditioned as follows:

(a) It is Applicant's intent that deliveries of natural gas at the Ignacio delivery point shall be limited to those incremental volumes of natural gas that Applicant is able to deliver for resale to Southwest at a price not to exceed Applicant's system average gas cost at the time of delivery.

(b) The volumes of natural gas which Applicant is authorized to sell and deliver to Southwest at the proposed Ignacio delivery point shall not exceed 500,000 therms on a daily basis.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

BILLING CODE 6717-01-M

[Docket No. CP82-470-001]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Amendment to Application

May 20, 1983.

Take notice that on May 2, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP82-470-001 an amendment to its pending application filed in Docket No. CP82-470-000 pursuant to Section 3 of the Natural Gas Act so as to reflect a change in the maximum daily quantity of natural gas proposed to be imported from Canada to the United States from 309,000 Mcf to 209,000 Mcf, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Tennessee states that due to the Reasons for Decision issued by the National Energy Board of Canada (NEB) on January 27, 1983, Tennessee is amending its import application to reflect the deletion of its request to import gas to be produced by Ocelot Industries Ltd.

Tennessee seeks to recover the cost of that gas which it would import under the authorizations requested in its instant application by means of its purchased gas adjustment provision in Article XXIII of the General Terms and Conditions of its FERC Gas Tariff and by means of a waiver of § 154.38(d)(4) of the Commission's Regulations to the extent that the Commission determines that such waiver is necessary.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 3, 1983, file with the Federal Energy Regulatory Commisssion, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Except for those persons that have previously been permitted to intervene, any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-309-000]

Transcontinental Gas Pipe Line Corp.; Application

May 26, 1983.

Take notice that on May 3, 1983, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP83-309-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for The New Jersey Zinc Company, Inc. (NJZ), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 3,700 dt equivalent of natural gas per day for NJZ on an interruptible basis for six months. Applicant contends that NJZ is an eligible user of natural gas as defined in Section 157.102 of the Commission's Regulations. Applicant submits that NJZ has arranged to purchase natural gas from Industrial Energy Services Company (IESCO), a broker purchasing gas from Atlas Resources, Inc. (Atlas), for use in NJZ's Palmerton, Pennsylvania, ammonia plant.

It is further stated that Columbia Gas Transmission Corporation (Columbia) would receive up to 3,700 dt equivalent of gas per day from IESCO via Columbia's existing interconnections with Atlas in Indiana County, Pennsylvania, and would redeliver such quantities, minus line loss and fuel retention charged by Columbia, to Applicant at the existing interconnection of Applicant and Columbia at Young Woman's Creek, Clinton County, Pennsylvania. Applicant, in turn, would transport such quantities by displacement and deliver them for NJZ's account to Union Gas Company (Union), an existing customer of Applicant at Palmerton, Pennsylvania, it is stated. Union would redeliver the gas ultimately at existing delivery points with NJZ, it is further explained.

It is stated that for such transportation service, NJZ would initially pay Transco 32.1 cents per dt equivalent delivered. Such service would be subordinate to

deliveries to Union under Applicant's Rate Schedules CD, GSS, LGA, PS, WSS and ISP, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate if required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transco to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-307-000]

Arkansas Louisiana Gas Co., a Division of Arkla, Inc.; Application

May 27, 1983.

Take notice that on May 3, 1983, Arkansas Louisiana Gas Company, a division of Arkala, Inc. (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP83-307-000 and application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the sale for resale of natural gas to the Town of Mangum, Oklahoma (Mangum), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that at the request of Mangum, it has bought the municipally-owned distribution system and taken over its operation. Applicant, therefore, proposes the abandonment of its sale of gas to Mangum for resale as Applicant would be delivering gas into its own distribution facilities. Applicant submits that the volumes sold to Mangum have averaged less than 110 Mcf per day for the last six years. Applicant points out that it is not requesting abandonment authorization for its tap and related facilities by means of which it has heretofore effected the delivery of gas from its transmission line to the subject distribution system because those facilities would continue to be used in the same service.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 17, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. CP83-336-000]

City of Pensacola, Florida v. United Gas Pipe Line Co.; Petition for Declaratory Order and Complaint

May 27, 1983.

Take notice that on May 4, 1983, the City of Pensacola, Florida (Pensacola), Energy Services, 105 East DeSota Street, Pensacola, Florida 32501, pursuant to the Natural Gas Act and the Commission's Regulations thereunder, has filed a petition for declaratory order[1] and complaint. Pensacola seeks, *inter alia*, a declaration that the full requirements provision of the service agreement between it and United Gas Pipe Line Company (United) is unjust, unreasonable, unduly discriminatory and preferential and that certain articles in the service agreement are in conflict with United's FERC Gas Tariff as to partial requirements customers. Pensacola also asserts that United has permitted some customers with full requirements service agreements to pursue second source supplies. Pensacola also asserts that United seeks to use its monopoly position to thwart competition, contrary to the antitrust and antimonopoly laws and decisions. Pensacola also requests, *inter alia*, that an investigation be initiated and that a hearing be convened to take evidence on matters set forth in its petition.

Any person desiring to be heard or to make any protest with reference to said petition and complaint should, on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition

[1] Pensacola's petition is styled "Motion to Intervene, Protest, Complaint, and Petition for Declaratory Order."

to intervene in accordance with the Commission's Rule.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP78-41-002]

Columbia Gas Transmission Corp.; Equitable Gas Co.; Petition To Amend

May 27, 1983.

Take notice that on April 14, 1983 Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, S.E., Charleston, West Virgina 25314, and Equitable Gas Company (Equitable), 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219, filed in Docket No. CP78-41-002 a petition to amend the order issued April 13, 1978, in Docket No. CP78-41 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas to an additional delivery point from Columbia to Equitable and the transportation of gas owned by any Equitable subsidiary, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners were authorized, *inter alia*, to transport and exchange natural gas pursuant to a transportation and exchange agreement dated October 18, 1977. It is asserted that this agreement provides that delivery of exchange volumes of natural gas may be made at such other points not enumerated therein as are mutually agreed upon. Petitioners have agreed upon and request authorization for a new point of delivery from Columbia to Equitable at an existing point of interconnection between Columbia and Texas Eastern Transmission Corporation (Texas Eastern) near Waynesburg, Greene County, Pennsylvania. It is asserted that deliveries at this location would not exceed 30,000 Mcf per day on a firm basis and in addition up to 20,000 Mcf per day on a best-efforts basis provided that the combined delivery at this location plus deliveries at the existing Waynesburg delivery point would not exceed 50,000 Mcf per day for the five-month period, November through March, and 30,000 Mcf per day for the seven-month period, April through October. It is stated that all deliveries made at the new delivery point would be made by Columbia to Texas Eastern for Equitable's account.

Further, Equitable has requested and Columbia has agreed that gas owned by any Equitable subsidiary may be transported under the transportation and exchange agreement of October 18, 1977, so long as the total volumes transported thereunder do not exceed 70,000 Mcf per day. Authority for such transportation is also requested herein.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 17, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14749 Filed 6-1-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-437-000]

Commonwealth Edison Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, and Establishing Hearing and Price Squeeze Procedures

Issued: May 27, 1983.

On March 31, 1983, Commonwealth Edison Company (Commonwealth) tendered for filing increased rates for firm service to its five full requirements customers.[1] The proposed rates would increase revenues by approximately $8.6 million (18.6%) for the calendar year 1983 test period. Commonwealth requests that the proposed rates because effective on May 31, 1983. The proposed rates are based on a cost of service study which includes no CWIP in rate base that would not qualify under existing Commission regulations. However, Commonwealth requests that sufficient CWIP be added to rate base to offset any downward adjustments ultimately made to its cost of service.

Notice of the filing was published in the **Federal Register**, with comments due by April 26, 1983. The Cities of Batavia, Geneva, Naperville, Rock Falls, and St. Charles, Illinois (Cities) filed a timely protest and motion to intervene. The Cities raise various cost of service and rate base issues,[2] allege that the proposed rates will create a price squeeze, request a five month suspension, and request that the Commission abandon its policy of phasing price squeeze issues and deal with that issue immediately. The Cities also request that the Commission reject Commonwealth's request for inclusion of sufficient non-qualifying CWIP in rate base to offset any cost of service adjustments.

While the Cities have been involved in substantial litigation before the Commission in prior cases, they state that their present attorneys and consultants have not participated in that prior litigation. Therefore, the Cities assert that they are not yet in a position to make a judgment as to which issues, if any, in this docket should be governed by the outcome of prior litigation or which issues, although previously addressed, have been affected by changed circumstances or other factors. Accordingly, the Cities request that all decisions concerning the precedential effect of prior cases be deferred for consideration by the presiding administrative law judge.

On May 11, 1983, Commonwealth filed an answer to the Cities' protest and motion to intervene. Commonwealth disputes the allegations that its cost of service is excessive or improper. Commonwealth does not, however, oppose the Cities' intervention in this proceeding. As to the Cities' contention that CWIP is not properly includable in Commonwealth's filing, Commonwealth states that the Commission at a public meeting on March 10, 1983, decided to adopt a rule allowing up to 50% of a utility's CWIP in rate base. By that decision, Commonwealth argues that the Commission effectively abandoned its CWIP policy as embodied in § 2.16 of the Commission's regulations. Therefore, it is Commonwealth's belief that the disposition of its filing should be governed by the Commission's March 10th "decision," not § 2.16 of the Commission's regulations.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motion to intervene serves to make the Cities parties to this proceeding.

---

[1] *See* Attachment A for customers and rate schedule designations.

[2] These issues include: (1) Claimed return on common equity; (2) rate design; (3) demand and energy allocators; (4) test period expense and load projections; (5) calculation of income tax; and (6) inclusion of the cost of unenriched uranium in rate base.

We shall deny Commonwealth's request to support the proposed rates by including sufficient non-qualifying CWIP in rate base as an offset to any cost of service adjustments. As noted, this request was made in anticipation of revised regulations changing the Commission's CWIP policy; Commonwealth did not allege that it was experiencing severe financial difficulty under § 2.16 of our regulations as it existed at the time of Commonwealth's filing. Cities contend that Commonwealth's request is contrary to the effective regulations and would constitute a moving target. They argue persuasively that a utility generally controls the timing, magnitude, and cost support of its rate filings and that substantial resources would be squandered in litigating various cost of service issues if the utility were later able to negate any adverse consequences by a simple offset based on a rule which had not issued at the time of filing. We note that a final rule pertaining to CWIP was issued in Docket No. RM81–38–000 on May 16, 1983. That rule expressly provides that it does not become effective until thirty days after publication in the **Federal Register**; the rule further provides the specific filing requirements and conditions under which a utility may *file* to include CWIP in rate base *on and after* the effective date of the rule. Thus, the new regulations cannot apply to anticipatory filings or requests such as Commonwealth's.

As noted, the Cities' request that all decisions regarding which issues in this docket are properly governed by prior litigation should be referred to the presiding judge. Inasmuch as the issues raised by this filing may be more clearly defined after discovery has taken place, we agree that it is appropriate to leave such questions initially to the presiding judge.

Our review of Commonwealth's submittal and the pleadings indicates that the proposed rates have not been shown to be just and reasonable, and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. We shall therefore accept Commonwealth's rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82–23–000, 18 FERC ¶ 61,189 (1982), we explained the Commission's suspension policy and noted that rate filings would ordinarily be suspended for five months where preliminary review indicates that the proposed rates may be unjust and unreasonable and may produce substantially excessive revenues, as defined in *West Texas*. Because our review suggests that Commonwealth's rates may be substantially excessive, we shall suspend the rates for five months from 60 days after filing, to become effective, subject to refund, on October 31, 1983.

In light of the Cities price squeeze allegations, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79–339–000, 8 FERC ¶ 61,131 (1979).[3]

The Commission orders:

(A) Commonwealth's proposed rates are hereby accepted for filing and suspended for five months from 60 days after filing, to become effective, subject to refund on October 31, 1983.

(B) Commonwealth's request that sufficient CWIP be added to rate base to offset any cost of service adjustments ultimately ordered is hereby denied.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly section 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Commonwealth's rates.

(D) The Commission staff shall serve top sheets in this proceeding on or before June 14, 1983.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service to top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates, to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure, and to determine which issues in this proceeding should be governed by prior litigation involving Commonweath and the Cities.

(F) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate, which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(G) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

[3] While the Cities generally challenge the appropriateness of our established phasing practice and urge that it be abandoned, barring such relief, they have not suggested that extraordinary circumstances exist so as to justify an exception in their case.

[Project No. 6397–001]

Lawrence J. McMurtrey; Suspending 120-Day Period for Action on Small Hydro Exemption

May 27, 1983.

Lawrence J. McMurtrey filed an application for exemption for the proposed Project No. 6397–001, located in Snohomish County, California. The application was filed pursuant to Section 408 of the Energy Security Act of 1981 and § 4.101 *et seq.* of the Commission's regulations.

Having determined that additional time is necessary for action on the application in order to ensure full consideration of all information and comments that have been received, the 120-day period for Commission action is suspended pursuant to § 4.105(b)(5)(iv).

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP83-7-001]

Louisiana Resources Co.; Amendment to Application

May 26, 1983.

Take notice that on May 24, 1983, Louisiana Resources Company (Applicant), Post Office Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-7-001, an amendment to its pending application filed in Docket No. CP83-7-000 pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 so as to reflect a change in the transportation service to be provided Southern Natural Gas Company (Southern), all as more fully set for th in the amendment which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a gas transportation agreement dated June 10, 1982, it proposes to transport on behalf of Southern up to 150 billion Btu's of gas per day on firm basis for a 15-year term. Applicant further states that said agreement has been amended by agreement dated May 20, 1983, that changes the proposed transportation service by (1) deleting the minimum annual charge as an element of the rate and charge to be assessed Southern for the service, and (2) deleting the right Southern to extend the agreement an additional 5 years in order to make up for any transportation service paid for under the minimum annual charges but not actually provided by Applicant.

Any person desiring to be heard or to protest with reference to said amendment should on or before June 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 385.214, or 385.211). All protests filed with Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14752 Filed 6-1-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-420-000]

Northern States Power Company (Wisconsin); Order Accepting for Filing and Suspending Rates, Noting Interventions, and Establishing Hearing Procedures

Issued: May 27, 1983.

On March 29, 1983, Northern States Power Company (Wisconsin) (NSP-W) filed a proposed two-phase increase in rates for service to its thirteen wholesale customers.[1] The proposed Phase A rates would increase revenues from NSP-W's wholesale customers by approximately $404,550 (3.19%) for the calendar year 1983 test period. The Phase B rates would further increase revenues by an additional $102,950, representing a total increase of 4.09%. NSP-W requests that its Phase A rates be allowed to become effective on May 30, 1983; and effective date of May 31, 1983, is proposed for the Phase B rates. Further, NSP-W requests that if the Commission determines that the Phase B increase should be suspended for one day, that the Phase A increase be deemed withdrawn.

NSP also proposed to transfer service to its only partial requirements customer, the City of Barron, from its LP-1 rate to its full requirements W-1 rate since Barron no longer intends to use its own generation to meet portions of its load. Since Barron is NSP-W's only partial requirements customer, NSP-W has also filed a notice of cancellation of the LP-1 rate.

Although the proposed rates retain the rate structure of the present rates, NSP-W has also submitted proposed rates W-1 and PS-1 which are based on claimed short-run marginal costs. The proposed marginal cost-based rates would produce the same revenue as the proposed rates. NSP-W requests that the marginal cost-based rates be implemented prospectively after a final Commission decision in this docket.

Notice of NSP-W's filing was published in the **Federal Register** (48 FR 15686-87), with comments due on or before April 21, 1983. On April 21, 1983, a motion to intervene and request for a five month suspension and hearing was filed on behalf of the Cities and Villages ob Bangor, Baron, Bloomer, Cadott, Cornell, Spooner, and the Wisconsin Public Power Incorporated System (Cities).[2] On April 20, 1983, the Public Service Commission of Wisconsin filed a notice of intervention.

In support of their request for a five month suspension, the Cities raise a number of rate base, cost of service, and allocation issues.[3] The Cities have also requested that we specifically note that this proceeding may require a price squeeze investigation, but assert that they cannot now determine if hearing on price squeeze will be necessary.

On May 9, 1983, NSP-W answered the Cities' motion. NSP-W does not oppose the request to intervene or the Cities' request for a hearing. It does, however, object to the motion for a five month suspension. NSP-W disputes the Cities' proposed adjustments and further contends that, even assuming their appropriateness, the cost of service impact of these adjustments has been overstated.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed notice and motion to intervene serves to make the Wisconsin Commission and the Cities parties to this proceeding.

Our preliminary examination of NSP-W's filing and the pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be injust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

The Commission explained its suspension policy in *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (1982). There we stated that, where preliminary examination indicates that revised rates may be unjust and unreasonable and maybe substantially excessive, as

---

[1] Twelve of these wholesale customers, the Cities and Villages of Bangor, Black River Falls, Bloomer, Cadott, Cornell, New Richmond, Rich Lake, River Falls, Spooner, Trempealeau, Westby and Whitehall currently receive full requirements service under rate W-1. The other wholesale customer, the City of Barron, is currently a partial requirements customer served under rate LP-1. *See* Attachment A for rate schedule designations.

[2] The Wisconsin Public Power Incorporated System (SYSTEM) is a municipal electric company formed pursuant to State law by 28 Wisconsin municipalities and is authorized to serve as the bulk power supplier of its members. It receives service from NSP-W pursuant to contracts with five municipalities (Black River Falls, New Richmond, River Falls, Westby, and Whitehall) which have been assigned to SYSTEM with the consent of NSP-W.

[3] These issues include: (1) Revenue requirements for return on production plant and Tyrone Energy Park amortization; (2) stated depreciation expenses; (3) income tax expense; (4) wholesale demand and energy allocation factors; (5) mechanics for synchronization of test period fuel expenses and revenues; (6) calculation of labor ratios; (7) claimed fuel inventory, regulatory commission expense, and rate of return; (8) a proposed late payment charge; (9) the proposed peak shaving service demand charge; (10) an energy tilt in the rate design to the detriment of low load factor customers; and (11) treatment of future estimated nuclear fuel storage costs.

described in *West Texas*, we will ordinarily suspend the rates for the maximum five months. In the case at hand, our preliminary review suggests that both the Phase A and Phase B rates proposed by NSP–W may produce substantially excessive revenues. Accordingly, we shall suspend the Phase A and Phase B rates for five months to become effective, subject to refund, on October 30, 1983, and October 31, 1983, respectively.

With respect to the Cities' price squeeze concerns, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power & Light Company*, Docket No. ER79–339–000, 8 FERC ¶ 61,131 (1979).

With respect to the proposed notice of cancellation of the partial requirements service rate LP–1 tariff sheets, we shall accept that notice of cnacellation for filing, effective May 31, 1983. As noted, the City of Barron is the only customer now served under the LP–1 rate. Elimination of this partial requirements service to Barron will have no revenue effect because the unit charges under the LP–1 rate and the W–1 rate are identical and Barron has indicated that it does not intend to use its generation to meet its load. Thus, the billing determinants for Barron will be unchanged if Barron is served, as proposed by NSP–W, under the full requirements W–1 rate.

The Commission orders:

(A) NSP–W's proposed Phase A and Phase B rates are hereby accepted for filing and are suspended for five months, to become effective, subject to refund, on October 30, 1983, and October 31, 1983, respectively.

(B) NSP–W's notice of cancellation of its rate LP–1 tariff sheets is accepted for filing to become effective on May 31, 1983, and service to the City of Barron shall be provided under the applicable full requirements rate W–1.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness or NSP–W's rates.

(D) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(F) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(G) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

Designation and Description

1. Fifth Revised Sheets Nos. 1 and 2 under FERC Electric Tariff Original Volume No. 1 (Cancels FERC Electric Tariff Original Volume No. 1)—Notice of Cancellation of Rate LP–1 Tariff Sheets

[FR Doc. 83–14753 Filed 6–1–83; 8:45 am]
BILLING CODE 6717–01–M

[Docket No. ES83–45–000]

Pacific Power & Light Co.; Application

May 27, 1983.

Take notice that on May 19, 1983, Pacific Power & Light Company filed its application with the Federal Energy Regulatory Commission, pursuant to Section 204 of the Federal Power Act, seeking an order authorizing it to issue and sell its commercial paper from time-to-time in aggregate principal amounts not to exceed $150,000,000 at any one time outstanding. The authority requested is a renewal of authority granted in 1981 and expiring June 30, 1983.

Any person desiring to be heard or to make any protest with reference to the application should, on or before June 17, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with 18 CFR 385.211 or 385.214, respectively.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER83–433–000]

Rochester Gas & Electric Co.; Order Accepting for Filing and Suspending Transmission Rate Schedule, Granting Intervention, and Establishing Procedures

Issued: May 27, 1983.

On March 31, 1983, Rochester Gas & Electric Company (RG&E) tendered for filing increased rates and new terms and conditions[1] for wheeling firm Niagara Project capacity and energy to customers of the Power Authority of the State of New York (PASNY).[2] The change is contained in a letter agreement between RG&E and PASNY dated November 23, 1982. The proposed wheeling rate would increase revenues by approximately $190,000 (236%) based on a calendar year 1981 test period.

In addition, the instant submittal would modify the present agreement by committing RG&E to provide firm service rather than providing service only to the extent that excess transmission capacity is available. The proposed filing requires PASNY to supply RG&E with a five-year load forecast to provide sufficient time for RG&E to construct the transmission facilities necessary to meet the full requirements of PASNY's customers. The agreement also provides that, if PASNY fails to provide timely load forecasts and RG&E cannot install needed facilities on a timely basis without incurring extraordinary costs, RG&E will perform the required installation only upon agreement by the affected PASNY customers to reimburse RG&E. Under the proposed agreement, if a PASNY customer experiences a temporary load increase necessitating system reinforcement, RG&E would not be required to serve the additional load unless the customer pays for the cost of the system reinforcement. However, RG&E would be required to refund this amount if permanent increases in load within the subsequent ten-year period would warrant equivalent system reinforcement. RG&E requests a July 1, 1983, effective date for its revised rates, terms, and conditions.

Notice of the filing was published in the **Federal Register**, with comments due on or before April 25, 1983. On April 29, 1983, PASNY filed a late motion to intervene in support of RG&E's submittal. PASNY states that it has a direct financial interest in this proceeding which cannot be adequately represented by any other party.

On May 4, 1983, the Municipal Electric Utilities Association of New York (MEUA) filed a motion for leave to file out of time followed on May 5, 1983, by a motion to intervene out of time. MEUA requests that it be permitted to intervene, that the filing be suspended for one day, and that a hearing be held on the lawfulness of the proposed rates and service conditions. In support of its requests, MEUA states that: (1) Actual notice of RG&E's filing was provided to PASNY and to the New York Public Service Commission, but not to PASNY's customers, Angelica and Spencerport; (2) a one-day suspension is warranted under the rule enunciated in *West Texas Utilities Company*, 18 FERC ¶61,189 (1982); (3) RG&E's claimed rate of return on common equity is not justified in today's economic climate; (4) RG&E has not allocated cost of service items correctly, including A&G expenses, taxes, materials and supplies, prepayments, and Federal income taxes; (5) a proposed limitation in service relating to contiguous service areas is unduly discriminatory or needs clarification; (6) the ability of RG&E to withhold additional delivery points may prevent competition by PASNY customers in the future; (7) language with respect to providing load forecasts by PASNY and limitations on firm service is ambiguous; and (8) language with respect to construction of facilities does not include notice provisions.

On May 20, 1983, RG&E filed an answer to MEUA's motion. RG&E states that none of the members of MEUA has a direct interest in RG&E's filing and that only Angelica and Spencerport have an indirect interest as affected PASNY customers. Thus, RG&E opposes MEUA's motion to intervene for any purpose other than as a representative of Angelica and Spencerport. In addition, RG&E states that MEUA has attempted to raise issues which do not apply to the transmission service required by Angelica and Spencerport; therefore, RG&E also opposes any effort by MEUA to address issues which are generic to other transmission services rendered by other utilities. RG&E responds to each of the specific matters raised by MEUA, arguing that its proposed transmission rate has been developed at a level substantially lower than its cost of service would support, that the adjustments suggested by MEUA are improper or of no net rate effect, and that the challenged terms and conditions of service are both necessary and reasonable. RG&E concludes that no evidentiary hearing is needed in this docket and that suspension is not warranted.

Discussion

Given the early stages of this proceeding, the apparent interests of PASNY and at least some MEUA

[1] The rate schedule designation is: *Rochester Gas and Electric Corporation*, DC–A–32, Supplement No. 1 to Rate Schedule FERC No. 25.

[2] PASNY operates the Niagara Hydroelectric Project. RG&E wheels capacity and energy to two of PASNY's customers, the Villages of Angelica and Spencerport, New York. The present RG&E rates have been in effect since 1961.

members in the outcome of this case, and the fact that no undue delay or prejudice should occur as a result of the late interventions, we find that good cause exists to permit PASNY and MEUA to intervene out of time. We shall not at this time attempt to limit the degree of participation by MEUA as a representative of its membership or to define the precise scope of this proceeding, as requested by RG&E. After having heard the positions of all participants, we believe that the presiding judge will be in a better position to evaluate the relevance of particular issues and to preclude consideration of matters not germane to the filing in this docket.

Our preliminary examination of RG&E's filing and the pleadings indicates that the proposed rates, terms, and conditions have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the submittal for filing and suspend its operation as ordered below.

The Commission explained in *West Texas Utilities Company, supra,* that, where preliminary examination indicates that revised rates may be unjust and unreasonable but may not be substantially excessive, as described in *West Texas,* we will ordinarily suspend the rates for one day. Our review in this case suggests that the proposed rates may not be excessive. In any event, MEUA has requested only a one day suspension. Accordingly, we shall suspend the proposed rates, terms, and conditions for one day from the proposed effective date, to become effective, subject to refund, on July 2, 1983.

Two aspects of RG&E's filing require further comment. As noted, the submittal contains provisions requiring PASNY's customers to reimburse RG&E for (1) extraordinary costs incurred in constructing additional transmission facilities to meet projected increases in load, and (2) construction costs for system reinforcement to supply additional temporary load increases. We take this opportunity to advise RG&E that implementation of either provision will constitute a change in rate and will require a timely filing pursuant to § 35.13 of the Commission's regulations accompanied by appropriate data and computations showing the basis for the change in rate.

The Commission orders:

(A) RG&E's submittal is hereby accepted for filing and suspended for one day to become effective on July 2, 1983, subject to refund.

(B) The untimely interventions by PASNY and MEUA are hereby granted subject to the Commission's Rules of Practice and Procedure.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of RG&E's rates, terms, and conditions for the wheeling service at issue.

(D) The Commission's staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall promptly publish this order in the Federal Register

By the Commission

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14795 Filed 6-1-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER83-427-000 and ER83-428-000]

Utah Power & Light Co.; Order Accepting for Filing and Suspending Rates, Granting Summary Disposition, Noting Interventions, Consolidating Dockets, and Establishing Hearing and Price Squeeze Procedures

Issued: May 27, 1983.

On March 31, 1983, Utah Power & Light Company (Utah) tendered for filing in Docket No. ER83-427-000 increased tariff rates for firm power service to 17 full and partial requirements wholesale customers.[1] At the same time Utah tendered for filing in Docket No. ER83-428-000 increased rates to the City of Manti, Utah (Manti) under a separate rate schedule. The proposed rates in Docket No. ER83-427-000 would increase revenues in two steps. The first step (Phase I) would increase revenues by approximately $4,244,000 (6%) during the calendar year 1983 test period. The second step (Phase II) would further increase rates by approximately $11,315,000 (23%), or a total increase of approximately $15,559,000 (29%). The requested effective dates are May 31, 1983, and June 1, 1983, for the Phase I and Phase II rates, respectively. The proposed rates for Manti, essentially identical to the Phase II rates in Docket No. ER83-427-000, would result in an increase in annual revenues from that customer of approximately $89,000 (101%), based on estimated sales for 1983. Utah requests that the increased rates to Manti become effective prospectively following a final Commission order, in accordance with Manti's service agreement.

Notice of the instant filings was published in the Federal Register ,[2] with comments due on or before April 22, 1983.

Three timely interventions were filed in Docket No. ER83-427-000 and one timely intervention was filed in Docket No. ER83-428-000.

An untimely intervention was filed in Docket No. ER83-427-000 by the Navajo Tribal Utility Authority (NTUA). NTUA's motion to intervene was filed April 27, 1983, five days late, although the accompanying certificate of service states that it was mailed on April 21, 1983. NTUA states that it is a wholesale customer of Utah and that its interests will not be adequately represented by any other intervenor. NTUA requests that Utah's proposed rates be suspended for five months, although NTUA does not raise any specific substantive issues.

The Public Service Commission of Nevada filed a timely notice of intervention in Docket No. ER83-428-000 which raises no specific issues.

Sierra Pacific Power Company (Sierra) requests a hearing and identifies a number of cost of service and rate design issues in connection with Utah's filing. Sierra notes that the issue of transmission functionalization and allocation is a subject of litigation at this time in a pending Utah rate case in Docket No. ER82-211-000. With respect to Utah's proposed CWIP-based rates, Sierra reserves the right to contest the consistency of Utah's filing with any revised CWIP regulations ultimately

[1] *See* Attachment A for rate schedule designations.

[2] 48 FR 15689 (April 12, 1983).

issued by the Commission. Sierra states that it has not had time to complete an in-depth analysis of Utah's filing, so that it may seek to raise other issues in addition to those discussed in its motion to intervene.[3]

The Tri-State Intervention Group (Tri-State) [4] filed a protest, motion to intervene, and motion to suspend Utah's rates for five months. Tri-State raises a variety of cost of service and rate design issues [5] and alleges that the proposed rates would result in a price squeeze. Tri-State also contends that the Commission should apply its suspension analysis on a class-by-class basis, citing the Commission's order in *Ohio Power Company*, Docket Nos. ER82–533–000 and ER82–534–000, 20 FERC ¶61,081 (1982).

Manti filed a protest, motion to intervene, and motion to reject the filing in Docket No. ER83–428–000. Manti urges rejection of Utah's filing for Manti on the ground that it is unduly discriminatory because it provides for a larger percentage increase in rates for Manti than for Utah's other wholesale customers. Manti also challenges Utah's proposed ratchet for Manti and for Utah's other partial requirements customers. Manti alleges that the ratchet has been previously rejected in Opinion No. 113, *Utah Power & Light Company*, Docket No. ER79–121–000, 13 FERC ¶61,162 at 61,300 (1981). Manti contends that Utah's proposed ratchet is a further basis for rejection of Utah's filing. In the event that the filing is not rejected, Manti requests a hearing and consolidation with Docket No. ER83–427–000.

Utah filed timely responses to the motions by Manti and Tri-State on May 4, 1983, and May 9, 1983, respectively. Utah contends that Manti's motion to reject Utah's filing as discriminatory ignores the fact that Manti's contract status means that rates previously filed in Docket No. ER82–211–000 are not currently in effect for Manti as they are for Utah's other customers. Utah contends that Manti's separate status as a customer with a contract allowing only for prospective rate changes makes a separate filing for Manti appropriate and makes consolidation of the two dockets inappropriate. Finally, Utah argues that Opinion No. 113, *supra*, does not preclude Utah from filing a rate design incorporating a ratchet.

Concerning the question of consolidation, Utah asserts that different evidentiary standards apply in proceedings under sections 205 and 206 of the Federal Power Act and that the timing of the effective dates for the proposed rates make the interests of Manti different from the interests of the other customers in pursuing prompt resolution of the proceeding. Utah also asks that if the Commission does consolidate the two dockets, it order Manti "to participate fully in the hearing and litigate the issues attendant to the [section] 206 proceeding so that the [section] 205 customers are not burdened with the prospect of trying those issues which are related solely to Manti's position."

In its response to Tri-State's pleading, Utah contends that Tri-State's arguments as to the percentage amount of the increase are fallacious inasmuch as they are based upon a comparison between the rates filed in this docket and settlement rates, rather than the rates currently being collected by Utah. Utah also argues against Tri-State's request that the Commission apply the criteria of *West Texas Utilities Company*, Docket No. ER82–23–000, 18 FERC ¶ 61,189 (1982), on a class-by-class basis. Utah contends that the Commission's order in *Ohio Power Company, supra*, is not precedent for the treatment sought by Tri-State because in *Ohio Power Company* the Commission set different suspension periods for two different filings and because the customer in one of the two dockets was a subsidiary of Ohio Power Company. Utah argues that in this docket such a class-by-class analysis would lead to regulatory chaos.

Utah also contends that its Phase I rates comply fully with ratemaking principles that have been previously adopted by the Commission and that the Phase II rates reflect certain additional costs that are fully supported in Utah's filing. With respect to the Phase II rates, Utah contends that the inclusion of CWIP in rate base is an appropriate issue for hearing. Utah further contends that the inclusion of CWIP in rate base is not pertinent to the Phase I rates because no CWIP was included in rate base for the cost of service supporting those rates.

Discussion

Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely notice and motions to intervene serve to make the Nevada Commission, Manti, Sierra, and Tri-State parties to this proceeding. Because of the early stage of this proceeding, NTUA's late motion to intervene will not prejudice other parties or delay the proceeding, and we find that good cause exists to grant the motion.

Manti's motion to reject the filing in Docket No. ER83–428–000 will be denied. Manti's allegations of undue discrimination and Utah's response raise questions of law or fact most appropriately decided on the basis of an evidentiary record. We note, however, that the rates proposed to Manti and the remaining customers are virtually identical. Manti's allegations with regard to Utah's proposed ratchet do not constitute a basis for rejection of Utah's filing. It appears that Utah's proposed ratchet may be sufficiently different from the ratchet at issue in Opinion No. 113, *supra*, that its use is a proper issue for hearing. Because Utah's filing substantially complies with our regulations and no other basis for rejection has been identified, rejection is not warranted.[6]

With respect to the question of whether the two dockets should be consolidated for purposes of hearing and decision, we find that consolidation is appropriate in this proceeding. Utah has filed the same cost of service in support of the proposed rates in each docket. Common issues of law and fact are clearly presented and a failure to consolidate the dockets would pose substantial risk of redundancy and wasted resources. We are not persuaded that undue delay in the proceeding will result from this decision.[7]

We note that Utah has not synchronized the interest expense used in its income tax calculation with the interest portion of the claimed rate of return. Although Utah has properly calculated the interest in the capitalization for rate of return purposes, Utah has improperly included approximately $154 million in investment tax credits as a separate

---

[3] In addition to the issues noted above, Sierra also raises the following issues: (1) Use of revenue credits for wheeling services; (2) classification of fixed and variable costs for allocation and rate design purposes.

[4] The group consists of Deseret Generation & Transmission Cooperative and its members; Strawberry Water Users Association; the Utah Cities of Blanding, Brigham, Levan, Nephi, Price, and St. George; and Soda Springs, Idaho.

[5] These issues include: (1) Adjustment of coincident peaks used to allocate demand-related costs; (2) claimed rate of return on equity; (3) inclusion of non-qualifying CWIP in rate base; (4) calculation of allowance for cash working capital; (5) deferred tax reserve deficiency; (6) accumulated deferred taxes as an offset to rate base; (7) impact of new generating capacity on cost of service; (8) use of revenue credits for firm wheeling revenues; (9) use of a demand ratchet; and (10) power factor charge.

[6] *See Municipal Light Boards of Reading and Wakefield, Mass. v. FPC*, 450 F.2d 1341 (D.C. Cir. 1971).

[7] We believe that Utah's concern regarding the degree and substance of Manti's participation in the hearing presents questions of procedure best left for resolution by the presiding judge and the parties.

component in the capitalization when developing the interest expense deduction for income taxes, resulting in a lower deduction than required. Commission policy and practice have consistently required the computation of the long-term debt cost component of the interest expense tax deduction as the product of a utility's allocated rate base and the weighted cost of long-term debt.[8] Accordingly we shall order summary disposition as to this issue.

With respect to Utah's inclusion of CWIP in rate base for its Phase II rates and for its rates to Manti, we note that the Commission recently reassessed its CWIP standards in Docket No. RM81–83–000. A final rule was issued in the docket on May 16, 1983. The company, however, based its request in this docket on the anticipated outcome of that rulemaking proceeding; Utah had not alleged that it was experiencing severe financial difficulty under section 2.16 of our regulations as it existed at the time of Utah's filing. We note that the final rule in Docket No. RM81–38–000 provides expressly that it does not become effective until thirty days after publication in the **Federal Register**; the rule further provides the specific filing requirements and conditions under which a utility may *file* to include CWIP in rate base *on and after* the effective date of the rule. Thus, the new regulations cannot apply to anticipatory filings such as Utah's. Accordingly, we shall reject Utah's proposed inclusion of CWIP in rate base, without prejudice to Utah's right to file revised rates after the effective date of the new rules, together with any requests for waivers which Utah might seek. Given the magnitude of our summary dispositions with regard to CWIP and the question of interest synchronization, we shall require Utah to refile its Phase II rates and its rates to Manti to reflect these determinations. As noted below, however, we have determined preliminarily that the Phase I rates may not be excessive. Consequently, refiling of those rates will not be required at this time.

Our preliminary review of Utah's filing and the pleadings indicates that the rates proposed in these dockets have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing, as modified by summary disposition, and we shall suspend them as ordered below.

In *West Texas Utilities Company, supra*, we indicated that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not produce substantially excessive revenues, as defined in *West Texas*. Because our preliminary review indicates that Utah's proposed Phase I Rates may not yield excessive revenues, we shall suspend those rates for one day to become effective, subject to refund, on June 1, 1983. With respect to the Phase II rates, however, preliminary review suggests that, even after summary disposition, the proposed increase may yield substantially excessive revenues. Accordingly, we shall suspend the Phase II rates for five months, to become effective, as modified by summary disposition and subject to refund, on November 1, 1983.[9] Utah' proposed rates for Manti, as modified by summary disposition, may become effective prospectively only following a final Commission order in this proceeding.

In accordance with the Commission's policy and practice established in *Arkansas Power & Light Company*, Docket No. ER79–339–000 8 FERC ¶ 61,131 (1979), we shall phase the price squeeze issue raised by Tri-State.

The Commission orders:

(A) Manti's motion to reject the filing in Docket No. ER83–428–000 is hereby denied.

(B) Summary disposition is hereby ordered with respect to: (1) Utah's failure to properly synchronize the interest expense in the income tax calculation with the interest portion of the claimed rate of return; and (2) Utah's inclusion of non-qualifying CWIP in rate base for its Phase II rates in Docket No. ER83–427–000 and for its proposed rates to Manti In Docket No. ER83–428–000. Within sixty (60) days of the date of this order, Utah shall file a revised cost of service as well as revised Phase II rates and rates to Manti which reflect these determinations.

(C) Utah's proposed Phase I and Phase II rates in Docket No. ER83–427–000 are hereby accepted for filing; the Phase I rates are suspended for one day from sixty days after filing, to become effective, subject to refund, on June 1, 1983, and the Phase II rates are suspended for five months to become effective, as modified by summary disposition and subject to refund, on November 1, 1983.

(D) Utah's proposed rates for Manti in Docket No. ER83–428–000 are accepted for filing, as modified by summary disposition to become effective prospectively only following a final Commission order in this proceeding.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Utah's rates.

(F) Docket Nos. ER83–427–000 and ER83–428–000 are hereby consolidated for purposes of hearing and decision.

(G) NTUA's late-filed motion to intervene is hereby granted pursuant to the Commission's Rules of Practice and Procedure.

(H) The Commission staff shall serve top sheets in this proceeding on or before June 14, 1983.

(I) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(J) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rates which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(K) The Secretary shall promptly publish this order in the **Federal Register**.

[8] *See, e.g., Gulf States Utilities Company*, Docket No. ER82–375–000, 20 FERC ¶ 61,039 (1982); *Public Service Company of New Mexico*, Opinion No. 133, Docket No. ER78–338–000 (Phases I and II), 17 FERC ¶ 61,123 (1981); *Union Electric Company, Opinion No. 94, Docket No. ER77–614–000, 12 FERC* ¶ 61,239 (1980); *Alabama Power Company*, Opinion No. 54, Docket No. E–8851, 8 FERC ¶ 61,083 (1979).

[9] We believe that our decision with regard to the suspension period for the Phase II rates moots the controversy between Utah and Tri-State over suspension on a class-by-class basis.

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A—Utah Power & Light Company

[Docket No. ER83-427-000]

Filing Date: March 31, 1983.

Effective Date: Phase I: June 1, 1983, subject to refund; Phase II: November 1, 1983, subject to refund.

Designation	Description
(1) FERC Electric Tariff, First Revised Volume No. 1 (Original Sheet Nos. 1 through 15.A) (Supersedes FPC Electric Tariff, Original Volume No. 1).	Phase I rates

BILLING CODE 6717-01-M

[Docket No. ER83-430-000]

Virginia Electric & Power Co.; Order Accepting for Filing and Suspending Rates, Granting Summary Disposition, Noting Interventions, and Establishing Hearing and Price Squeeze Procedures

Issued: May 27, 1983.

On March 31, 1983, Virginia Electric and Power Company (VEPCO) tendered for filing a proposed three-phase increase in rates for firm power service to ten municipal customers, eighteen cooperative customers, and the North Carolina Eastern Municipal Power Agency (NCEMPA). VEPCO also tendered for filing a three-phase increase in rates for transmission service to NCEMPA.[1]

The Phase-one rates provide for an increase in jurisdictional revenues of approximately $15.1 million (6.8%) for the calendar year 1983 test period. The Phase-two rates would increase jurisdictional revenues by an additional $8.9 million. The difference between the Phase-one and Phase-two rates consists of a higher rate of return on common equity and the inclusion in rate base of the unamortized costs associated with the company's cancellation of its nuclear facility at North Anna Unit 3. Finally, the Phase-three rates represent an additional increase of $10.3 million; this portion of the increase reflects the inclusion in rate base of 50% of VEPCO's average construction work in progress (CWIP) for the test period. According to the company, the third phase has been submitted as a result of public discussions by the Commission relating to the pending generic CWIP rulemaking in Docket No. RM81-38-000.

VEPCO requests "effective dates" of May 30, 1983, and May 31, 1983, for its proposed Phase-one and Phase-two rates, respectively. However, in accordance with a settlement agreement between VEPCO and its customers in Docket No. ER82-423-000, VEPCO requests that these rates be suspended until July 15, 1983. Moreover, VEPCO states that the Phase-one rates should be deemed withdrawn if the Commission suspends these rates beyond July 15, 1983, or if it suspends the Phase-two rates to no later than July 15, 1983. With respect to its Phase-three rates, VEPCO requests an effective date of May 31, 1983, with suspension until July 15, 1983, or until such later date as a final rule in Docket No. RM81-38-000 becomes effective. In this regard, VEPCO requests that the Phase-three rates become effective as a supplement to whatever rates are then in effect. As a related matter, VEPCO requests permission to supplement its filing to include any additional information that might be required by a final CWIP rule in Docket No. RM81-38-000.

Notice of the filing was published in the **Federal Register**, with responses due on or before April 25, 1983. The period for responses was later extended until May 2, 1983. The Secretary of the Navy (Navy) filed a timely motion to intervene. The Navy states that while VEPCO's Military Service (MS) rate schedule is not subject to this Commission 's jurisdiction, the terms of the Navy's contract with VEPCO link the MS rates to the rates set by the Commission for the RS rate schedule (Resale Service to Municipalities and Private Utilities). In developing rates for service to the Navy, VEPCO utilizes the same methodology, rate of return, test period, and effective date as those permitted with respect to the RS rate schedule.

Bear Island Paper Company (Bear Island) also filed a timely motion to intervene. Bear Island states that it is a high load factor industrial customer which purchases power furnished by VEPCO to the Rappahannock Electric Cooperative. Bear Island contends that its interests will not be adequately represented by other parties to this proceeding. While Bear Island raises no specific cost of service issues, it requests that VEPCO's proposed rates be suspended for five months and that hearing procedures be established.

On May 2, 1983, Old Dominion Electric Cooperative and Northern Virginia Electric Cooperative (Virginia Cooperatives) filed a motion to intervene. The Virginia Cooperatives request rejection of the filing on the grounds that the company's proposed Phase-one rates are not supported by a separate cost of service study. The Virginia Cooperatives also request rejection of the Phase-three CWIP rates on the grounds that the request is inconsistent with the Commission's current regulations concerning inclusion of CWIP in rate base. If the filing is not rejected, a five month suspension is requested for all three phases of VEPCO's increase. The Virginia Cooperatives support this suspension request on the basis of a number of alleged errors reflected in VEPCO's cost of service calculations.[2] In addition, the Virginia Cooperatives request that the Commission grant summary disposition with respect to the company's inclusion in rate base of the unamortized costs associated with the cancellation of North Anna Unit No. 3. Finally, the Virginia Cooperatives allege that the proposed rates may result in a price squeeze.

On May 2, 1983, separate motions to intervene were filed by (1) ElectriCities of North Carolina and the North Carolina Eastern Municipal Power Agency (ElectriCities), and (2) the North Carolina Electric Membership Corporation and Albemarle Electric Membership Corporation (North Carolina Cooperatives). These pleadings contain many of the same requests as those advanced by the Virginia Cooperatives. ElectriCities and the North Carolina Cooperatives also request rejection of the filing, rejection of the proposed Phase-three rates or a maximum suspension of all three phases, and summary disposition as to VEPCO's inclusion in rate base of plant cancellation costs. With respect to the price squeeze issue, the North Carolina Cooperatives ask that the price squeeze claims be heard initially rather than phased for later consideration.[3]

[1] *See* Attachment A for customers and rate schedule designations.

[2] These issues include rate of return, the mechanics of interest synchronization, support for O&M expenses, and the rate base and expense treatment of a facilities sale during the test period.

[3] The North Carolina Cooperatives raise several of the issues identified by the Virginia Cooperatives as well as the calculation of AFUDC amounts and wholesale coincidence factors, and the claimed

On May 13, 1983, VEPCO filed a response to the motions of the Virginia Cooperatives, ElectriCities, and North Carolina Cooperatives. VEPCO argues, *inter alia*, that there is no basis for the Commission to reject the entire filing or the Phase-three CWIP rates. VEPCO also argues that the Commission should deny the request for summary disposition with respect to VEPCO's inclusion in rate base of plant cancellation costs. If summary disposition is granted on this issue, however, VEPCO requests permission to amortize the cancellation costs over a five year period, instead of the ten year period reflected in VEPCO's originally filed rates and prepared testimony. The Company suggests that this approach would preclude the need to file reduced rates to reflect the summary disposition. Finally, VEPCO denies the existence of a price squeeze and argues, further, that its cost of service justifies its requested suspension period. VEPCO agrees with the intervenors on one point. The company states that it erred in the calculation of an interest expense deduction for income tax purposes and suggest that its rates should be refiled to reflect the appropriate calculation.

On May 18, 1983, ElectriCities filed a pleading amplifying its May 2, 1983 motion. The additional discussion was prompted by two intervening Commission actions: revised rules pertaining to CWIP issued on May 16, 1983, in Docket No. RM81–38–000; and a Commission decision in *Public Service Company of New Mexico*, Opinion No. 164, Docket No. ER81–187–000; issued May 13, 1983.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely motions to intervene serve to make the Navy, Bear Island, the Virginia Cooperatives, the North Carolina Cooperatives, and ElectriCites parties to this proceeding.

Contrary to the intervenors' claims, we find that VEPCO's filing as it relates to its Phase-one and Phase-two rates substantially complies with the Commission's filing requirements.[4] Consistent with our determination in *Southern California Edison Company*, 19 FERC 61,209 (1982), we believe that it is unnecessary to require VEPCO to file a separate cost of service for both the Phase-one and Phase-two rates. Accordingly, the motions to reject the filing on this basis will be denied.

However, the Commission will grant the requests to reject VEPCO's proposed Phase-three rates. As noted, the company sought to justify filing these rates based on discussions held during a Commission meeting relating to a pending rulemaking; VEPCO has not alleged that it was experiencing severe financial difficulty under § 2.16 of our regulations as it existed at the time of VEPCO's filing. While VEPCO offered to make its Phase-three rates effective only after issuance of a final CWIP rule and to supplement it filing if necessary, this portion of VEPCO's filing did not satisfy the then-effective CWIP criteria. As noted, the Commission isued revised CWIP regulations on May 16, 1983, in Docket No. RM81–38–000. The final rule, however, expressly provides that it does not become effective until thirty days after publication the **Federal Register**; the rule further provides the specific filing requirements and conditions under which a utility may *file* to include CWIP in rate base *on and after* the effective date of the rule. Thus, the new regulations cannot apply to anticipatory filings such as VEPCO's. Accordingly, we shall reject VEPCO's Phase-three rates without prejudice to VEPCO's right to file revised rates after the effective date of the revised rules, together with any requests for waivers which VEPCO might seek.

We shall also grant summary disposition with respect to VEPCO's inclusion in rate base of the cancellation costs associated with its North Anna Unit No. 3. This proposed treatment by VEPCO is contrary to well-established Commission precedent. *See, e.g., New England Power Co.*, Opinion No. 49, 8 FERC ¶ 61,054 (1979), *aff'd sub nom., NEPCO Municipalities Committee* v. *FERC*, 668 F. 2d 1327 (D.C. Cir. 1981); *Virginia Electric and Power Company*, Opinion No. 118, 15 FERC ¶ 61,052 (1983); and *Central Maine Power Company*, Docket Nos. ER82–155–000, *et al.*, 18 FERC ¶ 61,126 (1982). We note that VEPCO's prefiled testimony on this issue does not provide a basis for distinguishing this precedent. We also reject the company's alternative request to permit it to amortize these costs over a period other than that reflected in its prepared testimony and filed rates. VEPCO was free to develop its proposed rates and supporting testimony as it saw fit. Its decision was to develop rates reflecting a rate base inclusion contrary to established Commission precedent while proffering testimony suporting a ten year amortization period as consistent with prior Commission treatment of VEPCO cancellation costs. VEPCO has offered no support in its original filing or in its May 13 response for an amortization period other than ten years. The Commission "has long held that utilities may not present a 'moving target' by offering alernative justifications for previously filed rates." *Jersey Central Power & Light Company*, Docket No. ER82–426–000, 20 FERC ¶ 61,083 (1982). Because the revenue impact of our determination with respect to rate base inclusion of cancelled plant costs is substantial, VEPCO will be required to revise its Phase-two rates in accordance with our summary disposition.

We shall accept VEPCO's suggestion that it revise its rates to correct the calculation of the interest expense deduction for income tax purposes. Accordingly, the revised rates ordered herein shall also reflect this correction.

Our preliminary review of VEPCO's Phase-one and Phase-two rates and the intervenors' pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. As discussed below, we shall accept VEPCO's Phase-two rates for filing, as modified by summary disposition, and we shall suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82–23–000, 18 FERC ¶ 61,169 (1982), we noted that rate filings would ordinarily be suspended for five months where preliminary review indicates that the proposed increase may be unjust or unreasonable and may generate substantially excessive revenues, as defined in *West Texas*. Since our preliminary review indicates that both the Phase-one rates and the Phase-two rates, after summary disposition, would yield substantially excessive revenues, we shall suspend VEPCO's proposed Phase-two rates for five months, to become effective on October 31, 1983, subject to refund. Consistent with the company's request, we shall deem the Phase-one rates to have been withdrawn.

In accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79–339, 8 FERC ¶ 61,131

---

cash working capital allowance. ElectriCities also raise a variety of additional issues including, *inter alia*, stated levels of materials and supplies, fuel stocks, wages and salaries, and demand and energy projections; treatment of gains associated with facilities sales; the amortization period for recovery of cancelled plant costs; assignment of retail costs to wholesale customers; normalization procedures; and accrual of AFUDC on CWIP amounts included in rate base.

[4] *See Municipal Light Boards of Reading and Wakefield, Mass.* v. *FERC*, 450 F. 2d 1341 (D.C. Cir. 1971).

(1979), we shall phase the price squeeze issue raised by the intervenors.[5]

The Commission orders:

(A) The motions to reject VEPCO's filing in its entirety are hereby denied.

(B) The motions to reject VEPCO's Phase-three rates are hereby granted.

(C) Summary disposition is hereby ordered, as noted in the body of this order, with respect to the company's inclusion in rate base of the costs associated with the cancellation of North Anna Unit No. 3. In accordance with VEPCO's suggestion, the calculation of VEPCO's interest expense deduction shall also be corrected. VEPCO's request to incorporate a five year amortization period for cancelled plant costs is denied. Within sixty (60) days of the date of this order, VEPCO shall refile its rates and supporting cost data to reflect these determinations.

(D) VEPCO's proposed Phase-two rates are hereby accepted for filing, as modified by summary disposition, and are suspended to become effective on October 31, 1983, subject to refund. The Phase-one rates are deemed to have been withdrawn.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning the justness and reasonableness of VEPCO's rates.

(F) The Commission staff shall serve top sheets within ten (10) days of the date of this order.

(G) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(H) The Commisson hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modity this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(I)The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[5] Based on the information available thus far, we perceive no basis on which to depart from our existing phasing practice as requested by the North Carolina Cooperatives. However, we note that, under that practice, the presiding judge has discretion to modify the procedural schedule where good cause is found to do so. (*See* Ordering Paragraph (H), *infra*).

BILLING CODE 6717-01-M

[Docket No. ER83-423-000]

Wisconsin Power & Light Co., Order Accepting for Filing and Suspending Rates, Noting Interventions, Denying Motion To Reject, Granting Summary Disposition, and Establishing Procedures

Issued: May 27, 1983.

On March 31, 1983, Wisconsin Power and Light Company (WP&L) filed a proposed two-step rate increase for service to forty-one wholesale customers.[1] The proposed step-one rates would increase revenues by approximately $1.3 million (2.6%) for the twelve month test period ending June 30, 1984. The step-two rates would result in an additional increase of approximately $1.6 million (3.1%). WP&L proposes that the step-one rate increase become effective on July 1, 1983, and that the step-two rates become effective prospectively only after a final Commission order.[2]

Notice of the filing was published in the **Federal Register**, with comments due on or before April 25, 1983. On April 18, 1983, the Public Service Commission of Wisconsin filed a notice of intervention. On April 22, 1983, WP&L's cooperative customers (Cooperatives) [3] filed a protest, motion to intervene, motion to reject, request for a five month suspension, and request for price squeeze procedures. On April 25, 1983, the Municipal Wholesale Power Group (MWPG) filed a motion to intervene, request for a five month suspension, motion for summary disposition, and request for an investigation and hearing. MWPG is an association of wholesale purchasers, including 34 municipalities, two small private electric companies, and the Wisconsin Public Power Incorporated System (WPPI System), a municipal electric system.[4]

The Cooperatives request that WP&L's proposed filing be rejected, asserting that WP&L has not provided adequate supporting work papers as required by the Commission's regulations. In the alternative, the Cooperatives request that WP&L's proposed rates be suspended for five months. In support of their request for a five month suspension, the Cooperatives raise numerous cost of service issues including: (a) Overstated materials and supplies, fuel stocks, and cash working capital allowance; (2) excessive expense projections, depreciation rates, and reserve capacity; (3) failure to synchronize fuel adjustment clause revenues and fuel expenses; and (4) improper allocation of administrative and general expenses and other expenses. In addition, the Cooperatives request that the Commission initiate a price squeeze investigation.

MWPG also requests a five month suspension and has raised a number of issues including: (1) Excessive return on equity; (2) overstated expense projections; (3) excessive fuel stocks; (4) improper allocation factors; and (5) inclusion of an inappropriate amount for spent nuclear fuel disposal costs in the test year. In addition to its request for a maximum suspension, MWPG requests summary disposition with respect to WPL&L's failure to synchronize fuel adjustment clause revenues and fuel expenses during the test year. MWPG also alleges price squeeze.

WP&L filed a timely response to the MWPG pleading on May 9, 1983. WP&L asserts that almost all of the issues raised by MWPG relate to the proposed step-two rates, which will only be applied prospectively. According to WP&L, MWPG will, therefore, have ample opportunity to substantiate these allegations before the imposition of final rates. WP&L further contends that MWPG has failed to support its request for a five month suspension of the step-one rates. With respect to the fuel synchronization issue, WP&L contends that the method it has used in its filing is mandated by the terms of the settlement agreement between itself and MWPG in Docket Nos. ER80-297 and ER82-188-000.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely notice and motions to intervene serve to make the Public Service Commission of Wisconsin, the Cooperatives, and MWPG parties to the proceeding absent opposition within fifteen days of their respective pleadings.

Contrary to the Cooperatives' contentions, we find that WP&L's submittal substantially complies with the Commission's filing requirements. As a result, the motion to reject WP&L's filing will be denied.[5]

As noted by the intervenors, WP&L has failed to synchronize fuel adjustment clause revenues and fuel expenses during the test year. According to WP&L, MWPG and the W-2 customers opposed its fuel synchronization method in Docket No. ER80-297. WP&L further contends that its calculation in this filing is identical to that underlying the settlement agreements in Docket Nos. ER80-297 and ER82-188-000. WP&L believes that if MWPG is permitted to raise an objection to the method used in the filing, WP&L will be placed in a "catch-22" position since MWPG could justifiably claim that WP&L must abide by the method used in the two earlier dockets. (Response at 13). Consequently, WP&L contends that the issue should be resolved during a hearing. We disagree.

Contrary to WP&L's contentions, the settlement agreements in the earlier dockets do not bar WP&L from making a filing which properly synchronizes fuel expenses and revenues. The agreements merely precluded WP&L from seeking rate design changes in this wholesale rate filing. Synchronization of test period fuel expenses and revenues is a cost of service adjustment affecting revenue requirements and has no effect on the design of the company's base rates or fuel adjustment clauses. Thus, consistent with established Commission precedent, [6] we shall grant the intervenor's request for summary disposition and require that the company's cost of service and rates developed at the conclusion of this proceeding reflect an appropriate synchronization of test period fuel expenses and revenues.

Our preliminary review of WP&L's filing and the pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

---

[1] WP&L serves 34 municipals and two private utilities under its Rate Schedule W-3 and five cooperative customers under its Rate Schedule W-2. *See* Attachment A for rate schedule designations and affected customers.

[2] Pursuant to a prior settlement agreement between WP&L and its wholesale customers in Docket No. ER82-188-000, the step-two increase may only be effective prospectively after a final Commission order.

[3] The five cooperative customers are: Adams-Marquette Electric Cooperative, Central Wisconsin Electric Cooperative, Columbus Rural Electric Cooperative, Waushara County Electric Cooperative, Inc., and Rock County Electric Cooperative Association.

[4] Five of the WPPI System members, Boscobel, Cuba City, Muscoda, Waunakee, and Waupum, are presently direct customers of WP&L. They have contracted, however, to receive power from the WPPI System which, in turn, has contracted to received power from WP&L. WP&L filed this agreement on April 19, 1983. Upon acceptance of that filing, the five WPPI members would no longer be direct customers of WP&L.

[5] *See Municipal Light Boards of Reading & Wakefield, Massachusetts* v. *FPC*, 450 F. 2d 1341 (D.C. Cir. 1971).

[6] *See, e.g., Gulf States Utilities Company*, Docket No. ER82-375-000, 20 FERC ¶ 61,039 (1982); *Mississippi Power Company*, Docket No. ER83-194-000, 22 FERC ¶ 61,141 (1983).

In *West Texas Utilities Company*, Docket No. ER82–23–000, 18 FERC ¶ 61,189 (1982), we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas*. Our preliminary review indicates that WP&L's proposed step-one increase may not yield excessive revenues. Under these circumstances, we shall suspend the step-one rates for one day from the requested effective date to become effective, subject to refund, on July 2, 1983. With respect to WP&L's step-two rates, preliminary review suggests that the proposed increase may yield substantially excessive revenues. However, as noted, WP&L seeks to apply the step-two rates prospectively only. Accordingly, consistent with the Company's request we shall set WP&L's proposed step-two rate for investigation, to become effective following a final Commission order in this proceeding.

In light of the intervenors' price squeeze allegations, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79–339, 8 FERC ¶ 61–131 (1979).

The Commission orders:

(A) The Cooperatives' motion to reject is hereby denied.

(B) MWPG's motion for summary disposition is hereby granted. WP&L shall reflect synchronized fuel clause revenues and fuel expenses in its compliance cost of service and rates at the conclusion of this proceeding.

(C) WP&L's submittal is hereby accepted for filing. The proposed step-one rates are suspended for one day to become effective, subject to refund, on July 2, 1983. The proposed step-two rates may become effective prospectively only from the date of a final Commission order in this proceeding.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules and Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of WP&L's rates.

(E) The Commission staff shall serve top sheets in this proceeding on or before June 13, 1983.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service to top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate, which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may order a change in this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(H) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

Office of the Secretary

National Petroleum Council, Chemical Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Chemical Task Group of the Committee on Enhanced Oil Recovery will meet in June 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Chemical Task Group meeting follows:

The Chemical Task Group will hold its seventh meeting on Tuesday and Wednesday, June 7 and 8, 1983, starting at 10:00 a.m., in Room 112, Phillips Petroleum Company, Research Forum, Bartlesville, Oklahoma.

The tentive agenda for the Chemical Task Group Meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.

2. Review progress of Task Group study assignments.

3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Chemical Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Chemical Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G.J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on May 26, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

Draft Health Assessment Document for Manganese

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: On May 5, 1983 (48 FR 20281), EPA announced the availability of three draft Health Assessment Documents on metals prepared by the Office of Health and Environmental Assessment of the Office of Research and Development. In order to have a thorough review of the scientific aspects of these documents, external review drafts will be transmitted to the Agency's Science Advisory Board (SAB) for review, and simultaneously, will be made available for public review and comment.

The titles and publication numbers of the draft assessment documents are:

Title	EPA publication No.
Health assessment document for nickel	600/8-83-012
Health assessment document for manganese	600/8-83-013
Health assessment document for chromium	600/8-83-014

The draft Health Assessment Document for Nickel became available for public review on May 16 and the Agency will accept public comments until July 15.

The draft Health Assessment Document for Manganese will be available for public review on or about June 13 and the Agency will accept public comments until August 12.

The draft Health Assessment Document for Chromium will tentatively be available in mid June. There will be a further announcement in the **Federal Register** specifying the exact date for the release of the Chromium document.

After receipt of all comments on the three documents, public meetings will be held to review these documents. Advance notices announcing the time and place for the SAB public meetings and document agenda will be made in the **Federal Register.**

Those persons interested in commenting on the scientific merit of the draft Manganese document will be able to obtain copies as follows:

(1) The draft document will be available in single copy quantity from EPA at the following address: ORD Publication's—CERI-FR, U.S. Environmental Protection Agency, Cincinnati, Ohio 45268, Tel: 513/684–7562. Requesters should be sure to cite the EPA number assigned to the document.

(2) The draft document will also be available for public inspection and copying at the EPA library at Waterside Mall, 401 M Street, SW., Washington, D.C. 20460.

Commenters are requested to submit comments in writing. Comments must be received by close of business, August 12, in order to be considered. Address comments to: Dr. Linda Erdreich, Environmental Criteria and Assessment Office, U.S. Environmental Protection Agency, 26 W. St. Clair Street, Cincinnati, Ohio 45268.

FOR FURTHER INFORMATION CONTACT:
For Manganese—Dr. Linda Erdreich, Tel: 513/684–7573.

Courtney Riordan,

Acting Assistant Administrator for Research and Development.

National Drinking Water Advisory Council; Open Meeting

Under Section 10(a)(2) of Pub. L. 92423, "The Federal Advisory Committee Act," notice is hereby given that a meeting of the National Drinking Water Advisory Council stablished under the Safe Drinking Water Act, as amended (42 U.S.C. 300f *et seq.*), will be held at 9:00 a.m. on June 23, 1983, and at 8:30 a.m. on June 24, at EPA Headquarters, Room 3906, Mall Area, 401 M Street, SW., Washington, D.C. 20460. Council Subcommittees will be metting at EPA Headquarters on June 22 1983.

The purpose of the meeting will be an initial review of the Advance Notice of Proposed Rulemaking on the Revised Regulations, a review of soon to be proposed Regulations for Federally Administered UIC Programs for twenty-two States and Territories, a review of the Council's position on the fluoride standard in view of a second report from the Surgeon General (if received), and to consider potential changes to the Safe Drinking Water Act which may be currently before Congress.

This meeting will be open to the public. The Council encourages the hearing of outside statements and will allocate a portion of its meeting time for public participation. Oral statements will be limited to 5 minutes. It is preferred that there be one presenter for each statement. Any outside parties interested in presenting an oral statement should petition the Council by telephone at (202) 382–5533. The petition should include the topic of the proposed statement, the petitioner's telephone number and should be received by the Council before June 15, 1983.

Any person who wishes to file a written statement can do so before or after a Council meeting. Accepted written statements will be recognized at the Council meeting and will be part of the permanent meeting record.

Any member of the public wishing to atend the Council meeting, present an oral statement, or submit a written statement should contact Ms. Charlene Shaw, Executive Assistant, National Drinking Water Advisory Council,

Office of Drinking Water (WH–550), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

The telephone number is: Area Code 202/382–5533.

Dated: May 24, 1983.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

FEDERAL COMMUNICATIONS COMMISSION

National Industry Advisory Committee, Long Range Planning Committe; Meeting

Pursuant to the provisions of Pub. L. 92–463, announcement is made of a public meeting of the Long Range Planning Committee of the National Industry Advisory Committee (NIAC) to be held Friday, June 17, 1983. The Committee will meet at the Chandelier Room of the Sheraton Carlton Hotel Located at 16th and K Street, N.W., Washington, D.C. at 2:00 P.M.

Purpose: To discuss NSTAC initiatives on the National Coordinating Mechanism and Satellite Survivability.

Agenda: As follows:

1. Opening remarks by Chairman.
2. Discussion of National Security Telecommunications Advisory Committee (NSTAC) initiatives:
   a. National Coordinating Mechanism.
   b. Satellite Survivability.
3. Discussion of response to NSTAC through FCC.
4. Other business.
5. Adjournment.

Any member of the public may attend or file a written statement with the Commitee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the NIAC Executive Secretary in the FCC Emergency Communications Division at (202) 634–1549.

BILLING CODE 6712–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Forms Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of forms submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

TITLE OF INFORMATION COLLECTION: Application for Federal Deposit Insurance for Operating Noninsured Institutions.

BACKGROUND: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), FDIC hereby gives notice that it has submitted to the Office of Management and Budget a form SF–83, "Request for OMB Review," for the information collection system identified above.

ADDRESS: Written comments may be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the FDIC, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Requests for a complete copy of the form SF–83 "Request for OMB Review," and related documentation may be addressed to John Keiper, Paperwork and Regulation Control Coordinator, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429, telephone (202) 389–4351.

SUMMARY: Section 5(a) of the Federal Deposit Insurance Act (12 U.S.C. 1815) provides that any State nonmember bank, upon application to and examination by the Corporation and approval by its Board of Directors, may become an insured bank. Before approving the application, the Act requires that FDIC Board of Directors to consider certain factors which are listed in Section 6 of the Act.

The information contained in the application will be used by the FDIC as a basis for analyzing the proposal and evaluating the statutory factors in order to determine whether or not to grant deposit insurance to the applicant.

It is estimated that this collection of information will create a reporting

burden of 8 hours per application for each of the estimated 50 respondents, annually. The total annual reporting burden is, therefore, estimated to be 400 hours.

Dated: May 26, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Equality Bankshares

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. WIth respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Equality Bankshares,* Cheyenne, Wyoming; to acquire 100 percent of the voting shares or assets of Century Bank Shares, Cheyenne, Wyoming, parent of First State Bank of Lyman, Lyman, Wyoming; Pioneer Bank Shares, Cheyenne, Wyoming, parent of Pioneer Bank of Evanston, Evanston, Wyoming; and Jeffrey City State Bank, Jeffrey City, Wyoming. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Kansas City. Comments on this application must be received not later that June 24, 1983.

Board of Governors of the Federal Reserve System, May 26, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities; First Bank System, Inc., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Bank System, Inc.,* Minneapolis, Minnesota (data processing; continental United States): To engage through its subsidiary, First Data Processing, Inc., in data processing and processing banking and financial data in accordance with the Board's Regulation Y. These activities would be conducted from offices located in Milwaukee and West Allis, Wisconsin, serving the continental United States. Comments on this application must be received not later than June 23, 1983.

2. *First Bank System, Inc.,* Minneapolis, Minnesota (making and servicing loans; United States): To engage through its subsidiary, FBS Asset Management, in acquiring directly or indirectly loans or other extensions of credit and servicing these loans and credits. These activities would be performed from offices located in Minneapolis, Minnesota, serving the United States. Comments on this application must be received not later than June 23, 1983.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Mercantile Texas Corporation,* Dallas, Texas (mortgage financing and servicing activities; Texas, Oklahoma, Arkansas, Louisiana, and New Mexico): To engage through its subsidiary, MPACT Mortgage Company, in making or acquiring and servicing loans and other extensions of credit such as would be made by a mortgage company. These activities would be performed in the states of Texas, Oklahoma, Arkansas, Louisiana and New Mexico. Comments on this application must be received not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 26, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14695 Filed 6-1-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; First National Bankshares, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in 3(c) of the Act (12 U.S.C. section 1842(c)).

Each aplication may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First National Bankshares, Inc.*, Emporia, Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Emporia, Emporia, Virginia. Comments on this application must be received not later than June 24, 1983.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President), 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First Financial Bancshares Corp.*, Ponca City, Oklahoma; to become a bank holding company by acquiring at least 80 percent of the voting shares of First National Bank and Trust Company, Ponca City, Oklahoma. Comments on this application must be received not later than June 24, 1983.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President), 400 Sansome Street, San Francisco, California 94120:

1. *Viejo Bancorp*, Mission Viejo, California; to become a bank holding company by acquiring 100 percent of the voting shares of the successor by merger to Mission Viejo National Bank, Mission Viejo, California. Comments on this application must be received not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 26, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14692 Filed 6-1-83; 8:45 am]

BILLING CODE 6210-01-M

First Interstate Bancorp; Proposed Acquisition of First Interstate Mortgage Company of Texas

First Interstate Bancorp, Los Angeles, California, through its wholly-owned direct subsidiary, First Interstate Mortgage Company, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire indirect ownership of the common stock of First Interstate Mortgage Company of Texas, Houston, Texas.

Applicant states that the proposed subsidiary would engage in making, acquiring, selling, and servicing loans and other extensions of credit secured by real estate mortgages. These activities would be performed from offices of Applicant's subsidiary in Houston, Texas, and the geographic area to be served in Texas. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 26, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14693 Filed 6-1-83; 8:45 am]

BILLING CODE 6210-01-M

Hong Kong and Shanghai Banking Corporation, Kellett, N.V., H.S.B.C. Holdings, B.V., Marine Midland Banks, Inc.

The Hong Kong and Shanghai Banking Corporation, Hong Kong, B.C.C., Kellett, N.V., Curacao, Netherlands Antilles, H.S.B.C. Holdings B.V., Amsterdam, The Netherlands, and Marine Midland Banks, Inc., Buffalo, New York, have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage *de novo*, through their wholly-owned subsidiary, Marine Midland Realty Credit Corporation, Buffalo, New York, in arranging, incidental to the conduct of a mortgage banking business, equity financing for income-producing real properties with institutional investors. These activities would be performed from offices of Applicants' subsidiary in New York and Buffalo, New York; Los Angeles and Newport Beach, California; and Houston, Texas and the geographic area to be served is the entire United States.

Although arranging equity financing has not been added to the list of permissible activities specified by the Board in section 225.4(a) of Regulation Y, the Board has determined by Order that this activity is closely related to banking. E.g. *Trust Company of Georgia*, 69 Federal Reserve Bulletin 225 (1983).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 24, 1983.

Board of Governors of the Federal Reserve System, May 26, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4310-84-M

[A 11811]

Order Providing for Opening of Public Lands; Arizona

In an exchange of lands made under the provisions of Section 206 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2756, 43 U.S.C. 1716, the following lands have been conveyed to the United States:

Gila and Salt River Meridian, Arizona

Those certain tracts or parcels of land being a part of H.E.S. No. 509, Township 4 South, Range 32 East of the Gila and Salt River Base and Meridian, Greenlee County, Arizona, described as follows:

No. 1 beginning at a point South 8°56' E., 792.22 feet from Corner No. 1, H.E.S. No. 509; thence due East for a distance of 424.52 feet; thence South 6°44' W. for a distance of 178.67 feet; thence South 5°34' W. for a distance of 128.36 feet; thence South 13°59'30" W. for a distance of 212.64 feet; thence South 33°41' W. for a distance of 88.50 feet; thence South 43°25' W. for a distance of 126.21 feet; thence South 27°46' W. for a distance of 128.53 feet; thence South 11°42' W. for a distance of 55.32 feet; thence North 8°56' W. for a distance of 855.07 feet to the point of beginning.

No. 2 beginning at Corner No. 1, H.E.S. No. 509; thence South 8°56'00" E. 164.36 feet to the true point of beginning: thence South 89°47'56" E. 328.00 feet; thence due South a distance of 619.08 feet; thence due West a distance of 230.50 feet; thence North 8°56'00" W. 627.86 feet to the true point of beginning.

The areas described contains approximately 9.94 acres in Greenlee County.

Upon acceptance of title to the lands, they became part of the Apache National Forest and are subject to all the laws, rules, and regulations applicable thereto.

At 10: a.m. on June 29, 1983, the lands shall be open to such forms of disposition as may by law be made of national forest lands.

Inquiries concerning the lands should be addressed to the Forest Supervisor, Apache National Forest, P.O. Box 640, Springerville, Arizona, 85938.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[U-37255]

Order Providing for Opening of Public Lands; Utah

1. In an exchange of lands pursuant to Section 8 of the Act of June 28, 1934, 48 Stat. 1272, the following described lands, including all minerals, were reconveyed to the United States:

Salt Lake Meridian, Utah

T. 33 S., R. 16 E.,
Sec. 2, all.
T. 34 S., R. 16 E.,
Sec. 16, all.
T. 39 S., R. 16 E.,
Sec. 2, lots 1, 2, S½NE¼, SE¼.
T. 33 S., R. 17 E.,
Secs. 2, 16, 32, 36, all.
T. 34 S., R. 17 E.,
Sec. 2, all.
T. 39 S., R. 17 E.,
Sec. 2, S½.
T. 32 S., R. 18 E.,
Sec. 32, all.
T. 38 S., R. 18 E.,
Sec. 2, all;
Sec. 16, S½.
T. 37 S., R. 21 E.,
Sec. 32, N½, SE¼.

Aggregating 7,519.24 acres.

2. At 10:00 a.m. on June 27, 1983, the lands described in paragraph one lying outside of primitive areas, as shown on the official Bureau of Land Management township plats, will be open to the operation of the public land laws generally, to location under the United States Mining Laws, and to mineral leasing subject to the following listed leases issued by the State of Utah:

ML 31342 affecting Sec. 2, lots 1, 2, S½NE¼, SE¼, T. 39 S., R 16 E.,
ML 31838 affecting Secs. 2, 16, 32, 36. T. 33 S., R. 17 E.,
ML 31343 affecting Sec. 2, S½. T. 39 S., R. 17 E.,
ML 31323 affecting Sec. 32, all. T. 32 S., R. 18 E.,
ML 31339 affecting Sec. 2, all; and Sec. 16, S½. T. 38 S., R. 18 E.

Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

All valid applications received at or prior to 10:00 a.m. on June 27, 1983 shall be considered as simulataneously filed at that time. Those received thereafter shall be considered in the order of filing.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

Dated: May 24, 1983.

Darrell C. Barnes,

Chief, Branch of Lands and Minerals Operations.

[ES 20644]

Santa Rosa County, Florida; Proposed Reinstatement of a Terminated Oil and Gas Lease

1. Federal oil and gas lease ES 20644 terminated automatically by operation of Law on July 1, 1980 [30 U.S.C. 188].

2. A petition for reinstatement of ES 20644 was filed by Tenneco Oil Company (Lessee) under Section 31 D of the Mineral Leasing Act of 1920, as amended by the Federal Oil and Gas Royalty Management Act of 1982 (96 Stat. 2447).

3. The Lessee has met all the following requirements for reinstatement:

(a) $500—Reimbursement of Department Administrative cost.

(b) $6,324—Back rental payments.

(c) $136—Publication cost.

4. The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent beginning July 1, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

Endangered Species Permits Issued for the Months of January, February, March and April 1983

Notice is hereby given that the U.S. Fish and Wildlife Service has taken the following action with regard to permit applications duly received according to Section 10 of the Endangered Species Act of 1973 as amended, 16 U.S.C. 1539. Each permit listed as issued was granted only after it was determined that it was applied for in good faith, that by granting the permit it will not be to the disadvantage of the endangered species; and that it will be consistent with the purposes and policy set forth in the Endangered Species Act of 1973 as amended.

Additional information on these permit actions may be requested by contacting the Federal Wildlife Permit Office, Box 3654, Arlington, VA 22203, telephone (703/235-1903) or by appearing in person at the Federal Wildlife Permit Office, 1000 N. Glebe Road, Room 605, Arlington, VA, between the hours of 8:00 a.m. and 3:00 p.m. weekdays.

Endangered Species Permit; Receipt of Applications; University of Hawaii, et al.

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Michael G. Hadfield, University of Hawaii, Honolulu, HI—PRT 2-10486.

The applicant requests a permit to take (mark) live snails and take (collect) empty shells of the Oahu tree snail (*Achatinella* spp.) in Oahu, HI, for scientific research.

Applicant: International Animal Exchange, Ferndale, MI—PRT 2-10490.

The applicant requests a permit to purchase in interstate commerce two male mongoose lemurs (*Lemur mongoz*), four male and one female ring-tailed lemurs (*L. catta*) and two male and three female brown lemurs (*L. mococo fulvus*) from Oregon Regional Primate Center, Beaverton, OR, for enhancement of propagation.

Applicant: David B. Wake, University of California, Berkeley, CA—PRT 2-10499.

The applicant requests a permit to take two desert slender salamanders (*Batrachoseps aridus*) from Hidden Palms Canyon, CA, for scientific research.

Applicant: International Animal Exchange, Ferndale, MI—PRT 2-10491.

The applicant requests a permit to import one male captive-born lion-tailed macaque (*Macaca silenus*) and one male captive-born mandrill (*Papio sphinx*) from Metro Toronto Zoo, Canada, for enhancement of propagation.

Applicant: Roger Williams Park Zoo, Providence, RI—PRT 2-10485.

The applicant requests a permit to import six captive-bred Parma wallaby (*Macropus parma*) from the Jersey Wildlife Preservation Trust, Channel Islands, United Kingdom.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Rd., Arlington, Virginia, or by writing to the U.S. Fish & Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications within 30 days of the date of this publication by submitting written data, views, or arguments to the above address. Please refer to the file number when submitting comments.

Dated: May 27, 1983.

Geological Survey

Contributions From and Collaborative Work With Private Sources

AGENCY: Geological Survey, Interior.

ACTION: Notice.

SUMMARY: This notice is published to announce that the U.S. Geological Survey (USGS) is authorized, pursuant to the provisions of the Department of Interior Appropriations Act (Pub. L. 97-394), to accept lands, buildings, equipment and other contributions for and to engage in collaborative projects with private sources. The criteria and procedures for acceptance of contributions from and collaborative projects with private sources are set forth below. Procedures for cooperative work with Federal, State, and local government agencies are not covered by this notice.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Bruce B. Hanshaw, Assistant Director for Research, U.S. Geological Survey, (MS 104), National Center, Reston, VA 22092. Telephone (703) 860-7480.

Criteria for Acceptance

The USGS will consider accepting contributions and pursuing collaborative projects for the support of scientific research, technological development and data systems pertaining thereto. To be acceptable such contributions and collaborative projects must:

1. Serve the public.
2. Be in compliance with applicable laws and regulations.
3. Be compatible with USGS missions.
4. Not adversely affect the scientific integrity of the USGS.
5. Provide funding adequate to accomplish the proposed project objective.

Procedures

Individuals and orgaizations wishing to make contributions to or enter into collaborative projects with the USGS should submit proposals to the Director, USGS.

1. In cases where a donor wishes to made a contribution to the USGS for a *nonspecific purpose*, the Director may accept such donations and determine their use for a purpose which meets the criteria stated above. Such contributions must be documented by a letter from the donor specifying the amount or description of the contribution. The Director will acknowledge the contribution by letter to the donor.

2. When proposals are received for collaboratiove projects, they will be reviewed by appropriate USGS officials who will recommend acceptance or rejection to the Director.

a. USGS officials may hold preliminary discussions with those who have proposed projects which meet the criteria stated above. These preliminary discussions are to identify the nature and scope of the proposed project, its estimated cost, financing method, and other significant aspects of the project, but will not be binding on the USGS.

b. Prior to final acceptance, the USGS will submit all proposals to the Department of the Interior Solicitor and Ethics Counselor for a determination that they are in compliance with law and conflict-of-interest regulations.

c. The USGS and th party contributing funds will execute a Memorandum of Agreement to document all agreements for collaborative projects.

d. The USGS will provide administrative control and technical direction for all collaborative projects.

Public Announcement

Upon final acceptance of a contribution or collaborative project, the USGS will place and announcement in the **Federal Register** to inform the public and other concerned sources of the amount and purpose, and to invite additional contributions or participation if appropriate, for the same or similar purpose.

Reports

The USGS will prepare and make available to the public a report on the results of all projects conducted with contributions for private sources.

Dated: May 26, 1983.

Doyle G. Frederick,

Associate Director.

BILLING CODE 4310-31-M

Office of the Secretary

Coastal Barrier Resources Act; Section 10—Reports to Congress

AGENCY: Office of the Secretary, Interior.

ACTION: Notice and request for comments.

SUMMARY: This document sets forth for review and comment the Department of the Interior's proposed plan to study those aspects of undeveloped coastal barriers required by Section 10 of the Coastal Barrier Resources Act of 1982 (CBRA) (Pub. L. 97-348)

DATE: Comments on this plan will be accepted through July 1, 1983.

ADDRESS: Comments should be addressed to Ms. Deborah Lanzone, Coastal Barriers Study Coordinator, National Park Service (763), U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah Lanzone, (202) 343-9377.

SUPPLEMENTARY INFORMATION: On October 18, 1982, President Reagan signed the CBRA into law (Pub. L. 97-348). The law establishes the Coastal Barrier Resources System as referred to and adopted by Congress, and prohibits all new Federal expenditures and financial assistance within the units of the System unless specifically excepted by the Act. These provisions of the Act became effective immediately. The Act also amends and conforms the Federal flood insurance provisions of the Omnibus Budget Reconciliation Act 1981 (OBRA) pertaining to undeveloped coastal barriers. The statutory ban on the sale of new Federal flood insurance for new construction or substantial improvements in these areas will go into effect on October 1, 1983. Section 10(a) of CBRA directs the Secretary to prepare and submit to Congress a report regarding the System. Section 10(b) directs the Secretary to prepare this report in consultation with the States, and where applicable, the State Coastal Zone Management officers of those States affected by CBRA. Section 10(c) states that the report shall contain:

—Recommendations for the conservation of the fish, wildlife, and other natural resources of the System based on an evaluation and comparison of all management alternatives, and combinations thereof, such as State and local actions (including management plans approved under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.)), Federal actions (including acquisition for administration as part of the National Wildlife Refuge System), and initiatives by private organizations and individuals;

—Recommendations for additions to, or deletions from, the Coastal Barrier Resources System, and for modifications to the boundaries of System units;

—A summary of the comments received from the Governors of the States, State coastal zone management

agencies, other government officials, and the public regarding the System; and,

—An analysis of the effect, if any, that general revenue sharing grants made under section 102 of the State and Local Fiscal Assistance Amendments of 1972 (31 U.S.C. 1221) have had on undeveloped coastal barriers.

In response to this mandate, the Department proposes to conduct the Coastal Barriers Study as outlined below. Further, the Department intends to transmit the Report to Congress prior to the deadline established in CBRA; the Department expects to transmit this report no later than October 1984.

The Coastal Barriers Study Proposed Outline

I. Evaluation and comparison of existing management alternatives for coastal barrier resources—

A. Federal.

B. State.

C. Local.

D. Private (includes user constitutencies, i.e. fishing, boating, recreation, as well as conservation).

E. Partnerships and inter-institutional agreements.

II. Case studies of coastal barrier ecosystems.

III. Review and reassessment of Atlantic and Gulf Coast undeveloped coastal barriers.

IV. Identification and inventory of national coastal resources—

A. "Protected" coastal barriers along the Atlantic and Gulf Coasts.

B. Pacific Coast coastal barriers.

C. Great Lakes coastal barriers.

D. Caribbean coastal barriers, including U.S. Virgin Islands.

E. Pacific Territories.

V. Identification and inventory of other coastal resources.

VI. Consultation and coordination with States—

A. Information exchange.

B. Ongoing input to study process.

C. Effects on general revenue sharing.

VII. Effects of reduced Federal dollars in coastal development.

VIII. Findings and Conclusions.

A. Symposium/Workshop.

B. Major protection issues (including post-disaster mitigation).

IX. Recommendations.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks

[FR Doc. 83-14759 Filed 6-1-83; 8:45 am]

BILLING CODE 4310-10-M

Privacy Act of 1974—Publication of Systems of Records Notices

May 25, 1983.

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Department of the Interior is publishing new notices of systems of records maintained by the Minerals Management Service (MMS). Six notices of systems of records maintained by MMS are published in their entirety below. The records systems described by the notices do not contain newly-created records, but represent existing records that were transferred from other bureaus in the Department when MMS was established.

The notice for EMM-1 titled Minerals Lease and Royalty Accounting Files, published below, replaces the notice published in the **Federal Register** on January 7, 1982 (47 FR 866) for EGS-21 titled Mineral Lease and Royalty Accounting Files describing the records formerly maintained by the U.S. Geological Survey. The notice for EMM-6 titled Outer Continental Shelf (OCS) Lease Sale Qualification files, published below, replaces the notice published in the **Federal Register** on April 11, 1977 (42 FR 191118) for LLM-25 titled Outer Continental Shelf Lease Sale describing the records formerly maintained by the Bureau of Land Management. Both EGS-21 and LLM-25 are deleted from the inventory of the Department's Privacy Act records systems.

The remaining notices published below, EMM-2 through EMM-5, describe administrative records extracted from comparable existing records systems maintained by the U.S. Geological Survey and the Bureau of Land Management, and which were transferred to the Minerals Management Service upon its establishment.

This notice is published pursuant to the provisions of 5 U.S.C. 552(e)(4). The purposes and routine uses of the records described in the notices published below are consistent with those previously published for the records systems from which the MMS records were derived. Written comments on the proposed notices are invited and can be addressed to the Department Privacy Act Officer, Office of the Secretary (PIR), U.S. Department of the Interior, Washington, D.C., 20240. If no comments are received, the systems will be implemented without further notice in the **Federal Register**. Comments received on or before July 5, 1983 will be considered.

Dated: May 25, 1983.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

INTERIOR/EMM-1

SYSTEM NAME:

Mineral Lease and Royalty Accounting Files—Interior, EMM-1

SYSTEM LOCATION:

Minerals Management Service, 12203 Sunrise Valley Drive, Reston, Virginia 22091 and field offices. For specific addresses of field offices contact the system manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Lease or permit holders, and individuals who have requested statistical books. (The records contained in this system which pertain to individuals contain principally proprietary information concerning sole proprietorships. However, some of the records in the system which pertain to individuals may reflect personal information. Only the records reflecting personal information are subject to the Privacy Act. The system also contains records concerning corporation and other business entities. These records are not subject to the Privacy Act.)

CATEGORIES OF RECORDS IN THE SYSTEM:

Lease contractual terms, production, royalty, reserve, and related information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Minerals Leasing Act of 1920, as amended, 30 U.S.C. 22, et seq.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are to: (a) Manage mineral leases on public lands for which the Minerals Management Service (MMS) is responsible; (b) supervise the leases and permits; (c) keep records of royalty accounts; (d) control revenues; (e) gather statistical data for planning and managing the mineral leasing program. Disclosure outside of the Department may be made: (1) to the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulations, order, or license; (3) from the record of an individual in response

to an inquiry from a congressional office made at the request of that individual; (4) to a Federal Agency which has requested information relevant or necessary to its hiring or retention of an employee or issuance of a security clearance, license, contract, grant, or other benefit; (5) to Federal, State, or local agencies when necessary to obtain information relevant to the hiring or retention of an employee or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders, tab runs, and information recorded on magnetic tape.

RETRIEVABILITY:

Indexed by lease number and/or company.

SAFEGUARDS:

Maintained in MMS areas occupied by MMS personnel during working hours with building locked and/or guarded during off hours.

RETENTION AND DISPOSAL:

Destroyed 6 years after lease terminates or in the event of a dispute; 6 years after settlement of the dispute.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Minerals Management Service, Office of the Director, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Anyone wishing to inspect a file may request access from the System Manager. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Lessees, permittees, and individuals on whom records are maintained.

INTERIOR/EMM-2

SYSTEM NAME:

Personal Property Accountability Records—Interior, EMM–2

SYSTEM LOCATION:

(1) Administative Services Division, Branch of Office Services, Minerals Management Service, 12203 Sunrise Valley Drive, Reston, Virginia 22091; amd (2) Administrative offices in substantially all field locations. A listing of field locations is available from the System Manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of MMS who are accountable for Government-owned controlled property.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of assignment of an internal identification number and acknowledgment of receipt by employees. Records of transfers to other accountable employees. Inventory records containing employee social security numbers and duty stations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. 483(b).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are to: (1) Maintain control over MMS-owned and controlled property; and (2) maintain up-to-date inventory and to record accountability for the property. Disclosure outside the Department of the Interior may be made: (1) to the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) from the record of an individual in response to an inquiry from a congressional office made at the request of that individual; (4) to a Federal Agency which has requested information relevant or necessary to its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit; and (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are both manual and computerized.

RETRIEVABILITY:

By employee social security number.

SAFEGUARDS:

Access by authorized employees only.

RETENTION AND DISPOSAL:

Placed in inactive file upon transfer or separation of employee. Closeout inactive file at the end of the fiscal year. Destroyed 2 years after closeout.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office Services Branch, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

NOTIFICATION PROCEDURE:

Contact the System Manager or the pertinent field installation. See 43 CFR 2.60

RECORDS ACCESS PROCEDURES:

Same as above or to the pertinent field installation for access. See 43 CFR 3.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71

RECORD SOURCE CATEGORIES:

Individual employees and property management personnel.

INTERIOR/EMM-3

SYSTEM NAME:

Accident Reports and Investigations—Interior, EMM–3

SYSTEM LOCATION:

Administrative Services Division, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All personnel of the Minerals Management Service (MMS) who have had on-the-job accidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Form DI–134, Accident Reports, correspondence, historical information, and corrective action reviews relating to accidents which have occurred on-the-job.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7902.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are: (1) To maintain records of accidents in which MMS employees have been involved; (2) to report statistics and trends to the Department; (3) to monitor and report progress of the safety program in the MMS, using historical data and records of actions taken. Disclosure outside of the Department may be made: (1) To the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) from the record of an individual in response to an inquiry from a congressional office made at the request of that individual; (4) to a Federal Agency which has requested information relevant or necessary to its hiring or retention of an employee or issuance of a security clearance, license, contract, grant, or other benefit; and (5) to Federal, State or local agencies where necessary to obtain information relevant to the hiring or retention on an employee or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders.

RETRIEVABILITY:

By name of individual.

SAFEGUARDS:

Kept in locked cabinet. Access limited to authorized personnel.

RETENTION AND DISPOSAL:

Retained onsite. Closeout at the end of the fiscal year in which the case is closed. Destroyed 6 years after closeout.

SYSTEM MANAGER(S) AND ADDRESS:

Safety Management Officer, Administrative Services Division, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

NOTIFICATION PROCEDURE:

A written and signed request stating that the requester seeks information concerning records pertaining to him or her must be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access must be in writing, signed by the requester, submitted to the System Manager, and meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and meet the requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Accident victims, witnesses, supervisors, and investigators.

INTERIOR/EMM–4

SYSTEM NAME:

Security—Interior, EMM–4

SYSTEM LOCATION:

Administrative Services Division, Facilities Management Branch, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Minerals Management Service (MMS) employees who have been granted access to classified information.

CATEGORIES OF RECORDS IN THE SYSTEM:

Record of Security Clearances for MMS personnel; contains name, grade, organization, place and date of birth, and type of security clearance of person being granted access.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10501.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is to keep current records on security clearances in MMS. Disclosure outside of the Department may be made: (1) To the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or license; (3) from the record of an individual in response to an inquiry from a congressional office made at the request of that individual; (4) to a Federal Agency which has requested information relevant or necessary to its hiring or retention of an employee or issuance of a security clearance, license, contract, grant, or other benefit; and (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual systems maintained in locked cardex and legal size files.

RETRIEVABILITY:

Indexed by individual name.

SAFEGUARDS:

Maintained with security, meeting the requirements of 43 CFR 2.51.

RETENTION AND DISPOSAL:

Records on former employees are placed in inactive file upon transfer or separation. Closeout inactive file at the end of the fiscal year. Destroyed 2 years after closeout.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Facilities Management Branch, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

NOTIFICATION PROCEDURE:

Inquiries regarding the existence of records should be addressed to the System Manager. A written, signed request stating that the requester seeks information concerning records pertaining to him or her is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access may be addressed to the System Manager. The request must be in writing and be signed by the requester. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individual on whom record is maintained.

INTERIOR/EMM–5

SYSTEM NAME:

ELC Records—Interior, EMM–5

SYSTEM LOCATION:

Administrative Services Division, Facilities Management Branch, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Minerals Management Service (MMS) employees Service-wide.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names of individual employees, social security numbers, grades, office telephone, location codes, room numbers, tenures, mail stop codes, organization codes, and home zip codes.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The primary uses of these records are: (1) To prepare MMS telephone directories; (2) ride sharing; and (3) to prepare space occupancy reports. Disclosure outside of the Department may be made: (1) To the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) from the record of an individual in response to an inquiry from a congressional office made at the request of that individual; (4) to a Federal Agency which has requested information relevant or necessary to its hiring or retention of an employee or issuance of a security clearance, license, contract, grant, or other benefit; and (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE

Maintained in manual and computerized form.

RETRIEVABILITY:

By name or social security number.

SAFEGUARDS:

Records kept in locked cabinets for use by the Facilities Management Branch.

RETENTION AND DISPOSAL:

Retained until obsolete or employee leaves MMS, then destroyed.

SYSTEM MANAGERS(S) AND ADDRESS:

Chief, Facilities Management Branch, Minerals Management Service, Mail Stop 635, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

NOTIFICATION PROCEDURE:

A written and signed request stating that the requester seeks information concerning records pertaining to him or her must be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access should be addressed to the System Manager. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

Contact the System Manager. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individuals on whom records are kept.

INTERIOR/EMM-6

SYSTEM NAME:

Outer Continental Shelf (OCS) Lease Sale Qualification Files, Interior, EMM-6

SYSTEM LOCATION:

Regional Managers of OCS Regional Offices of the Minerals Management Service at:

Alaska Regional Office, 620 East 10th Avenue, P.O. Box 1159, Anchorage, Alaska 99510

Atlantic Regional Office, 26 Federal Plaza, Suite 32-120, New York, New York 10278

Gulf of Mexico Regional Office, 3301 N. Causeway Blvd., P.O. Box 7944, Metairie, Louisiana 70010

Pacific Regional Office, 1340 West 6th Street, Rm. 200, Los Angeles, California 90017.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Qualified bidders/assignees, who are individuals, or which are trusts and estates, who bid on OCS leases.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documents showing qualifications to bid (citizenship status), name, and address.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

43 U.S.C. 1331, 30 CFR 256.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To identify holders of record title interest in OCS leases. Users include the general public and Government Agencies for notification to lessees and for any necessary regulatory compliance action. Disclosures outside of the Department may be made: (1) To the general public by the publication of information for all bids on each sale; (2) to the U.S. Department of Justice when related to litigation or anticipated litigation; (3) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; and (4) from the record of an individual in response to any inquiry from a congressional office made at the request of that individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records consist of paper documents which are stored in folders in file cabinets.

RETRIEVABILITY:

Indexed by individual name, by trust names, or estate names.

SAFEGUARDS:

Access to files is supervised when office is open. Maintained in MMS areas occupied by MMS personnel during working hours. During non-working hours, the buildings are locked and/or guarded.

RETENTION AND DISPOSAL:

If bidder is unsuccessful, record is retained for 3 years and then transmitted to GSA for records retirement. If bidder is successful, record is retained for the life of the lease and 6 months thereafter and then to GAS for records retirement.

SYSTEM MANAGER(S) AND ADDRESSES:

Regional Managers, OCS Regional Offices listed above.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to the appropriate System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Access requests should be directed to the appropriate System Manager. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment must be addressed to the appropriate System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

All records are derived from documents submitted by the qualified bidders or assignees.

Guidelines for Transactions Between Nonprofit Conservation Organizations and Federal Agencies

AGENCY: Office of the Secretary, Interior.

ACTION: Extension of notice of final guidelines—Request for additional comments.

SUMMARY: The Assistant Secretary for Fish and Wildlife and Parks is extending for 30 days the comment period prior to publishing final guidelines for transactions between nonprofit conservation organizations and Federal agencies that utilize the Land and Water Conservation Fund (LWCF). These guidelines will provide broad instructions to the four Federal agencies in their use of nonprofit conservation organizations to assist in securing the natural, cultural, wildlife and recreation values in greatest need of protection.

The guidelines will apply to the National Park Service, Fish and Wildlife Service, and the Bureau of Land Management in the Department of The Interior and the Forest Service in the Department of Agriculture.

DATES: Additional comments must be received before June 23, 1983. Unless modified pursuant to notice in the **Federal Register**, these guidelines shall be effective July 21, 1983.

FOR FURTHER INFORMATION CONTACT: Chairman, LWCF Policy Group, Room 3156, Department of the Interior, Washington, D.C. 20240.

SUPPLEMENTARY INFORMATION: The public was invited to comment on the proposed guidelines, that appeared in the **Federal Register**, January 28, 1983 (Vol. 48, No. 20, pages 4055–6), and the final guidelines that appeared in the **Federal Register**, April 22, 1983 (Vol. 48, No. 79, pages 17406–7). In order to receive the benefit of the comments of a greater number of interested parties, the Assistant Secretary has extended the comment period and effective date by 30 days, until June 23, 1983, for the comment period and July 21, 1983, for the effective date.

May 23, 1983.

J. Craig Potter,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-10-M

INTERNATIONAL TRADE COMMISSION

[Investigations No. 104-TAA-14 and 104-TAA-15]

Import Investigations; Bicycle Tires and Tubes From the Republic of Korea and Taiwan

Determinations

Based on the record [1] developed in investigations Nos. 104–TAA–14 and 104–TAA–15, the Commission determines,[2] pursuant to section 104(b) of the Trade Agreements Act of 1979, that an industry in the United States would not be materially injured or threatened with material injury, nor would the establishment of an industry in the United States be materially retarded, by reason of imports of bicycle tires and tubes from the Republic of Korea manufactured by Korea Inoue Kasei, Co., or bicycle tires and tubes from Taiwan manufactured by Cheng Shin Rubber Co., Ltd., if the countervailing duty orders covering those imports were to be revoked.

Background

On July 30, 1981, the Commission received a petition on behalf of Korea Inoue Kasei Co. (KIK) seeking the institution of an investigation under section 104(b) of the Trade Agreements Act of 1979, (19 U.S.C. 1671 note), to determine whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry would be materially retarded if the countervailing duty order covering bicycle tires and tubes from the Republic of Korea were to be revoked. KIK, a Korean manufacturer of bicycle tires and tubes, is the only company coverd by the order.

On December 30, 1982, Cheng Shin Rubber Co., Ltd., (Cheng Shin), a manufacturer of bicycle tires and tubes from Taiwan, submitted a petition seeking the institution of a section 104 investigation regarding the revocation of the countervailing duty order covering bicycle tires and tubes from Taiwan. Cheng Shin is the only company covered by the order.

On the basis of the petitions filed on behalf of KIK and Cheng Shin, the Commission instituted investigation No. 104–TAA–14 on bicycle tires and tubes from Korea on December 21, 1982, and investigation No. 104–TAA–15 on bicycle tires and tubes from Taiwan on January 10, 1983. The purpose of the Commission's investigations was to determine whether an industry in the United States would be materially injured, or threatened with material injury, or the establishment of an industry in the United States would be materially retarded, if the countervailing duty orders applicable to bicycle tires and tubes, provided for in items 772.48 and 772.57, respectively, of the Tariff Schedules of the United States, imported from Korea, manufactured by KIK, and imported from Taiwan, manufactured by Cheng Shin, were to be revoked.

Notice of the institution of these Commission investigations was given by posting copies of the notices in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C. and by publishing the notice for investigation No. 104–TAA–14 in the **Federal Register** of December 29, 1982, and that for investigation No. 104–TAA–15 in the **Federal Register** of January 14, 1983. The public hearing for these investigations was held concurrently on March 1, 1983, and the Commission voted on these cases in public session on May 10, 1983.

The Commission transmitted its report on these investigations to the Secretary of Commerce on May 20, 1983. A public version of the Commission's report, Bicycle Tires and Tubes from the Republic of Korea and Taiwan (investigations nos. 104–TAA–14 and 15), USITC Publication 1382, contains the views of the Commission and information developed during the investigations.

By Order of the Commission.

Issued: May 20, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-139]

Import Investigations; Certain Caulking Guns; Commission Decision Not To Review Initial Determination

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to

[1] The "record" is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (47 FR 6190, Feb. 10, 1982).

[2] Chairman Eckes dissenting.

review the presiding officer's initial determination (Order No. 7) granting complainant's motion to amend the complaint in the above-captioned investigation to consolidate two respondents—Handy Dan, San Antonio, Texas and Handy Dan Home Improvement Center Inc., Los Angeles, California—into one respondent, Handy Dan Home Improvement Centers, Inc., Dover, Delaware.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982 and 48 FR 20225, May 5, 1983; to be codified at 19 CFR 210.53 (c) and (h)).

SUPPLEMENTARY INFORMATION: On April 27, 1983, the presiding officer issued an initial determination granting the motion of complainant Peter J. Chang to amend the complaint to consolidate to two above-named respondents into one respondent, Handy Dan Improvement Centers, Inc. Under § 210.54(b) of the Commission's rules, the deadline for filing petitions for review of the initial determination expired on May 9, 1983. No petitions were filed.

Copies of the nonconfidential version of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: William E. Perry, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0499.

BILLING CODE 7020-02-M

[Investigations Nos. 104-TAA-16, 17, and 18]

Import Investigation of Certain Nonrubber Footwear From Brazil, India, and Spain

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines, [2] pursuant to section 104(b) of the Trade Agreements Act of 1979, that an industry in the United States would not be materially injured or threatened with material injury, nor would the establishment of an industry in the United States be materially retarded, by reason of imports of certain nonrubber footwear from Brazil, India, or Spain covered by outstanding countervailing duty orders, if the orders were to be revoked. The investigations, cover imports of nonrubber footwear provided for in items 700.05–.45, 700.56, 700.72–.83, and 700–.95 of the Tariff Schedules of the United States (TSUS). With respect to India, the investigation covers all of the above footwear except huaraches (TSUS item 700.05); leather ski boots (TSUS item 700.28); and chappals, slippers and footwear having an open toe and heel, however provided for in part 1, subpart A of Schedule 7 in the TSUS.

Background

On October 26, 1981, October 27, 1981, and April 23, 1982, the U.S. International Trade Commission received requests from the Governments of Brazil, India, and Spain, respectively, for investigations under section 104 of the Trade Agreements Act of 1979 with respect to certain nonrubber footwear imported from Brazil, India, and Spain. Accordingly, effective January 25, 1983, the Commission instituted investigations Nos. 104–TAA–16, 17, and 18 under section 104(b) to determine whether an industry in the United States would be materially injured or threatened with material injury, or the establishment of an industry in the United States would be materially retarded, by reason of imports of certain nonrubber footwear from Brazil, India, and Spain, currently covered by contervailing duty orders, if the orders were to be revoked.

Notice of the institution of the commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on February 2, 1983 (48 FR 4742). The hearing was held in Washington, D.C. on April 19, 1983, and all persons who requested the opportunity were permited to appear in person or by counsel.

The Commission transmitted its report on the investigations to the Secretary of Commerce on May 24, 1983. A public version of the Commission's report, *Certain nonrubber footwear from Brazil, India, and Spain* (investigations Nos. 104–TAA–16, 17, and 18, USITC Publication 1383, 1983), contains the views of the Commission and information developed during the investigation.

By order of the Commission.

Issued: May 24, 1983.

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 29, 1983, under section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, on behalf of Cincinnati Microwave, Inc., 1 Microwave Plaza, Cincinnati, Ohio 45242. The complaint alleges unfair methods of competition and unfair acts in the importation of certain radar detectors and accompanying owners' manuals into the United States, or in their sale, by reason of (a) infringement of U.S. Letters Patent Des. 253,752; (b) infringement of U.S. Copyright Reg. Nos. TX 346–467 and TX 1–064–030; (c) infringement of U.S. Trademerk Reg. No. 1,127,831; (d) common law trademark infringement; (e) false representation using ESCORT; (f) false representation using photographs; (g) false advertising; (h) passing off; (i) false designation of manufacturer and/or geographic origin using photographs; and (j) improper use of complainant's copyright notice. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue both a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of investigation: Having considered the complaint, the U.S. International Trade Commission, on May 24, 1983, ordered that: (1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain radar detectors and accompanying owners' manuals into the United States, or in their sale, by reason of alleged (a) infringement of U.S. Letters Patent Des. 253,752; (b) infringement of U.S. Copyright Reg. Nos. TX 346–467 and TX 1–064–030; (c) infringement of U.S. Trademark Reg. No. 1,127,831; (d) common law trademark infringement; (e) false representation using ESCORT; (f) false representation using photographs; (g) false advertising, (h) passing off; (i) false designation of manufacturer and/or geographic origin using photographs; and (j) improper use of complainant's copyright notice, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Cincinnati Microwave, Inc., 1 Microwave Plaza, Cincinnati, Ohio 45242.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Uniden Corporation, 7–4 Onitaka 4–Chome, Ichikawa, Japan

Dynascan Corporation, 6460 West Courtland Street, Chicago, Illinois 60635

Larrick's Incorporated, 23 Mackoil Street, Dayton, Ohio 45403

Capitol Electronics, Inc., 7312 Cherokee Plaza, Oklahoma City, Oklahoma 73132

Cardenal Car Stereo, 6240 North 23rd Avenue, Glendale, Arizona 85301

David's, 7601 N. May Avenue, Oklahoma City, Oklahoma 73116

Apollo Wholesalers, 1022 Miller Industrial Park, Altamonte Springs, Florida 32701

(c) Wilhelm A. Zeitler, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 124, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR § 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to consititue a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice of the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Wilhelm A. Zeitler, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–0390.

By order of the Commission.

Issued May 27, 1983.

Kenneth R. Mason,

Secretary.

[Investigation No. 337–TA–108]

Import Investigation; Certain Vacuum Bottles and Components Thereof; Denial of Petition for Reconsideration and Rejection of Motion for Relief From the Order

AGENCY: International Trade Commission.

ACTION: Denial of petition for reconsideration of the Commission's determination and rejection of motion for relief from the order.

SUPPLEMENTARY INFORMATION: On Octobr 29, 1982, the Commission concluded the above-captioned investigation under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) with a determination that there is no violation of that section in the importation into and sale in the United States of certain vacuum bottles. On November 12, 1982, complainant Union Manufacturing Co. (Union) filed a petition for reconsideration pursuant to § 210.56 of the Commission's Rules of Practice and Procedure (19 CFR 210.56). On March 22, 1893, Union filed a motion for relief from the order based on newly discovered evidence.

On May 17, 1983, the Commission denied the petition for reconsideration and rejected Union's motion for relief from the order.

Copies of the Commission's Action and Order disposing of these matters and all other nonconfidential documents filed in connection with this investigation are available for inspection during offical business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW.,

Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: William E. Perry Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0499.

By order of the Commission.

Issued May 24, 1983.

[Investigation No. 337–TA–128]

Import Investigations; Certain Cupric Hydroxide Formulated Fungicides and Cupric Hydroxide Preparations Used in the Formulation Thereof; Initial Determination Terminating Respondent on The Basis of Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: Dr. H. Wayne Richardson (Richardson).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on May 25, 1983.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washigton, D.C. 20436, telephone 202–523–0161.

Written comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later then 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

[Investigation No. 337–TA–131]

Import Investigation, Certain Variable Character Display Devices; Termination of Investigation Based on Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Termination of the above-captioned investigation based on a settlement agreement.

SUMMARY: On January 27, 1983, complainant Staver Manufacturing Co., Inc. (Staver) and respondent Ferranti-Packard Electronics, Ltd. (Ferranti-Packard) filed a joint motion (Motion No. 131–2) to terminate the above-captioned investigation as to all respondents. The motion is based on a nonexclusive patent license agreement between Staver and Ferranti-Packard. Neither complainant nor the Commission investigative attorney requested that the investigation continue with regard to the two other respondends in the investigation, Identicon of Franklin, Massachusetts, and Ferranti-Packard Ltd. of Dunkirk, New York. On May 18, 1983, the Commission granted the joint motion and terminated the investigation.

SUPPLEMENTARY INFORMATION: Copies of the Commission's Action and Order and all other nonconfidential documents filed in connection with the investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Jane K. Albrecht, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436; telephone 202–523–1627.

By order of the Commission.

Issued: May 24, 1983.

BILLING CODE 7020–02–M

[Investigation No. 731–TA–130 (Preliminary)]

Import Investigations; Chloropicrin From the People's Republic of China

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured, [2] by reason of imports from the People's Republic of China of chloropicrin, provided for in items 408.16, 408.29, or 425.52 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value (LTFV).

Background

On April 6, 1983, counsel for LCP Chemicals and Plastics, Inc., and Niklor Chemical Co., Inc., filed a petition with the Commission and the Department of Commerce alleging that imports of chloropicrin from the People's Republic of China are being sold in the United States at LTFV, and that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Accordingly, effective April 6, 1983, the Commission instituted a preliminary antidumping investigation under section 733(a) of the Act (19 U.S.C. 1673b(a)).

Notice of the institution of the Commission's investigation and of a conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on April 13, 1983 (48 FR 15964). The conference was held in Washington, D.C. on April

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Commissioner Stern determines that there is a reasonable indication that an industry in the United States is materially injured, or threatened with material injury, by reason of the subject imports.

28, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigation to the Secretary of Commerce on May 23, 1983. A public version of the Commission's report, Chloropicrin from the People's Republic of China (investigation No. 731–TA–130 (Preliminary), USITC Publication 1395, 1983) contains the views of the Commission and information developed during the investigation.

By order of the Commission.

Issued: May 23, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigations Nos. 731–TA108 and 109 (Final)]

Import Investigations; Portland Hydraulic Cement From Australia and Japan

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigations and scheduling of a hearing to be held in connection with the investigations.

EFFECTIVE DATE: May 19, 1983.

SUMMARY: As a result of affirmative preliminary determinations by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from Australia and Japan of portland hydraulic cement other than white, nonstaining portland cement, provided for in item 511.14 of the Tariff Schedules of the United States, are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of investigations Nos. 731–TA–108 and 109 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Unless the investigations are extended, the Commission will make its final injury determinations by August 26, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Ms. Judith C. Zeck (202–523–0339), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.—On November 1, 1982, the Commission determined, on the basis of the information developed during the course of its prelimary investigations, that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of imports of portland hydraulic cement from Australia and Japan which were alleged to be sold at LTFV. The perliminary investigations were instituted in response to a petition filed on September 23, 1982, by counsel for Kaiser Cement Corp., Gifford-Hill Cement Company, Monolith Portland Cement Company, Nevada Cement Company, the Stone, Glass and Clay Coordinating Committee, AFL/CIO, and the United Cement, Lime, Gypsum and Allied Workers International Union, AFL/CIO; CLC.

Participation in the investigations.—Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the Federal Register. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to these investigations must be served on all other parties to the investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in these investigations will be placed in the public record on July 1, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with these investigations beginning at 10:00 a.m., on July 19, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on July 5, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m., on July 11, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is July 14, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factural meterials relevant to the public hearing should be included in prehearing briefs in accordance with §207.22 (19 CFR 207.22, as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on July 26, 1983.

Written submissions.—As mentioned, parties to these investigations may file prehearing and posthearing briefs by the dates, shown above. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations on or before July 26, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207,

as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, Subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: May 27, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7035-02-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Agricultural Cooperative; Intent To Perform Interstate Transportation for Certain Nonmembers

Dated: May 27, 1983.

The following notices were filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt interstate transportation must file the Notice, Form BOp-102, with the Commission within 30 days of its annual meetings each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, D.C. 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C.

[OP-5FC-246]

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, (202) 275-72-7269.

F.D. 30197. By decision of May 20, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181 Subpart B, Review Board Number 3, approved the transfer to HENRY J. SERWAT, d.b.a. RED WING EXCURSIONS, St. Louis Park, MN, of Certificates Nos. WC-1308 and WC-1308 Sub 2, issued May 17, 1977, and August 15, 1979, respectively, to BLAINE F. CLAYPOOL, d.b.a. RED WING EXCURSIONS, Lake City, MN, authorizing the transportation of passenger, by self-propelled vessel, in round-trip excursion trips on the Mississippi River, beginning and ending at Red Wing, MN, and extending to Prairie Island, MN, and Bay City, WI, between the months of May and October inclusive of each year; and passengers and their baggage, in regular daily scheduled, sightseeing trips and special charter sightseeing trips, between points and ports along the Mississippi River from 8 miles north of Red Wing, MN, to and including Alma, WI, in seasonal operations from the opening of the river for navigation to the close of navigation of each year. Representative: Samuel Rubenstein, P.O. Box 5, Minneapolis, MN 55440.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods.) The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules undeer 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with

the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendents to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members, Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275–7992.

Note.— Applicant seeks to provide privately-funded charter and special transportation.

[FR Doc. 83–14712 Filed 6–1–83; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

For the following, please direct status calls to Team 1 at 202–275–7992.

Volume No. OP1–193

Decided: May 20, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating.)

MC 167711, filed April 29, 1983. Applicant: RELIANCE TRANSPORT SERVICES, INC., P.O. Box 3117, Kingsport, TN 37664. Representative: John R. King, III (same address as applicant) (615) 288–4908.
